COLONIALS

- 3001 (1670-75) St. Patrick Farthing—Corroded—ANACS. Fine 12 Details. Breen-216, Whitman-11500.** The variety with a figure 8 below the King. Chestnut and olive surfaces are lightly corroded with slightly heavier corrosion at the crown. Still a pleasing example of the St. Patrick coinage, a series that has gained considerable popularity in recent years. Listed on page 39 of the 2011 Guide Book. MRB VG8.
*Purchased from F. Langworthy (3/22/1961).
From The W. Philip Keller Collection of U.S. Colonials. (#42)*
- 3002 (1670-75) St. Patrick Farthing—Corroded—ANACS. VF20 Details. Whitman-11500.** Although finely corroded, this is an attractive St. Patrick farthing with olive and steel surfaces and accompanying tan color on some of the high points. A specialized knowledge of the series is necessary to distinguish the several varieties. Listed on page 39 of the 2011 Guide Book. MRB Fine 12.
*Purchased from C.M. Fletcher (9/12/1964).
From The W. Philip Keller Collection of U.S. Colonials. (#42)*
- 3003 (1670-75) St. Patrick Farthing—Corrosion—NGC Details. VF. Breen-208, Whitman-11500.** This piece carries the farthing legends on a planchet nearly the diameter of a halfpence. The surfaces are corroded with light orange color from cleaning. Listed on page 39 of the 2011 Guide Book. MRB VG10.
- 3004 (1694) London Elephant Token, Thick Planchet VF30 PCGS. Hodder 2-B, W-12040, R.2.** Luminous and moderately worn with deep brown surfaces. Small, scattered marks and planchet flaws appear in the open fields. Listed on page 44 of the 2011 Guide Book. MRB Fine 12. (#55)
- 3005 Six Piece Lot of Colonial Issues Uncertified. 1722 Rosa Americana Halfpenny,** Whitman-1222, VG porous, *Purchased from W.E. Johnson (6/17/1959)*; Same, VG rough, *Purchased from Cessna (9/6/1952)*; **1723 Rosa Americana Twopence,** W-1346, Good, *Purchased from Richard Picker (6/14/1967)*; Same, VG, *Purchased from Richard Picker (8/11/1961)*; **1787 Connecticut,** “Miller 32.9-X.7” per Philip Keller, AG, *Purchased from Bowers and Ruddy (8/5/1971)*; **1788 New Jersey,** Maris 67-v, Good, porous, *Purchased from Ramsey (2/11/1962)*.
From The W. Philip Keller Collection of U.S. Colonials. (Total: 6 coins) (#104)
- 3006 1722 Rosa Americana Penny, UTILE VF35 ANACS. Martin 2-C, W-1264, R.4.** A charming medium to deep brown representative of this Early American import. Free from any distracting marks. Listed on page 41 of the 2011 Guide Book. MRB VF30.
*Purchased from Richard Picker (10/9/1961).
From The W. Philip Keller Collection of U.S. Colonials. (#13)*
- 3007 1722 Rosa Americana Twopence—Environmental Damage—NGC Details. XF. Martin 3-C, W-1326, R.6.** The Martin 3-C variety features the older head of King George, with a diagnostic period after REX. This specimen is a well detailed medium golden-brown piece, on a slightly granular planchet. Listed on page 41 of the 2011 Guide Book. MRB XF40.
*Purchased from Richard Picker (10/25/1966).
From The W. Philip Keller Collection of U.S. Colonials. (#116)*
- 3008 1723 Rosa Americana Penny—Cleaned—ANACS. VF25 Details. Martin 2-E, W-1278, R.2.** Small 3. A faintly hairlined piece with olive-gold and tan-brown toning. Mildly granular here and there, but no marks distract. Listed on page 41 of the 2011 Guide Book. MRB VF20.
Purchased from Richard Picker (9/23/1961). (#125)
- 3009 1723 Rosa Americana Twopence—Corroded, Cleaned—ANACS. AU55 Details. Martin 3-D, W-1334, R.2.** Misattributed by ANACS as W-1346. Glimpses of the initial brassy olive-gold luster reside within the legends and devices. A gray spot on the forehead and a couple of areas of deep brown toning hardly merit the ANACS designations. Listed on page 41 of the 2011 Guide Book. MRB AU50.
*Purchased from Richard Picker (11/15/1961).
From The W. Philip Keller Collection of U.S. Colonials. (#128)*
- 3010 1722 Hibernia Halfpenny, Type One, Harp Left XF40 ANACS. Martin 4.3-Bc.1, W-12730, R.4.** The chocolate-brown fields appear unabraded and slightly glossy. Highpoint wear is evident. One roundish strike-through beneath the E in HIBERNIA. Listed on page 42 of the 2011 Guide Book. MRB XF40.
*Purchased from Hutter (10/8/1954).
From The W. Philip Keller Collection of U.S. Colonials. (#167)*
- 3011 1723 Hibernia Farthing, DEI GRATIA AU50 ANACS. Martin 3.18-Bc.5, W-12350, R.4.** A satiny golden-brown example with minimal highpoint wear and splendid surfaces. Listed on page 42 of the 2011 Guide Book. MRB AU50.
*Purchased from Batchelder (3/4/1961).
From The W. Philip Keller Collection of U.S. Colonials. (#176)*
- 3012 1723 Hibernia Farthing, DEI GRATIA AU53 ANACS. Martin 3.20-Bc.2, W-12350, R.6.** 12 harpstrings. A lovely chocolate-brown farthing, smooth save for two narrow faded striations near the R in HIBERNIA. Martin states the obverse die is perfect, but the obverse has several peripheral cracks. The reverse has a bold radial crack at 3 o'clock. Listed on page 42 of the 2011 Guide Book. MRB XF45.
*Purchased from Hutter (10/19/1954).
From The W. Philip Keller Collection of U.S. Colonials. (#176)*

3013 Collection of 22 Hibernia Halfpence Uncertified.

1723 Hibernia Halfpence: Martin 4.5-Fb.1, R.5, Fine, rough, Purchased from Richard Picker (12/12/1959); Martin 4.14-Fb.1, R.3, Fine, Purchased from Richard Picker (12/12/1959); Martin 4.19-Gc.19, R.5, VG, Purchased from Robert A. Vlack (7/18/1960); Martin 4.44-Fa.5, R.4, VG, Purchased from Kenneth W. Rendell (5/2/1959); Martin 4.45-Fa.2, R.5, VG, Purchased from Richard Picker (12/12/1959); Martin 4.47-Gb.7, R.4, Fine, rough, Purchased from Richard Picker (12/12/1959); Martin 4.47-Gb.7, R.4, VG, Purchased from W.E. Johnson (4/11/1959); Martin 4.48-Gc.29, R.4, VG, Purchased from New Netherlands (11/28/1958); Martin 4.53-Gc.42, R.5, VG, Purchased from Van Horn (3/10/1960); Martin 4.55-Gc.26, R.4, Fine, Purchased from Richard Picker (12/12/1959); Martin 4.57-Fa.4, R.3, VG, Purchased from Philip Greco (1/17/1960); Martin 4.77-Gc.27, R.5, Good, Purchased from Kenneth W. Rendell (4/5/1960); Martin 4.79-Gb.10, R.6, VG, Purchased from Richard Picker (3/6/1959); Martin 4.81-Fa.5, R.3, Fine, Purchased from Richard Picker (12/12/1959); Martin 4.86-Gc.17, R.4, VG, Purchased from Richard Picker (12/12/1959); Martin 4.93-Gc.35, R.4, VG, Purchased from Richard Picker (12/12/1959); Martin 4.93-Gc.35, R.4, Fine, Purchased from Pukall (12/9/1958).

1724 Hibernia Halfpence: Martin 4.30-K.1, R.2, Fine, Purchased from B.A. Seaby (5/3/1960); Martin 4.51-K.4, R.2, Good, Purchased from W.E. Johnson (4/11/1959); Martin 4.51-K.4, R.2, VG, Purchased from Kenneth W. Rendell (5/2/1959); Martin 4.70-K.2, R.4, VG, Purchased from Kenneth W. Rendell (6/28/1958); Martin 4.70-K.2, R.4, Good, Purchased from Kenneth W. Rendell (5/2/1960). From The W. Philip Keller Collection of U.S. Colonials. (Total: 22 coins)

3014 1723 Hibernia Halfpenny XF40 ANACS. Martin 4.101-Gc.36, W-13120, R.5. An attractive chocolate-brown representative without any spots or noticeable marks. Listed on page 43 of the 2011 Guide Book. MRB XF40. Purchased from Douglas (12/3/1954). From The W. Philip Keller Collection of U.S. Colonials. (#180)

3015 1723/2 Hibernia Halfpenny VF30 ANACS. Martin 4.60-Da.1, W-12850, R.2. A richly detailed ebony-brown halfpenny that lacks consequential contact. Evenly granular with a small active spot near the H in HIBERNIA. Listed on page 43 of the 2011 Guide Book. MRB VF30. Purchased from D. Sonderman (7/3/1976). From The W. Philip Keller Collection of U.S. Colonials.

3016 1724 Hibernia Farthing VF30 ANACS. Martin 3.9-D.1, W-12600, R.4. A moderately circulated medium brown farthing that has only a trace of peripheral verdigris. Listed on page 43 of the 2011 Guide Book. MRB VF30. Ex: Stack's (6/26/1958), lot 45. From The W. Philip Keller Collection of U.S. Colonials. (#187)

3017 1724 Hibernia Halfpenny—Scratched—ANACS. Fine 12 Details. Martin 8.1-L.1, W-13730, R.7. A medium brown example of this very rare Hibernia die marriage. Each side has a few faint, straight pinscratches, and two thin scratches are noted near REX. Listed on page 43 of the 2011 Guide Book. MRB VG8. Purchased from Robert A. Vlack (10/23/76). From The W. Philip Keller Collection of U.S. Colonials. (#190)

3018 1724 Hibernia Halfpenny VF35 ANACS. Martin 4.30-K.1, W-13730, R.2. An attractive walnut-brown Hibernia copper that displays only a trivial tick or two on each side. Listed on page 43 of the 2011 Guide Book. MRB VF25. Purchased from Robert A. Vlack (5/29/64). From The W. Philip Keller Collection of U.S. Colonials. (#190)

3019 1721-H French Colonies Copper Sou—Corroded—ANACS. W-11830. This chocolate-brown copper sou displays intermittent granularity, most conspicuous on the central obverse. A few minor pinscratches are noted on the left reverse. Listed on page 51 of the 2011 Guide Book. MRB VF20. Purchased from Richard Picker (2/12/1962). From The W. Philip Keller Collection of U.S. Colonials. (#158632)

3020 1722-H French Colonies Copper Sou—Corroded—ANACS. VF30 Details. W-11835. The final 2 is punched over a 1 on this La Rochelle Mint example. Both sides have fine surface granularity with pleasing chestnut and olive color. Struck slightly off-center with the tops of some letters off the flan. Listed on page 51 of the 2011 Guide Book. MRB VF25. Purchased from Richard Picker (4/30/1961). From The W. Philip Keller Collection of U.S. Colonials. (#158629)

3021 1722-H French Colonies Copper Sou—Corroded—ANACS. VF35 Details. W-11840. Several die varieties of this La Rochelle Mint issue exist. This piece has a sharp die break extending upward from the left side of the crown, with die crumbling among some letters on the reverse. Pleasing medium brown surfaces host minor maroon and steel corrosion. Still an attractive representative of the "Louisiana copper" series, as these coins were called many years ago. Listed on page 51 of the 2011 Guide Book. MRB VF30. Purchased from Richard Picker (4/30/1961). From The W. Philip Keller Collection of U.S. Colonials. (#158629)

3022 1767-A French Colonies Copper Sou—Double Struck—Fine 15 ANACS. Vlack 7-N. Double struck, with the hammer die (crown side) rotating a couple of degrees counter-clockwise between blows. A moderately granular tan-brown representative. Listed on page 51 of the 2011 Guide Book. MRB Fine 12. Purchased from Richard Picker (4/30/1961). From The W. Philip Keller Collection of U.S. Colonials. (#158651)

3023 1767-A French Colonies Copper Sou, RF Counterstamp XF40 ANACS. Vlack 1-A. A charming golden-brown piece. Counterstamped, as often seen on the issue, with the expected flatness opposite near the Paris mintmark. The reverse border has a mere trace of granularity. Listed on page 51 of the 2011 Guide Book. MRB VF30. Ex: Metro New York Sale (Stack's, 4/28/1962), lot 116. From The W. Philip Keller Collection of U.S. Colonials. (#158637)

3024 1767-A French Colonies Copper Sou, RF Counterstamp XF40 ANACS. Vlack 3-C. The counterstamp is deeply impressed and shows little sign of wear. The reverse is flattened near the mintmark, opposite the counterstamp. Medium brown with build-up in protected areas. Listed on page 51 of the 2011 Guide Book. MRB XF40. Purchased from Richard Picker (4/30/1961). From The W. Philip Keller Collection of U.S. Colonials. (#158637)

3025 1766 Pitt Halfpenny VF25 NGC. W-8350. This glossy chocolate-brown mid-grade example has a few tiny rim nicks but the field abrasions are all inconspicuous. Listed on page 48 of the 2011 Guide Book. MRB VF20. Ex: New England Numismatic Association Convention (Stack's, 10/11/1952), lot 752. From The W. Philip Keller Collection of U.S. Colonials. (#236)

3026 1773 Virginia Halfpenny, Period AU50 ANACS. N. 24-K, W-1570, R.1. A lightly circulated but pleasing example that has minor incompleteness of strike on the central reverse. Listed on page 43 of the 2011 Guide Book. MRB AU50. Purchased from New Netherlands (9/20/1954). From The W. Philip Keller Collection of U.S. Colonials. (#240)

**MS62 Red and Brown Newman 26-Y
1773 Virginia Halfpenny, With Period**

- 3027 1773 Virginia Halfpenny, Period MS62 Red and Brown ANACS. N. 26-Y, W-1680, R.2.** Peach-tinged luster outlines design elements, although the cheek, neck, and fields are toned brown. One spot noted on the head of the harp angel. Listed on page 43 of the 2011 *Guide Book*. MRB MS60.
Purchased from Adamski (2/7/1959).
From The W. Philip Keller Collection of U.S. Colonials. (#241)
- 3028 1773 Virginia Halfpenny, No Period—Corroded—ANACS. VG8 Details. N. 5-B, W-1410, R.6.** Well detailed for the VG level, but the deep gray-brown surfaces are heavily granular. A rare die pairing. Listed on page 43 of the 2011 *Guide Book*. MRB Good 6.
Purchased from Richard Picker (9/7/1960).
From The W. Philip Keller Collection of U.S. Colonials. (#243)
- 3029 1773 Virginia Halfpenny, No Period VF20 ANACS. N. 10-W, W-1620, R.6.** A rare die variety of this underappreciated Colonial series. The dark brown surfaces are granular. Listed on page 43 of the 2011 *Guide Book*. MRB Fine 15.
Purchased from D & W Auction (4/3/1959), lot 76.
From The W. Philip Keller Collection of U.S. Colonials. (#243)
- 3030 1773 Virginia Halfpenny, No Period—Corroded—ANACS. VF25 Details. N. 8-H, W-1490, R.4.** An evenly granular medium brown example. Although Newman 8-H is not a great rarity, nearly all survivors are well circulated. The variety was apparently absent from the sizeable Cohen hoard that sources most high grade examples. Listed on page 43 of the 2011 *Guide Book*. MRB VF20.
Purchased from Macy's (4/8/1954).
From The W. Philip Keller Collection of U.S. Colonials. (#243)
- 3031 1773 Virginia Halfpenny, No Period VF25 ANACS. N. 5-Z, W-1600, R.4.** Blended steel-gray and medium brown toning embraces this circulated but nicely detailed Virginia halfpenny. Mildly granular near the profile, and the reverse has a small rim nick at 9:30. Listed on page 43 of the 2011 *Guide Book*. MRB VF25.
Purchased from Richard Picker (7/16/1960).
From The W. Philip Keller Collection of U.S. Colonials. (#243)
- 3032 1773 Virginia Halfpenny, No Period—Scratched—ANACS. VF30 Details. N. 6-X, W-1610, R.3.** The portrait displays faint slide marks, and has a few closely spaced parallel pinscratches across the jaw. A small obverse rim nick at 3:30. Listed on page 43 of the 2011 *Guide Book*. MRB VF20.
Ex: New Netherlands (6/19/1958), lot 58.
From The W. Philip Keller Collection of U.S. Colonials. (#243)
- 3033 1773 Virginia Halfpenny, No Period VF30 ANACS. N. 4-O, W-1470, High R.4.** The deep olive-brown surfaces are lightly brushed but are verdigris-free and lack any consequential marks. The reverse die is failing near 10 o'clock. Listed on page 43 of the 2011 *Guide Book*. MRB VF30.
Purchased from New Netherlands (6/19/1958), lot 58.
From The W. Philip Keller Collection of U.S. Colonials. (#243)

- 3034 1773 Virginia Halfpenny, No Period—Scratched—ANACS. XF40 Details. N. 4-G, W-1460, R.3.** Subtle maroon-brown and sea-green toning. A short and straight but deep scratch is noted on the neck of King George III. Listed on page 43 of the 2011 *Guide Book*. MRB Fine 15.
Purchased from Macy's (4/8/1954).
From The W. Philip Keller Collection of U.S. Colonials. (#243)
- 3035 1760 Hibernia-Voce Populi Halfpenny VF25 ANACS. Z. 2-A, N-4, W-1382X, R.1.** This charming chocolate-brown Voce Populi type coin is problem-free save for a rim nick at 9:30 on the reverse. Listed on page 47 of the 2011 *Guide Book*. MRB VF25.
Purchased from B.A. Seaby (3/28/1960).
From The W. Philip Keller Collection of U.S. Colonials. (#262)
- 3036 1760 Hibernia-Voce Populi Halfpenny, VOOE POPULI AU53 PCGS. Z. 7-E, N-3, W-13930, R.3.** The C in VOCE was first entered reversed, then corrected. Attractive chocolate-brown patina, with traces of darker verdigris within the recesses of the devices. A small contact mark above the errant C in VOCE, and an obverse rim planchet flaw at 1 o'clock. Listed on page 47 of the 2011 *Guide Book*. MRB XF40. (#265)
- 3037 1760 Hibernia-Voce Populi Halfpenny, P Before Face—Corroded—ANACS. VF30 Details. Z. 15-N, N. 12, W-13950, R.2.** The right obverse field is pitted, but the remainder of the maroon-brown halfpenny is only moderately granular. Listed on page 47 of the 2011 *Guide Book*. MRB VF20.
Ex: New Netherlands Auction #51 (6/19/1958), lot 202.
From The W. Philip Keller Collection of U.S. Colonials. (#271)
- 3038 1785 Connecticut Copper, Bust Right—Corroded—ANACS. VG8 Details. M. 6.5-M, W-2430, High R.6.** The Miller 6.5 obverse is identified by the position of the first colon entirely on the head and the second colon distant from the bust. The present coin is well worn but clearly recognizable, with lightly corroded surfaces in some areas. Listed on page 59 of the 2011 *Guide Book*. MRB Good 6.
Ex: John M. Richardson; Norman Bryant Collection (Stack's, 2/1973), lot 5.
From The W. Philip Keller Collection of U.S. Colonials. (#316)
- 3039 1785 Connecticut Copper, Bust Right—Corroded—ANACS. VF25 Details. M. 6.3-G.2, W-2410, High R.5.** Maroon-brown with occasional powder-blue flaking and moderate pitting on the central reverse. A few parallel thin marks near the obverse profile. A scarce die variety. Listed on page 59 of the 2011 *Guide Book*. MRB VF20.
Purchased from G. Creed (9/3/1960).
From The W. Philip Keller Collection of U.S. Colonials. (#316)

**African Head 1785 Connecticut Copper
M. 4.1-F.4, VF30**

- 3040 1785 Connecticut Copper, African Head VF30 ANACS. M. 4.1-F.4, W-2355, R.1.** A charming chocolate-brown example of the prominent Connecticut type. A pair of faint thin marks on the jaw, but otherwise undisturbed. Listed on page 59 of the 2011 *Guide Book*. MRB VF30.
Ex: Hutter (11/8/1952).
From The W. Philip Keller Collection of U.S. Colonials. (#319)

3041 1786 Connecticut Copper, Small Head Right, ETLIB INDE—Corroded—ANACS Details. Good 4. M. 2.2-D.2, W-2475, High R.6. Called the “Broad Shouldered Head” and struck on planchets of smaller than ordinary diameter, the Miller 2.2-D.2 often has a partially missing date, as seen on the present coin. The devices are worn, but recognizable, and the surfaces are lightly corroded. Listed on page 59 of the 2011 *Guide Book*. MRB Good 4.
Purchased from J. Killoran (2/19/1965).
From The W. Philip Keller Collection of U.S. Colonials. (#325)

3042 1786 Connecticut Copper, Small Head Right, ETLIB INDE Fine 15 ANACS. M. 1-A, W-2460, High R.4. The “Double Chin” variety of the scarce ETLIB INDE subtype. This medal turn example is deep brown and minimally abraded with a hint of field granularity. Listed on page 59 of the 2011 *Guide Book*. MRB Fine 12.
Purchased from New Netherlands (10/23/1953).
From The W. Philip Keller Collection of U.S. Colonials. (#325)

3043 1786 Connecticut Copper, Mailed Bust Left Good 4 ANACS. M. 5.2-H.1, W-2545, High R.6. Chestnut-brown and steel-gray with a well-worn obverse and sharper definition on the reverse. Somewhat granular, and each side has minor flan flaws. Listed on page 59 of the 2011 *Guide Book*. MRB Good 4.
Purchased from Kenneth W. Rendell (3/6/1959).
From The W. Philip Keller Collection of U.S. Colonials. (#331)

3044 1786 Connecticut Copper, Mailed Bust Left—Bent—ANACS Details. VG8. M. 5.7-O.2, W-2615, High R.6. The Miller 5.7 obverse is recognized by the repunched letters NEC, while the O.2 reverse has no liberty cap. This specimen is well worn, with pleasing brown surfaces, and a slight horizontal bend through the middle of the coin. Listed on page 59 of the 2011 *Guide Book*. MRB Good 5.
Purchased from Greco (3/28/1960).
From The W. Philip Keller Collection of U.S. Colonials. (#331)

3045 1786 Connecticut Copper, Mailed Bust Left VF20 ANACS. M. 5.4-N, W-2585, High R.6. The medium size triangular dentils are emblematic of the Miller 5.4 obverse, while the unique punctuation in the reverse legend indicates the N reverse. This example is an evenly worn, problem-free specimen, with chocolate-brown surfaces. Listed on page 59 of the 2011 *Guide Book*. MRB Fine 12.
Purchased from Ted Craig (4/26/1969).
From The W. Philip Keller Collection of U.S. Colonials. (#331)

3046 1786 Connecticut Copper, Mailed Bust Left—Planchet Flaws—VF20 ANACS. M. 5.11-R, W-2660, High R.5. A moderately granular walnut-brown example of a challenging die marriage. Mint-made planchet striations affect the top of the obverse bust and a few peripheral areas of the reverse. The head of the seated figure is absent due to an uneven strike. Listed on page 59 of the 2011 *Guide Book*. MRB Fine 12.
Purchased from P.D. Greco (9/23/1961).
From The W. Philip Keller Collection of U.S. Colonials. (#331)

3047 1786 Connecticut Copper, Mailed Bust Left—Corroded—ANACS. VF30 Details. M. 5.8-H.2, W-2625, High R.5. The fluted border is partially double cut on the obverse, and the liberty cap is present on the reverse, identifying this specimen as Miller 5.8-H.2. The attribution was once written in white ink in the obverse field, as often seen on pieces from old colonial collections. Listed on page 59 of the 2011 *Guide Book*. MRB Fine 12.
Purchased from Kenneth Rendell (2/22/1959).
From The W. Philip Keller Collection of U.S. Colonials. (#331)

**Challenging Choice VF Miller 5.8-F
1786 Connecticut Copper
Mailed Bust Left**

3048 1786 Connecticut Copper, Mailed Bust Left VF35 ANACS. M. 5.8-F, W-2620, R.5. Traces of luster remain on this lightly circulated and unblemished example. An uneven strike causes the striated planchet surface on the lower left reverse and opposite on the upper left obverse, while the remainder of the state copper is well impressed. Listed on page 59 of the 2011 *Guide Book*. MRB XF40.
Purchased from Hollinbeck (7/29/1954).
From The W. Philip Keller Collection of U.S. Colonials. (#331)

**Partial Brockage on a Mailed Bust Left
1786 Connecticut Copper
Miller 5.5-M, XF Details**

3049 1786 Connecticut Copper, Mailed Bust Left—Partial Brockage, Corroded—ANACS. XF40 Details. M. 5.5-M, W-2595, R.3. Light brown with glimpses of faded luster in design recesses. Although designated as corroded by ANACS, the surfaces are in fact pleasing, with granularity minor and limited to the IN in INDE. The reverse is indented between 5 o'clock and 6:30 by the obverse of a previously struck copper. Listed on page 59 of the 2011 *Guide Book*. MRB XF40.
Purchased from Stack's (10/9/1954).
From The W. Philip Keller Collection of U.S. Colonials. (#331)

3050 1786 Connecticut Copper, Hercules Head—Scratched—ANACS. Fine 15 Details. M. 5.3-N, W-2575, R.2. Both motifs display several thin scratches from an encounter with a pocket knife long ago. A deep brown example of this distinctive type. The reverse field is swollen due to a failing die. Listed on page 59 of the 2011 *Guide Book*. MRB VG8.
Purchased from Kaplan (9/9/1952).
From The W. Philip Keller Collection of U.S. Colonials. (#334)

3051 1787 INDE ET LIB Mailed Bust Right Connecticut Copper—Damaged—ANACS. VG Details. M. 52-G.1, W-2745, R.6. Keller had two examples of this very rare die marriage. A wavy and gouged example with tan-brown devices and granular ebony fields. The reverse has a rim ding at 9 o'clock. Listed on page 59 of the 2011 *Guide Book*. MRB VG8.
Purchased from T.L. Craig (5/25/1966).
From The W. Philip Keller Collection of U.S. Colonials. (#340)

- 3052 1787 ETLIB INDE Small Head Right Connecticut Copper VG8 ANACS. M. 1.1-A, W-2700, R.3.** This subtype is distinctive both for its design and its reverse legend. Failing dies weaken the definition at the centers, but sharpness at the borders suggests a higher technical grade than VG8. A problem-free medium brown example. Listed on page 59 of the 2011 *Guide Book*. MRB Fine 12.
Purchased from Kaplan (9/9/1952).
From The W. Philip Keller Collection of U.S. Colonials. (#346)
- 3053 1787 Connecticut Copper, Mailed Bust Left—Corroded—ANACS. VF20 Details. M. 8-O, W-2840, R.3.** The tan highpoints contrast with ebony fields. Moderately rough near the rims, but the legends are clear where allowed by the centering, which is several degrees off toward 12 o'clock. Listed on page 59 of the 2011 *Guide Book*. MRB Fine 15.
Purchased from Batchelder (9/17/1960).
From The W. Philip Keller Collection of U.S. Colonials. (#349)
- 3054 1787 Connecticut Copper, Mailed Bust Left VF30 ANACS. M. 2-B, W-2755, R.3.** Attribution "2/B" in white ink on left obverse field. The irregular obverse field is as coined from a sinking die. The dies are close to medal turn, and the strike is several degrees off center toward 7 o'clock. Listed on page 59 of the 2011 *Guide Book*. MRB VF25.
Purchased from Kaplan (9/9/1952).
From The W. Philip Keller Collection of U.S. Colonials. (#349)
- 3055 1787 Connecticut Copper, Laughing Head—Corroded—ANACS. XF40 Details. M. 6.2-M, W-2825, R.4.** The scarcer variety of the popular Laughing Head type. M. 6.1-M is the usually encountered pairing. Maroon devices rise above granular gray-brown fields. Listed on page 59 of the 2011 *Guide Book*. MRB VF20.
Purchased from French's (10/13/1951).
From The W. Philip Keller Collection of U.S. Colonials. (#358)

**Rare Perfect Obverse 1787 Miller 4-L Copper
'Hornless Bust' Variety
First of a Five-Coin Progression**

- 3056 1787 Connecticut Copper, Horned Bust—Corroded—ANACS. VF25 Details. M. 4-L, R.1.** The rare perfect obverse state of the Horned Bust variety, best described as the "Sans Horn" or "Hornless Bust" copper. A survey of 55 different examples of Miller 4-L appearing in our auctions since 1998 reveals just three previous offerings of perfect obverse pieces, or about 5% of known examples. This attractive reddish-brown piece with olive highlights shows minor porosity and a faint obverse scratch. The overall eye appeal is far finer than the obligatory description suggests. Listed on page 59 of the 2011 *Guide Book*. MRB Fine 12.
Purchased from David Bullowa (11/8/1952).
From The W. Philip Keller Collection of U.S. Colonials. (#364)

- 3057 1787 Connecticut Copper, Horned Bust—Corroded—ANACS. VF25 Details. M. 4-L, R.1.** Early in the life of the die marriage, a tiny die chip developed in the left obverse field, between the chin and the A of AUCTORI. On this example, that chip forms a small crescent on an arc nearly equal to the chin, and about two mm. from the chin. The crescent break is variable in size. In fact, a careful study of multiple examples may show that every surviving specimen represents a different die stage. This example has light corrosion on each side with moderate pitting on the reverse. The color is pleasing steel, blended with olive. Listed on page 59 of the 2011 *Guide Book*. MRB VF20.
Purchased from New Netherlands (9/26/1953).
From The W. Philip Keller Collection of U.S. Colonials. (#364)
- 3058 1787 Connecticut Copper, Horned Bust—Corroded—ANACS. VF20 Details. M. 4-L, R.1.** This intermediate die stage has the obverse break in the shape of a curved crescent that joins the top edge of the bust below the chin, curving upward in the field. In our survey of 55 examples appearing in our auctions, 14 of those (or about 25%) represent a similar die stage. This deep olive piece has minor corrosion with light verdigris on each side. Listed on page 59 of the 2011 *Guide Book*. MRB VF20.
Purchased from David Bullowa (11/8/1952).
From The W. Philip Keller Collection of U.S. Colonials. (#364)
- 3059 1787 Connecticut Copper, Horned Bust VF25 ANACS. M. 4-L, R.1** This late die stage piece has the obverse die break beginning below the top edge of the bust, and continuing upward into the left obverse field. It is now thicker and longer, about 2 mm. wide at the base. This die stage is plentiful, seen 13 times out of 55 observed specimens. Smooth olive and steel surfaces display a trace of green corrosion on the reverse. Listed on page 59 of the 2011 *Guide Book*. MRB VF25.
Purchased from Stack's (10/9/1954).
From The W. Philip Keller Collection of U.S. Colonials. (#364)

**Late Die State 1787 M. 4-L Copper, VF35 Details
Connecticut Horned Bust Variety**

- 3060 1787 Connecticut Copper, Horned Bust—Corroded—ANACS. VF35 Details. M. 4-L, R.1.** This late die stage has a massive obverse die break that is nearly triangular, rather than crescent-shaped. Only about 10% of observed examples are in the late die stage represented here. This lovely piece has minor corrosion, mostly on the reverse, with pleasing mahogany surfaces. Listed on page 59 of the 2011 *Guide Book*. MRB VF30.
Purchased from F.J. Schaefer (7/6/1953).
From The W. Philip Keller Collection of U.S. Colonials. (#364)
- 3061 1787 Connecticut Copper, Draped Bust Left Fair 2 ANACS. M. 37.15-h.3, W-4195, R.7.** This rare variety was not known when Miller studied this series in 1919, but it was identified shortly thereafter. The obverse is characterized by erratically aligned, widely spaced dentils of medium length, while the pole on the reverse points between the 1 and 7 in the date. This specimen is too worn to distinguish some of the details, but enough detail is present to identify the coin. Listed on page 60 of the 2011 *Guide Book*. MRB Fair 2.
Purchased from Bowers and Ruddy Galleries (8/5/1971).
From The W. Philip Keller Collection of U.S. Colonials. (#370)

- 3062 1787 Connecticut Copper, Draped Bust Left—Cleaned—ANACS. Good 4 Details. M. 33.42-Z.2, W-4000, R.7.** An extremely rare variety, with the obverse die represented only in major Connecticut collections. Rose-red and olive-gray colors indicate cleaning. A few flan flaws are distributed, and the types display faint thin marks. Listed on page 60 of the 2011 *Guide Book*. MRB Good 4.
Purchased from T.L. Craig (5/12/1970).
From The W. Philip Keller Collection of U.S. Colonials. (#370)
- 3063 1787 Connecticut Copper, Draped Bust Left VG8 ANACS. M. 48-g.5, W-4315, R.5.** The Miller 48 obverse is distinguished by its unique punctuation in the legend, while the g.5 reverse is identified by the wide 17 in the date, with the 8 high, and the pole pointing to the tip of the 1. Unfortunately, many of the reverse diagnostics are not clear on this specimen, as the reverse exhibits more wear than the obverse. A pleasing, medium brown example of this scarce issue. Listed on page 60 of the 2011 *Guide Book*. MRB Fine 12.
Purchased from Kenneth Rendell (3/6/1959).
From The W. Philip Keller Collection of U.S. Colonials. (#370)
- 3064 1787 Connecticut Copper, Draped Bust Left—Corroded, Cleaned—ANACS. VG8 Details. M. 37.8-HH, W-4145, High R.5.** All legends are distinct, but this mildly granular state copper is hairlined from a vigorous cleaning and displays unnatural reddish-brown color. Listed on page 60 of the 2011 *Guide Book*. MRB VG8.
Purchased from E.G. Coins (2/24/1962).
From The W. Philip Keller Collection of U.S. Colonials. (#370)
- 3065 1787 Connecticut Copper, Draped Bust Left Fine 12 ANACS. M. 16.5-n, W-3025, R.6.** The reverse die is rotated with respect to the obverse on this specimen, as Keller notes on his envelope “foot opposite UC.” There is also a small clip at 6 o’clock on the obverse. The Miller 16.5 obverse, with the lower fillet opposite the colon, was later dramatically altered to become the Mailed Bust Left Miller 8 die, an extremely unusual occurrence. Listed on page 60 of the 2011 *Guide Book*. MRB VG8.
Public Auction Sale (James Kelly, 2/1954).
From The W. Philip Keller Collection of U.S. Colonials. (#370)
- 3066 1787 Connecticut Copper, Draped Bust Left Fine 12 ANACS. M. 33.25-Z.10, W-3730, R.6.** This chocolate-brown rare variety Connecticut is unabraded, although each side has a small flan flaw. Moderately granular when viewed beneath a loupe. Listed on page 60 of the 2011 *Guide Book*. MRB VG10.
Purchased from E. Hipps (6/5/1965).
From The W. Philip Keller Collection of U.S. Colonials. (#370)
- 3067 1787 Connecticut Copper, Draped Bust Left Fine 12 ANACS. M. 33.5-T.2, W-3420, R.5.** A so-called “Skeleton Hand” variety, named for the ungainly engraver touch-ups on the hand supporting the Liberty pole. The present example is interesting for its large retained obverse die break between 2 and 4 o’clock. A few darkly toned flan flaws are of mint origin. Listed on page 60 of the 2011 *Guide Book*. MRB Fine 12.
Purchased from Weisenhart (4/7/1962).
From The W. Philip Keller Collection of U.S. Colonials. (#70)
- 3068 1787 Connecticut Copper, Draped Bust Left Fine 12 ANACS. M. 29.1-p, W-3155, R.5.** A deep brown representative that has ample drapery detail. Moderately granular with a couple of faint reverse marks. The left obverse field has an attribution entered in faint white ink, as was the practice many decades ago. Listed on page 60 of the 2011 *Guide Book*. MRB Fine 12.
Purchased from New Netherlands (10/23/1953).
From The W. Philip Keller Collection of U.S. Colonials. (#370)
- 3069 1787 Connecticut Copper, Draped Bust Left—Clashed Dies—Fine 12 ANACS. M. 33.43-q, W-4005, High R.5.** A collectible example of an elusive Miller marriage. Struck a few degrees off center toward 11:30. The left borders are lightly impressed. Mildly granular near the profile. The obverse field is clashed, as made. Listed on page 60 of the 2011 *Guide Book*. MRB Fine 12.
Purchased from J. Walsh (5/26/1968).
From The W. Philip Keller Collection of U.S. Colonials. (#370)
- 3070 1787 Connecticut Copper, Draped Bust Left Fine 15 ANACS. M. 47-a.3, W-4310, R.6.** With the exception of the date, the legends are bold on this maroon-brown rare variety Connecticut copper. Moderately granular but devoid of marks. Listed on page 60 of the 2011 *Guide Book*. MRB Fine 12.
Purchased from J. Stipp (3/2/1975).
From The W. Philip Keller Collection of U.S. Colonials. (#370)
- 3071 1787 Connecticut Copper, Draped Bust Left—Scratched—ANACS Details. VF20. M. 33.38-Z.6, W-3930, High R.5.** The Miller 33.38 obverse has a wide AU, a thick I that leans right, and the C is close to the head. The Z.6 reverse is identified by the pole that points to the top left of the 7 in the date. This piece is well worn, with light brown surfaces, and a few long shallow scratches on the bust. Listed on page 60 of the 2011 *Guide Book*. MRB VG8.
Purchased from Kenneth Rendell (9/16/1959).
From The W. Philip Keller Collection of U.S. Colonials. (#370)
- 3072 1787 Connecticut Copper, Draped Bust Left—Corroded—ANACS. VF20 Details. M. 46-BB, W-4305, R.5.** A mildly porous tan-brown representative with minor planchet striations on the upper reverse. Attribution numbers in olive-green and white ink are noted on the obverse field. Listed on page 60 of the 2011 *Guide Book*. MRB Fine 12.
Purchased from Hollinbeck (7/29/1954).
From The W. Philip Keller Collection of U.S. Colonials. (#370)
- 3073 1787 Connecticut Copper, Draped Bust Left VF20 ANACS. M. 33.27-r.4, W-3755, R.6.** A circulated but unblemished olive-brown rare variety Connecticut. The obverse is slightly misaligned toward 2:30, and the reverse is moderately misaligned toward 6 o’clock. Listed on page 60 of the 2011 *Guide Book*. MRB Fine 15.
Purchased from W.E. Johnson (5/12/1959).
From The W. Philip Keller Collection of U.S. Colonials. (#370)
- 3074 1787 Connecticut Copper, Draped Bust Left VF20 ANACS. M. 33.17-r.1, W-3625, R.1.** A circulated but problem-free golden-brown state copper. Well centered with sharp legends and no noticeable marks. Listed on page 60 of the 2011 *Guide Book*. MRB Fine 15.
Purchased from P.D. Greco (1/30/1960).
From The W. Philip Keller Collection of U.S. Colonials. (#370)
- 3075 1787 Connecticut Copper, Draped Bust Left—Dented—ANACS. VF25 Details. M. 37.2-k.5, W-4105, High R.5.** A chocolate-brown Connecticut copper with a scrape at 1 o’clock on the obverse that causes a slight bend and some flatness on the 88 in the date. The obverse rim has an inconspicuous abrasion above the RI in AUCTORI. Listed on page 60 of the 2011 *Guide Book*. MRB VF20.
Ex: Hollinbeck (11/30/1953).
From The W. Philip Keller Collection of U.S. Colonials. (#370)
- 3076 1787 Connecticut Copper, Draped Bust Left VF25 ANACS. M. 33.39-s.1, W-3960, R.4.** This richly detailed golden-brown Connecticut type coin is attractive for the designated grade despite a planchet flaw on the cheek of the obverse bust. Listed on page 60 of the 2011 *Guide Book*. MRB VF20.
Purchased from New Netherlands (8/9/1954).
From The W. Philip Keller Collection of U.S. Colonials. (#370)

- 3077 1787 Connecticut Copper, Draped Bust Left—Corroded—ANACS. VF30 Details. M. 33.9-s.2, W-3490, R.2.** Primarily steel-gray and tan, although the left obverse field is deep brown and granular. Some active verdigris is noted near the top of the branch. Listed on page 60 of the 2011 *Guide Book*. MRB VF20.
Purchased from New Netherlands (9/26/1953).
From The W. Philip Keller Collection of U.S. Colonials. (#370)

**XF Miller 32.1-X.3 Draped Bust Left
1787 Connecticut Copper**

- 3078 1787 Connecticut Copper, Draped Bust Left XF40 ANACS. M. 32.1-X.3, W-3215, R.3.** A sharp example of a type usually seen in VF or lower grades. Medium brown overall with hints of gunmetal-gray. Luster traces emerge from the design. The left reverse has a couple of faded minor marks. Listed on page 60 of the 2011 *Guide Book*. MRB XF40.
Ex: Connecticut ANA Auction, 9/13/1960, lot 794.
From The W. Philip Keller Collection of U.S. Colonials. (#370)

- 3079 1787 Connecticut Copper, AUCIORI VF30 ANACS. M. 38-GG, W-4205, R.4.** One of two varieties with the blundered legend AUCIORI instead of the proper AUCTORI (Latin for "authority.") This walnut-brown example has lightly impressed centers but actual circulation wear is minimal. One concealed thin mark within the drapery. Listed on page 60 of the 2011 *Guide Book*. MRB VF20.
Ex: Royal (11/10/1952).
From The W. Philip Keller Collection of U.S. Colonials. (#373)

- 3080 1787 Connecticut Copper, AUCTOPI—Cleaned—ANACS. VF20 Details. M. 40-N, W-4240, R.6.** A rare die marriage of the scarce AUCTOPI type. Apparently the R punch went missing at the time the obverse die was engraved. Unnatural orange and aqua shades result from a cleaning generations ago. A thin vertical mark on the seated Liberty merits mention. Listed on page 60 of the 2011 *Guide Book*. MRB VG8.
Purchased from Rudisill (12/5/1961).
From The W. Philip Keller Collection of U.S. Colonials. (#376)

- 3081 1787 Connecticut Copper, FNDE VG8 ANACS. M. 32.8-aa, W-3275, R.6.** This unabraded dark brown example is mildly granular and has a minor flan flaw on the lower half of the seated figure. The blundered reverse legend suggests that the Fugio cent makers had a profitable side business producing Connecticut coppers. Listed on page 60 of the 2011 *Guide Book*. MRB VG8.
Purchased from Empire Coin Company, Inc. (3/30/1959).
From The W. Philip Keller Collection of U.S. Colonials. (#388)

- 3082 1787 Connecticut Copper, ETLIR Fine 15 ANACS. M. 37.11-ff.2, W-4170, R.5.** A deep brown piece with hints of tan on the reverse highpoints. All legends are bold save for softness on the obverse near 10:30. Mark-free with a mildly and evenly granular appearance. Listed on page 60 of the 2011 *Guide Book*. MRB Fine 12.
Purchased from J. Stipp (3/2/1975).
From The W. Philip Keller Collection of U.S. Colonials. (#391)

- 3083 1787 Connecticut Copper, ETLIR—Corroded—ANACS. VF20 Details. M. 33.17-gg.2, W-3635, R.5.** This ebony-brown state copper is granular but has clear types and legends. A few degrees off center toward 1:30. Listed on page 60 of the 2011 *Guide Book*. MRB Fine 12.
Purchased from Batchelder (9/17/1960).
From The W. Philip Keller Collection of U.S. Colonials. (#391)

- 3084 1788 Connecticut Copper, Mailed Bust Right VF30 ANACS. M. 4.1-K, W-4430, R.5.** This middle-grade scarce variety Connecticut copper is darkly toned but has pleasing surfaces. A roundish strike-through, as made, is noted near the OR in AUCTORI. The shield is clashed near the profile of the obverse portrait. Listed on page 60 of the 2011 *Guide Book*. MRB VF20.
Purchased from Bowers and Ruddy (8/5/1971).
From The W. Philip Keller Collection of U.S. Colonials. (#397)

**Rare 1788 Connecticut-Vermont Mule
Miller 1-I, Ryder-39, Choice Fine**

- 3085 1788 Connecticut Copper, Small Head Fine 15 ANACS. M. 1-I, W-4400, also RR-39, Bressett 25-U, W-2265, High R.5.** This curious Machin Mills die pairing mules a Connecticut obverse and a Vermont reverse. A late die state with the obverse failing on the left field and on the dentils near 5 o'clock. The center of the reverse die is sinking. Struck from widely rotated dies. Chestnut-brown highpoints contrast with deep brown fields. Mildly granular but unabraded. Listed on page 60 of the 2011 *Guide Book*. MRB Fine 12.
Purchased from Richard Picker (8/17/1967).
From The W. Philip Keller Collection of U.S. Colonials. (#400)

- 3086 1788 Connecticut Copper, Mailed Bust Left—Double Struck over a Nova Constellatio Copper, Holed—ANACS. VF20 Details. M. 12.2-C, W-4525, R.5.** The host coin is a High R.4. Crosby 5-E 1785 Nova Constellatio copper, readily attributable due to the relative position of the LIB in LIBERTAS. The first strike was approximately 10% off center toward 12 o'clock. The second strike was uniface reverse, the obverse die blocked by a planchet, and was approximately 70% off center toward 5 o'clock relative to the reverse. The second strike is 2 o'clock relative to the obverse of the first strike. A roundish hole with a diameter that measures about 3 mm is at the center of the second strike, and is surrounded by a bend and wispy scratches. Listed on page 60 of the 2011 *Guide Book*. MRB AG3.
Purchased from New Netherlands (10/23/1953).
From The W. Philip Keller Collection of U.S. Colonials. (#403)

- 3087 1788 Connecticut Copper, Draped Bust Left VG10 ANACS. M. 16.5-H, W-4625, Low R.5.** This chestnut-brown better variety Connecticut copper has a small flan flaw on the neck and a thin flaw that passes through the branch. A loupe locates faint marks, including one near the hair ribbons. A later die state with a straight crack near the N in INDE. Listed on page 60 of the 2011 *Guide Book*. MRB Fine 12.
Purchased from Richard Picker (12/1/1962).
From The W. Philip Keller Collection of U.S. Colonials. (#409)

- 3088 1788 Connecticut Copper, Draped Bust Left VF30 ANACS. M. 16.1-H, W-4600, R.4.** This pale olive-brown state copper has moderate laminations on the left obverse margin and a few small to medium planchet flaws that have toned and now resemble pits. Lines from the waist of the seated Liberty are clashed near the chin of the obverse figure, and a die crack journeys from the nose to the R in AUCTORI. Listed on page 60 of the 2011 *Guide Book*. MRB VF20.

Purchased from J. Stipp (2/23/75).

From The W. Philip Keller Collection of U.S. Colonials. (#409)

- 3089 1788 Connecticut Copper, Draped Bust Left VF30 ANACS. M. 15.1-L.1, W-4585, R.4.** This unabraded chestnut-brown copper is distinguished by a small obverse flan flaw at 4 o'clock. The reverse displays several spindly die cracks. A faded inked attribution is noted near the chin. Listed on page 60 of the 2011 *Guide Book*. MRB VF20.

Ex: James Kelly (2/8/1954).

From The W. Philip Keller Collection of U.S. Colonials. (#409)

**Scarce Choice VF Miller 16.4-L.2
1788 Connecticut Copper
Draped Bust Left**

- 3090 1788 Connecticut Copper, Draped Bust Left VF35 ANACS. M. 16.4-L.2, W-4620, High R.5.** Toned medium brown with a flan flaw at the obverse center and a few small rim nicks on the left reverse border. A prominent radial die crack crosses the L in LIB. The dies have close to medal turn, and the piece was struck approximately 10% off center toward 2 o'clock. Listed on page 60 of the 2011 *Guide Book*. MRB VF25.

Purchased from Stack's (10/9/1954).

From The W. Philip Keller Collection of U.S. Colonials. (#409)

**Choice XF 1788 Connecticut Copper
Draped Bust Left, Miller 16.1-H**

- 3091 1788 Connecticut Copper, Draped Bust Left XF45 ANACS. M. 16.1-H, W-4600, R.4.** A lovely olive-brown representative that exhibits glimmers of luster within the legends and devices. Sharply struck for this somewhat better variety. A small mint-made curved clip is on the reverse at 1 o'clock. Listed on page 60 of the 2011 *Guide Book*. MRB AU50.

Ex: Auction 64 (James Kelly, 2/8/1954), lot 1427.

From The W. Philip Keller Collection of U.S. Colonials. (#409)

**1787 Vlack 19-87C Machin's Mills, MS62 Brown
Partial Incomplete Punch Error**

- 3092 1787 Machin's Mills Halfpenny—Partial Incomplete Punch—MS62 Brown NGC. Vlack 19-87C, Whitman 7940, R.2.** The reverse die is the same as found on the Vermont Britannia coppers, Ryder 13, although here in a much earlier die state. Thomas Machin entered into an agreement with Reuben Harmon, Jr., of Vermont coinage fame. The result was, in some cases, mismatching of dies between Vermont and Machin's Mills coins.

While this variety is one of the most plentiful of all Machin's Mills pieces, it is rarely seen in such remarkable preservation. This piece exhibits medium brown surfaces with noticeable splashes of bright orange mint luster on each side. A curved incomplete planchet punch is evident on each side. Listed on page 64 of the 2011 *Guide Book*. MRB MS60.

Purchased from Stack's (8/11/1962).

From The W. Philip Keller Collection of U.S. Colonials. (#469)

- 3093 1788 Machin's Mills Halfpenny AU58 NGC. Vlack 23-88A, Whitman 8100, R.2.** Considerable cartwheel luster remains on the medium olive surfaces of this specimen, with old green and steel verdigris mostly on the obverse. Listed on page 64 of the 2011 *Guide Book*. MRB XF45.

Purchased from Stack's (8/11/1962).

From The W. Philip Keller Collection of U.S. Colonials. (#472)

**Impressive 1788 Vlack 23-88A Machin's Mills Halfpenny
MS61 Brown**

- 3094 1788 Machin's Mills Halfpenny MS61 Brown NGC. Vlack 23-88A, W-8100, R.2.** Pleasing golden-brown surfaces exhibit planchet flaws that retain a darker steel color on this attractive Machin's Mills piece. While common as a variety, the present specimen is one of the finest we have ever seen.

The Machin's Mills coppers rank among the most important colonial issues ever minted, with the full intention of passing as then current British halfpence. Numerous varieties bear dates in the range of 1747-1788, and all are linked together through emission sequence study, or punch linking where defective letters appear on multiple varieties. Listed on page 64 of the 2011 *Guide Book*. MRB AU55.

Purchased from Stack's (8/11/1962).

From The W. Philip Keller Collection of U.S. Colonials. (#472)

- 3095 Group Lot of 26 Colonial Era Coppers Uncertified.** This assortment of coppers includes British and Irish coppers, along with contemporary circulating counterfeits, from the reigns of George II and George III. All are pieces that probably circulated in colonial America. Included, according to Philip Keller's envelopes are two pieces described as Bungtown coppers and a Blacksmith copper. The overall quality is admittedly low, and the value will likely prove similarly low, but this fascinating lot will appeal to the historian or colonial treasure hunter.
From *The W. Philip Keller Collection of U.S. Colonials*. (Total: 26 coins)(#472)

1787 Nova Eborac Curiosity

- 3096 1787 Nova Eborac Copper, Seated Left VG Uncertified.** 27.2 mm, 111 grains. The obverse of this piece is the normal Medium Bust Nova Eborac design, with the reverse finessed to show the incorrect legend INDE / ETLIB in oversized letters, with 1787 below. The reverse is similar to designs of certain Vermont and Connecticut coppers, but obviously not from either of those series. Two older collector envelopes accompany this piece, offered strictly as a colonial curiosity.
Purchased from W.E. Johnson (6/3/1961).
From *The W. Philip Keller Collection of U.S. Colonials*. (#478)
- 3097 1786 New Jersey Copper, Narrow Shield Good 6 ANACS. M. 14-J, W-4810, R.1.** An olive-brown piece with legible peripheral legends and surprising definition on the reverse shield. Traces of old verdigris reside in protected regions. Listed on page 66 of the 2011 *Guide Book*. MRB VG8.
Purchased from Lausch (5/19/1961).
From *The W. Philip Keller Collection of U.S. Colonials*. (#496)
- 3098 1786 New Jersey Copper, Narrow Shield Fine 15 ANACS. M. 15-J, W-4815, R.4.** This medium brown New Jersey example has completely readable legends, and the types are distinct. Magnification reveals wispy hair-thin marks across both sides. Listed on page 66 of the 2011 *Guide Book*. MRB Fine 12.
Purchased from A.D. Hoch (11/30/1959).
From *The W. Philip Keller Collection of U.S. Colonials*. (#496)

Choice VF 1786 New Jersey Copper Maris 14-J

- 3099 1786 New Jersey Copper, Narrow Shield VF35 ANACS. M. 14-J, W-4810, R.1.** A charming golden-brown New Jersey type coin. Evenly struck and free from verdigris. No marks are singularly consequential. Listed on page 66 of the 2011 *Guide Book*. MRB 30.
Ex: Auction #72 (James Kelly, 2/8/1954).
From *The W. Philip Keller Collection of U.S. Colonials*. (#496)
- 3100 1787 New Jersey Copper, Outlined Shield—Overstruck—Fine 15 ANACS. M. 43-d, W-5225, R.1.** This piece appears to be double struck, the first strike widely off center and uniface. Dentils and a rim outline are apparent between 2:30 and 5 o'clock on the reverse. This medium brown copper is problem-free save for faded marks on the right obverse. Listed on page 66 of the 2011 *Guide Book*. MRB Fine 12.
Purchased from Douglas (9/29/1951).
From *The W. Philip Keller Collection of U.S. Colonials*. (#503)
- 3101 1787 New Jersey Copper, Outlined Shield VF30 ANACS. M. 48-g, W-5275, R.1.** A glossy chocolate-brown state copper that unblemished fields and a few small dull marks on the shield. Listed on page 66 of the 2011 *Guide Book*. MRB 20.
Purchased from Rudisill (10/11/1964).
From *The W. Philip Keller Collection of U.S. Colonials*. (#503)
- 3102 1787 New Jersey Copper, Outlined Shield VF30 ANACS. M. 48-g, W-5275, R.1.** A well defined state copper with even, moderate wear and a hint of surface granularity. The obverse rim has subtle dings between 6 and 8 o'clock. Listed on page 66 of the 2011 *Guide Book*. MRB VF20.
Purchased from Behringer (12/19/1953).
From *The W. Philip Keller Collection of U.S. Colonials*. (#503)
- 3103 1787 New Jersey Copper, Outlined Shield VF30 ANACS. M. 43-d, W-5225, R.1.** A pleasing golden-brown New Jersey copper. Well centered and unblemished with sharp legends and ample definition on the types. Listed on page 66 of the 2011 *Guide Book*. MRB VF20.
Ex: Auction 73 (James Kelly, 2/8/1954).
From *The W. Philip Keller Collection of U.S. Colonials*. (#503)
- 3104 1787 New Jersey Copper, Outlined Shield—Corroded—ANACS. XF40 Details. M. 6-C, W-5040, R.4.** A well detailed and unabraded medium brown representative with a few spots of active green verdigris on each side. Listed on page 66 of the 2011 *Guide Book*. MRB VF25.
Ex: New Netherlands (12/3/1968), lot 388.
From *The W. Philip Keller Collection of U.S. Colonials*. (#503)
- 3105 1787 New Jersey Copper, Small Planchet, Plain Shield—Struck on Connecticut Copper, Corroded—ANACS. VG8 Details. M. 34-V, W-5120, R.6.** CONNEC from the undertype is visible along the lower right obverse border. A granular dark brown example of this rare New Jersey die variety. Listed on page 66 of the 2011 *Guide Book*. MRB Good 6.
Purchased from Ted L. Craige (3/17/1969).
From *The W. Philip Keller Collection of U.S. Colonials*. (#506)

**VF30 Details 1787 New Jersey Copper
Maris 62-q, WM Initials Visible**

- 3106 1787 New Jersey Copper, Large Planchet, Plain Shield—Burnished—ANACS. VF30 Details. M. 62-q, W-5350, R.3.** An early die state without the usual prominent die break on the northwest corner of the shield. Per the 2009 Whitman *Encyclopedia of Colonial and Early American Coins*, traces of the initials WM (for engraver Walter Mould) are visible beneath the left and right leaves below the bust on early die state examples, such as the present lot. A slightly luminous olive-brown example with minor obverse edge damage at 10:30 and two small digs on the base of the plow. Listed on page 66 of the 2011 *Guide Book*. MRB VF20. Purchased from French (10/10/1953).
From The W. Philip Keller Collection of U.S. Colonials. (#509)

- 3107 1787 New Jersey Copper, Camel Head—Overstruck—Fine 12 ANACS. M. 56-n, W-5310, R.1.** Glimpses of an unidentifiable undertype, perhaps a British import, are visible at the centers. This medium brown Camel Head has minor granularity and a brief thin mark on the shield. Listed on page 66 of the 2011 *Guide Book*. MRB Fine 12.
Purchased from A. Kern (8/10/1971).
From The W. Philip Keller Collection of U.S. Colonials. (#515)

- 3108 1788 New Jersey Copper, Head Left—Corroded—ANACS. VF20 Details. M. 50-f, W-5475, R.2.** An ebony and tan-brown representative with clear legends and prominent obverse motifs. The obverse displays moderate verdigris, and the reverse has a few marks. The usual variety encountered of the elusive Head Left subtype. Listed on page 66 of the 2011 *Guide Book*. MRB VG10. Purchased from Schaefer (5/3/1952).
From The W. Philip Keller Collection of U.S. Colonials. (#527)

- 3109 1785 Vermont Copper, VERMONTS—Corroded—ANACS. Fine 12 Details. RR-2, Bressett 1-A, W-2005, R.2.** The late die state with a dramatic tornado-shaped die break through the plow. The gray and brown surfaces show varying degrees of granularity, and both sides have a few mint-made planchet flaws. Listed on page 68 of the 2011 *Guide Book*. MRB VG8. Purchased from Kenneth W. Rendell (12/14/1959).
From The W. Philip Keller Collection of U.S. Colonials. (#539)

**Landscape 1785 Vermont Copper
VERMONTS, RR-2, VF30 Details**

- 3110 1785 Vermont Copper, VERMONTS—Corroded—ANACS. VF30 Details. RR-2, Bressett 1-A, W-2005, R.2.** A dark brown example of the popular Landscape type. VERMONTS was the initial attempt at a Latin spelling of the then-independent Republic. The tornado-shaped die break on the plow is midstage. Listed on page 68 of the 2011 *Guide Book*. MRB VF20. Purchased from Hoch (7/16/1960).
From The W. Philip Keller Collection of U.S. Colonials. (#539)

- 3111 1785 Vermont Copper, VERMONTIS—Corroded—ANACS. Fine 12 Details. RR-4, Bressett 3-C, W-2015, High R.4.** Medium brown overall, with reddish obverse highpoints. The field near the plow has been faintly pinscratched to remove corrosion. Listed on page 68 of the 2011 *Guide Book*. MRB Fine 12.
Ex: Hollinbeck (11/1953).
From The W. Philip Keller Collection of U.S. Colonials. (#542)

- 3112 1786 Vermont Copper, Baby Head VG8 ANACS. RR-9, Bressett 7-F, W-2040, R.3.** A deep brown example of the well-known Baby Head type. Moderately granular, and the reverse exhibits a few thin marks. The left borders display curves from an incomplete planchet punch, as made nearly 225 years ago. Listed on page 68 of the 2011 *Guide Book*. MRB Good 6. Purchased from Cessna (9/6/1952).
From The W. Philip Keller Collection of U.S. Colonials. (#548)

- 3113 1786 Vermont Copper, Baby Head—On Defective Planchet—VG10 ANACS. RR-9, Bressett 7-F, W-2040, R.3.** The awkwardly engraved Baby Head type, well known to Early American collectors. Prominent flan flaws affect the branch hand and the left obverse field. Mildly granular but minimally abraded. Wear is even except on VERMONT. Listed on page 68 of the 2011 *Guide Book*. MRB VG8. Purchased from Kenneth W. Rendell (3/6/1959).
From The W. Philip Keller Collection of U.S. Colonials. (#548)

- 3114 1787 Vermont Copper, Bust Right Fine 12 ANACS. RR-14, Bressett 10-K, W-2105, R.3.** Tan-brown devices and bold legends confirm the appeal of this Bust Right Vermont copper. The obverse is lightly brushed, and both fields are dark and somewhat granular. Listed on page 68 of the 2011 *Guide Book*. MRB Fine 12. Purchased from W.E. Johnson (8/17/1959).
From The W. Philip Keller Collection of U.S. Colonials. (#560)

- 3115 1788 Vermont Copper, Bust Right Good 6 ANACS. RR-26, Bressett 16-T, W-2190, High R.6.** The obverse legends are bold, while INDE ET LIB is faint. A granular and slightly bright collector grade example of this desirable Vermont copper die pairing. Listed on page 68 of the 2011 *Guide Book*. MRB Good 6. Purchased from Richard Picker (3/29/1966).
From The W. Philip Keller Collection of U.S. Colonials. (#563)

- 3116 1788 Vermont Copper, Bust Right—Corroded, Scratched—ANACS. VG8 Details. RR-36, Bressett 10-P, W-2180, High R.6.** Ryder-36 is an important rarity within the Vermont series. The tan and dark olive-brown surfaces are pinscratched from verdigris removal. Listed on page 68 of the 2011 *Guide Book*. MRB Good 4. Purchased from Robert A. Vlack (3/2/1964). From The W. Philip Keller Collection of U.S. Colonials. (#563)
- 3117 1788 Vermont Copper, Bust Right VG10 ANACS. RR-21, Bressett 10-R, W-2155, R.5.** An elusive Vermont marriage, undoubtedly due to the arc-shaped die break on the lower reverse. The dark brown fields show minor granularity. Listed on page 68 of the 2011 *Guide Book*. MRB Fine 12. Purchased from Robert A. Vlack (12/9/1963). From The W. Philip Keller Collection of U.S. Colonials. (#563)
- 3118 1788 Vermont Copper, Bust Right VG10 ANACS. RR-25, Bressett 16-U, W-2195, R.3.** The legends are sharp on this ebony-brown Republic copper. Evenly granular and free from consequential contact. Listed on page 68 of the 2011 *Guide Book*. MRB Fine 12. Purchased from A.D. Hoch (5/26/1960). From The W. Philip Keller Collection of U.S. Colonials. (#563)
- 3119 1788 Vermont Copper, Bust Right Fine 12 ANACS. RR-20, Bressett 10-L, W-2150, R.4.** A minimally abraded and verdigris-free example of this scarce but collectible Vermont variety. The reverse die is failing, which causes a convex and lightly detailed central reverse. Listed on page 68 of the 2011 *Guide Book*. MRB Fine 15. Purchased from A.D. Hoch (11/17/1960). From The W. Philip Keller Collection of U.S. Colonials. (#563)
- 3120 1788 Vermont Copper, Bust Right—Environmental Damage—NGC Details. Fine. RR-25, Bressett 16-U, W-2195, R.3.** The RR-25 obverse is recognized by the unusual punctuation in the legend, VERMON+AUCTORI+, and the die break at the juncture of the neck and the mail. The reverse represents the High Shield style, with the branch hand positioned opposite the upright of D in INDE. This specimen displays evenly worn brown surfaces, with a few areas of light corrosion. Listed on page 68 of the 2011 *Guide Book*. MRB Fine 12. Purchased from the New Netherlands Coin Company (9/20/1954). From The W. Philip Keller Collection of U.S. Colonials. (#563)
- 3121 1788 Vermont Copper, Bust Right—Corroded—ANACS. VF30 Details. RR-24, Bressett 16-S, W-2200, R.3.** This tan-brown Vermont type coin has an unabraded reverse and only a few brief thin marks on the right obverse. Evenly granular with bold legends and clear motifs. Struck from rotated dies, and listed on page 68 of the 2011 *Guide Book*. MRB VF25. Purchased from Kenneth W. Rendell (12/14/1959). From The W. Philip Keller Collection of U.S. Colonials. (#563)

**XF Bust Right Vermont Copper
Ryder-25, W-2195**

- 3122 1788 Vermont Copper, Bust Right XF40 ANACS. RR-25, Bressett 16-U, W-2195, R.3.** A lightly circulated Bust Right representative whose golden-brown fields are smooth and only minimally abraded. The centers display incompleteness of strike usual for the type, and a slender lamination is noted on the obverse between 10 and 11 o'clock. Listed on page 68 of the 2011 *Guide Book*. MRB XF45. Purchased from A.D. Hoch (11/17/1960). From The W. Philip Keller Collection of U.S. Colonials. (#563)
- 3123 1788 Vermont Copper, Bust Right—Corroded—ANACS. RR-27, Bressett 18-W, W-2205, R.2.** This deep brown Republic copper is richly defined and well centered. The reverse is relatively smooth, while portions of the obverse are moderately pitted. Listed on page 68 of the 2011 *Guide Book*. MRB VF30. Purchased from New Netherlands (8/9/1954). From The W. Philip Keller Collection of U.S. Colonials. (#563)
- 3124 1785 Nova Constellatio Copper, Pointed Rays, Large Date—Corroded—ANACS. VF30 Details. Crosby 5-E, W-1915, High R.4.** This medium to deep brown representative was struck on a somewhat rough flan, but the surfaces are much nicer than suggested by the ANACS designation. Listed on page 52 of the 2011 *Guide Book*. MRB VF20. Ex: New Netherlands #44 (6/23/1954). From The W. Philip Keller Collection of U.S. Colonials. (#813)
- 3125 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays Fine 15 ANACS. Newman 9-Q, W-6760, R.5.** A better variety of this important Early American type. Light to medium brown with even wear, an absence of corrosion, and no consequential abrasions. Listed on page 83 of the 2011 *Guide Book*. MRB Fine 12. Purchased from Robert A. Vlack, 6/13/1962. From The W. Philip Keller Collection of U.S. Colonials. (#883)
- 3126 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays—Corroded—ANACS. VF Details. Newman 6-W, W-6730, R.4.** An evenly worn Fugio with dark brown fields that contrast with maroon devices. Listed on page 83 of the 2011 *Guide Book*. MRB VG8. Purchased from Copley (1/15/1959). From The W. Philip Keller Collection of U.S. Colonials. (#883)
- 3127 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays—Corroded—ANACS. VF20 Details. Newman 12-M, W-6800, R.3.** A medium brown representative with generally clear legends despite a consistently granular appearance. Listed on page 83 of the 2011 *Guide Book*. MRB Fine 12. Purchased from Lausch (5/19/1961). From The W. Philip Keller Collection of U.S. Colonials. (#883)

- 3128** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays VF20 ANACS. Newman 22-M, W-7020, R.5. A mildly granular medium brown example of this scarce die pairing. The obverse rim has tiny marks, but the fields and devices are unblemished. The reverse die is rotated and clashed. Listed on page 83 of the 2011 *Guide Book*. MRB Fine 12.
Purchased from G. Creed, 6/1/1960.
From The W. Philip Keller Collection of U.S. Colonials. (#883)

- 3129** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays VF20 ANACS. Newman 12-M, W-6800, R.3. An attractive chocolate-brown Fugio copper with an occasional inconspicuous planchet flaw and a solitary small obverse mark near 9 o'clock. The reverse die is clashed. Listed on page 83 of the 2011 *Guide Book*. MRB Fine 15.
Purchased from New Netherlands, 11/28/1958.
From The W. Philip Keller Collection of U.S. Colonials. (#883)

- 3130** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays—Corroded—ANACS. VF25 Details. Newman 16-N, W-6925, R.3. This tan-brown Fugio copper is generally smooth, with moderate pitting limited to the area near the 8 in the date. A small mint-made clip is noted at 1:30. Listed on page 83 of the 2011 *Guide Book*. MRB Fine 15.
Purchased from Robert A. Vlack (4/9/1965).
From The W. Philip Keller Collection of U.S. Colonials. (#883)

**Scarce Newman 14-O 1787 Fugio Cent
XF40, Pointed Rays, Cinquefoils**

- 3131** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays XF40 ANACS. Newman 14-O, W-6875, R.4. A richly detailed walnut-brown Fugio copper that lacks any noticeable contact, but has a whisper of surface granularity. Listed on page 83 of the 2011 *Guide Book*. MRB XF40.
Ex: Abner Kreisberg & Hans F. Schulman (4/3/1959).
From The W. Philip Keller Collection of U.S. Colonials. (#883)

- 3132** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays XF45 ANACS. Newman 13-X, W-6855, R.2. A smooth golden-brown piece with ample indications of luster. Decisively struck at the centers and on the right borders, while the left margins are incompletely brought up. Listed on page 83 of the 2011 *Guide Book*. MRB XF40.
Purchased from A.D. Hoch (11/17/1960).
From The W. Philip Keller Collection of U.S. Colonials. (#883)

**Choice XF Pointed Rays 1787 Fugio Cent
Double Struck, Newman 13-X**

- 3133** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays XF45 ANACS. Newman 13-X, W-6855, R.2. Double struck, the reverse (hammer) die rotating a few degrees counter-clockwise between blows from the dies, while the obverse (anvil) die was stationary. Because of the two strikes, MIND YOUR BUSINESS is uncommonly sharp, despite moderate circulation wear. Listed on page 83 of the 2011 *Guide Book*. MRB XF40.
Purchased from N. Pullen (10/29/1960).
From The W. Philip Keller Collection of U.S. Colonials. (#883)

- 3134** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays—Planchet Streaks—AU55 ANACS. Newman 11-X, W-6790, R.4. A glossy and splendid Fugio that undoubtedly originated in the famous Bank of New York hoard. The well struck chocolate-brown surfaces shimmer with luster. Each side has a couple of noticeable mint-made planchet flaws. Struck from prominently clashed dies. Listed on page 83 of the 2011 *Guide Book*. MRB AU50.
Purchased from Commonwealth Coin (7/22/1968).
From The W. Philip Keller Collection of U.S. Colonials. (#883)

**Smooth MS62 Brown 1787 Fugio Cent
Newman 13-X, Cinquefoils**

- 3135** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS62 Brown ANACS. Newman 13-X, W-6855, R.2. Satin luster shimmers across this unabraded chocolate-brown Fugio type coin, likely at one time part of the Bank of New York hoard. Boldly struck at the centers, while the margins display occasional softness of strike, typical of open collar coinage. Listed on page 83 of the 2011 *Guide Book*. MRB MS60.
Purchased from Foster (11/24/1953).
From The W. Philip Keller Collection of U.S. Colonials. (#883)

**1787 States United Fugio Cent, MS62 Brown
Newman 8-X With Bold Obverse Die Break**

- 3136** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS62 Brown NGC. Newman 8-X, W-6750, R.3. A late-state beauty that shows the variety's famous die break, which splits the motto MIND YOUR BUSINESS in half. A planchet flaw appears in the same area, but the glossy golden-brown surfaces are generally smooth otherwise. Well struck and pleasing. Listed on page 83 of the 2011 *Guide Book*. MRB AU55. (#883)

- 3137** 1787 Fugio Cent, STATES UNITED, Raised Rim—Corroded—ANACS. VF30 Details. Newman 19-Z, W-6975, R.5. The popular Raised Rim pattern reverse is paired with a regular obverse die. Medium brown with even granularity. A scarce die combination. Listed on page 84 of the 2011 *Guide Book*. MRB Fine 12. Purchased from J. Walsh (9/16/1961). From The W. Philip Keller Collection of U.S. Colonials. (#895)

- 3138** 1787 Fugio Cent, STATES UNITED, Eight-Pointed Stars VF20 ANACS. Newman 15-Y, W-6915, R.2. A slightly luminous tan-brown example. Unabraded with the infrequent peripheral flan flaw. The sole die marriage of the popular *Guide Book* variety with two eight-pointed stars on the reverse label. Listed on page 83 of the 2011 *Guide Book*. MRB Fine 15. Ex: James Kelly (2/8/1954). From The W. Philip Keller Collection of U.S. Colonials. (#898)

- 3139** 1787 Fugio Cent, STATES UNITED, Eight-Pointed Stars—Corroded, Cleaned—ANACS. VF20 Details. Newman 15-Y, W-6915, R.2. Walnut-brown overall with hints of orange from a cleaning. Slightly glossy with minor peripheral verdigris. The upper eight-pointed star is clear, although its lower counterpart is worn. The sole die marriage of this popular Fugio subtype. Listed on page 83 of the 2011 *Guide Book*. MRB Fine 12. Purchased from Copley, 11/2/1953. From The W. Philip Keller Collection of U.S. Colonials. (#898)

**Club Rays, Rounded Ends, Newman 3-D
1787 Fugio Cent VF30**

- 3140** 1787 Fugio Cent, Club Rays, Rounded Ends VF30 ANACS. Newman 3-D, W-6680, R.3. The Club Rays motif is more elusive than the Pointed Rays subtype, particularly in better grades. An evenly defined medium brown Fugio with a hint of field granularity on each side and minor flan flaws near the right reverse border. Listed on page 84 of the 2011 *Guide Book*. MRB VF20. Purchased from R. Hooper (3/3/1973). From The W. Philip Keller Collection of U.S. Colonials. (#904)

**Important 1783 Chalmers Shilling
Short Worm, Breen-1011, W-1785**

- 3141** 1783 Chalmers Shilling, Short Worm Genuine PCGS. Breen-1011, W-1785, High R.5. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this piece has the details of an XF specimen that has environmental damage and has been cleaned. The pearl-gray centers have the pallor of cleaning, while the outer zones are darker sage, an indication of environmental damage. This coin does have excellent remaining detail, however, and as a representative of this rare die pair, it is sure to be pursued by colonial enthusiasts. Listed on page 49 of the 2011 *Guide Book*. MRB VF30.

- 3142** 1783 Washington & Independence Cent, Large Military Bust AU58 PCGS. Baker-4, Vlack 4-D, W-10180, R.4 for the type. Glossy chocolate-brown surfaces with blue and violet overtones. One of the olive leaves in Washington's crown makes firm contact with the I in INDEPENDENCE above. Listed on page 75 of the 2011 *Guide Book*. MRB AU50. (#667)

- 3143** 1795 Washington Grate Halfpenny, Large Buttons, Reeded Edge MS63 Red and Brown NGC. Baker-29A, W-10955, R.1. Pleasing rose-red accents fill the protected areas, while the rest of the surfaces are medium-brown. Some evidence of die deterioration is seen (a few small "lumps"), but there are no marks of any significance. The strike is crisp, save for some softness on the left side of the fireplace on the reverse. Listed on page 79 of the 2011 *Guide Book*. MRB MS60. Accompanied by a certificate (with a photo of the obverse) signed by Walter Breen for the Colonial American Coin Club (First Coinvestors). (#747)

**Uncirculated Washington Success Medal
Small Size, Reeded Edge, Baker-267**

- 3144** Undated Washington Success Medal, Small Size, Reeded Edge MS61 PCGS. Baker-267, W-10875, R.5. This satiny Success Medal has golden-brown toning on the obverse and throughout the reverse border. The reverse field retains its initial pearl-gray color. The all-seeing eye is softly impressed, as always, but the remainder of the strike is sharp. Unabraded and pleasing. Listed on page 80 of the 2011 *Guide Book*. MRB AU55. Population: 1 in 61, 3 finer (10/10). (#783)

3145 Nine Piece Lot of Bolen and Related Copies Uncertified. **Bar Copper**, Bolen dies 1-A, Whitman-14200, AU, Purchased from *New Netherlands* (5/3/1954); **Inimica Tyrannis / Confederatio Mule**, Bolen dies 2-B, W-14230, AU, Purchased from Richard Picker (10/3/1963); **Higley Copper**, Bolen dies 3-D, W-14270, MS63 Red and Brown, Purchased from *New Netherlands* (5/3/1954); **Indian / Eagle on Globe**, Bolen dies 7-F, W-14370, MS60, Purchased from Richard Picker (10/3/1963); **George Clinton copper**, Bolen dies 8-G, W-14390, MS63 Red and Brown, Purchased from *New Netherlands* (5/3/1954); **Brasher doubloon**, Robinson copy, Kenney-3, W-15100, MS60, Purchased from *New Netherlands* (5/3/1954); **NON DEPENDENS STATUS**, Kenney-6, W-15250, AU, Purchased from *New Netherlands* (11/22/1952); **Dickeson Sommer Islands shilling**, brass, W-15410, MS63, Purchased from *New Netherlands* (11/22/1952); **Washington President, Idler Copy**, Kenney-1, Baker-25M, W-15870, MS60, Purchased from Empire Coin Co. (8/31/1959).

This wonderful selection of colonial copies has a total Whitman *Colonial Encyclopedia* catalog value of \$9,250.

From The W. Philip Keller Collection of U.S. Colonials. (Total: 9 coins)

3146 (1860) William Idler Storecard MS64 Red and Brown ANACS. W-15660. The design imitates the extremely rare Lord Baltimore Maryland penny, and pairs Miller Pa-216 and Pa-223. This satiny and well struck store card is more Red than Brown, with slight mellowing on the obverse center and a trio of minor spots distributed along the reverse border. MRB MS63.

Purchased from M.L. Kaplan (3/24/1953).

From The W. Philip Keller Collection of U.S. Colonials.

HALF CENTS

1793 Liberty Cap Left Half Cent, C-4, B-4, VG8

3147 1793 VG8 PCGS. C-4, B-4, Low R.3. The present coin is well worn, but retains enough definition to determine the variety and die state. The C-4 variety is recognized by the short, curved fraction bar on the reverse, while Manley die state 2 is indicated by the defect at the top of the 7 in the date. The surfaces are light brown, on a slightly granular planchet. MRB Good 4.

From The Eagle Harbor Collection, Part Two. (#1000)

Choice XF 1794 Half Cent, C-9, B-9

3148 1794 XF45 PCGS. CAC. C-9, B-9, R.2. A relatively accessible variety for the type with the R in LIBERTY close to the curl and leaves close to the T in CENT. At the Choice XF level, for all its availability, the 1794 half cent is hardly a common coin. This violet-brown coin is generally smooth save for a mark just above Liberty's pole. MRB XF40. (#1003)

Charming Choice AU 1794 Half Cent Dies of C-4, B-6

3149 1794 AU55 PCGS. C-4a, B-6b, R.3. Manley Die State 2.0, sparse wreath, irregular date, die rust on each side, clashed but without the bulge to the left of the date. Edge not visible in the holder, but presumed to be the Small Letters Edge, since its Large Letters counterpart is extremely rare. This is a marvelous second-year half cent and a great representative of the type, smooth and scarcely worn with delicate blue elements set against rich chocolate-brown surfaces. A coin of excellent all-around quality that is sure to reward the winning bidder. MRB XF45. For the various 1794 half cent varieties, Population: 23 in 55, 26 finer (10/10).

From The Eagle Harbor Collection, Part Two. (#1003)

**Lettered Edge 1795 Half Cent
C-1, B-1, AU55**

- 3150 1795 Lettered Edge AU55 PCGS. C-1, B-1, R.2.** Easily attributed by the letter I in the date instead of a number 1; a thick bar or pole near the bust truncation; and a small die lump after the second A in AMERICA. This Choice AU example is conditionally scarce for the variety, and Mint State pieces are rare. The tan and steel-gray coloration is somewhat lighter than usual, for this early type. The striking details are better struck than average, and well centered on the planchet. Any serious collector interested in assembling a high grade set of early half cents should consider this attractive and technically impressive specimen. MRB XF45. Population: 9 in 55, 18 finer (10/10).
Ex: 2008 ANA Auction (Heritage, 7-8/2008), lot 944.
From The Eagle Harbor Collection, Part Two. (#1009)

- 3151 1804 Crosslet 4, Stems AU55 NGC. C-10, Breen-9, R.1.** An available variety, characterized by the high 4 in the date and the heavy break through R in AMERICA. The present coin is a lightly circulated example, with sharp devices and medium brown surfaces. MRB AU50.(#1069)

- 3152 1804 Spiked Chin AU53 PCGS. C-8, B-7, R.1.** A lightly worn example of this popular and accessible Spiked Chin die pair. Generous cinnamon and lavender overtones grace rich mahogany-brown surfaces. MRB AU50.
From The Eagle Harbor Collection, Part Two. (#1075)
- 3153 1809/6 AU58 PCGS. C-5, B-5, R.1.** The 1809 Over Inverted 9, or "1809/6" in earlier (and some modern) parlance. A scarcely worn example, well struck for the type with ample violet and rose hues. MRB AU50. Population: 13 in 58, 20 finer (10/10). (#1126)
- 3154 1826 MS63 Brown PCGS. C-1, B-1, R-1.** Manley Die State 4.0 to 5.0. A beautiful golden-brown example of this collectible Classic Head date. Well struck aside from the upper left-side stars. No marks are evident, although the reverse has a few subtle gray spots. MRB AU55.(#1144)

**1828 Half Cent, MS63 Red
13 Stars, C-3, B-2**

- 3155 1828 13 Stars MS63 Red PCGS. C-3, B-2, R.1.** The Cohen variety is attributed by the low position of the 2 in the date, the tip of the highest leaf extending beyond the second S in STATES, and a wreath spine from the leaf point above HA into the field. Vibrant mint luster enhances the pleasing red surfaces, and the design elements are sharply detailed. MRB MS63. Population: 9 in 63 Red, 7 finer (10/10). (#1149)
- 3156 1855 MS66 Brown PCGS. CAC. C-1, B-1, R.1.** Lovely olive-gold and orange-red toning drapes this thoroughly lustrous and nearly mark-free Premium Gem. The strike is sharp save for the right-side margins. As of (10/10), PCGS has certified just two examples at the lofty MS66 level with none finer. MRB MS63. (#1233)
- 3157 1855 MS64 Red and Brown PCGS. CAC. C-1, B-1, R.1.** Close to full Red but the central reverse field has begun to tone, and a spot is noted between the IC in AMERICA. Lustrous, nicely struck, and virtually free from contact. MRB MS63.(#1234)
- 3158 1855 MS64 Red PCGS. C-1, B-1, R.1.** Bold peach and rose color with minor spotting and a patch of violet to the left of the truncation of the bust. Attentively struck with a small abrasion hidden to the left of star 11 on the obverse. MRB MS64. (#1235)

LARGE CENTS

**Famous 1793 Chain Cent, VG8
AMERICA, S-3, B-4**

- 3159 1793 Chain AMERICA VG8 PCGS. S-3, B-4, Low R.3.** Among the most iconic of the early American coinage types, the Chain cent may have been unpopular and quickly replaced in its time, but today it is well-respected and eagerly sought-after by type and series collectors alike. This is a glossy Very Good example with deep walnut-brown surfaces that lighten on the devices and at the rims. Both sides show scattered digs, but the long, thin line visible at the lower right reverse is a planchet flaw rather than a post-striking defect. The peripheral devices show understandable weakness from wear, but the central chain is strong. MRB Good 5. *From The Eagle Harbor Collection, Part Two. (#1341)*

**1793 Wreath Cent, VG10
Popular Vine and Bars Edge, S-6, B-7**

- 3160 1793 Wreath Cent, Vine and Bars VG10 PCGS. CAC. S-6, B-7, R.3.** The Sheldon variety is identified by the position of the right leaf nearly touching both the curl and lowest lock on the obverse, and the small heavy bow on the reverse. This example shows a little more wear on the obverse, with light brown surfaces. Some areas of slight granularity are evident on both sides. MRB VG7. (#1347)

**1793 Wreath Cent, VF25
Vine and Bars, S-10, B-10**

- 3161 1793 Wreath Cent, Vine and Bars VF25 PCGS. S-10, B-10, R.4.** A die flaw near the obverse rim at 3 o'clock, and the long right stem and ribbon on the reverse identify this scarce variety. The surfaces are glossy brown on the obverse, while the reverse displays highlights of steel-blue. A few rim bruises are evident on both sides, with some crumbling on the obverse at 5 o'clock. MRB Fine 15. *From The Eagle Harbor Collection, Part Two. (#1347)*

1793 Wreath Cent, MS61 Brown
Spectacular Condition Census Example, S-5
Ex: Clay, Parmelee

3162 1793 Wreath Cent, Vine and Bars MS61 Brown PCGS. S-5, B-6, Low R.4. The coin offered here is a Wreath cent of surpassing quality that traces its pedigree back to 1871. This example was a highlight in some of the most celebrated early large cent collections, and its status remains undiminished today. Currently, the piece occupies the 9th position in Walter Breen's Condition Census.

The auction history of this specimen begins with lot 700 of the Clay Collection, cataloged by William Strobridge in December 1871. Strobridge described another high quality 1793 cent in the preceding lot, and then reported:

“Another, same date and variety; struck on a planchet with small streaks on rev. side, but a beautiful impression, bearing the fine golden color left by the impression of the dies. A rare and desirable cent.”

The present coin is easily recognized from Strobridge's terse description, and many catalogers have echoed his glowing opinion of the piece over the years. The S-5 variety is easily identified by the large letters in LIBERTY, and this specimen is from die state II, with the rim beginning to crumble over LIB. The pleasing surfaces are a glossy brown color, with delightful hints of red still evident on the obverse. A few minor abrasions and planchet voids can be detected on close inspection, none of which affect the grade. Population: 1 in 61 Brown, 25 finer (10/10). MRB AU50. Del Bland XF45.

Ex: Dr. Charles Clay Collection (William Strobridge, 12/1871), lot 700, realized \$25; W. Elliot Woodward; Lorin G. Parmelee; Parmelee/Seavey Collection (Strobridge, 6/1873), lot 130, realized \$26; William Festus Morgan; Sale Number 287 (Morgenthau, 6/1932), lot 7, realized \$47; unknown intermediaries; Wayte Raymond; Sale Number 384 (Morgenthau, 12/1937), lot 335, realized \$205; Frank Hussey; 54th Sale (New Netherlands, 4/1960), lot 1337, realized \$490; Corrado Romano, unknown intermediaries; ANA Convention Auction (Stack's, 8/1976), lot 221, realized \$2,200; Mike Follett Rare Coin Co.; Manfra, Tordella & Brookes; Medio and Gomez Collections (American Numismatic Rarities, 6/2004), lot 4029, realized \$31,050. (#1347)

S-65, B-51 1794 Head of 1794 Cent, VF35

- 3163 1794 Head of 1794 VF35 PCGS. S-65, B-51, R.1.** A luminous Choice VF example of this relatively accessible die pair, distinguished by the prominent die crack between the letters ES of STATES. Cinnamon-brown surfaces show elements of deep blue and steel color which appear mostly at the margins. Few post-striking disturbances. MRB VF25. (#901374)

**S-30, B-12 1794 Cent
Head of 1794, AU55**

- 3164 1794 Head of 1794 AU55 PCGS. S-30, B-12, R.1.** The obverse with doubled lowest hair curl, the reverse with a right ribbon end that almost reaches the rim. A glossy brown example of this accessible but desirable issue, distinctly rubbed on the high points but with few significant abrasions visible in the centers. MRB XF40. *From The Eagle Harbor Collection, Part Two.* (#901374)

**1795 Liberty Cap Cent, XF40
Plain Edge, S-76b, B-4b**

- 3165 1795 Plain Edge XF40 PCGS. S-76b, B-4b, R.1.** Hints of red still glimmer amidst the light brown patina of this lightly worn large cent. The S-76b variety is identified by the plain edge, with the 5 overlapping the bust, and ONE CENT placed high on the reverse. The planchet is slightly granular in some areas, but the devices retain much original detail. MRB VF30. (#1380)

- 3166 1797 Reverse of 1797, Stems VF25 PCGS. S-128, B-23, R.3.** The M in AMERICA is punched over an E, and the obverse die is nearly shattered. A nicely detailed olive-brown example of this distinctive variety. A loupe reveals wispy thin marks, a small obverse depression near 3 o'clock, and a pair of tiny obverse rim nicks near 12 o'clock. MRB Fine 15. (#1422)

Popular S-189, B-3 1799 Cent

- 3167 1799 Genuine PCGS. S-189, B-3, R.2.** The PCGS number ending in .97 suggests Environmental Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this piece has the details of a Fine specimen that has corrosion and obverse residue. Deep teak-brown surfaces on each side show considerable (if fine) corrosion, save for patches of strange gloss at the upper obverse that may be a form of lacquer. Nonetheless, a worthwhile example of this highly collectible date. MRB VG7.

- 3168 1800/79 VF30 PCGS. S-196, B-10, R.1.** The 79 underdigits are obvious, and the high second 0 confirms the die marriage. Rich olive-brown toning blankets this attractively detailed and moderately abraded Draped Bust cent. MRB VF20. (#1455)

**Choice AU 1803 Cent
Small Date, Large Fraction, S-258, B-17**

- 3169 1803 Small Date, Large Fraction AU55 PCGS. S-258, B-17, R.1.** A repunched T in LIBERTY and a die break through the curve of D in UNITED identify this relatively available variety. Only the faintest signs of circulation can be detected on this sharply detailed specimen. The surfaces are light brown, with blue-steel highlights on the reverse. MRB XF40. Population: 3 in 55, 13 finer (10/10). *From The Eagle Harbor Collection, Part Two.* (#1485)

**Late Dies Key 1804 Cent, VF25
S-266, B-1**

- 3170 1804 VF25 PCGS. CAC. S-266, B-1, R.2.** The final major die state with large cuds above the RTY in LIBERTY and the MERIC in AMERICA. This is a medium brown representative with olive undertones at the reverse center. No marks are worthy of comment, and the strike is consistent save for softness on the bust tip and STATES OF. Only a single die pair was used to strike the 1804, and as a date, it is among the rarest in the large cent series, challenged primarily by the 1799. MRB Fine 15. (#1504)

**1806 Cent, AU50
Well Preserved S-270, B-1 Example**

- 3171 1806 AU50 PCGS. S-270, B-1, R.1.** The only variety for the date. With a large reported mintage of 348,000 pieces, it seems likely that some 1805 dated coins were included in the production total. The present coin is a lightly circulated example, with much original detail remaining on the devices, and pleasing, medium brown surfaces. Visual appeal is quite strong. MRB XF40. Population: 6 in 50, 15 finer (10/10). (#1513)

- 3172 1809—Improperly Cleaned—NGC Details. XF. S-280, B-1, R.2.** The sole die marriage for this scarce Classic Head date. The sea-green and maroon toning is suspect, and the well defined and minimally abraded surfaces appear somewhat cloudy. MRB VF20.

**1810 Classic Head Cent, AU50
Popular S-282, B-3 Variety**

- 3173 1810 AU50 PCGS. S-282, B-3, R.2.** Star 6 is closer to star 5, and the top inner serif of N in CENT is extended, indicative of the S-282 variety. The present coin is a well detailed, glossy brown specimen, with a little weakness on the curls in front of Liberty's ear and the right stars. MRB XF40. Population: 9 in 50, 25 finer (10/10). From *The Eagle Harbor Collection, Part Two*. (#1549)

Choice AU 1814 Plain 4 Cent, S-295, B-2

- 3174 1814 Plain 4 AU55 PCGS. S-295, B-2, R.1.** The sole Plain 4 die pair for the year. Blue and violet overtones grace rich brown surfaces that exhibit considerable glossiness. While certain stars show varying degrees of incompleteness, the central devices show average to above-average definition for the type. For the Plain 4 variety, Population: 10 in 55, 21 finer (10/10). MRB XF45. (#1576)

**Elusive 1814 S-295, B-2 Cent
Plain 4, MS63 Brown**

- 3175 1814 Plain 4 MS63 Brown PCGS. S-295, B-2, R.1.** The Plain 4 variety is plentiful in all grades, although Mint State examples are seldom encountered in the market place. This attractive piece exhibits mahogany, chestnut, and steel-brown surfaces with full cartwheel luster. MRB MS60. (#1576)

- 3176 1823 Restrike MS64 Brown NGC. N-3, R.2.** From the usual broken and rusted state. Well struck and moderately prooflike with lilac and powder-blue undertones. The earliest known reference to the Restrike large cents of 1823 dates to November 1862, when W. Elliot Woodward cataloged a copper composition example as "recently struck from the original die." The dies were purportedly sold by the Mint as scrap metal and later acquired by Joseph Mickley. The dies have survived, and are currently on loan to the ANA Museum from the Jules Reiver family. Certified in a prior generation holder. MRB MS60. Census: 17 in 64 Brown, 5 finer (10/10). (#81627)

- 3177 1835 Head of 1836 MS64 Brown PCGS. N-15, R.2.** Hints of faded red cling to the design of this mostly ebony-brown near-Gem. No marks are noticeable, and the strike is sharp except for the flatly impressed stars. A desirable example of this transitional large cent issue. MRB MS62. (#1714)

**Delightful N-6 1839 Booby Head Cent
MS63 Red and Brown**

- 3178 1839 Booby Head MS63 Red and Brown PCGS. N-6, R.2.** Light repunching on star 9 and a tiny die chip near star 10 help attribute this Booby Head cent, a design subtype coined only in 1839. This lustrous representative is predominantly fire-red, although blushes of apple-green are found at the centers. Marks are limited to a few trivial hairlines on the lower left obverse field. MRB MS63. (#1752)

- 3179 1856 Upright 5 MS65 Red and Brown NGC. N-11, R.1.** Grellman Die State b with an obverse orange-peel texture. This satiny Gem is mostly orange-gold but displays dusky steel-blue on the borders and wreath. Marks are essentially absent, and the strike is good overall despite softness on portions of the dentils. MRB MS62. (#1920)

FLYING EAGLE CENTS

Key 1856 Flying Eagle Cent, VF30

- 3180 1856 VF30 PCGS. CAC. Snow-9.** A walnut-brown representative of this historic numismatic issue. The eagle's breast and tail feathers exhibit moderate wear, but substantial plumage detail remains. Inspection beneath a lens fails to locate any consequential contact. The obverse field has a few trivial hairlines. The Snow-9 die pair is associated with proofs, and it is likely the present cent was initially purchased by a collector circa-1859. It may have then been used as a pocket piece for awhile by the proud owner, or simply spent by an heir who was oblivious of its status as the key date of the small cent denomination. If the latter, the person who removed it from circulation must have been delighted by the remarkable find. Encapsulated in an old green label holder. (#2013)

- 3181 1858 Large Letters MS64+ PCGS. CAC. High Leaves, Closed E in ONE.** A Large Letters beauty that comes close to the Gem level. Deep rose-violet interiors give way to lighter orange-brown colors close to the rims. (#2019)

- 3182 1858 Large Letters MS64 PCGS. High Leaves, Closed E in ONE.** The letters AM of AMERICA are firmly joined at the base. Green and orange overtones grace copper-gold surfaces on this near-Gem, softly struck at the upper obverse but relatively well-defined elsewhere.
From The Eagle Harbor Collection, Part Two. (#2019)

PROOF FLYING EAGLE CENTS

1857 Flying Eagle Cent, PR64 A Magnificent, Deeply Reflective Example

- 3183 1857 PR64 NGC. Snow PR-1.** With an estimated mintage of only 50 proofs, it seems odd that three sets of dies would be necessary to accomplish such a slight output. This die pairing is easily recognized by the die file mark from the left serif at the top of the I in UNITED to the rim, the diagonal die scratch below the eagle's beak, and the left ribbon end on the reverse that connects with the denticles. As seen on all PR-1 examples, the fields on this piece show extraordinarily deep reflectivity. The bright yellow-green color deepens to a reddish tint around the margins on each side. The most noticeable pedigree identifier on this beautiful near-Gem is a spot between the 5 and 7 in the date. (#2040)

Small Letters 1858 Flying Eagle Cent, PR62

- 3184 1858 Small Letters PR62 NGC. Clear separation between all letters in AMERICA confirms the Small Letters obverse. A line through the right obverse field is a strike-through, possibly of thread, though blue-accented copper-gold surfaces also show grade-defining hairlines. Minor carbon is present at the center of the eagle's body. (#2043)

Pleasing PR63 1858 Small Letters Cent

- 3185 1858 Small Letters PR63 PCGS. The 1858 Small Letters Flying Eagle cent boasts a tiny proof mintage of about 200 pieces., including both High Leaves and Low Leaves varieties. The issue is rare today in all grades. The present coin represents the more available Low Leaves variety, with the leaves in the wreath below the top of O in ONE. The surfaces of this Select example are slightly reflective, with light golden-brown color. The devices are strongly impressed, and a few spots of dark color on the reverse are the only mentionable distractions. Population: 8 in 63, 40 finer (10/10). (#2043)

Remarkable 1858 Small Letters
Flying Eagle Cent, PR64 Cameo

- 3186 1858 Small Letters PR64 Cameo PCGS. Richard Snow's *Guide Book of Flying Eagle and Indian Head Cents* recounts how the U.S. Mint was engaged in rampant pattern production for small cents in 1858. Sets of a dozen coins, 11 of them patterns, were sold for a few years thereafter, and the one regular-issue coin in each set was a Small Letters 1858 Flying Eagle cent proof, like the piece offered here. Pale copper-orange surfaces show blushes of peach at parts of the margins, and the reverse shows prominent die polish lines, especially within the wreath. Both sides offer uncommonly strong contrast for the type. A few small flecks and a surface blemish between the I in UNITED and the wing contribute to the grade. (#2044)
-

INDIAN CENTS

- 3187 1859 MS64 PCGS. CAC.** A fully lustrous golden-tan near-Gem example of the one-year type issue with no shield at the top of the reverse. The combination of its one-year type status, and its first year of issue status among all Indian cents means that the 1859 is always in high demand. (#2052)
- 3188 1860 Pointed Bust MS64 PCGS.** The 1860 Pointed Bust Indian Head cents were produced using previously undated dies from 1859, with the older Pointed Bust motif. The design difference was not noticed until much later, and examples in Choice condition are quite scarce. The present coin is sharply struck, with bright mint luster and attractive red surfaces. Population: 79 in 64, 34 finer (10/10). (#2056)

Impressive 1862 Indian Cent, MS66+

- 3189 1862 MS66+ PCGS.** This beautiful Indian cent is a wonderful representative of the copper-nickel composition, with light tan surfaces and bold design elements. The cents were once called "nickels" or "white cents" for their composition. Here is an important opportunity for the specialist or type collector. Population: 61 in 66, 8 finer (10/10). (#2064)
- 3190 1864 Bronze No L MS66 Red NGC.** Attractive copper-gold color embraces the lustrous surfaces of this Premium Gem while a well executed strike emboldens the design elements. A few light reverse flecks are undisturbing. Census: 27 in 66 Red, 2 finer (10/10). (#2078)
- 3191 1866 MS64 Red and Brown NGC. Snow-2, FS-301.** The 1 and 6 are clearly repunched on this in-demand variety, with the flag of the secondary 1 showing below the primary digit, and the top of the underlying 6 apparent above the final numeral. Richard Snow considers MS64 Red and Brown the Optimal Collecting Grade for this date. Census: 1 in 64 Red and Brown, 3 finer (10/10). (#2086)
- 3192 1867 MS65 Red and Brown PCGS.** A significant portion of original red still remains on each side, perhaps as much as 50%. The striking details on the obverse are remarkably strong with complete definition to the end of the feathers in the headdress. The shield on the reverse is the only area that displays softness. *From The F.L. Ivy Rainbow Copper Collection.* (#2089)
- 3193 1869 MS64 Brown PCGS. CAC.** Deep violet-brown color lightens to rosewood close to the reverse rims. A Choice charmer with pleasing detail. Population: 51 in 64 Brown, 14 finer (10/10). (#2094)
- 3194 1869 MS64 Red and Brown PCGS.** The glossy red and brown surfaces show remarkably strong definition on both obverse and reverse, giving the coin a well-balanced appearance overall. Tiny abrasions and flyspecks explain the grade. *From The F.L. Ivy Rainbow Copper Collection.* (#2095)

- 3195 1869 MS64 Red and Brown PCGS. Snow-2.** Although unlisted in the Cherrypickers' Guide, this desirable variety has obvious recutting on all four date digits. Both sides show bold design definition with frosty orange luster and accompanying light brown toning. Housed in a green-label PCGS holder. *Accompanied by an Eagle Eye Photo Seal and Certificate.* (#2095)
- 3196 1870 MS65 Red and Brown NGC. Snow-23.** Eagle Eye Photo Seal, Card Included. Bold N. The reverse exhibits minor die doubling, most apparent on the lower serif of the E in CENT. The obverse is notable for a prominent die lump on the Indian's neck. Peach-gold and sea-green with a bit more of the latter. Sharply struck and mark-free. A popular lower-mintage date, housed in a former generation holder. *From The F.L. Ivy Rainbow Copper Collection.* (#2098)
- 3197 1871 MS64 Red and Brown PCGS. CAC. Bold N.** Generous dusk-orange and rose elements mingle with deeper brown and mahogany hues on this near-Gem. A well struck example that is attractive for the grade. (#2101)

Semikey 1872 Indian Cent, MS65 Brown

- 3198 1872 MS65 Brown PCGS. CAC. Bold N in ONE.** Like the typical Uncirculated survivor, this piece displays soft details on the date and shield. The other design elements are sharp, including the upper feather tips of Liberty's headdress. The faces show variegated greenish-brown and gold patina. The low mintage, just above 4 million pieces, was further reduced by widespread melting following the Mint Act of 1873. Today the issue is extremely scarce at the Gem level; PCGS reports only seven examples in MS65 Brown (10/10). *From The F.L. Ivy Rainbow Copper Collection.* (#2103)
- 3199 1873 Open 3 MS65 Red and Brown PCGS.** Considerable copper-gold, orange, and peach hues mix with brown on this Open 3 Gem. Solidly struck with a flyspeck noted to the left of the headdress and another over the Y in LIBERTY. *From The F.L. Ivy Rainbow Copper Collection.* (#2107)

Doubled LIBERTY 1873 Cent, XF40

- 3200 1873 Doubled LIBERTY, Closed 3 XF40 PCGS. Snow-1. FS-101.** One of the most prominent doubled dies in U.S. coinage history, most famous for its eponymous broad doubling on the letters of LIBERTY. Though both sides show light, even wear on gold-spotted chocolate-brown surfaces, the all-important central definition is clear. For the variety, Population: 13 in 40, 65 finer (10/10). (#2115)

3201 1874 MS65 Red and Brown PCGS. CAC. This better date Gem is predominantly orange-gold, although the cheek and open fields are display blushes of olive. No marks are evident, and carbon is trivial save for a fleck or two near the bust tip. (#2119)

3202 1876 MS66 Red and Brown NGC. This piece represents excellent value for the collector as it retains almost all the original red luster. There is very little brown on either side to account for the Red and Brown designation. The strike is sharp throughout and the surfaces are remarkably free from post-striking impairments. Census: 12 in 66 Red and Brown, 1 finer (10/10).
From The F.L. Ivy Rainbow Copper Collection. (#2125)

3203 1877 Fine 12 NGC. The letters BE of LIBERTY are partly obscured, but the rest of the detail is strong enough to warrant a Fine designation for this key-date cent. Subtle violet-gold overtones grace minimally abraded medium-brown surfaces. (#2127)

Attractive AU53 1877 Cent

3204 1877 AU53 PCGS. Despite a mintage of 852,500 pieces, the number of surviving 1877 cents is unusually low (Richard Snow, 2009). Medium brown patina bathes both sides of this AU53 example, and sharp definition is apparent on the design elements, including all letters in LIBERTY. The upper diamond is typically crisp, and the others display at least partial detail. A few light circulation marks are unworthy of individual mention. This is a great coin for a high-grade Indian cent collection. (#2127)

**1877 Indian Cent, AU58
Low-Mintage, Key Date**

3205 1877 AU58 PCGS. CAC. The 1877 Indian cent boasts a low mintage of 852,500 pieces, making it the rarest and most sought-after date of the series. The present coin is a well detailed, lightly circulated example, with pleasing light brown surfaces and no mentionable distractions. Population: 70 in 58, 95 finer (10/10). (#2127)

3206 1878 MS65 Red and Brown NGC. CAC. Pale copper-gold and orange hues dominate this Gem, though the mahogany tones at the left obverse preclude a fully Red designation. This well struck and eye-appealing piece is housed in a prior-generation holder and tied for the finest Red and Brown representative known to NGC (10/10). (#2131)

Vibrant 1883 Cent, MS66 Red

3207 1883 MS66 Red PCGS. Bright copper-orange luster with minor apricot and peach peripheral accents. This Premium Gem is well struck overall, though the ribbon lacks definition on the diamonds. Nonetheless, a carefully preserved example that should appeal to a wide range of high-end Indian cent collectors. Population: 25 in 66 Red, 6 finer (10/10). (#2147)

3208 1883 MS66 Red NGC. Fresh and vibrant luster ranges from pale copper-gold to peach and lavender. A distinctive Premium Gem that is well struck and delightful. Census: 18 in 66 Red, 3 finer (10/10). (#2147)

3209 1885 MS65 Red PCGS. Fire-gold luster bathes this exquisitely struck Gem. Thorough evaluation fails to locate even trivial marks, and only the infrequent carbon fleck decides the grade. Population: 54 in 65 Red, 10 finer (10/10). (#2153)

3210 1885 MS65 Red PCGS. Cherry-red dominates this intricately struck and lustrous Gem. Virtually devoid of contact, and carbon-free aside from two flecks between the TE in UNITED and above the final A in AMERICA. A lower mintage date. Population: 54 in 65 Red, 10 finer (10/10).
From The F.L. Ivy Rainbow Copper Collection. (#2153)

3211 1886 Type Two MS65 Brown NGC. This is an interesting coin that has mirrored fields that are subdued by incredible deep red, brown, and blue colors. For a Brown coin, this piece has surprising vibrancy and eye appeal.
From The F.L. Ivy Rainbow Copper Collection. (#2154)

3212 1886 Type Two MS64 Red and Brown PCGS. Lustrous surfaces display golden-tan patination and adequately struck devices. A few light flecks are seen over each side.
From The F.L. Ivy Rainbow Copper Collection. (#2155)

3213 1886 Type Two MS64 Red and Brown PCGS. CAC. A satiny Choice representative of this scarcer issue. Cherry-red, sun-gold, and apple-green cover the unabraded and glossy surfaces. Sharply struck throughout.
From The F.L. Ivy Rainbow Copper Collection. (#2155)

3214 1886 Type Two MS65 Red and Brown NGC. Virtually full red mint luster is actually a combination of bright orange and pale yellow, with traces of delicate blue over the high points. Census: 34 in 65 Red and Brown, 1 finer (10/10).
From The F.L. Ivy Rainbow Copper Collection. (#2155)

Distinctive 1886 Type Two Indian Cent, MS64 Red

- 3215 1886 Type Two MS64 Red NGC.** The Type Two 1886 Indian cents have a distinctive satin appearance that is essentially diagnostic. This piece is fully brilliant with a high degree of orange mint luster on both sides. As such, it is highly desirable. Minor carbon on each side is consistent with the grade. Census: 9 in 64 Red, 10 finer (10/10). (#92156)

- 3216 1891 MS65 Red NGC.** Remarkably intense colors, including cherry-red and deep sun-orange. This Red Gem has a sharp strike at the centers and undeniable eye appeal. NGC has graded just three finer Red representatives (10/10). (#2180)

- 3217 1894 Doubled Date MS62 Brown PCGS. CAC. FS-301.** This repunched date with dramatic offset, particularly on the last digit, is either on its way to becoming a collector classic or already there. Though called "Brown," this coin has considerable peripheral orange around violet-brown centers. (#92187)

- 3218 1902 MS66 Red NGC. CAC.** A fully brilliant Premium Gem, this lovely cent exhibits frosty orange luster, richer at the lower obverse border. A splendid example and seldom seen so fine. (#2213)

- 3219 1908-S MS65 Red and Brown PCGS.** A luminous piece that offers a roughly equal balance between faded orange and olive hues. Well struck and clearly of Gem quality, an appealing example of this elusive S-mint cent issue. (#2233)

1908-S Indian Cent, MS66 Red First S-Mint Cent

- 3220 1908-S MS66 Red PCGS.** Subtle golden bronze color with a hint of green encircles the devices of this Gem, while the centers show a woodgrain toning pattern with copper highlights. Reasonably well struck, with exceptionally smooth surfaces. An attractive Premium Gem example of this semi-key date. Population: 33 in 66 Red, 0 finer (10/10). (#2234)

- 3221 1909 MS66 Red PCGS.** Copper-orange at the outer zones with more umber shadings at the interiors; the reverse in particular takes on an almost mahogany tone. Softly struck on the feather-tips but with complete diamonds. (#2237)

PROOF INDIAN CENTS

- 3222 1862 PR65 Cameo NGC.** Fully struck and prominently mirrored with sun-gold color and a hint of a fingerprint fragment on the left obverse field. Few copper-nickel cents have this much original "white" surface remaining. Just 550 proofs were struck. Census: 17 in 65 Cameo, 21 finer (10/10).
From The F.L. Ivy Rainbow Copper Collection. (#82259)

- 3223 1864 Bronze No L PR66 Brown NGC.** A scarce issue as a proof, the 1864 bronze Indian cents had a low proof mintage of only 150 pieces. This Premium Gem is mostly medium to dark olive with traces of violet, sea-green, and pale yellow toning. Census: 10 in 66 Brown, 2 finer (10/10).
From The F.L. Ivy Rainbow Copper Collection. (#2276)

1865 Indian Cent, PR67 Red and Brown Cameo Bright Surfaces and Sharply Contrasted

- 3224 1865 PR67 Red and Brown Cameo NGC.** The estimated mintage of the proof 1865 Indian cent is only 500 pieces, but it is a safe bet that few survive at the level of this Superb Gem coin. The color is predominantly almond-gold, with only slight daubs of deeper medium-brown. Splendid cameo contrast is set up by the high points, which are more deeply toned on the reverse than the obverse, against the intensely reflective fields on both sides. The strike is impeccable, and there are no signs of contact visible on either side. This piece is the only PR67 certified at either NGC or PCGS, regardless of color or contrast (10/10). A memorable coin for the finest collection.

From The F.L. Ivy Rainbow Copper Collection. (#82283)

- 3225 1869 PR65 Red and Brown NGC.** Mahogany and olive central colors are framed in still-bright copper-orange on this Red and Brown Gem. Excellent design definition with just a few tiny contact marks visible under magnification. NGC has certified only four finer Red and Brown specimens (10/10).
From The F.L. Ivy Rainbow Copper Collection. (#2295)

- 3226 1875 PR65 Red and Brown NGC.** It is rare when Indian cents are found with any degree of original red remaining. This coin is definitely Red and Brown, but there are bright, noticeable tracings of original red luster around the obverse rim and much more over the reverse. The strike is strong throughout, as one would expect, and the surfaces are pleasing and problem-free. Census: 40 in 65 Red and Brown, 7 finer (10/10).
From The F.L. Ivy Rainbow Copper Collection. (#2313)

- 3227 1875 PR64 Red Cameo PCGS.** Strong copper-gold to orange color with small streaks of variation. Considerable field-to-device contrast, particularly for a small cent issue of the 19th century. Population: 4 in 64 Red Cameo, 3 finer (10/10). (#82314)

Favored 1877 Indian Cent, PR65 Red and Brown

- 3228 1877 PR65 Red and Brown NGC. CAC.** The 1877 Indian cent is the acknowledged key to the regular series, and many collectors select a proof specimen to represent this date in their sets. Only 900 proof examples were minted, and Gem specimens are very scarce. The present coin is an impressive Gem, with mostly red surfaces and an exemplary strike. Census: 70 in 65 Red and Brown, 16 finer (10/10). (#2319)

Popular 1877 Indian Cent, PR66 Red and Brown Only One Coin Certified Finer in Red and Brown

- 3229 1877 PR66 Red and Brown NGC.** The 1877 Indian Head cent is the rarest business-strike coin of the series, putting intense pressure on the small proof mintage of 900 pieces. The present coin is a sharply struck Premium Gem example, with brightly reflective fields. The surfaces are mostly red, with hints of lavender toning. Census: 15 in 66 Red and Brown, 1 finer (10/10). (#2319)

- 3230 1881 PR65 Red NGC.** This is an excellent type coin. The surfaces show full, even red mint luster and the fields are deeply reflective. The only mark we see is on the reverse below the E in ONE, otherwise this beauty would undoubtedly grade even higher. Census: 29 in 65 Red, 16 finer (10/10).
From The F.L. Ivy Rainbow Copper Collection. (#2332)

- 3231 1881 PR65 Red PCGS.** A boldly struck Gem, radiant peach hues are dominant although the lower reverse offers freckles of olive and ruby color. Although proofs of this date are not rare, most are spotted and comparatively few survive as Red Gems. Population: 52 in 65 Red, 26 finer (10/10).
From The F.L. Ivy Rainbow Copper Collection. (#2332)

- 3232 1881 PR65 Red PCGS.** The fiery orange-gold surfaces display occasional splashes of lavender and sky-blue over the high points, and the strike is complete throughout. Devoid of mentionable contacts or spots, and housed in a first generation holder. Population: 52 in 65 Red, 26 finer (10/10).
From The F.L. Ivy Rainbow Copper Collection. (#2332)

- 3233 1892 PR66 Red PCGS.** A well struck and satiny specimen of the 1892 proof issue that will prove nearly impossible to surpass. Light pumpkin-gold surfaces have lavender and peach overtones. Population: 12 in 66 Red, 2 finer (10/10). (#2365)

- 3234 1901 PR65 Red NGC.** The fields flash brightly on each side, unimpeded by any darker coloration. Both sides display rich, original red mint luster.
From The F.L. Ivy Rainbow Copper Collection. (#2392)

- 3235 1903 PR65 Red PCGS. CAC.** Bright copper-orange luster shows occasional hints of lemon. The fields are bright and deeply mirrored, adding to the eye appeal of this lovely type coin. This Red Gem specimen is housed in a first-generation holder. Population: 36 in 65 Red, 43 finer (10/10).
From The F.L. Ivy Rainbow Copper Collection. (#2398)

1905 Indian Cent, PR67 Red Flashy and Highly Impressive as a Type Coin

- 3236 1905 PR67 Red NGC.** A delicate blend of copper-gold, orange, and light green is seen over both sides of this Red Superb Gem, and the strike is strong throughout, as one would expect from a proof. The surfaces are impeccably preserved, rounding out the picture of this coin's outstanding eye appeal. Census: 3 in 67 Red, 0 finer (10/10).
From The F.L. Ivy Rainbow Copper Collection. (#2404)

LINCOLN CENTS

1909 VDB Doubled Die Obverse, MS64 Red FS-1101, Strongly Doubled Digits in the Date

- 3237 1909 VDB Doubled Die Obverse, FS-1101, MS64 Red PCGS.** Of the two DDO cents of the 1909 VDB, the doubling on the FS-1101 is far more evident. Dual impressions are seen on all four digits of the date and RTY of LIBERTY. The FS-1101 is scarce in Uncirculated grades, and especially so in near-Gem and Gem condition. The surfaces are full red throughout with only two grade-limiting carbon spots, located within the C of CENT and the other to the left of the T in CENT.

**Beautiful 1909-VDB Cent Variant
FS-1101, Doubled Die Obverse, MS65 Red**

- 3238 1909 VDB Doubled Die Obverse, FS-1101, MS65 Red PCGS.** This sharp obverse doubled die has especially obvious doubling of RTY and 190 to the left and right of Lincoln's bust. It is a fully brilliant and highly lustrous example with frosty orange mint surfaces. This Gem has an orange-gold obverse and a golden-tan reverse. It has few peers. Population: 17 in 65 Red, 8 finer (10/10). (#82425)

- 3239 1909-S VDB VF20 NGC.** Gold-rose and violet overtones grace the deep brown surfaces of this VF piece. While small digs appear in the space to the right of Lincoln's head, the devices themselves are smooth. An appealing example of the key date. (#2426)

- 3240 1909-S VDB VF20 PCGS.** Moderately worn but mightily appealing for the grade, a 1909-S VDB cent with blue and violet overtones to deep walnut-brown surfaces. Small abrasions in the fields contribute to the grade. (#2426)

- 3241 1909-S VDB AU58 NGC.** Slight friction on the jaw and cheekbone indicates a momentary stint in circulation, but the chocolate-brown fields display satin luster, and no marks are consequential. A great coin to slot into an otherwise Mint State set. (#2426)

Popular 1909-S VDB Cent, MS65 Brown

- 3242 1909-S VDB MS65 Brown PCGS.** Although designated as Brown, this handsome Gem possesses much pumpkin-gold color, slightly faded to tan with the passage of a century. Fully struck except for the base of the initials, which are nonetheless clear. No marks are evident, and carbon is limited to a few pinpoint peripheral gray flecks. (#2426)

- 3243 1909-S VDB MS63 Red and Brown PCGS.** Mixed copper-gold and mahogany hues dominate this Select key-date Lincoln cent. The obverse has a partial woodgrain pattern at right, while the distribution of hues on the reverse is more freeform. (#2427)

**1909-S VDB Cent, MS64 Red and Brown
Attractive, Slightly Mellowed Surfaces**

- 3244 1909-S VDB MS64 Red and Brown NGC.** This always-popular issue from the first year of the Lincoln cent design has certainly survived the past century well. The surfaces have lovely orange-red and pale yellow color and the strike is complete, as one would expect from an S-VDB. Tiny, faint flyspecks are scattered over the obverse which explain the MS64 grade. (#2427)

Full Red 1909-S VDB Cent, MS63

- 3245 1909-S VDB MS63 Red PCGS.** This lovely yellow-gold tinted key date cent has booming luster and a crisp strike in all areas. The grade is limited only by several tiny flecks in the right obverse field and far fewer on the reverse. The 1909-S VDB has been a collector favorite and considered a key issue since the year of issue. (#2428)

Popular 1909-S VDB Cent, MS64 Red

- 3246 1909-S VDB MS64 Red PCGS. CAC.** Probably the single most popular American coin, and easily the most desirable Lincoln cent, the 1909-S VDB is known to collectors and non-collectors alike. This Choice Mint State piece has sharp design motifs with brilliant orange luster and only a few trivial spots. (#2428)

**1911-S Lincoln Cent, MS65 Red
Scarce Key Issue**

3247 1911-S MS65 Red PCGS. The 1911-S Lincoln cent is a key date in the series, and examples in Gem condition, with original red surfaces, are quite scarce. The present coin features sharply detailed design elements and good mint luster. Only a few dark flecks can be detected on close inspection. Population: 56 in 65 Red, 11 finer (10/10). (#2449)

3248 1914 MS65 Red PCGS. Rich copper-orange color shifts to rose and lavender on this dusky but charming Gem. Well-defined with wonderfully textured surfaces. PCGS has graded 49 finer Red representatives (10/10).(#2470)

3249 1914-D AU55 PCGS. Blue to violet overtones grace deep walnut-brown surfaces. A captivating Choice AU piece, minimally abraded and housed in a green label holder.(#2471)

Favored Near-Mint 1914-D Lincoln Cent

3250 1914-D AU58 PCGS. CAC. While it has a higher mintage than several other well-known Lincoln cent dates, the 1914-D is one of the most elusive in better circulated and Mint State grades, as it was among the least-saved of the early issues. This glossy chocolate-brown example has just a touch of rub and few marks, though it has picked up a touch of violet color over the course of nearly a century. (#2471)

Colorful MS64 Brown 1914-D Cent

3251 1914-D MS64 Brown NGC. CAC. The color is the most immediate source of eye appeal on this near-Gem 1914-D cent, which has a deep chocolate-brown base laced with blue and violet shades. Excellent design definition with just a few abrasions scattered in the obverse fields. Census: 47 in 64 Brown, 18 finer (10/10). (#2471)

Key 1914-D Lincoln Cent, MS64 Red and Brown

3252 1914-D MS64 Red and Brown PCGS. This key issue is certified in a small green-label holder. The fields on each side are faded lilac, with the devices and part of the fields alternating that shade with a medium brown. Some luster resides over each side, and no contact is evident. An interesting die crack runs from the obverse rim at 5 o'clock up onto the forward coat and to the bow tie. PCGS has graded 39 Red and Brown coins finer (10/10). (#2472)

Select Red 1914-D Lincoln Cent

3253 1914-D MS63 Red PCGS. The obverse has smooth, attractive copper-orange luster with hints of pink. The reverse adds prominent blue-violet dots and also a measure of carbon. Nonetheless, this solidly struck Select example displays well and will have plenty to offer the high-end Lincoln cent collector. (#2473)

3254 1914-S MS64 Red and Brown PCGS. Deep violet-brown through the centers but with appreciable copper-orange along the rims. A lovely near-Gem example of this underrated Lincoln cent issue with luminous surfaces that show few significant abrasions. PCGS has graded 16 finer Red and Brown pieces (10/10).(#2475)

3255 1917 MS66 Red PCGS. The pale surfaces range from pinkish-red to orange and have strong luster, especially on the reverse. The solidly struck devices are virtually mark-free, though deeper color and a hint of cloudiness appear around the devices. PCGS has graded 17 finer Red examples (10/10).(#2497)

3256 1918 MS66 Red PCGS. CAC. Both sides have pleasing orange-tan color with hints of purple iridescence. Blazing luster and an excellent strike with surfaces that are nearly pristine. A die crack (as struck) runs from the rim to the second T in STATES. PCGS has certified just 10 finer Red representatives (10/10).(#2506)

3257 1919-S MS64 Red PCGS. A frosty near-Gem with rich amber-to-violet coloration that is a shade deeper on the obverse. PCGS has certified just 21 Red examples in MS65 and higher (10/10). (#2521)

3258 1920-S MS64 Red PCGS. This sharply struck and beautiful near-Gem has light gold and apricot tints. Minor spotting, though carbon is negligible and the eye appeal is exemplary. Population: 83 in 64 Red, 9 finer (10/10).(#2530)

- 3259 1921 MS66 Red PCGS.** A blazing Red coin that boasts attractive surfaces with minimal carbon. The strike is sharp on the motto and wheat ears, without the often seen drawn lettering toward the rim. Strong eye appeal for this issue, elusive any finer despite a mintage of over 39 million pieces. PCGS has graded only 11 such Red coins (10/10).(#2533)

Bright, Full Red 1921-S Lincoln Cent, MS64

- 3260 1921-S MS64 Red PCGS.** This is a quality near-Gem representative of this conditionally scarce S-mint delivery. Unlike the majority of extant 1921-S cents, both sides of this coin retain full golden-orange luster. There are virtually no objectionable carbon spots or abrasions and the strike is suitable for the issue. A coin that should see spirited bidding. PCGS has graded just 17 finer Red examples (10/10).
Ex: Jack Lee Estate Collection (Heritage, 2/2009), lot 457. (#2536)

**1922 Lincoln Cent, AU55
No D, Strong Reverse**

- 3261 1922 No D Strong Reverse AU55 PCGS.** The prized Strong Reverse variety, struck from die pair No. 2, with the D mintmark effaced during repair work done to remove clashmarks. The present coin displays the expected softness of detail on the obverse, paired with the sharply defined reverse characteristic of this issue. The pleasing light brown surfaces are minimally abraded for the grade. Population: 69 in 55, 82 finer (10/10). (#3285)
- 3262 1923 MS66 Red PCGS.** Copper-orange to rose colors with strong and swirling luster. A charming example of this 1920s issue, well-defined and carefully preserved. PCGS has certified just 13 finer Red examples (10/10).(#2545)
- 3263 1924-D MS64 Red and Brown PCGS.** The 1924-D is one of the condition rarities in the Lincoln cent series, with fully brilliant red pieces seldom encountered. This piece is boldly defined with mostly reddish-orange surfaces that show slight mellowing to bluish-brown. (#2553)
- 3264 1924-D MS64 Red PCGS.** Well struck and lustrous with a couple of small marks on Lincoln's cheekbone and prominent lavender-violet elements against pale orange surfaces. PCGS has certified 39 finer Red examples (10/10).(#2554)
- 3265 1926-S MS64 Red and Brown NGC.** Pleasing reddish-tan and mint-green toning adorns the satiny surfaces of this well struck cent. The lustrous surfaces are carefully preserved, and a small mark on Liberty's cheekbone is the only obstacle to Gem status. NGC has graded 28 finer Red and Brown examples (10/10).(#2574)

- 3266 1927-S MS64 Red PCGS.** Pale copper-orange at the margins with fades to olive on the obverse and near-mahogany color on the reverse. A lustrous near-Gem that is housed in a green label holder. PCGS has graded 16 finer examples as Red (10/10).(#2584)

- 3267 1931-D MS65 Red PCGS. CAC.** This beautiful brick-red Gem exhibits sweeping luster and a minimum of pinpoint carbon. The strike is crisp except for minor softness on the AME in AMERICA. (#2617)

**1938-D Lincoln Cent, MS68 Red
Nearly Perfect**

- 3268 1938-D MS68 Red NGC.** The relatively low mintage of only 20 million coins was immediately noticed by collectors and numerous examples were set aside, but almost none are known in this grade. Only three coins have been certified in MS68 Red (2 at NGC and 1 at PCGS), and none are finer (10/10). The surfaces are expectantly near-perfect and each side shows even, original mint red. (#2671)

-
- 3269 1955 Doubled Die Obverse AU55 ANACS. FS-101.** A sharply struck representative of this classic doubled die variety. Lincoln's jaw and cheekbone display slight wear, but marks are minor and the olive-brown, ruby-red, and blue-green patina is attractive. (#2825)

- 3270 1955 Doubled Die Obverse AU55 PCGS. FS-101.** The doubled die classic that inspired many collectors to take up the field. This lightly worn example has blue and olive influences on glossy, deep brown surfaces. (#2825)

- 3271 1955 Doubled Die Obverse AU55 PCGS. FS-101.** Dramatic doubling is easily detected on the date and all obverse lettering. Only the slightest wear shows on this well detailed Choice AU specimen, with pleasing light brown surfaces. (#2825)

Choice Brown 1955 Doubled Die Obverse Cent

-
- 3272 1955 Doubled Die Obverse MS64 Brown NGC. CAC. FS-101.** An impressive example of this popular error. Traces of mint red in the protected areas enhance the mahogany patina that graces both sides. The doubling is extremely pronounced, as usual, and the strike is also razor-sharp. Just a couple of minor abrasions keep this piece from an even higher grade. NGC reports just 12 Brown pieces finer (10/10). (#2825)

- 3273 1971 Doubled Die Obverse MS65 Red PCGS Secure. FS-101.** The left side of the obverse is boldly doubled with lesser doubling at the right side. This lovely Gem has brilliant orange mint luster with frosty surfaces and excellent eye appeal. A few darker iridescent spots are evident. Population: 21 in 65 Red, 1 finer (10/10).(#38009)
- 3274 1982 Zinc, Small Date MS68 Red PCGS.** Bold copper-orange color with occasional variations into peach, most visibly at the right reverse. Carefully preserved with just a few small flecks in the fields.
- 3275 1982 Zinc, Large Date MS68 Red PCGS.** Light copper-to-peach color on the obverse with a more swirling, dusky appearance on the reverse. An impressively detailed charmer with considerable eye appeal.
- 3276 1982-D Zinc, Small Date MS68 Red PCGS.** Prominent peach, orange, and copper-gold hues mingle on each side. An exquisitely preserved piece of great importance to the Registry collector.

PROOF LINCOLN CENTS

- 3277 1909 PR64 Red and Brown PCGS.** The obverse is bright copper-orange save for the fingerprint at upper right, while the reverse has muted blue-brown and peach hues. An intriguing near-Gem of this matte proof design, the last of three produced in 1909.(#3304)
- 3278 1909 PR65 Red and Brown PCGS.** A great strike and charming mahogany-red coloration are the hallmarks of this beautiful first-year specimen. The matte surfaces are contact-free, and just a handful of tiny carbon flecks are noted on each side.(#3304)

1910 Matte Lincoln Cent, PR66 Red A Gorgeous, High-Grade Example

- 3279 1910 PR66 Red NGC.** The needle-sharp strike and high, squared-off rims attest to the proof status, as well as the full strike and mark-free surfaces. The obverse has bright orange-gold color, while the reverse is several shades deeper in hue. The satiny, mattelike surfaces only have a few scattered carbon specks. Census: 9 in 66 Red, 2 finer (10/10). (#3308)
- 3280 1911 PR64 Red PCGS.** Gold-to-orange color over the reverse and at the edges of the obverse, though the interior of the obverse has duskier hues rooted in brick-red. Minor disturbances of the matte surface account for the grade. Population: 22 in 64 Red, 35 finer (10/10).(#3311)
- 3281 1912 PR64 Red PCGS.** Light gold-orange on the obverse with slightly deeper color on the reverse. Well-defined with small areas of carbon on the matte surfaces. Population: 30 in 64 Red, 17 finer (10/10).(#3314)
- 3282 1913 PR65 Red PCGS.** Light apricot-gold color overall with occasional elements of lavender and olive. A charming Gem specimen of this popular matte proof Lincoln cent issue. Population: 41 in 65 Red, 28 finer (10/10).(#3317)

- 3283 1936 Type One—Satin Finish PR65 Red and Brown PCGS.** Copper-orange with a degree of fading and minor spotting on the obverse. A well struck and attractive Gem of the one-year Satin Finish subtype. Population: 26 in 65 Red and Brown, 4 finer (10/10).(#3331)
- 3284 1936 Type Two—Brilliant Finish PR65 Red and Brown NGC.** Predominantly orange-gold, but the obverse border displays cherry-red and sea-green along with a few pinpoint flecks. A fully struck specimen of this low mintage proof date.(#3334)

Amazing PR68 Red Ultra Cameo 1957 Lincoln Cent

- 3285 1957 PR68 Red Ultra Cameo NGC.** Both sides of this incredible 1957 Lincoln are fully brilliant with no toning or blemishes. It is a bright orange Superb Gem proof that displays fully mirrored fields and highly lustrous, boldly defined devices. Census: 3 in 68 Red Ultra Cameo, 0 finer (10/10). (#93380)
- 3286 1971-S PR69 Red Ultra Cameo NGC.** A virtually flawless specimen with gleaming copper-gold surfaces. Exactingly detailed with marvelous contrast and eye appeal in spades.(#93434)

Superlative 1971-S Doubled Die Cent, FS-101 PR69 Red Ultra Cameo

- 3287 1971-S Doubled Die Obverse PR69 Red Ultra Cameo NGC. FS-101.** A highly desirable Doubled Die obverse variety, the FS-101 is characterized by bold doubling on LIBERTY, with slight doubling on the date. Slight doubling is also visible on IN GOD of the motto. This amazing near-perfect Ultra Cameo proof cent has brilliant orange surfaces with nicely mirrored fields around its frosty devices. (#93533)
- 3288 1998-S Close AM PR68+ Red Deep Cameo PCGS. FS-901.** A mix-up between business strike and proof designs led to this intriguing variant. Great contrast with just a few tiny disturbances visible under magnification.(#93529)
- 3289 1998-S Close AM PR69 Red Deep Cameo PCGS. FS-901.** A virtually flawless example of this increasingly popular variant. Pale copper-gold mirrors are boldly reflective, while the devices offer frosty contrast. For the variety, Population: 64 in 69 Red Deep Cameo, 0 finer (10/10).(#93529)

TWO CENT PIECES

- 3290 1864 Large Motto MS65 Red PCGS. CAC.** Strong copper-orange color prevails on this Red Gem, though elements of paler gold and deeper near-umber are also present. Well struck and an intriguing selection for the type collector. PCGS has graded 47 finer Red pieces (10/10).(#3578)

Lovely Red Gem 1866 Two Cent

- 3291 1866 MS65 Red PCGS.** A shimmering brick-red two cent beauty with peach and green-gold hues. A small violet spot above the middle of the obverse banner appears only at certain angles. Precisely struck and minimally abraded with minor strike doubling on the reverse legends. Population: 35 in 65 Red, 7 finer (10/10).(#3590)

PROOF TWO CENT PIECES

- 3292 1866 PR64 Red PCGS.** Rich gold-to-orange color with a few splashes of peach. This entirely Red example has bold detail and only a few scattered hairlines to preclude an even finer designation. Population: 14 in 64 Red, 33 finer (10/10).(#3632)

Richly Colored 1872 Two Cent Piece, PR66 Red and Brown

- 3293 1872 PR66 Red and Brown NGC.** Bluish-purple and cherry-red colors are seen over the obverse of this Premium Gem while the former palette dominates the reverse. The design elements are strongly struck and reveal pleasing variance with the reflective obverse fields. No mentionable contact marks or spots are evident on the well-preserved surfaces. Census: 35 in 66 Red and Brown, 4 finer (10/10).
From The F.L. Ivy Rainbow Copper Collection. (#3649)

- 3294 1872 PR65 Red NGC.** This satiny and contact-free Gem boasts an unimprovable strike, and the apricot-gold surfaces have only a hint of mellowing to gray. The N in IN is faintly die doubled, diagnostic for proofs of this low mintage date. Census: 21 in 65 Red, 5 finer (10/10).(#3650)

- 3295 1873 Closed 3 Genuine PCGS. Proof.** The PCGS number ending in .94 suggests Altered Surfaces as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, the piece has the details of a PR60 specimen that has been lightly cleaned. Outer olive-brown toning and interior walnut-brown hues, the latter covering almost the entirety of the obverse, show muted reflectivity after a past cleaning.

THREE CENT SILVER

- 3296 1852 MS66 PCGS. CAC.** Impressively lustrous with a pillow appearance. Light blue and gold toning drapes slightly satiny surfaces. Carefully preserved and housed in a green label holder. PCGS has graded 13 coins finer (10/10).(#3666)

- 3297 1861 MS66 PCGS. CAC.** Magnificently toned forest-green, rose-red, navy-blue, and straw-gold. Struck with medal turn, unusual for the series. A satiny and immaculate Premium Gem from the incipient year of the Civil War. Population: 72 in 66, 25 finer (10/10).(#3679)

PROOF THREE CENT SILVER

CAC Gold Label 1859 Three Cent Silver, PR65

- 3298 1859 PR65 PCGS. CAC Gold Label.** Rich gold, green, and blue-plum patina embraces each side of this immensely reflective proof three cent silver. Great eye appeal for early in the series and a simply gorgeous coin, appreciably better-preserved than the "PR65" label on the insert in the first-generation holder. (#3708)

- 3299 1870 PR64 PCGS.** A deeply toned Choice Cameo proof, this three cent piece has bold design motifs with lustrous devices and deeply mirrored fields. A prominent lint mark is evident at the left side of the date. (#3721)

- 3300 1870 PR63+ Cameo PCGS. CAC.** Though not quite near-Gem material, this is an outstanding coin for the Select proof level. Patina ranges from deep cerulean at the margins to lighter gold-orange washes over the centers. Great frost on the devices. (#83721)

- 3301 1873 PR65 NGC.** A gleaming final-year Gem specimen, richly toned ocean-blue and edged in green with a pale gold-to-gray center on the reverse. Sharp eye appeal. Census: 63 in 65, 30 finer (10/10).(#3724)

Gem Proof 1873 Trime Closed 3

- 3302 1873 PR65 NGC.** Only 600 proof trimes were minted in 1873 and no business strikes were produced. All examples seen employ a closed 3 in the date. Vivid shades of lime-green and lavender toning visit the surfaces of this delightful Gem. The devices are sharply detailed and the surfaces are brightly reflective, under the patina. (#3724)

Beautiful 1873 Three Cent Silver, PR67 ★

- 3303 1873 PR67 ★ NGC.** This is one of the finest certified examples from the fateful final year of the three cent silver series, one of several coin series legislated out of existence by the “Crime of ‘73.” The 1873 three cent silver were issued only in proof format, all with the Close 3 date style. Glints of scarlet and ice-blue generously coat both sides of this Superb Gem, which is wonderfully distraction-free. This coin, one of two non-Cameos at this highest certified grade level, would be a super acquisition for last-year-of-type collectors. (#3724)

THREE CENT NICKELS

- 3304 1869 MS66 NGC. CAC.** Honey-gray toning and exemplary luster combine with a bold strike to ensure imposing eye appeal. A strong loupe locates a single imperfection, a hair-thin vertical mark near the third column of the denomination. Census: 14 in 66, 0 finer (10/10). (#3735)
- 3305 1871 MS65+ PCGS. CAC. Triple Die Obverse FS-101.** Evidence of the obverse tripling is visible on the letters of this impressive Gem. Both sides are highly lustrous with sharp design details. Both sides show light clash marks. (#3737)
- 3306 1879 MS66 NGC. CAC.** A pleasing Premium Gem with a curious blend of shining and satiny luster. Over-polished reverse dies show broken details at the bottom of the wreath, but the portrait is decently struck. (#3747)

1880 Three Cent Nickel, MS67 Only 21,000 Pieces Minted

- 3307 1880 MS67 NGC.** Late-date business strike three cent nickels have been widely recognized for decades as rarities, yet they are largely ignored by collectors. Only 21,000 circulation strikes were produced in 1880. The surfaces of this piece are smooth, blemish-free, and satiny with a light accent of rose patina. Superlative quality. Census: 5 in 67, 0 finer (10/10). (#3748)
- 3308 1888 MS66 PCGS.** A remarkable Premium Gem, this example has frosty nickel-gray luster with delicate champagne toning. The strike is bold and the eye appeal is excellent. Minor lamination is seen on the reverse. Population: 57 in 66, 36 finer (10/10). (#3757)

PROOF THREE CENT NICKELS

Low-Mintage 1865 Three Cent Nickel, PR65 Rich, Variegated Toning

- 3309 1865 PR65 PCGS.** There was a small mintage of 500 proof three cent nickels in 1865, the first date of the series. The present coin is a splendid Gem example, with the expected full strike and no mentionable distractions. Rich shades of lilac and pale golden toning enhance both sides of this solid Gem proof. Population: 48 in 65, 14 finer (10/10). (#3761)

1865 Three Cent Nickel, PR65 Cameo Only 500 Pieces Minted

- 3310 1865 PR65 Cameo PCGS. CAC.** From a minuscule mintage of only 500 pieces, the 1865 proof three cent nickel is scarce in all grades, and rare at the exalted PR65 Cameo level. The present coin exhibits razor-sharp details on all design elements, and the frosty devices contrast boldly with the brilliant reflective fields. Population: 24 in 65 Cameo, 23 finer (10/10). (#83761)
- 3311 1867 PR66 Cameo PCGS.** Great field-device contrast on this gold-tinged nickel-white piece, which offers a clean look and a stripe of deeper pinkish-gold bisecting the obverse. Among the finest Cameos certified at PCGS from this proof mintage estimated at 625 coins. Population: 19 in 66 Cameo, 0 finer (10/10). (#83763)
- 3312 1868 PR66 Cameo NGC.** Fully brilliant with bright, watery mirrors that contrast nicely with the design elements. A scarcer early issue with cameo qualities and seldom found this nice. Census: 18 in 66 Cameo, 8 finer (10/10). (#83764)
- 3313 1875 PR65 NGC.** Gold and pink-rose toning over pale pearl-gray surfaces. Strongly mirrored and attractive for this issue which is seldom found any finer. NGC has graded only nine such non-Cameo coins (10/10). (#3771)
- 3314 1878 PR66+ Cameo NGC. CAC.** An incredible Premium Gem Cameo proof with the additional Plus designation from NGC, this beauty exhibits boldly defined and lustrous devices with a frame of full and deep mirrors. This is the only 1878 proof that NGC has assigned the Plus designation. (#83774)

**Tied for Finest 1879 Three Cent Nickel
PR68 Cameo**

3315 1879 PR68 Cameo NGC. An absolutely gorgeous Superb Gem Cameo proof, this 1879 three cent piece is equal to the finest that either NGC or PCGS have ever graded. In fact, only NGC has certified any of these at the PR68 grade level. This piece is fully and deeply mirrored in the fields around frosty white devices. No toning is evident on either side. Census: 6 in 68 Cameo, 0 finer (10/10). (#83775)

3316 1881 PR67 ★ Cameo NGC. CAC. An incredible Superb Gem, this Cameo proof is one of the finest at its grade level. Both sides are fully mirrored with lustrous and sharply detailed devices. Census: 4 in 67 ★ Cameo, 7 finer (10/10). (#83777)

3317 1882 PR67 PCGS. Light green, blue, and violet overtones with pools of reflectivity in the fields. An exquisitely preserved, faintly contrasted beauty that is housed in a green label holder. PCGS has graded just seven coins finer (10/10). (#3778)

3318 1886 PR66 NGC. A lightly gold-toned Premium Gem struck from heavily polished dies. Comes with a plush case, certificate of authenticity, and outer cardboard box. (#3782)

3319 1886 PR67+ Cameo NGC. CAC. A fully brilliant Superb Gem with flashy fields and frosty motifs. A practically perfect example of this popular proof-only date. The second-highest NGC-graded 1886 three cent nickel, surpassed only by a solitary non-Cameo PR68 (10/10). (#83782)

3320 1887 PR66 NGC. Pale blue and gold accents over pearl-gray mirrors. A lovely Premium Gem specimen of this later-date three cent nickel issue. Census: 28 in 66, 1 finer (10/10). (#3783)

SHIELD NICKELS

3321 1866 Rays MS65+ NGC. The first year of issue for the nickel five-cent piece, and this splendid Gem is an excellent representative of the two year With Rays type. Both sides are light gray with satin luster and delicate gold toning. Census: 1 in 65+, 25 finer, none with the + designation (10/10). (#3790)

3322 1880 XF45 NGC. CAC. A problem-free Choice XF example with stone-gray and almond-gold toning. A mintage of 16,000 pieces ensures that business strike 1880 nickels are rarities, although proofs can be located without difficulty. (#3810)

3323 1881 MS64 NGC. A strongly lustrous near-Gem example of this popular low-mintage issue. Minimally toned in the centers but with distinct elements of green-gold close to the rims. Census: 14 in 64, 46 finer (10/10). (#3811)

PROOF SHIELD NICKELS

**1866 Shield Nickel, PR66
In-Demand, Two-Year Rays Type**

3324 1866 Rays PR66 PCGS. CAC. Pale green and violet patina enhances the pristine surfaces of this spectacular Premium Gem proof Shield nickel. The reported mintage of 600 pieces has been challenged by some experts, and estimates vary considerably from one authority to another. Certainly, only a few survivors can match the appeal of this magnificent coin, as PCGS has certified only one example in higher numeric grade (10/10). Housed in a green label holder. (#3817)

Gem Cameo Proof 1866 Rays Nickel

3325 1866 Rays PR65 Cameo NGC. This first-year nickel is immensely popular for its Rays Reverse subtype, the only readily collectible proof date with that feature. Pale nickel-blue surfaces are impressively mirrored, and lightly frosted devices contribute to the piece's appreciable contrast. Census: 17 in 65 Cameo, 34 finer (10/10). (#83817)

**1866 Shield Nickel, PR67 ★ Cameo
Popular First-Year Type Coin**

3326 1866 Rays PR67 ★ Cameo NGC. Always in demand as the first date of a two-year design type, the 1866 Rays Shield nickel is doubly popular because its 1867 Rays counterpart is extremely rare. The present coin is virtually unimprovable, with razor-sharp definition on all design elements and deeply mirrored fields. The field-device contrast is dramatic. Currently, this coin is the only specimen certified PR67 ★ Cameo by NGC, with none finer (10/10). (#83817)

- 3327 1875 PR65 PCGS. CAC.** Pastel sun-gold and powder-blue toning denies full brilliance. Crisply struck and satiny. A few minute flecks on the lower reverse are of little import. A mere 700+ proofs were sold. Population: 62 in 65, 9 finer (10/10).(#3829)

Eye-Catching PR65+ Ultra Cameo 1876 Nickel

- 3328 1876 PR65+ Ultra Cameo NGC.** The sole PR65+ Ultra Cameo example of this issue certified by NGC, with just five numerically finer Ultra Cameo coins at that service (10/10). Excellent contrast with just a hint of gray patina in the gleaming fields and rich frost over the central devices. A touch above even Gem standards. (#93830)
- 3329 1881 PR67 PCGS. CAC.** An eye-catching Superb Gem with considerable contrast, though the green label holder does not list any kind of Cameo designation. Light blue and gold-green pastel-tones drape each side. Population: 22 in 67, 0 finer (10/10). (#3836)
- 3330 1881 PR67 NGC.** Lightly gold-toned with hints of green and windows of peripheral nickel-white. A faintly contrasted Superb Gem specimen that is popular thanks to its associated business strike. (#3836)

LIBERTY NICKELS

- 3331 1883 No Cents MS67 NGC.** This highly lustrous Superb Gem exhibits fully frosty white luster with bold design details. The No Cents nickel represents the first year of the Liberty series in combination with a one-year design type. Census: 52 in 67, 0 finer (10/10).(#3841)

**1884 Liberty Nickel, MS66+
The Only MS66+ Certified to Date**

- 3332 1884 MS66+ NGC.** While the 1884 is considered a common date, earlier issues such as this one simply were not set aside in the quantities that later dates were. When both services are combined, only 32 pieces have been certified in MS66 (15 at NGC) and only one piece is finer (10/10). The surfaces on this example are smooth and satiny with pale rose and lilac toning on each side. This exceptionally attractive piece is fully struck except on the left ear of corn. (#3845)

- 3333 1885 XF45 PCGS.** A lightly worn Choice XF example of the popular low-mintage date with rose accents across steel-gray surfaces. Well struck in the centers but with business-strike-confirming softness at the stars near the coronet. (#3846)

- 3334 1886 AU58 PCGS. CAC.** A luminous example of this semikey issue, pearl-gray and dove with gold-green at the peripheral obverse and central reverse. Streaky but appealing with just a hint of rub on the high points. (#3847)
- 3335 1899 MS66 PCGS.** Better-defined than usual on the obverse stars, though the bottom of the wreath is a trifle soft. Light pearl-blue and olive shadings grace lustrous medium-gray surfaces. Population: 52 in 66, 1 finer (10/10).(#3860)
- 3336 1912 MS66 PCGS. CAC.** Lovely golden-bronze toning adorns the intensely lustrous, virtually pristine surfaces of this Premium Gem example. The striking definition is extremely bold, and only the left ear of corn shows noticeable weakness. Population: 23 in 66, 0 finer (10/10).(#3873)
- 3337 1912-D MS65 PCGS.** A lovely Gem example of the first D-mint nickel, well-defined on the obverse portrait and left stars. Shining surfaces are minimally toned overall, though whispers of olive visit the fields. PCGS has certified 29 coins finer (10/10).(#3874)

Distinctively Toned MS64+ 1912-S Nickel

- 3338 1912-S MS64+ PCGS.** This example of the popular S-mint Liberty nickel key puts the "near" in "near-Gem." The obverse has gold-to-orange peripheral toning and minor softness on certain stars, while the reverse has more streaky patina that incorporates sage and muted mauve. A small mark appears on the lower portion of the large letter V within the wreath. (#3875)

**Choice 1912-S Liberty Head Nickel
Only S-Mint Issue**

- 3339 1912-S MS64 PCGS. CAC.** From a series-low mintage of 238,000 pieces, the 1912-S Liberty Head nickel is always in demand as the only date of the type from the San Francisco Mint. The present coin is a remarkable Choice specimen, with vibrant mint luster, brilliant surfaces, and a razor-sharp strike. (#3875)

**Gem 1912-S Liberty Head Nickel
Sought-After, Low-Mintage Issue**

- 3340 1912-S MS65 PCGS.** Always in demand because of its low mintage of 238,000 pieces and its status as the only S-mint Liberty Head nickel, the 1912-S is a desirable coin in any grade. The present coin is a delightful Gem, with sharp details, and attractive gold and ice-blue patina. Currently, PCGS has certified only 8 coins in higher numeric grades (10/10). (#3875)

PROOF LIBERTY NICKELS

- 3341 1883 No Cents PR66 Cameo NGC. CAC.** A fully brilliant Premium Gem Cameo proof, one of the most appealing examples we have handled. This lovely representative of the No Cents design is captivating with its white nickel surfaces and sharp design elements. Census: 58 in 66 Cameo, 18 finer (10/10).(#83878)
- 3342 1883 With Cents PR66 Cameo PCGS. CAC.** Frosty devices contrast with mirrored fields, despite a hint of sun-gold toning on each side. Three different designs of proof nickels were offered in 1883, to the delight of contemporary numismatists. Population: 24 in 66 Cameo, 1 finer (10/10).(#83881)
- 3343 1885 PR65 NGC.** Green-gold and mint hues over strongly mirrored surfaces. A well-defined Gem proof specimen of an issue made famous by its low-mintage business strike counterpart. (#3883)
- 3344 1886 PR65 Cameo NGC. CAC.** Green-gold and lavender-blue toning embraces each side of this Cameo Gem. A boldly reflective and moderately contrasted coin that should find favor with a high-level collector. Census: 13 in 65 Cameo, 25 finer (10/10). (#83884)
- 3345 1890 PR65+ Cameo PCGS. CAC.** A remarkable Gem Cameo proof with the Plus designation from PCGS, this beauty has bright nickel-gray surfaces with excellent eye appeal. Both sides have bold design motifs with lustrous devices and deeply mirrored fields. Population: 1 in 65+ Cameo, 6 finer (10/10).(#83888)

Gem Ultra Cameo Proof 1891 Nickel

- 3346 1891 PR65 Ultra Cameo NGC.** Outstanding field-to-device contrast is key to this Gem's eye appeal. While a few splashes of whitish-gray color appear in the areas surrounding the frosted central devices, the essential cameo effect of each side is essentially undimmed. A carefully preserved specimen, hence the PR65 designation. Census: 2 in 65 Ultra Cameo, 4 finer (10/10). (#93889)

- 3347 1893 PR66 Cameo PCGS.** Saturated yellow toning with undercurrents of green. Bold mirrors shine through the patina, and the faintly frosted devices supply appreciable contrast. A lovely piece. Population: 17 in 66 Cameo, 8 finer (10/10).(#83891)
- 3348 1897 PR66 Cameo NGC.** Medium honey-gold toning enriches this fully struck and pristine Premium Gem. A wonderful representative of Charles Barber's Victorian-era design. Census: 17 in 66 Cameo, 11 finer (10/10).(#83895)
- 3349 1900 PR66 Cameo PCGS.** Light gold toning adorns this flashy high grade specimen. The strike is good aside from the left ear of corn, the Achilles' heel of the design as it is opposite the highest relief portion of the portrait. Population: 16 in 66 Cameo, 10 finer (10/10).(#83898)
- 3350 1901 PR67 NGC.** Pastel olive-green, apricot, and ice-blue patina graces this boldly struck and contact-free Superb Gem. A trace of a fingerprint near star 13, but otherwise virtually pristine. Encased in a prior generation holder. (#3899)
- 3351 1901 PR66 Cameo PCGS. CAC.** Pleasing mint frost throughout the portrait contrasts favorably with the glassy obverse field. The wreath is also icy, and toning is limited to a hint of tan on the reverse center. Population: 11 in 66 Cameo, 6 finer (10/10). (#83899)
- 3352 1902 PR66 PCGS. CAC.** Brilliant and satiny with a razor-sharp strike and an undisturbed appearance. A high grade proof type coin. The 1902 is generally encountered with only modest white on black contrast. PCGS has yet to certify a Deep Cameo example. Population: 60 in 66, 11 finer (10/10).(#3900)
- 3353 1903 PR66+ Cameo NGC. CAC.** Faint golden toning cannot deny the dazzling reflectivity of the mirrored fields of the present Premium Gem. Intricately struck and pristine despite a small mint-made strike-through near star 8. Census: 4 in 66+ Cameo, 12 finer (10/10).(#83901)
- 3354 1904 PR66 PCGS. CAC.** A stunning Premium Gem proof, this 1904 nickel has satiny devices and mirrored fields visible beneath delicate gold and blue toning. Population: 35 in 66, 3 finer (10/10). (#3902)
- 3355 1909 PR64 Deep Cameo PCGS.** A lovely Deep Cameo proof, this Choice specimen has wispy gold toning over its light gray surfaces. Both sides have a bold strike and outstanding eye appeal. Population: 1 in 64 Deep Cameo, 7 finer (10/10).(#93907)

**1911 Liberty Head Nickel, PR68 ★
Finest Certified at NGC**

- 3356 1911 PR68 ★ NGC.** Proof mintage of Liberty Head nickels dropped considerably in 1911, to just 1,733 pieces. The present coin is an incredible specimen, with spectacular golden-brown, green, and ice-blue toning. The devices are sharply rendered, and the pristine fields are brightly reflective, under the patina. Census: 1 in 68 star, 0 finer (10/10). (#3909)
- 3357 1912 PR66 Cameo PCGS. CAC.** This fully struck Liberty nickel features beautiful caramel-gold, ice-blue, and olive-green toning. A faint hair-thin vertical line is noted on the portrait. Population: 17 in 66 Cameo, 4 finer (10/10).(#83910)

BUFFALO NICKELS

- 3358 1913 Type One MS67 PCGS. CAC.** A stunning example of the Type One design, this Superb Gem has frosty gray luster with incredible iridescent toning and sharp design motifs. It possesses wonderful eye appeal. PCGS has only certified 12 finer pieces (10/10). (#3915)
- 3359 1913 Type One MS67 PCGS.** A splendidly toned Superb Gem of this briefly issued subtype, which represents the design as intended by its engraver, James Earle Fraser. Lustrous and well struck with orange-gold, fire-red, silver-blue, and olive patina. Certified in an older generation holder. (#3915)

Superb Gem 1913-S Type One Nickel

- 3360 1913-S Type One MS67 PCGS.** The most challenging of the Type One Buffalo nickel issues, its mintage of just over 2.1 million pieces less than half that of its D-mint counterpart. Well struck for the type despite die erosion that appears as peripheral weakness and strongly frosty luster under gold and lavender-gray patina. Population: 17 in 67, 1 finer (10/10). (#3917)

Elusive 1914/3 Buffalo Nickel, MS62

- 3361 1914/3 MS62 PCGS. FS-101.** The crossbar of the 3 is unmistakable on this second-year Buffalo nickel. The satiny olive-gray surfaces are impressively devoid of contact, and although the centers are incompletely brought up, peripheral design elements are crisply defined. The fields provide an orange-peel texture, as coined from late-in-life dies. A very scarce *Guide Book* variety. (#93924)

1915-D Nickel, MS66

Sharply Struck and Exceptionally Well Preserved

- 3362 1915-D MS66 PCGS.** The eye appeal is extraordinary, each side displaying dominant antique-gold patina with blushes of salmon-pink iridescence intermingled toward the borders. Although the 1915-D as an issue is the first poorly struck Buffalo nickel from the Denver Mint (per Lange, 2006), the present example is sharply detailed throughout. The surfaces are problem-free save for some scattered flyspecks, all of which are faint, and none of which are individually distracting. The 1915-D (7.5 million pieces produced), while somewhat scarce in lower grades, should only really be considered rare in grades at or above the Gem threshold. Population: 29 in 66, there are just two finer (10/10). Ex: 2006 June Long Beach Auction (Heritage, 6/2006), lot 766. (#3928)

Splendid 1926-S Buffalo, AU58

- 3363 1926-S AU58 PCGS. CAC.** Just a trace of wear is evident on the high points of this satiny near-Mint 1926-S Buffalo, a highly desirable issue in all grades. This piece exhibits nickel-gray surfaces with splendid gold and iridescent toning on both sides, and it will fit nicely in an otherwise full Mint State collection of the Buffalo series. (#3959)
- 3364 1931-S MS66 PCGS. CAC.** Bold gold-orange toning over the margins with more muted sage-gray patina covering the centers. A lustrous Premium Gem from an issue of 1.2 million pieces. PCGS has graded just two coins finer (10/10). (#3971)

Extremely Rare 1935 FS-801 Nickel Doubled Die Reverse, MS61

- 3365 1935 MS61 NGC. Doubled Die Reverse. FS-801.** This variety has obvious die doubling on the denomination and the motto, and it is considered one of the most popular Buffalo nickel varieties. Bill Fivaz and J.T. Stanton write that only about 10 of these coins are known in Mint State grades. This piece is lustrous with frosty gray surfaces and light gold toning. (#3974)

- 3366 1935-D MS66+ PCGS. CAC.** Indisputably high-end for an MS66 piece and gorgeous to boot with frosty luster under a thin layer of gold and orange patina. PCGS has certified just five numerically finer examples (10/10). (#3975)
- 3367 1936-S MS67 PCGS.** Light blue overtones on pale nickel-gray surfaces. A gracefully patinated Superb Gem with solid detail and generous luster. Population: 60 in 67, 0 finer (10/10). (#3979)
- 3368 1937-D Three-Legged AU53 NGC. FS-901.** A lightly circulated example of the popular collector classic. Sage, gold, gray, and peach shadings drape still-lustrous, mildly abraded surfaces. (#3982)
- 3369 1937-D Three-Legged AU58 NGC. CAC. FS-901.** A luminous, minimally worn representative of the famous variety. Soft luster filters through rich rose, orange, and nickel-gray patina. Few significant marks. (#3982)
- 3370 1937-D Three-Legged AU58 NGC. FS-901.** Just a touch of rub separates this Three-Legged nickel from a Mint State designation. Luminous surfaces show prominent peach, copper-yellow, and rose overtones. (#3982)
- 3371 1937-D Three-Legged AU58 NGC. FS-901.** Chestnut-gold, lilac, and ice-blue toning blankets this shimmering and unmarked key date nickel. Only slight wear is noted on the bison's hip and flank. Die diagnostics are accounted for, such as the clusters of minute die dots between the legs. (#3982)
- 3372 1937-D Three-Legged MS61 NGC. FS-901.** Luminous and beautiful, a trifle abraded on the high points but a coin of great visual appeal for the MS61 designation. Gray devices give way to peach and yellow toning in the fields. (#3982)

1937-D Three-Legged Nickel, MS62 Pleasing, Satiny Example

- 3373 1937-D Three-Legged MS62 PCGS. FS-901.** David Lange reports in *The Complete Guide to Buffalo Nickels* that the distribution of the 1937-D Three-Legged Buffalos occurred first in Montana, with "most examples coming from that part of the country. This account helps to explain why so few uncirculated examples are known, coin collectors being equally scarce in that part of the country."
- It is true that, compared to their incessant demand, the 1937-D Three-Leggeds are scarce in Mint State, but many pleasing AU, Choice AU, and near-Mint State examples appear regularly on the market. Mint State examples usually top out at the MS63 level, with far more appearing in MS61 and MS62. Near-Gems are seldom seen, and Gems or finer are quite rare. This is an especially pleasing coin for the grade with bright, satiny mint luster and even, golden-toned surfaces that have no obvious or mentionable abrasions. (#3982)

Famous Three-Legged 1937-D Nickel, MS64

- 3374 1937-D Three-Legged MS64 PCGS. FS-901.** Rich apricot and gunmetal shades grace this coruscating and unabraded Choice key date nickel. In his 1988 *Encyclopedia*, Walter Breen targeted hapless Mr. Young as the mint worker responsible for abrading away the bison's leftmost foreleg. Young has since been mentioned in so many catalog descriptions over the years that he could sue for libel if he is still with us to this day. MS64 is much higher in grade than the typical example of this famous variety, which is generally encountered in VF through AU. (#3982)

Patinated MS68 ★ 1938-D Nickel

- 3375 1938-D MS68 ★ NGC.** Unusual fire-red, lemon-gold, and apple-green toning blankets the obverse. The reverse is also colorful, as it provides iridescent lime and sun-gold tints. The centers show slight inexactness of strike, but both sides appear devoid of contact. A memorable example from the terminal year of the popular Americana series. (#3984)

PROOF BUFFALO NICKELS

PR66 1916 Buffalo Nickel One of 600 Proofs Struck

- 3376 1916 PR66 PCGS.** The luminous surfaces of this Premium Gem proof are bathed in soft pastels of violet, ice-blue, beige-gold, and reddish-orange patina. The design elements are well brought up, befitting a proof strike. A single small fleck at the lower right obverse rim does not detract. Population: 78 in 66, 33 finer (10/10). (#3993)

1916 Buffalo Nickel, PR67
Only One Coin Certified Finer at NGC

- 3377 1916 PR67 NGC.** Only 600 proof Buffalo nickels were minted in 1916, the last year of the Mint's classic matte proof offerings. This example is a magnificent Superb Gem, with fully struck design elements. The lustrous surfaces are patinated in glorious shades of gold and ice-blue. Census: 19 in 67, 1 finer (10/10). (#3993)

JEFFERSON NICKEL

- 3378 1968-S MS65 Full Steps PCGS.** Light green-gold to yellow toning graces this Gem Full Steps piece, though it breaks in small windows to permit pearl-gray color. Lustrous and important. Population: 5 in 65 Full Steps, 3 finer (10/10).(#84081)

PROOF JEFFERSON NICKELS

Desirable 1942-P Wartime Nickel
PR66 Cameo

- 3379 1942-P Type 2 PR66 Cameo PCGS.** The only War nickels struck in proof were coined in 1942, and these coins are effectively one-year type coins for proof collectors. This Premium Gem Cameo proof is fully brilliant with highly lustrous devices and fully mirrored fields. This piece is a borderline Deep Cameo proof and highly desirable. Population: 4 in 66 Cameo, 0 finer (10/10). (#84180)
- 3380 1959 PR69 Cameo PCGS.** Moderate contrast and outstanding eye appeal, thanks to a thin layer of caramel-gold patina across gleaming surfaces. This delightful specimen is housed in a green label holder. Population: 2 in 69 Cameo, 0 finer (10/10). (#84191)

EARLY HALF DIMES

1795 Flowing Hair Half Dime, XF45
Slightly Scarce V-4, LM-10 Variety

- 3381 1795 XF45 PCGS. V-4, LM-10, R.3.** A mintage of 78,600 Flowing Hair half dimes was achieved in 1795, and 10 different die varieties are known for the date. The present coin represents the slightly scarce LM-10 variety, with star 15 joined to the bust on the obverse, and no inner berries plus one outer berry under the left wing on the reverse. This specimen retains much original detail and luster under light lavender patina.
From The Eagle Harbor Collection, Part Two. (#4251)

V-2, LM-1 1797 15 Stars Half Dime, Fine 15

- 3382 1797 15 Stars Fine 15 PCGS. V-2, LM-1, R-3.** Aquamarine and lilac colors embrace this elusive early type coin. All legends are bold, and some definition is present on Liberty's lower tresses. A short pinscratch above the hair curls is of little consequence. Great all-around eye appeal for the grade and a worthwhile representative.
From The Sandy Beach Collection. (#4258)

1797 Draped Bust Half Dime, XF45
V-4, LM-2

- 3383 1797 16 Stars XF45 PCGS. V-4, LM-2, R.4.** The LM-4 variety is identified by the 16 obverse stars, and the position of the outer berry between NI in UNITED on the reverse. Much fine detail remains on the obverse, including some dramatic clash marks in the right field. The reverse displays less detail, and a die break is evident through E in UNITED. The pleasing surfaces are lustrous, with wisps of gold and blue patina.
From The Eagle Harbor Collection, Part Two. (#4259)

- 3384 1800 Genuine PCGS. V-1, LM-1, R.3.** The PCGS number ending in .84 suggests Holed and/or Plugged as the reasons, or perhaps among the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VF specimen that has been holed, plugged, and whizzed. Re-engraving on the tail feathers and the uppermost curl of the portrait indicates the location of the plug. A mildly granular charcoal-gray example of the scarce Heraldic Eagle type. (#4264)

**1800 Draped Bust Half Dime, XF45
V-1, LM-1**

- 3385 1800 XF45 PCGS. V-1, LM-1, R.3.** The most available of the four die varieties of the date, the LM-1 is recognized by the well spaced left obverse stars. This specimen is lightly worn, with attractive, lustrous surfaces, and well detailed devices. Housed in a green label holder. Population: 15 in 45, 97 finer (10/10).
From The Eagle Harbor Collection, Part Two. (#4264)

- 3386 1800 LIBEKTY Good 4 PCGS. CAC. V-2, LM-3, R.4.** A LIBEKTY obverse with the Y distant from the closest star. A well-worn but pleasing gold-to-gray example that is housed in a second-generation PCGS holder. (#4265)

**1800 LIBEKTY Half Dime, AU50
Richly Toned V-2, LM-3 Variety**

- 3387 1800 LIBEKTY AU50 PCGS. V-2, LM-3, R.4.** A defective R punch led to this popular *Guide Book* variety. The 8 in the date was apparently formed by entering two small 0 punches one on top of the other. These die features indicate the primitive nature of the early U.S. Mint. The present AU example has pleasing sea-green, russet-brown, and dove-gray toning. Design definition is soft in places, especially below the eagle's beak, created by the die break in that area, usual for the V-2 marriage. Mark-free and attractive with noticeable remaining luster. (#4265)

**1803 Draped Bust Half Dime, VF35
Elusive V-1, LM-2 Variety**

- 3388 1803 Large 8 VF35 PCGS. CAC. V-1, LM-2, R.4.** A nicely detailed Choice VF walnut-brown representative of the scarce Heraldic Eagle type. The LM-2 variety is identified by the large 8 in the date and the leaf joined to C on the reverse. The open fields display hints of sky-blue. Study beneath a lens cannot locate any abrasions. The eye appeal is further improved by the strike, which is consistent save for the upper left reverse star, struck opposite the high relief of Liberty's shoulder. Population: 6 in 35, 38 finer (10/10). (#4269)

BUST HALF DIME

- 3389 1835 Large Date, Small 5C MS64+ PCGS. V-9, LM-6, R.2.** Bold and swirling luster is surprisingly silver-white on this 1835 half dime. Only small levels of peripheral sage and gray are present. Top-notch eye appeal. (#4283)

SEATED HALF DIMES

**Gem 1837 Seated Liberty Dime
Popular No Stars, Large Date Type**

- 3390 1837 No Stars, Large Date (Curl Top 1) MS65 PCGS.** The 1837 No Stars, Seated Liberty half dime is doubly popular with type collectors as the first date of the Seated Liberty design and the first year of the two-year, No Stars type. The present coin is a sharply struck Gem, with subtle mint luster, and light gray and lavender patina. Population: 62 in 65, 32 finer (10/10). (#4311)

Important MS61 1838-O No Stars Half Dime

3391 1838-O No Stars MS61 PCGS. The simple and beautiful No Stars half dime subtype, as seen in the first year of operation at New Orleans, which produced 70,000 of the pieces. Rich rose, peach, orange, and blue hues drape luminous surfaces that show wispy abrasions and a few more significant marks. Housed in a green label holder. Population: 3 in 61, 11 finer (10/10). (#4314)

3392 1840 No Drapery MS65 NGC. Essentially silver at the centers but with wide surrounding swaths of rose, violet, and blue patina. A satiny Gem from early in the Seated half dime series. (#4321)

Gem 1840 Seated Liberty Half Dime Scarcer With Drapery Type

3393 1840 Drapery MS65 NGC. A sharply struck Gem 1840 Seated Liberty half dime, from a mintage of 310,085 pieces. This specimen was struck from the later design, with drapery added at Liberty's elbow. The pleasing surfaces gleam with mint luster and display traces of blue and lavender toning. Gem specimens are very rare in today's market. Census: 9 in 65, 4 finer (10/10). (#4326)

3394 1845 MS65 PCGS. Minor recutting is evident inside the upper part of the 5 on this Gem 1845 half dime. Both sides have a bold strike with frosty silver luster that exhibits traces of light gray and gold toning. Population: 16 in 65, 16 finer (10/10). (#4335)

Superb Gem 1845 Half Dime Among the Finest Certified

3395 1845 MS67 PCGS. CAC. While the 1845 Seated Liberty half dime is not a challenging date in lower grades, the issue is quite rare at the Superb Gem level. Certainly, few survivors can match the quality of the present coin, with a razor-sharp strike and pristine surfaces. Bright mint luster shines through iridescent shades of gold, green, and violet toning. Housed in a green label holder. Population: 6 in 67, 0 finer (10/10). (#4335)

3396 1852-O AU58 PCGS. CAC. Mingled green-gold, yellow, and orange hues cover this scarcely worn O-mint half dime. Well struck with a single spot of deep color on the wreath below the second S in STATES. (#4350)

3397 1858-O MS64 PCGS. A delightful Choice Mint State piece, and a conditionally scarce issue that is seldom seen finer. This lovely half dime has frosty silver luster with gold, blue, and violet toning on both sides. Population: 54 in 64, 17 finer (10/10). (#4369)

3398 1860 MS66 PCGS. A substantial mintage of 799,000 Seated Liberty half dimes was achieved in 1860 at the Philadelphia Mint, the first date to use the new obverse design, with UNITED STATES OF AMERICA replacing the stars. This example is a scarce Premium Gem, with a sharp strike, bright mint luster, and attractive golden-brown and violet patina. Population: 51 in 66, 35 finer (10/10). (#4377)

1861/0 Seated Half Dime, MS65 Popular Guide Book Variety

3399 1861/0 MS65 PCGS. CAC. V-4. Golden-tan toning clings to the margins, while cream-gray occupies the fields and devices. Precisely struck, satiny, and pristine save for a small spot above the H in HALF and a few trivial luster grazes on the right obverse field. Listed on page 142 of the 2011 *Guide Book*. Population: 1 in 65, 5 finer (10/10). (#4380)

- 3400 1862 MS66 NGC.** This gorgeous Premium Gem has fully frosty and brilliant luster with bright silver surfaces and bold design definition. It is an exceptional representative of the Civil War. (#4381)
- 3401 1866 MS63 PCGS. CAC.** Gold-orange toning appears at the borders on the obverse and is dappled across the reverse. Excellent design definition with few serious marks. Population: 7 in 63, 30 finer (10/10). (#4388)
- 3402 1866 MS64 NGC.** Attractively detailed and faintly frosted. Silver interiors show gold at the edges. A lovely near-Gem from an issue of just 10,000 business strikes. Census: 14 in 64, 21 finer (10/10). (#4388)

**1867 Half Dime, MS67 Prooflike
The Finest Prooflike Certified**

- 3403 1867 MS67 Prooflike NGC.** A simply gorgeous Superb Gem. The fields are noticeably prooflike, and the devices are frosty. Both sides are brilliant save for slight milk-white toning in the reverse fields. The strike is bold, except for minor incompleteness on the left side of the wreath. An unquestionably original representative that is the single finest-graded example at NGC, where it is one of just three pieces graded as Prooflike and the only Prooflike MS67 (10/10). (#4390)
- 3404 1872 MS66 PCGS. CAC.** Bright silver is the dominant color of this well struck Premium Gem. Simple blushes of orange-to-gold appear close to Liberty's head and lightly dappled through the reverse. Population: 10 in 66, 0 finer (10/10). (#4400)
- 3405 1872-S Mintmark Below Bow MS65 PCGS. CAC.** Housed in a green-label PCGS holder is this lovely Gem with its frosty silver luster and remarkable display of gold and iridescent toning, speckled on the reverse. (#4401)

PROOF SEATED HALF DIMES

**1857 Seated Liberty Half Dime, PR64
Only Two Coins Certified Finer at PCGS**

- 3406 1857 PR64 PCGS.** This is an immensely popular proof issue because the Mint failed to record the original mintage. An aura of mystery surrounds such coins, leading to widespread speculation about the date's rarity. As for the proof 1857 half dime, there can be little doubt that the adjective "rare" applies. The present representative is carefully preserved with no postproduction impairments of note. The surfaces are golden and gray-tinged with sharp striking detail and a pleasingly reflective finish. Population: 14 in 64, 2 finer (10/10). (#4436)
- 3407 1859 PR64 PCGS.** The distinctive hollow stars obverse is featured on this near-Gem proof. Both sides combined lustrous devices and mirrored fields beneath deep violet and iridescent toning. Population: 59 in 64, 31 finer (10/10). (#4438)

**1871 Seated Half Dime, PR67 Cameo
None Certified Finer at NGC or PCGS**

- 3408 1871 PR67 Cameo NGC. CAC.** Hints of pale gold toning accent the pristine fields of this Superb Gem proof half dime. The sharply rendered devices contrast boldly with the reflective fields to create the dramatic Cameo effect. A fairly generous proof mintage of 960 half dimes was achieved in 1871, but few survivors can match the quality of this landmark piece. Census: 5 in 67 Cameo, 0 finer (10/10). (#84454)
- 3409 1872 PR64 NGC.** A delightful near-Gem proof, this 1872 half dime has full mirrors beneath its deep blue, violet, and iridescent toning. A lovely specimen. Census: 55 in 64, 41 finer (10/10). (#4455)
- 3410 1873 PR65 NGC.** A gorgeous Gem specimen from the end of the denomination. Opaque toning starts in blues and greens at the margins and progresses to rose at the interiors. The reverse also shows a small core of gold-to-gray color, a window into this coin's past reflectivity. Census: 37 in 65, 28 finer (10/10). (#4456)

EARLY DIMES

Near-Mint 1796 Dime, JR-1

- 3411** 1796 AU58 PCGS. JR-1, R.3. The dime was first struck in 1796, making it one of the few denominations struck in the 18th century to begin with the Draped Bust design rather than a Flowing or Capped Bust effigy. Along with the JR-6, the JR-1 is one of the most accessible die pairs from that first year of production, though still scarce in an absolute sense. This is a gorgeous near-Mint survivor, remarkably bright silver in the interiors with green-gold toning of varying intensity at the margins. The deepest color can be found just to the left of the date. For the various 1796 dime die pairs, Population: 24 in 58, 48 finer (10/10).
From The Eagle Harbor Collection, Part Two. (#4461)

1798 Draped Bust Dime, AU58 Large 8, JR-4 Die Marriage

- 3412** 1798 Large 8 AU58 PCGS. JR-4, R.3. The prominent die crack from the obverse rim to Liberty's nose, and the large 8 in the date, identify this coin as a representative of the available JR-4 variety. Shades of gold and ice-blue toning visit the lustrous surfaces of this well detailed near-Mint specimen, and a few light adjustment marks are evident on the bust. Population: 2 in 58, 12 finer (10/10).
From The Eagle Harbor Collection, Part Two. (#4466)

1802 Dime, Choice AU JR-4, Low-Mintage Issue

- 3413** 1802 AU55 NGC. JR-4, R.4. Light golden-brown and dove-gray patina drapes this high-grade Draped Bust dime. Noticeable luster glows from the legends and devices, and striking weakness in the centers is characteristic for the type. Minor rim marks are present at 5 o'clock on each side. The low mintage of 10,985 pieces is divided between four very scarce to rare die marriages. JR-4 is recognized by the placement of star 8, further from the Y than on any other variety of the date. Another diagnostic is the lowest reverse star, which touches both tips of the eagle's beak. Just three other examples of this date have been graded as AU55 by NGC, and only there are only three other pieces specifically identified as an example of the JR-4 variety. Across all four varieties of this date, NGC has graded a mere six coins finer, as of (10/10). (#4472)

- 3414** 1805 4 Berries Fine 12 PCGS. JR-2, R.2. The 1805 Draped Bust dime is an available and popular early 19th century type coin. The present coin is an evenly worn specimen, with all important original detail remaining on the devices and attractive blue and silver-gray patina.
From The Sandy Beach Collection. (#4477)

- 3415** 1805 5 Berries Fine 15 PCGS. JR-1, R.3. The common 1805 obverse paired with the scarce (and more elusive) 5 Berries reverse. Silver-gray surfaces show considerable radiance despite moderate wear, though richer gold-to-charcoal toning appears at parts of the margins. For the 5 Berries variety, Population: 4 in 15, 17 finer (10/10). (#4478)

BUST DIMES

Select JR-1 1823/2 Small Es Dime

- 3416** 1823/2 Small Es MS63 PCGS. JR-1, R.3. Traces of the 2 underdigit are apparent to the unaided eye. Golden-brown and cream-gray at the centers, while bands of jade-green and navy-blue endow the margins. Unabraded save for a faint hair-thin diagonal mark on Liberty's neck. The sole die marriage that used a small E letter punch to form the legend UNITED STATES OF AMERICA. Population: 4 in 63, 10 finer (10/10). (#4498)

1823/2 Dime, AU58 Popular Overdate, JR-3

- 3417** 1823/2 Large Es AU58 PCGS. JR-3, R.2. The JR-3 variety is distinguished by the position of star 7 pointing to the top of the headband, and the large E punch used in the reverse legend. The present coin is a lustrous near-Mint specimen, with sharp details and gunmetal-gray toning. The remains of the 2 are easily detected beneath the final digit. Population: 6 in 58, 16 finer (10/10).
From The Eagle Harbor Collection, Part Two. (#4499)

1823/2 Capped Bust Dime, MS63 JR-3 Variety

- 3418** 1823/2 Large Es MS63 NGC. JR-3, R.2. Almond-gold and rose-red toning graces the borders, while the portrait and open fields are gunmetal-gray. The 2 underdigit is obvious. The reverse legend apparently mixes dime and quarter letter punches, with the D, E, and M punches oversized relative to the other letters. (#4499)

Lovely Gem JR-12 1827 Dime

- 3419** 1827 MS65 NGC. JR-12, R.1. The attribution is made by the low placement of the 7 in the date, combined with the final A in AMERICA attached to the arrow. This satiny and unmarked example is lightly toned in caramel-gold and slate. Well struck aside from a couple of left-side stars. Combined 1827 NGC Census: 26 in 65, 8 finer (10/10). (#4504)

- 3420** 1833 AU58 PCGS. CAC. JR-4, R.1. The apple-green centers are framed by golden-russet patina. An early die state that shows repunching on the U in UNITED. Later, the repunching fades and several radial die cracks appear. (#4522)

1834 Capped Bust Dime, MS64 Popular JR-5 Variety

- 3421** 1834 MS64 PCGS. CAC. JR-5, R.1. The 1834 Capped Bust dime claims a mintage of 635,000 pieces, with seven die varieties known for the date. The present coin is a representative of the available JR-5 variety, characterized by the broken crossbar on the 4 and the arrow shaft extending through the eagle's talon on the reverse. This Choice specimen features sharply defined design elements, bright mint luster, and light gold and ice-blue toning. Housed in a green label holder. Population: 30 in 64, 9 finer (10/10). (#4525)

SEATED DIMES

Choice 1837 Seated Dime Popular No Stars, Small Date Type

- 3422** 1837 No Stars, Small Date MS64 PCGS. CAC. The 1837 Seated Liberty dime is always sought-after because of its two-year No Stars design. The Small Date variety is identified by the curved top 3 in the date. The present coin is sharply defined, with satiny mint luster, and wisps of gold and lavender toning. Population: 13 in 64, 8 finer (10/10). (#4562)

**1838 Seated Dime, MS66
Large Stars, Prominent Die Cracks**

- 3423 1838 Large Stars MS66 PCGS. CAC.** The year 1838 saw the first use of the obverse stars design on the Seated Liberty dime. The present coin is a representative of the Large Stars variety, more specifically Brian Greer's variety No. 105, with a die crack bisecting the obverse from below Liberty's foot to star 7, but missing the shield. This spectacular Premium Gem is sharply struck, with ample mint luster, and light gold and ice-blue toning. Housed in a green label holder. Population: 15 in 66, 2 finer (10/10). (#4568)

**Choice 1838 Seated Dime
Prized Partial Drapery Type**

- 3424 1838 Partial Drapery MS64 PCGS.** The 1838 Partial Drapery Seated dime is a scarce variety resulting from clashed dies. The partial drapery feature is actually the imprint of part of the E in DIME from the reverse die, impressed into the obverse when the dies clashed. The present coin is a sharply struck Choice specimen, with mottled green, gray, and russet toning. Strong original mint luster shines underneath the patina. Population: 5 in 64, 3 finer (10/10). (#4570)

Near-Mint 1840 With Drapery Dime

- 3425 1840 Drapery AU58 PCGS.** A fold of drapery descends from the elbow on Liberty's pole-supporting arm. A strongly lustrous silver example with pale green-gold peripheral color and a touch of rub across the high points. This subtype is highly elusive in better circulated grades and a condition rarity in Mint State. Population: 2 in 58, 6 finer (10/10). (#4578)
- 3426 1842-O AU55 PCGS.** Medium O. Luminous centers are pale pearl-gray, while the margins show a mix of gold and russet colors. Lightly worn across the high points but greatly appealing. Population: 9 in 55, 15 finer (10/10). (#4582)

**1852 Seated Liberty Dime, MS66
Heavily Melted Issue**

- 3427 1852 MS66 PCGS.** The 1852 Seated Liberty dime was produced in large quantities, but Brian Greer believes many examples were melted shortly thereafter because of their high bullion value. Examples in Premium Gem condition are very rare today. The present coin is a sharply detailed specimen, with frosty mint luster, and wisps of light golden toning. Population: 3 in 66, 2 finer (10/10). (#4597)

Conditionally Scarce 1857-O Dime, MS65

- 3428 1857-O MS65 NGC.** Medium O. Ocean-blue and sun-gold illuminate the borders of this sharply struck and satiny antebellum dime. Faint field marks are visible only with the aid of a loupe. The 1857-O is readily obtained in well worn condition, but Uncirculated examples are scarce, with most such pieces grading MS62 through MS64. (#4615)
- 3429 1873 Closed 3, No Arrows MS65 NGC.** A nearly brilliant Gem whose lustrous fields and devices display only occasional wispy grazes. Not fully struck, but scarce in such lofty quality. Census: 6 in 65, 5 finer (10/10). (#4659)

MS64 No Arrows, Open 3 1873 Dime

- 3430 1873 Open 3, No Arrows MS64 NGC.** A beautiful near-Gem of this rare low mintage transitional issue, struck during the brief period after the date logotype was changed but before the weight was slightly increased to 2.5 grams. Toned golden-russet with glimpses of lavender. Lustrous and unabraded with exceptional eye appeal for the grade. Census: 5 in 64, 0 finer (7/10). (#4660)
- 3431 1873 Arrows MS64 PCGS. CAC.** Strongly lustrous with plenty of flash. Mainly silver color with glimpses of peripheral and field sea-green. Considerable frostiness is present on well struck devices. Population: 30 in 64, 15 finer (10/10). (#4665)

**1873-CC Seated Liberty Dime, XF45
Popular Arrows Type Coin**

3432 1873-CC Arrows XF45 NGC. Ex: Simpson Collection. The 1873-CC With Arrows dime is one of the classic rarities in the Seated dime series, and it is particularly desirable as it is actually the more plentiful Carson City With Arrows dime when compared to the 1874-CC. This piece has the characteristic die crack through the mintmark that is seen on some 1872-CC dimes as well as all 1873-CC and 1874-CC dimes. This Choice XF piece has pleasing light to medium gray surfaces with some iridescent toning on each side. It is a splendid piece for the advanced collector. Census: 3 in 45, 4 finer (10/10). (#4666)

**1873-S Arrows Dime, MS64
Scarce Issue, Later Die State**

3433 1873-S Arrows MS64 PCGS. Fortin-101. Small Thin S. The 1873-S dime is much scarcer than one would think for a coin with a mintage of 455,000 pieces. This is a high-grade survivor that shows the usual softness of detail normally found on the 101 variety. Bright mint luster rolls around each side, unimpeded by the scattered, light golden toning. Population: 12 in 64, 1 finer (10/10). (#4667)

**Premium Gem 1874 Seated Liberty Dime
Distinctive Arrows Type**

3434 1874 Arrows MS66 PCGS. The 1874 Seated Liberty dime is always popular as the second year of the two-year Arrows design type. The present coin is a well preserved Premium Gem, with sharp details in most areas, and just a little softness on the ribbon knot. The pristine surfaces display frosty mint luster, and light silver-gray toning. Population: 19 in 66, 8 finer (10/10). (#4668)

**1874-CC Seated Dime, AU Details
Rare Key Date**

3435 1874-CC Arrows—Improperly Cleaned—NGC Details. AU. The 1874-CC Seated Liberty dime is a formidable rarity in the series, as only the unique 1873-CC No Arrows issue is more elusive. The 1874-CC boasts a minuscule mintage of 10,817 pieces, and even worn coins with significant problems are ardently collected. The present coin is a sharply struck specimen, and retains much more original detail than the average example. The surfaces are lightly abraded, with intermingled blue, dove-gray, and gold toning. The luster is a bit dull, as a result of the noted cleaning, and a few minor rim bruises are evident at 3 o'clock. Altogether, this piece is an appropriate choice for most serious collectors. (#4669)

- 3436 1876 MS66 PCGS.** Lovely golden-orange border toning gives way to pale pearl-gray centers. Well-defined with equal elements of satin and frost in the elegant luster. Conditionally scarce this fine despite an ample mintage. Population: 16 in 66, 3 finer (10/10). (#4679)
- 3437 1876-CC MS64 PCGS. CAC.** Type Two Reverse. Golden-brown and aquamarine toning blankets this sharply struck near-Gem. Smooth save for a faint graze on the left (facing) arm. ONE DIME is die doubled, as are most examples of this popular Centennial year Carson City issue. (#4680)
- 3438 1879 MS66 ★ NGC.** Though not strictly Prooflike, this silver-white example is decidedly reflective in the fields with generous frost over the devices. This lends the coin the excellent eye appeal that determined the Star designation. Carefully preserved and delightful. (#4687)

**1879 Dime, MS67+ ★
Brilliant and Very Flashy**

- 3439 1879 MS67+ ★ NGC.** Only 15,100 circulation strike dimes were produced in 1879. With three die pairings used, almost all examples qualify as first-strikes and therefore many coins are prooflike since the dies were fresh when the coins were struck. This is a brilliant example that has virtually perfect surfaces and nicely reflective fields that have just a hint of cartwheel. This is the only + ★ coin certified of this date in any grade (10/10). (#4687)
- 3440 1880 MS64 PCGS. CAC.** Fortin-102a. Lustrous, sharply struck, and impressively unabraded with attractive light autumn-gold toning near the rims. A low mintage date that is more plentiful as a proof than in Mint State. (#4688)
- 3441 1882 MS66 NGC.** Frosty silver luster. This Premium Gem is a trifle soft through the centers, but the preservation is magnificent. A great Seated dime type coin. Census: 42 in 66, 26 finer (10/10). (#4690)
- 3442 1882 MS66 PCGS.** Attractive golden-brown toning dominates the centers of this sharply detailed Premium Gem, with crescents of violet at the rims. Original mint luster shines beneath the patina, creating abundant eye appeal. Population: 29 in 66, 16 finer (10/10). (#4690)
- 3443 1882 MS66 NGC.** Attentively struck with remarkably bright silver-white surfaces. Hints of frostiness grace devices and fields alike. An all-around charmer from late in the series. (#4690)
- 3444 1884 MS67 NGC.** This amazing Superb Gem ranks among the finest known examples of the date, with just three finer pieces certified by PCGS and NGC, combined. This piece is fully brilliant and highly lustrous with exceptional eye appeal. Census: 23 in 67, 2 finer (10/10). (#4692)
- 3445 1891 MS66 ★ NGC.** Few examples of any Seated dime carry the Star designation, and this Premium Gem is one of just nine for the date. It is a sharply defined specimen save for Liberty's head that is flat. However, the magnificent toning trumps the strike. Census: 4 in 66 ★, 2 finer with the ★ designation (10/10). (#4706)
- 3446 1891 MS67 NGC.** An incredible Superb Gem, and rarely seen any finer. In fact, NGC has only certified one better piece, and PCGS has graded none finer than this one. Both sides have bold design features with lovely iridescent toning. Census: 18 in 67, 1 finer (10/10). (#4706)

- 3447 1891-S MS65 PCGS.** Medium S. Dappled ocean-blue and olive-gray toning envelops this satiny and attractively preserved Gem. The strike is sharp save for the customary incompleteness on the upper left portion of the wreath. Population: 20 in 65, 9 finer (10/10). (#4708)

PROOF SEATED DIMES

**Choice Proof 1856 Seated Liberty Dime
Only Two Coins Certified Finer at PCGS**

- 3448 1856 PR64 PCGS.** The mintage of 1856 proof Seated Liberty dimes was not recorded, but experts estimate 35-40 pieces survive today. The present coin is a lovely Choice specimen, with sharply detailed, frosty design elements. The fields are brightly reflective, under dove-gray and violet patina. Population: 7 in 64, 2 finer (10/10). (#4745)
- 3449 1863 PR64 Cameo PCGS. CAC.** A strongly contrasted near-Gem specimen from this elusive Civil War date. Gleaming mirrors have pale green patina that is more pronounced on the reverse. Population: 11 in 64 Cameo, 11 finer (10/10). (#84756)
- 3450 1863 PR64 Cameo PCGS. CAC.** A sensational Civil War era proof, the 1863 dime is seldom encountered in any grade, business strike or proof. This Choice Cameo proof is fully brilliant with impressive contrast between its lustrous devices and deeply mirrored fields. Population: 11 in 64 Cameo, 11 finer (10/10). (#84756)
- 3451 1864 PR64 Cameo PCGS.** This glittering Choice Cameo proof has bright silver surfaces with delicate peripheral rose toning on each side. The combination of deeply mirrored fields and lustrous, frosty white devices provides exceptional eye appeal. Population: 13 in 64 Cameo, 15 finer (10/10). (#84757)

**1866 Seated Dime, PR66 ★ Cameo
Vivid Toning and Contrast**

- 3452 1866 PR66 ★ Cameo NGC.** A mintage of 725 proof Seated Liberty dimes was struck at the Philadelphia Mint in 1866, to complement the minuscule business-strike mintage of 8,725 pieces. The present coin is a spectacular Premium Gem, with sharply detailed, frosty devices and deeply mirrored fields. The surfaces are patinated in iridescent shades of gold, green, and violet, creating a fascinating play of colors. Census: 12 in 66 Cameo, 3 finer (10/10). (#84759)

**1870 Seated Liberty Dime, PR66 + ★
Extraordinary Eye Appeal, High Technical Grade**

- 3453 1870 PR66 + ★ NGC.** A fairly generous mintage of 1,000 proof Seated Liberty dimes was accomplished in 1870, but it is doubtful any surviving example can match the surpassing quality of the coin offered here. An exemplary strike imparts crisp definition to all design elements, and the fields have a depth of reflectivity that is seldom encountered. Delightful shades of pale green and violet toning enhance the pristine surfaces. This coin is the only Premium Gem specimen to be awarded both the Plus and Star designations at NGC (10/10). (#4763)

- 3454 1877 PR64+ Cameo PCGS.** Distinctly contrasted on each side with a touch of golden color visiting the obverse. Gleaming fields are better-preserved than usually seen on near-Gems, though not quite at the next level. PCGS has certified just four finer Cameo examples (10/10).(#84774)

- 3455 1878 PR65+ NGC.** Outstanding reflectivity with appreciable (though not Cameo-level) contrast. Lightly gold-toned at the rims and greatly appealing. NGC has graded just 10 numerically finer examples (10/10).(#4775)

**1879 Seated Dime, PR67 Cameo
Among the Finest Certified**

- 3456 1879 PR67 Cameo NGC.** A beautiful proof representative of this always-popular date in the Seated Liberty dime series. There is very little toning in evidence, and the surfaces do not reveal a single blemish that would call in to question the validity of the PR67 designation. Razor sharp striking definition and bold field-to-device contrast round out this coin's list of positive attributes. The first of three low mintage Seated dime issues produced in the late 1870s and early 1880s, the 1879 has an original mintage of just 15,100 pieces. Census: 11 in 67 Cameo, 0 finer (10/10). (#84776)

Gleaming PR67 Cameo 1881 Dime

- 3457 1881 PR67 Cameo NGC.** Silver-on-silver contrast dominates the obverse, while the reverse shows subtle traces of canary-yellow and gold. Both sides of this Superb Gem offer prominent cameo effects between amply frosted devices and gleaming fields. Great eye appeal and preservation. Census: 5 in 67 Cameo, 0 finer (10/10). (#84778)

- 3458 1883 PR66 Cameo NGC.** Light gold and cloud-white glints grace gleaming fields and attractively frosted devices. A well-defined Premium Gem specimen. Census: 5 in 66 Cameo, 11 finer (10/10). (#84780)

**Superb Gem Proof 1885 Seated Dime
Only Two Coins Certified Finer at PCGS**

- 3459 1885 PR67 PCGS. CAC.** From a mintage of 930 pieces, the proof 1885 Seated Liberty dime is seldom encountered in Superb Gem condition. The coin offered here displays pale green and violet toning, with brightly reflective fields gleaming under the patina. All design elements are sharply detailed, and the surfaces are virtually pristine. Population: 8 in 67, 2 finer (10/10). (#4782)

**1885 Seated Dime, PR66 Deep Cameo
Finest Certified at PCGS**

- 3460 1885 PR66 Deep Cameo PCGS. CAC.** From a mintage of 960 proof Seated Liberty dimes, few survivors can match the quality of this magnificent specimen. The deeply mirrored fields contrast profoundly with the sharply defined, frosty devices, culminating in the Deep Cameo effect. Population: 1 in 66 Deep Cameo, 0 finer (10/10). (#94782)

- 3461 1887 PR64 PCGS.** Golden patina appears mainly at the borders, while the centers offer light frost and watery reflectivity under a delicate layer of whitish-gray toning. Housed in a green label holder. Population: 43 in 64, 43 finer (10/10).(#4784)

Gorgeous PR67 1891 Dime

3462 1891 PR67 PCGS. CAC. While the green label holder does not list any sort of contrast designation, the obvious frost across the devices makes this Superb Gem a candidate for a Cameo designation today. Faintly gold-toned interiors give way to deeper orange and blue-violet toning at the borders. Population: 9 in 67, 0 finer (10/10). (#4788)

3463 1891 PR66 ★ Cameo NGC. This brilliant final year Premium Gem provides icy motifs and deeply mirrored fields. The strike is precise save for the usual inexactness on the upper left wheat grains. Census: 2 in 66 ★ Cameo, 4 finer as Cameo with a Star designation (10/10). (#84788)

BARBER DIMES

3464 1894 MS65 PCGS. Fantastically lustrous with lovely sapphire and amethyst jewel-tones draping each side. A strongly struck Gem that offers incredible eye appeal. Population: 20 in 65, 7 finer (10/10). (#4803)

Satiny Gem 1896-S Dime

3465 1896-S MS65 PCGS. CAC. Green-gold to orange color appears at the margins of this Gem, while the satiny interiors remain pale silver. Excellent design definition for this lower-mintage issue of fewer than 600,000 pieces, which is a condition rarity so fine. PCGS has graded 19 coins as MS65 and just four examples finer (10/10). (#4811)

Premium Gem 1899-S Dime

3466 1899-S MS66 PCGS. Strongly struck with a frosty "skin" that breaks into small streaks of brilliance at the upper reverse. Largely silver with faint golden overtones and potent luster. A pleasingly preserved Premium Gem from an issue that is rare so fine. Population: 10 in 66, 3 finer (10/10). (#4820)

3467 1901-O MS64 PCGS. Both sides are lustrous silver-gray and green-gold, the latter color appearing mostly at the margins. Well struck for this New Orleans issue with great eye appeal. Population: 19 in 64, 16 finer (10/10). (#4825)

3468 1906-S MS66 PCGS. Rich dove-gray, golden-brown, apple-green, and honey toning drapes this satiny and needle-sharp Premium Gem. Remarkably devoid of abrasions. Population: 16 in 66, 3 finer (10/10).

Ex: Long Beach Signature (Heritage, 5/2007), lot 717. (#4841)

Finest Certified 1909-D Dime, MS67

3469 1909-D MS67 NGC. Only 954,000 pieces of this issue were struck, which is by far the lowest production of any Denver Mint Barber dime. Both sides are toned in variegated pastels, and satiny luster is complemented with a bold strike. A couple of tiny contact marks are essentially hidden by the patina. This is the finest 1909-D dime certified by either of the major services. An amazing coin for the Barber dime specialist. Population: 1 in 67, 0 finer (10/10). (#4851)

1910 Barber Dime, MS67 Unimprovable for the Issue

3470 1910 MS67 NGC. For type purposes this piece would be hard to beat. The 1910 had a substantial mintage of 11.5 million pieces, but only 12 coins have survived in MS67 condition (and none are finer). The surfaces are essentially perfect with smooth, satiny mint luster that shows no interruptions on either side. The strike is complete, and both sides are brilliant. Census: 3 in 67, 0 finer (10/10). (#4854)

3471 1914 MS66 PCGS. CAC. Frosty with a few streaks of brilliance at the upper reverse and golden overtones close to the rims. A great Premium Gem example of this late-date Barber dime, an elusive issue any finer. (#4865)

3472 1916 MS66 PCGS. Green-gold toning is prominent at the margins, broken on the obverse but a complete ring on the reverse. Lavender-influenced dove-gray color graces the centers. A well struck Premium Gem from this final-year Barber dime issue. Population: 40 in 66, 4 finer (10/10). (#4870)

PROOF BARBER DIMES

- 3473 1894 PR66 PCGS.** The Philadelphia Mint achieved a large proof mintage of 972 Barber dimes in 1894, but many examples were later spent for face value or lost. Specimens in Premium Gem condition are quite scarce today. The present coin displays pinpoint definition on the design elements, with reflective surfaces under blue, gray, and green patina. Population: 32 in 66, 22 finer (10/10). (#4878)
- 3474 1894 PR66 NGC.** Although without a Cameo designation, this Premium Gem proof displays considerable contrast with mirrored fields and satiny devices. Both sides are boldly detailed with no evidence of toning. Census: 41 in 66, 29 finer (10/10). (#4878)
- 3475 1896 PR66 NGC.** Only 762 proof Barber dimes were minted in 1896, and the date is quite scarce in Premium Gem condition. Vivid green and ice-blue patina graces the deeply reflective surfaces of this spectacular piece. All design elements are sharply defined and eye appeal is extraordinary. Census: 45 in 66, 14 finer (10/10). (#4880)
- 3476 1897 PR66 Cameo NGC. CAC.** From a meager mintage of 731 pieces, proof 1897 Barber dimes are rare with the Premium Gem Cameo designation. This specimen possesses fantastic eye appeal, and the brilliant, reflective fields contrast boldly with the frosty, sharply detailed devices. Census: 18 in 66 Cameo, 16 finer (10/10). (#4881)
- 3477 1898 PR67 PCGS.** Strongly reflective through deep and luminous patina, blue, violet, lavender, and gold-green. Boldly struck and fantastically appealing. Population: 12 in 67, 2 finer (10/10). (#4882)

Cameo PR66 1898 Barber Dime

- 3478 1898 PR66 Cameo NGC. CAC.** Both sides of this late 19th century Barber dime offer strong contrast, and the thickness of the frost across the portrait is particularly noteworthy. Boldly mirrored with touches of peripheral gold that are strongest at the left obverse rim. Census: 19 in 66 Cameo, 25 finer (10/10). (#4882)
- 3479 1907 PR64 Cameo PCGS.** A distinctive late Cameo specimen, peripherally toned blue with occasional windows into the pale gold-to-silver that dominates the centers. The portrait has an unusual level of frost, while the wreath is less frost but still well-contrasted. Population: 6 in 64 Cameo, 10 finer (10/10). (#4891)

Gleaming PR67 1911 Dime

- 3480 1911 PR67 NGC.** This low-mintage date is always popular, especially when it can be located at or near the price of a type coin. This is a splendid proof striking. Both sides are completely free from color and shine with uncommon radiance with strong contrast noted between the fields and devices. A few tiny planchet flakes are noted in the reverse fields. Census: 16 in 67, 7 finer (10/10). (#4895)
- 3481 1912 PR66 NGC.** Deeply toned with stark divides in color. Pale teal-blue windows at the upper right obverse and left reverse give way to bold royal-blue and violet elsewhere. Census: 17 in 66, 8 finer (10/10). (#4896)

MERCURY DIMES

Ever-Popular 1916-D Mercury Dime

- 3482 1916-D Genuine PCGS.** The PCGS number ending in .91 suggests Questionable Color as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this piece has the details of an XF specimen that has been cleaned and retoned. A well struck piece that has been cleaned in the past and is now coated in odd pink-silver and olive toning but is nonetheless eminently collectible.
- 3483 1916-D VG8 PCGS.** The peripheral legends are bold, and the top of the fasces is sharp for the grade. Dusky lavender-gray toning embraces unblemished surfaces. This key date dime is housed in a green label holder. (#4906)
- 3484 1916-D VG10 PCGS.** Rich silver-blue luster with considerable violet overtones and elements of gold on the reverse. Well-worn but with a smooth appearance that makes it ideal as a finisher to the Mercury dime set. (#4906)

**Key 1916-D Mercury Dime, AU58
Only 264,000 Pieces Minted**

- 3485 1916-D AU58 NGC.** A high-end, near-Mint specimen of the key date in the Mercury dime series, this issue is seldom seen so fine. All design elements are sharply detailed, and the pleasing surfaces are enhanced by ice-blue and gold toning. Only a tiny fraction of the small original mintage is available in high grades today. Census: 25 in 58, 48 finer (10/10). (#4906)

**1916-D Mercury Dime, MS64 Full Bands
In-Demand, Key Issue**

- 3486 1916-D MS64 Full Bands PCGS. CAC.** The 1916-D Mercury dime is one of the most sought-after U.S. coins of the 20th century. From a tiny mintage of 264,000 pieces, the issue is the key date in the Mercury dime series, and enjoys great popularity as a first-year type coin. The coin offered here is a sharply detailed Choice Mint State specimen, with Full Bands definition. Intricate detail is present on all design elements, including Liberty's hair and the wings of the cap. The pleasing surfaces are enhanced by iridescent shades of gold, lavender, and ice-blue toning. Vibrant mint luster shines through the toning. (#4907)

- 3487 1917-S MS66 Full Bands PCGS.** Light silver-blue toning over most of each side with more intense reddish-gold color along parts of the margins. A well-defined Premium Gem that is housed in a green label holder. PCGS has graded just 10 finer Full Bands examples (10/10).(#4915)

- 3488 1918 MS65+ Full Bands PCGS.** An incredible, sharply detailed Gem, this fully brilliant and highly lustrous Mercury dime has few peers. Both sides are silver-white, with hints of light gold barely visible on the obverse. This is the only 1918 dime at PCGS or NGC that carries the Plus designation.(#4917)

- 3489 1918-S MS66 PCGS. CAC.** Cherry-red and honey-gold augment the margins of this thoroughly lustrous early branch mint Premium Gem. The reverse is essentially pristine, and the strike is sharp save for the central bands. Population: 10 in 66, 1 finer (10/10).
Ex: Larry Shapiro #1 All-Time Finest Mercury Dimes Basic PCGS Registry Set (Heritage, 1/2006), lot 1953, which realized \$1,610. (#4920)

- 3490 1919-D MS62 Full Bands PCGS.** Light honey-gold patina adorns this lustrous and crisply struck example. Marks are limited to a short pinscratch near the D in UNITED. A slender die crack bisects the obverse between 6 o'clock and 11:30.(#4925)

- 3491 1920-D MS64 Full Bands PCGS.** Well-defined throughout with layers of patina over soft luster. Pale blue and gold hues are dotted in deeper russet and crimson. PCGS has graded 61 finer Full Bands coins (10/10).(#4931)

- 3492 1920-S MS63+ Full Bands PCGS.** Pleasingly detailed and attractive despite wispy abrasions. The color is mainly silver, and the luster is solid. Die erosion at the margins and the right reverse field is typical for the issue.(#4933)

**Choice 1923-S Dime, Full Bands
A Conditional and Strike Rarity in the Series**

- 3493 1923-S MS64 Full Bands PCGS.** The 1923-S is scarce in almost all grades, but it is especially challenging in mint condition and with strong central bands. This is a brilliant example that has a few minor, but grade-limiting marks and absolutely full horizontal and diagonal bands on the reverse (the obverse is fully defined also). Population: 54 in 64 Full Bands, 37 finer (10/10). (#4941)

Near-Gem Full Bands 1924-S Dime

- 3494 1924-S MS64 Full Bands PCGS. CAC.** A boldly impressed S-mint Mercury dime, one of the more challenging dates to find with Full Bands, that has light gold and blue toning over bright silver surfaces. A few too many small abrasions for Gem status, but nonetheless a pleasing coin. PCGS has graded 17 finer Full Bands pieces (10/10). (#4947)

3495 1925 MS66 Full Bands PCGS. CAC. A sensational example with splashes of light gold toning over part of the obverse and reverse. The balance on both sides is fully brilliant. This boldly defined example will satisfy nearly any Registry collector. Population: 47 in 66 Full Bands, 26 finer (10/10). (#4949)

3496 1927 MS67 Full Bands PCGS. Delicate caramel-gold toning visits this lustrous and essentially pristine Superb Gem. None have been certified finer by either major service. Population: 18 in 67 Full Bands, 0 finer (10/10). (#4961)

3497 1929-D MS66+ Full Bands PCGS. CAC. Boldly impressed with a frosty "skin" save for a small patch of "die burn" to the left of the tip of the bust. Silver surfaces have tints of blue and small dots of red and orange-brown. PCGS has graded 31 finer Full Bands coins (10/10). (#4975)

3498 1935-S MS67 Full Bands PCGS. CAC. An absolutely stunning Superb Gem, exhibiting fully brilliant and untuned silver surfaces with reflective fields and satin devices. Population: 79 in 67 Full Bands, 1 finer (10/10). (#4997)

Brilliant 1939-S Dime, MS67 Full Bands

3499 1939-S MS67 Full Bands PCGS. Sensational quality with fully brilliant, frosty, and untuned silver surfaces and bold design elements. The 1939-S is common in lower Mint State grades, but rare at the Superb Gem grade level, especially with full bands on the reverse. Population: 30 in 67 Full Bands, 1 finer (10/10). (#5021)

PROOF MERCURY DIMES

3500 1936 PR64 PCGS. A richly toned near-Gem specimen of this famous first proof Mercury dime issue. The obverse has deep violet, blue, and olive border toning with a window into the lighter-toned interior at the left. The reverse has a light veil of similar pale color with gold tinges save for the right border, which is thickly toned. (#5071)

3501 1937 PR67 PCGS. CAC. Profoundly mirrored with gleaming chrome-silver surfaces. A sharp specimen with minimal contrast but maximum eye appeal. PCGS has graded 24 numerically finer pieces (10/10). (#5072)

Fabulously Toned 1937 Dime, PR68 ★

3502 1937 PR68 ★ NGC. CAC. Ex: Simpson. Vivid shades of green and lavender toning dominate both sides of this spectacular Superb Gem Star coin. The overwhelming eye appeal is enhanced by pinpoint definition on all design elements, and the surfaces are technically perfect. This specimen is the single finest graded at NGC with the Star designation (10/10). (#5072)

ROOSEVELT DIME

Premium Gem 1964-D Dime Doubled Die Reverse

3503 1964-D Doubled Die Reverse MS66 PCGS. FS-802. The doubling on this spectacular Premium Gem is most obvious on ONE DIME, UNITED, and the oak stem. The undertype is visible to the right of the primary impression, indicative of FS-802. The latest edition of the *Cherrypickers Guide* assigns this variety a rarity estimate of URS-6 (17-32 known), and states the variety may be undervalued. This specimen is sharply struck, with vibrant luster and brilliant surfaces. Listed on page 156 of the 2011 *Guide Book*. Population: 1 in 66, 0 finer (10/10). (#95129)

SMS ROOSEVELT DIME

Rare and Mysterious 1964 SMS Dime, MS68 One of Three Finest at PCGS

3504 1964 SMS MS68 PCGS. More mystery than history surrounds the issuance of the 1964 Special Mint Sets. In fact, many knowledgeable numismatists are still uninformed about their existence. The facts are sketchy, but the first sets appeared in Stack's auctions starting in 1993, apparently from the estate of New York coin dealer Lester Merkin. The speculation that they came from Mint Director Eva Adams' estate remains unconfirmed, to our knowledge. All five minor coinage denominations were produced in the sets, with an unusual surface texture featuring strong, haphazard die polishing lines on coins that have superstrong strikes and high, squared-off rims like proof coinage.

The die polishing lines on this piece are diagnostic and strongly evident. Note the squared-off rims. There is no fadeaway on the 4, even at the extreme rim, where 1964 business strikes would usually show weakness. Notice the heavy die polishing lines running southwest to northeast below TY, and the near-vertical die polishing lines above the head, also all diagnostic. The 9 and 6 in the date are not pointed, but rather slightly clubby, and there is not an obvious top serif on the 1. (The regular Pointed 9 1964s have a clear serif on the 1.) Mere glints of color appear on this mostly white coin. A small, near-linear mark on the neck, just behind the ear, serves as a pedigree marker, along with a tiny gray fleck below (LIBERTY)Y, in front of the forelock. One of the three finest certified at PCGS (10/10). (#5220)

TWENTY CENT PIECES

- 3505 1875 MS63 NGC.** A luminous and richly toned Select example, pale green at the borders with richer blue-to-lavender toning across the centers. A great example of this first-year twenty cent issue. (#5296)
- 3506 1875-CC AU55 PCGS.** Lustrous light silver surfaces show a hint of golden iridescence on each side. This pleasing piece has above average details with slight weakness on the eagle's breast and left wing. (#5297)
- 3507 1875-S MS63 PCGS.** Slight weakness is evident on both sides of this lustrous, delicately toned twenty cent piece. Both sides are frosty and attractive. (#5298)
- 3508 1875-S MS63 PCGS.** Light wheat-gold overtones are strongest at the margins of this Select twenty cent piece. A trifle soft on high and peripheral design elements, but a readily collectible example of this popular odd-denomination type issue.
From The Eagle Harbor Collection, Part Two. (#5298)

PROOF TWENTY CENT PIECES

Gorgeous PR66 Cameo 1876 Twenty Cent

- 3509 1876 PR66 Cameo PCGS.** This second twenty cent proof issue was also the last to have an accompanying business strike, as the 1877 and 1878 dates are both proof-only. While not so challenging in most grades as the later proof-only pieces, the 1876 is a condition rarity in the better Cameo grades. This is a gorgeous Premium Gem, moderately frosted on central devices that seem to float on gold-tinged mirrors. A small irregularity in the plastic holder which appears just to the right of Liberty's figure does not affect the coin's surface in any way. Population: 6 in 66 Cameo, 1 finer (10/10). (#85304)

1878 Twenty Cent Piece, PR60 Popular, Low-Mintage Issue

- 3510 1878 PR60 PCGS.** The final-year 1878 was a very low production issue with a mere 760 proofs struck, only 600 of which were sold and the remainder melted. This piece is brilliant except for a light touch of golden-brown color on the reverse rim. The fields are remarkably deep, a common trait on twenty cent proofs of any grade. Hairlining accounts for the grade. (#5306)

Important 1878 Twenty Cent, PR64 Final Issue, Proof-Only

- 3511 1878 PR64 PCGS.** The final twenty cent issue, like its predecessor a proof-only date. This near-Gem specimen is one of just 600 pieces struck, lightly hairlined but also richly toned with lavender-blue and gold-green elements most prominent. PCGS has certified 35 numerically finer examples (10/10). (#5306)

EARLY QUARTERS

1805 Draped Bust Quarter, XF40 Scarce B-4 Variety

- 3512 1805 XF40 PCGS. B-4, Low R.4.** The 1805 Draped Bust quarter enjoyed a significant mintage of 121,391 pieces, with five die varieties known for the date. The present coin represents the scarce B-4 variety, with the bottom serifs of I and T missing in the obverse legend, and the Large Stars on the reverse. The present coin is a lightly circulated specimen, with gunmetal-blue and gray surfaces. Population: 27 in 40, 80 finer (10/10).
From The Eagle Harbor Collection, Part Two. (#5313)

- 3513 1806 Good 6 NGC. B-5, High R.4.** Obverse in Tompkins State 3, cracked Y to dentils but no farther. Well-worn but richly toned with blues at the margins and rich reddish-orange through the centers. Small, scattered marks and a few faint pinscratches are also visible. (#5314)

**1806 Draped Bust Quarter, VF35
B-3 Variety, With Imperfect T**

- 3514 1806 VF35 PCGS. B-3, R.1.** The B-3 variety is diagnosed by the imperfect T in LIBERTY and the position of star 13 away from the bust on the obverse, with the 5 in the denomination away from the arrow feather on the reverse. This specimen shows some honest wear, but the incomplete detail on the central devices is mostly due to the weak strike usually seen on examples of this date. Gold and blue-steel toning enliven the pleasing surfaces. (#5314)

BUST QUARTERS

**1815 Capped Bust Quarter, AU53
Popular First-Year Type Coin, B-1**

- 3515 1815 AU53 PCGS. B-1, R.1.** Capped Bust Left quarters were produced for the first time in 1815, with a large mintage of 89,235 pieces. Only one variety is known for the date. The present coin is a lightly circulated piece, with much original detail and luster, under gunmetal-blue and golden-brown patina. Population: 4 in 53, 47 finer (10/10).
From The Eagle Harbor Collection, Part Two. (#5321)

- 3516 1828 Fine 12 ANACS. B-1, R.1.** This is the most common variety of 1828, and this piece is an early die state with a light die crack from ED to the scroll. The reverse die is the same as that used for the proof-only 1827 B-1 quarters. This piece is mostly light gray with peripheral iridescence. (#5342)

- 3517 1828 XF40 PCGS. CAC. B-4, R.3.** A lovely example of the scarce variety, with two-tone surfaces showing light gray devices with deeper steel and iridescent fields. Perfect dies as always according to Steve Tompkins, although slight evidence of "ear bars" are noticed with a glass. (#5342)

- 3518 1834 O Over F in OF AU58 PCGS. B-1, FS-901, R.1.** The blundered reverse with the O in OF punched over an errant F, recently added to the *Guide Book*. Both sides show considerable reflectivity in the fields, which are richly toned blue and gold at the margins but fade to grayish color over the centers. Just a touch of rub precludes a Mint State designation.
From The Eagle Harbor Collection, Part Two. (#38992)

B-2 1837 Bust Quarter, MS62

- 3519 1837 MS62 PCGS. B-2, R.1.** Attribution by the 7 in the date, which is completely under the curl, and the closeness of the second A in AMERICA to the nearby arrowhead. A well struck and lustrous charmer, slightly frosted on the devices, with green-to-gold outer toning that frames silver-white and pearl-gray centers. For the various 1837 varieties, Population: 19 in 62, 56 finer (10/10). (#5356)

SEATED QUARTERS

With Drapery 1840-O Quarter, MS63

- 3520 1840-O Drapery MS63 PCGS. Large O.** Silver-gray at its base with a light layer of patina, nearly translucent over the left obverse with more overt gold to rose elements through the right obverse and across much of the reverse. Great luster and no trace of wear, though small digs are noted in the fields close to Liberty's with-drapery elbow. Population: 6 in 63, 9 finer (10/10). (#5398)

- 3521 1841-O MS63 PCGS.** This lovely Mint State quarter represents the early years of the New Orleans Mint, with frosty silver luster and delicate gold toning on each side. Population: 7 in 63, 7 finer (10/10). (#5400)

Choice VF 1842-O Small Date Quarter

- 3522 1842-O Small Date VF35 PCGS.** A tiny date seems to float within the exergue on this variety. Offered here is a Choice VF example, still-lustrous beneath gold-orange and blue-green patina. Well struck on devices such as the obverse stars, and overall a lovely example for this earlier New Orleans quarter issue. Population: 2 in 35, 6 finer (10/10). (#5403)

3523 1849 MS62 PCGS. Intense cobalt-blue and more diffuse peach are the primary hues on this lustrous Mint State example. Well struck for the time but with a number of moderate abrasions on the portrait, though these are difficult to spot with the unaided eye. Population: 7 in 62, 14 finer (10/10). (#5413)

3524 1851-O—Improperly Cleaned—NGC Details. AU. This O-mint quarter is softly struck at Liberty's head but minimally worn. Scattered abrasions with partial gold and blue retoning from a past cleaning. (#5418)

3525 1854-O Huge O—Improperly Cleaned—NGC Details. XF40. FS-501. A single reverse die was sent to New Orleans without the mintmark. Rather than returning the die to Philadelphia, a mint workman hand cut an O in the die, and the result is this popular Huge O variety. This pleasing piece has been lightly cleaned but is highly attractive with excellent detail.

1857 Seated Quarter, MS65 Lustrous, Sharply Detailed Example

3526 1857 MS65 NGC. The 1857 Seated Liberty quarter was produced in large numbers, but few examples were saved by numismatists. Coins in Gem condition are quite scarce in today's market. The present coin is sharply detailed throughout and the mostly brilliant surfaces display wisps of light lavender toning. Vibrant mint luster is evident on both sides. Census: 56 in 65, 18 finer (10/10). (#5442)

Smooth Choice VF 1858-S Quarter

3527 1858-S VF35 PCGS. CAC. The 1858-S quarter is one of several early dates in the San Francisco minor silver series that becomes conditionally rare as early as XF. This Choice VF example, then, should appeal to a wide range of Seated enthusiasts. Gold-gray, rose, orange, and violet hues are dappled across faintly lustrous surfaces. (#5447)

3528 1858-S—Improperly Cleaned—NGC Details. XF. An example of this low-mintage and elusive issue with light to moderate wear. Cleaned in the past with a rim bump at lower reverse and blue retoning at left obverse and reverse. (#5447)

Gem 1860 Seated Liberty Quarter Lustrous, High Grade Condition Rarity

3529 1860 MS65 PCGS. CAC. The 1860 Seated Liberty quarter claims a substantial mintage of 804,400 pieces, but few examples have survived in high grades. The issue is very rare at the Gem level. The present coin is a well struck Gem, with wisps of gold and ice-blue toning, and strong mint luster. Housed in a green label holder. Population: 5 in 65, 2 finer (10/10). (#5451)

Elusive XF Sharpness 1860-S Quarter

3530 1860-S—Rim Filing—NGC Details. XF. A significant rim flaw or mark at the top of the reverse has been filed on this 1860-S quarter. Other than that, this is a desirable representative of one of the most challenging pre-Civil War San Francisco silver issues, rarely available with XF or better sharpness. Deep blue-gray and olive-green toning drapes minimally abraded surfaces. (#5453)

3531 1867 XF45 PCGS. Only 20,000 Seated Liberty quarters were struck in 1867, and the date is elusive in all grades today. The present coin is sharply detailed for an XF45, but the surfaces exhibit scattered minor abrasions on both sides, consistent with the grade. Attractive green and violet toning covers the surfaces, which show traces of prooflike reflectivity in sheltered areas. Population: 6 in 45, 27 finer (10/10). (#5470)

**Important MS64 1867 Quarter
Tied for PCGS-Finest**

3532 1867 MS64 PCGS. Just 20,000 pieces were struck for this post-Civil War Seated quarter issue, and few of those coins are available today in Mint State. This near-Gem is among the precious exceptions, one of just two MS64 coins graded by PCGS with none finer at that service (10/10). Soft luster filters through rich patina, a mix of rose and blue on the obverse with navy and violet across the reverse. Strongly struck with just a handful of significant marks. The first-generation holder makes this coin's grade seem all the more impressive. A magnificent coin for the Seated specialist to consider. (#5470)

3533 1872-CC Good 6 PCGS. The obverse has more life than the reverse, gold-to-gray with the last six letters of LIBERTY showing. Crossing abrasions on her figure contribute to the lessened grade. Population: 2 in 6, 46 finer (10/10). (#5482)

3534 1873 Arrows MS62 PCGS. Lightly but distinctly toned with warm and rewarding luster. Gold-to-green outer toning gives way to light blue over the centers. PCGS has graded 74 coins finer (10/10). (#5491)

3535 1874 Arrows MS64 PCGS. Deep blue-to-violet toning over most of the interiors with green-gold peripheral elements. Lustrous through the patina and well struck with few significant abrasions. Population: 23 in 64, 14 finer (10/10). (#5494)

3536 1877 MS65 PCGS. Type Two Reverse. A delightfully lustrous Gem example of this popular Seated quarter type issue, well-defined and carefully preserved under a layer of rich peach, blue, and sea-green toning. PCGS has certified 86 finer pieces (10/10). (#5504)

Surprising Superb Gem 1877 Quarter

3537 1877 MS67 NGC. Type Two Reverse. Bands of peach-red and jade-green endow the margins of this thoroughly lustrous Superb Gem. Sharply struck and pristine with unimprovable eye appeal. Struck from clashed dies that also exhibit rust (as made) within the eagle's shield. Census: 24 in 67, 7 finer (10/10). (#5504)

Richly Toned 1877-S Quarter, MS66

3538 1877-S MS66 PCGS. The 1877-S quarter has a generous mintage of nearly 9 million pieces that makes it attractive to type collectors. In grades above Gem, it becomes a condition rarity. This is a richly toned MS66 coin that offers bold, swirling luster through light gray patina that offers gold, orange, and lavender peripheral elements. (#5506)

Spectacular MS67 ★ 1879 Quarter

3539 1879 MS67 ★ NGC. Gorgeous bands of ocean-blue, plum-red, and golden-brown envelop this needle-sharp Superb Gem. The luster is booming, and only a few hairlines on the upper right obverse field deny numismatic perfection. Census: 3 in 67 ★, 3 finer with a Star designation (10/10). (#5511)

- 3540 1885 MS63 NGC.** This attractive and elusive Seated quarter exhibits satiny silver luster with bold design elements and mostly bright silver at the centers, with a frame of delicate reddish-gold and iridescent toning near the borders. Census: 15 in 63, 42 finer (10/10). (#5517)

**Premium Gem 1888 Seated Liberty Quarter
In-Demand, Low-Mintage Issue**

- 3541 1888 MS66 NGC. CAC.** The 1888 Seated Liberty quarter boasts a low mintage of just 10,000 pieces, and examples in Premium Gem condition are quite rare today. The present coin is a well struck specimen, with vibrant mint luster under iridescent ice-blue, green, and lavender toning. Census: 14 in 66, 14 finer (10/10). (#5520)

PROOF SEATED QUARTERS

- 3542 1859 PR62 PCGS.** Both sides of this desirable proof No Motto quarter are fully brilliant and sharply detailed with no evidence of toning. A lovely representative. (#5555)

**1859 Seated Quarter, PR64+
Attractive Toning**

- 3543 1859 PR64+ NGC. CAC.** A mintage of 800 proof Seated Liberty quarters was accomplished at the Philadelphia Mint in 1859, in just the second year of the Mint's commercial proof offerings. The present coin displays needle-sharp definition on all design elements, with iridescent blue and green patina. The fields are brightly reflective beneath the toning. Currently, this coin is the only PR64+ example in the NGC Census, with none certified finer in the plus category (10/10). (#5555)

**1864 Seated Liberty Quarter, PR65
Iridescent Toning**

- 3544 1864 PR65 PCGS. CAC.** Only 470 proof Seated Liberty quarters were minted in 1864, and few survivors can match the quality of the present Gem specimen. The coin offered here is sharply struck, with deeply mirrored fields, and vivid, iridescent violet and green patina. Housed in a green label holder. Population: 11 in 65, 4 finer (10/10). (#5560)

**1864 Seated Quarter, PR64 Cameo
Popular Civil War Date**

- 3545 1864 PR64 Cameo PCGS.** Coinage of proof Seated Liberty quarters was a minuscule 470 pieces in 1864, reflecting the difficult ordering procedures instituted by the Philadelphia Mint during the Civil War period. The present coin is a charming Cameo specimen, with deep mirrors and frosty devices. Specks of gold and green toning visit the pleasing surfaces. Population: 9 in 64 Cameo, 3 finer (10/10). (#85560)

**1871 Seated Liberty Quarter, PR66 ★ Cameo
Brilliant Surfaces, Strong Mirrors**

- 3546 1871 PR66 ★ Cameo NGC.** An exemplary strike imparts fine detail to all design elements on this spectacular Premium Gem, from a proof mintage of 960 pieces. The pristine surfaces are completely brilliant, and the deeply reflective fields contrast dramatically with the frosty devices. Census: 1 in 66 ★ Cameo, 0 finer (10/10). (#85570)

**Superb Gem Proof 1874 Quarter
With Arrows Type**

- 3547 1874 Arrows PR67 NGC.** This is a simply gorgeous coin that is earmarked for inclusion in the finest type set of toned Superb Gems. The fields are pleasingly reflective and they shine through the rich, original toning that blankets both sides. The color is reddish-champagne in the centers with electric-blue peripheral shadings. The strike is full, and grade-limiting hairlines are conspicuous by their absence. Arrows were briefly added to the design in 1873 to denote a minor change in weight to a metric standard. The Arrows, Motto type was only coined in 1873 and 1874, with a combined proof type mintage of only 1,240 pieces. For the 1874, NGC and PCGS combined have certified just nine coins in PR67, and none are graded finer (10/10).
Ex: 2002 FUN Sale (Heritage, 1/2002), lot 6782. (#5575)

**1881 Quarter, PR67 Cameo
Strong White-on-Black Contrast**

- 3548 1881 PR67 Cameo NGC.** The 1881 quarter is a perennial collector-favorite as it has a low total emission of only 12,000 strikes for circulation plus 975 proofs. When found, most survivors are in high grades, also adding to its popularity. This appears to be an early proof striking as it exhibits strong white-on-black cameo contrast on each side. The otherwise brilliant surfaces show just a hint of peripheral color. A well-preserved example from this low-mintage decade. (#85582)

- 3549 1884 PR64 PCGS.** A sensational representative with fully brilliant and untuned silver surfaces. Both sides are fully mirrored with slight contrast, although insufficient for a Cameo designation. (#5585)

**1890 Seated Liberty Quarter, PR65
Vivid, Attractive Toning**

- 3550 1890 PR65 NGC. CAC.** Only 590 proof Seated Liberty quarters were minted in 1890, and survivors in Gem condition are rare. The present coin is sharply detailed, with brightly reflective surfaces. The outstanding characteristic of this coin is the iridescent gold and violet toning that graces both sides. Census: 28 in 65, 34 finer (10/10). (#5591)

- 3551 1890 PR63 Cameo NGC.** An eye-catching Cameo from late in the proof Seated quarter series. Blue and violet toning over the mirrors stops at the devices, which are frosted silver-white. Scattered light hairlines contribute to the grade. Census: 4 in 63 Cameo, 42 finer (10/10).(#85591)

Exemplary PR66+ 1891 Quarter

- 3552 1891 PR66+ NGC.** Dramatic orange-gold, ruby-red, and blue-green patina consumes this precisely struck and beautifully preserved Premium Gem. Among the nicest survivors from a concluding year proof mintage of just 600 pieces. Census: 1 in 66+, 17 finer without a Cameo or Ultra Cameo designation (10/10). (#5592)

BARBER QUARTERS

Premium Gem 1894-O Barber Quarter Satiny Luster, Attractive Toning

- 3553 1894-O MS66 PCGS. CAC.** From a business strike mintage of 2.8 million pieces, the 1894-O Barber quarter is scarce, but not rare, in lower Mint State grades. Examples in Premium Gem condition are very rare, however, and PCGS has certified no coins in higher numeric grades (10/10). The present coin is well struck, with just the typical softness showing on the hair and eagle's claw. Light lavender patina graces both sides, with vibrant, satiny luster shining through the toning. Housed in a green label holder. (#5608)

Important 1896-S Barber Quarter

- 3554 1896-S Genuine PCGS.** The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, the piece has the details of a VF specimen that has been scratched, cleaned, and retoned. Moderately worn with a shallow scratch crossing Liberty's jawline. Cleaned in the past with medium-gray and pearl toning over each side that has an artificial origin.

1896-S Quarter, XF45 Low-Mintage Key to the Series

- 3555 1896-S XF45 PCGS.** The 1896-S had a low mintage of only 188,039 pieces and is very scarce in XF and better grades. Its scarcity has even attracted the attention of counterfeiters who have added an S to a P-mint coin. Genuine coins, such as this one, show horizontal die striations in the ear of Liberty. The surfaces of this piece are gray-brilliant with traces of luster surrounding the devices. The only mark of significance is at the back of Liberty's jawline. (#5615)

- 3556 1897-O MS64 PCGS.** Pink, orange, and gray hues cover most of the obverse, while the reverse is brighter with paler silver hues aside from the reddish-pearl elements at the margins. Great eye appeal for this O-mint issue which is challenging so fine. (#5617)

Gem 1899-O Barber Quarter Sharp Strike, Stunning Mint Luster

- 3557 1899-O MS65 NGC.** From a substantial mintage of 2.6 million pieces, the 1899-O Barber quarter is an underrated issue in Mint State grades, and the date is quite rare at the Gem level. The outstanding quality of this specimen is the vibrant, booming mint luster displayed on the brilliant, stone-white surfaces. The strike is needle-sharp, to add to the already powerful eye appeal. Census: 9 in 65, 3 finer (10/10). (#5623)

- 3558 1901-S Fair 2 PCGS.** Extensively worn but readily collectible. The last three digits of the date and the top of the right-set S are visible, and this is enough. An abrasion is noted at the upper right obverse. (#5630)

**1901-S Barber Quarter, Good 4
Low-Mintage Key**

3559 1901-S Good 4 NGC. The 1901-S is the most sought-after issue in the Barber quarter series, with a low mintage of 72,664 pieces and a low survival rate. This date is in-demand and valuable, even in lower circulated grades, as few high quality examples survive. The present coin is evenly worn and problem-free, with traces of green and lavender patina. Census: 36 in 4, 56 finer (10/10). (#5630)

3560 1905 MS65 PCGS. Rich olive, blue, and plum toning drapes each side of this strongly lustrous Gem. A well struck example of an issue seldom found so fine. Population: 17 in 65, 12 finer (10/10). (#5639)

Popular 1913-S Barber Quarter

3561 1913-S Genuine PCGS. The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, the piece has the details of an XF specimen that has been cleaned and shows light obverse environmental damage. Well-defined but with hairlines from a past cleaning. Toning ranges from pearl-gray to charcoal, with deeper elements at the obverse margins veering into environmental damage territory.

3562 1913-S Good 4 PCGS. CAC. From a series-low mintage of 40,000 pieces, the 1913-S Barber quarter is one of the most sought-after issues of the series. This pleasing silver-gray example is well worn, but the date, mintmark, and major design elements are still present. (#5666)

PROOF BARBER QUARTERS

3563 1892 PR64 PCGS. CAC. Type One Reverse, a rare subtype on proofs. A deeply toned first-year specimen that still shows considerable texture on the devices. Rich amber, gold-green, blue, and violet shadings are even more intense on the reverse. (#5678)

Patinated PR67 1892 Barber Quarter

3564 1892 PR67 NGC. Type Two Reverse. Lovely forest-green, orange, and lilac shades encompass this intricately struck and undisturbed Superb Gem. The fields are reflective, and the eye appeal is immense. Ideal for a high quality proof 19th century type set. Census: 24 in 67, 9 finer (10/10). (#5678)

Scarce PR67 ★ 1893 Barber Quarter

3565 1893 PR67 ★ Cameo NGC. This satiny Barber quarter has untuned fields and devices, although the peripheries display golden-russet and navy-blue patina. The strike is razor-sharp, and the eye appeal is formidable. A scant 792 proofs were struck, quite a reduction from the previous year. Apparently, collector interest was high for the new Barber designs following their 1892 introduction, but subsided thereafter. (#85679)

3566 1894 PR64 PCGS. The 1894 Barber quarter enjoyed a large proof mintage of 972 pieces. The present coin is a sharply struck Choice example, with reflective fields and mottled green, gold, and violet toning. Population: 81 in 64, 72 finer (10/10).(#5680)

3567 1900 PR65 ★ Cameo NGC. CAC. Colorful, contrasted, and captivating. Minimally toned devices are richly frosted, while the fields around them fade through gold and eventually royal-blue patina. (#85686)

Striking PR67 Cameo 1904 Quarter

3568 1904 PR67 Cameo NGC. CAC. An unusual Cameo representative of this brilliant-era proof Barber quarter issue, made all the more extraordinary by its impressive preservation. Central devices are lightly but distinctly silver-frosted, and the virtually untuned fields are deeply reflective. Census: 8 in 67 Cameo, 0 finer (10/10). (#85690)

3569 1906 PR66 PCGS. A thickly toned and gorgeous Premium Gem with stark patches of gold-green, aqua, blue, and violet in various places. Strongly mirrored on the obverse with a more muted appearance on the reverse. Population: 32 in 66, 19 finer (10/10). (#5692)

3570 1906 PR63 Cameo NGC. An unusual later Cameo proof from the Barber quarter series, lightly hairlined in the fields but distinctly contrasted between the mirrors and the well struck devices. Peripheral toning is pale green-gold, while the centers are silver. (#85692)

Superb Gem 1910 Barber Quarter Vivid Toning, Strong Eye Appeal

3571 1910 PR67 NGC. The 1910 proof Barber quarter boasts the third lowest mintage of the series at 551 pieces. The present coin is a spectacular Superb Gem, with a razor-sharp strike, brightly reflective fields, and vivid green and violet toning. Visual appeal is outstanding. Census: 22 in 67, 9 finer (10/10). (#5696)

STANDING LIBERTY QUARTERS

Clear Date 1916 Quarter, Fine 12

3572 1916 Fine 12 PCGS. Because the 1916 quarters were struck in December, few people noticed the difference in the dates between the 1916s and the 1917s struck only a month later. As a result, a large percentage of the mintage slipped into circulation, as did this piece. The surfaces are light gray overall with little variance in hue. Numerous grade-consistent small marks are scattered over each side. (#5704)

1916 Standing Liberty Quarter, VF25 Low-Mintage, First-Year of Design

3573 1916 VF25 PCGS. The 1916 Standing Liberty quarter boasts one of the lowest mintage figures of any 20th century U.S. regular-issue coin, at 52,000 pieces. This issue has always been acknowledged as the key to the series, but it is also popular as the first year of a two-year design type. The present coin shows moderate, even wear on all surfaces, with attractive dove-gray and electric-blue toning. (#5704)

- 3574 1917 Type One MS66 Full Head NGC.** A boldly defined Premium Gem, this Type One quarter exhibits silver brilliance at the centers, with deep golden-steel toning along the obverse border and delicate light gold at the reverse periphery. (#5707)

Full Head MS67 Type One 1917 Quarter

- 3575 1917 Type One MS67 Full Head PCGS.** Light sun-gold patina illuminates the margins of this thoroughly lustrous and nearly fully struck Superb Gem. A magnificent representative of a briefly coined type, as Liberty would soon don armor in preparation for World War I. Population: 59 in 67 Full Head, 1 finer (10/10). (#5707)

- 3576 1917-D Type One MS65+ Full Head PCGS. CAC.** Light pink and blue tints over immensely lustrous, faintly textured surfaces. This well-defined Gem-plus piece also has an arc of gold-orange at the left reverse. (#5709)

**1917-D Type One Quarter, MS66 Full Head
Wonderfully Preserved Example**

- 3577 1917-D Type One MS66 Full Head PCGS. CAC.** Several times scarcer than its Philadelphia counterpart, the 1917-D is a popular Type One issue for collectors, if for no other reason than its mintmark. This is a splendid example that displays rich mint frost over finely granular surfaces. Brilliant except for a tinge of golden patina at the margin, this is a wonderful and near-perfectly preserved 1917-D Type One. (#5709)

- 3578 1917-S Type One MS65+ PCGS. CAC.** A lustrous Gem example of the sole Type One S-mint Standing Liberty quarter eagle issue. Satiny surfaces are mainly pearl-gray on the obverse but have considerable golden overtones on the reverse. PCGS has graded 16 finer Full Head examples (10/10). (#5710)

**Fantastic 1917-S Type One Quarter
A Full Head Premium Gem**

- 3579 1917-S Type One MS66 Full Head NGC.** This is a remarkably attractive and technically impressive example of the Type One Standing Liberty quarter, which had a mintage of under 2 million pieces. All of the design elements are completely struck, including the shield rivets and the eagle's breast feathers. The lovely satin luster illuminates silver surfaces with just a touch of gold color on the lower right side of the obverse. A few wispy marks are noted in the reverse fields, but the overall eye appeal is solid. Census: 63 in 66 Full Head, 16 finer (10/10). (#5711)

- 3580 1918 MS66 NGC. CAC.** A magnificently preserved pearl-gray and caramel-gold Premium Gem. The strike is above average, with the date sharply impressed and the head fairly close to full. The two shield rivets near the waist are present although in low relief. (#5720)

- 3581 1918-D MS66 NGC.** Frosty luster dominates the eye appeal of this Premium Gem. The vibrant silver-white surfaces extend all the way to the rims, where a hint of golden-tan finally appears. Softly struck at the head but well-defined elsewhere. (#5722)

- 3582 1918-S MS65 PCGS. CAC.** Light blue elements across pale silver surfaces with generous luster. Softly struck at head and shield but well-preserved with only a few short marks. Population: 61 in 65, 13 finer (10/10). (#5724)

- 3583 1919 MS66 PCGS.** A strongly lustrous Premium Gem with considerable but not full detail on Liberty's head. Largely silver on the obverse with prominent green-gold tints across the reverse. Housed in a green label holder. Population: 75 in 66, 17 finer (10/10). (#5728)

- 3584 1919 MS66 PCGS. CAC.** Well-defined overall and just a leaf or two shy of Full Head status. Soft blue-gray and gold notes on the obverse intensify to deep indigo and amber over the lower reverse. Population: 75 in 66, 17 finer (10/10). (#5728)

- 3585 1919-D AU58 PCGS.** Green-gold and orange overtones appear on each side. At the upper reverse, these elements are the most prominent. A lustrous coin with just a touch of rub on decently struck devices. (#5730)

- 3586 1921 MS61 ANACS.** Soft gold-gray toning has settled over much of this Mint State example, with the color deepening to orange and butterscotch close to the rims. Well-defined overall but with the usual softness on the head. (#5740)

Shining Full Head 1924 Quarter, MS66

- 3587 1924 MS66 Full Head PCGS.** Boldly lustrous with little visible patina aside from small snatches of blue, gold, and rose at parts of the margins. Better-defined than usual on both head and shield with just a few tiny abrasions that preclude an even finer designation. PCGS has certified just seven finer Full Head examples (10/10). (#5747)

Full Head Gem 1924-S Quarter

- 3588 1924-S MS65 Full Head NGC.** Well struck overall with only minor softness at Liberty's shield and the eagle's breast. Liberty's head readily qualifies for Full by NGC standards, and the carefully preserved surfaces easily count on the Gem level. Strongly toned with a mixture of gold-orange and lavender-blue hues. Census: 29 in 65 Full Head, 4 finer (10/10). (#5751)
- 3589 1927-D MS66 PCGS. CAC.** Dappled blue, canary-gold, and violet hues grace this D-mint Premium Gem. Only slight softness in the ear area precludes Full Head status. Population: 26 in 66, 0 finer (10/10). (#5762)
- 3590 1928 MS66 NGC. CAC.** Standing Liberty quarter specialist J.H. Cline believes the 1928 is an underrated date, especially in high grade. The present coin is a spectacular Premium Gem, well struck and lustrous, with glorious ice-blue and golden-brown patina. Census: 37 in 66, 11 finer (10/10). (#5766)
- 3591 1928-S MS66 Full Head PCGS. CAC.** A bright Full Head Premium Gem with minimal patina and one distinct area of striking softness on the shield. Frosty with a few suggestions of green-gold at the upper reverse. (#5771)
- 3592 1929 MS66+ Full Head PCGS. CAC.** Attentively struck with generous frosty luster and considerable orange tints over pale silver-blue surfaces. Fantastic eye appeal. PCGS has graded six finer Full Head examples (10/10). (#5773)
- 3593 1930 MS66 Full Head PCGS.** Significantly better-defined than the norm for this final-year issue. Bright silver surfaces are pleasingly preserved on this Premium Gem. PCGS has certified 30 finer Full Head pieces (10/10). (#5779)
- 3594 1930-S MS67 Full Head NGC.** Both Liberty's head and her shield show substantially above-average definition on this wonderful Superb Gem. Only the tiniest of flaws appear in the immensely lustrous fields, even under close scrutiny. Pale peach patina visits parts of the otherwise light silver-gray surfaces. (#5781)

WASHINGTON QUARTERS

- 3595 1932-D MS62 NGC.** Soft but attractive luster with mostly silver centers. The margins offer a melange of peach, blue, violet, and gold shadings. Scattered wispy abrasions affect the technical grade more than the eye appeal. (#5791)
- 3596 1932-S MS64 NGC. CAC.** A sharply detailed Choice Mint State representative of the desirable San Francisco issue, this piece exhibits frosty luster with peripheral gold and iridescent toning. (#5792)

Gem 1932-S Washington Quarter First-Year, Key Date

- 3597 1932-S MS65 PCGS. CAC.** A delightful Gem specimen of this first-year Washington quarter, from a low mintage of 408,000 pieces. The devices are sharply defined, and the surfaces are graced by shades of green, russet, and ice-blue toning. Vibrant mint luster shines through the patina. Currently, only four coins have been certified in higher numeric grades at PCGS (10/10). (#5792)
- 3598 1940-D MS67 NGC.** Only 20 Superb Gem 1940-D Washington quarters have been certified by PCGS, with none finer (10/10), an important consideration for the Registry Set collector. The present coin is virtually perfect, with subtle hints of gold toning at the peripheries. (#5812)
- 3599 1941-S MS67 PCGS. CAC.** An amazing example, this Superb Gem has satiny silver surfaces with gorgeous peripheral gold, blue, and iridescent toning. Population: 34 in 67, 0 finer (10/10). (#5816)
- 3600 1947-S MS67+ PCGS. CAC.** The obverse is fabulously toned with a silver center and the reverse is only slightly toned around the margin. The surfaces are essentially perfect on both sides. (#5835)
- 3601 1949-D MS67 PCGS. CAC.** Intense umber-to-gold toning with reddish and orange accents consumes the obverse. The small windows of silver on the well struck portrait echo the broader untuned center on the reverse. Population: 28 in 67, 2 finer (10/10). (#5840)
- 3602 Coin and Die Set for 1998-D Quarter.** A die used to strike 1998-D quarters, serial number 8544984, along with two of the first pieces produced by said die. The design was planed off prior to the die's sale for security reasons, and while the certificate of authenticity lists any number of facts about the die's lifespan, it fails to mention "obverse" or "reverse." (Total: 3 items)

PROOF WASHINGTON QUARTERS

Sensational 1938 Quarter, PR68

- 3603 1938 PR68 PCGS.** A lovely Superb Gem proof, this 1938 quarter is fully brilliant with deeply mirrored fields and satiny devices, enhanced by delicate gold toning. It is one of the finest examples that PCGS has ever certified, a wonderful candidate for the advanced Registry collector. Population: 2 in 68, 0 finer (10/10). (#5977)

1953 Quarter, PR68 Deep Cameo None Certified Finer at PCGS

- 3604 1953 PR68 Deep Cameo PCGS.** This profoundly contrasted Washington quarter exhibits all the hallmarks of a Registry Set coin. The pristine surfaces are mostly brilliant, with hints of gold toning on the devices. Sharply struck throughout, some minor die doubling is apparent on IN GOD WE TRUST. Population: 7 in 68 Deep Cameo, 0 finer (10/10). (#95985)

1954 Washington Quarter, PR69 Ultra Cameo Among the Finest Certified

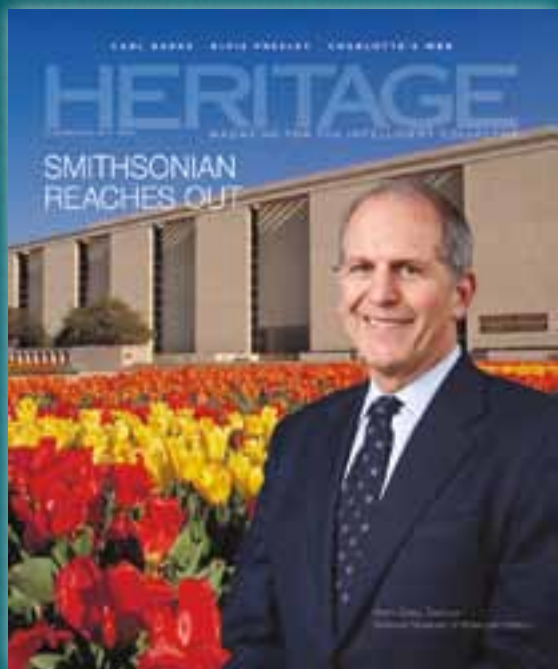

- 3605 1954 PR69 Ultra Cameo NGC.** A virtually perfect coin, with razor-sharp, frosty devices, and deeply mirrored fields of unfathomable depth. The intense field-device contrast results in a stunning black-on-white Ultra Cameo flash when the coin is tilted in the light. This coin displays incredible eye appeal to complement the high technical grade. Census: 6 in 69 Ultra Cameo, 0 finer (10/10). (#95986)

Near-Perfect 1958 Washington Quarter PR69 Deep Cameo

- 3606 1958 PR69 Deep Cameo PCGS.** Hints of light gold toning enhance the aesthetic desirability of this amazing Superb Gem proof. It is a nearly perfect example that has deeply mirrored fields and frosty, highly lustrous devices. Population: 5 in 69 Deep Cameo, 0 finer (10/10). (#95990)

STATEHOOD QUARTERS

- 3607** 2004-D Wisconsin Quarter Extra Leaf Variety Set MS67 NGC. A three-coin set, all graded MS67. Includes the regular 2004-D Wisconsin quarter, the 2004-D Extra Leaf High quarter, and the 2004-D Extra Leaf Low quarter.

PROOF STATEHOOD QUARTERS

Flawless 56-Coin 1999-2009
Silver Quarter Set

- 3608** 56-Piece Silver "Statehood" Quarter Set PR70 Ultra Cameo NGC. The complete set of proof silver quarters from 1999 to 2009, from Delaware to the Northern Mariana Islands, visiting every state, the District of Columbia, and several overseas territories. The 1999-S issues (Delaware, Pennsylvania, New Jersey, Georgia, and Connecticut) are of particular importance to high-end collectors. (Total: 56 coins)

EARLY HALF DOLLARS

- 3609** 1795 2 Leaves—WAGNER Counterstamp—VG10 NGC. O-109, R.4. Rulau-E-Mav(erick)-52K, R.8. The counterstamp is circa-1820s, per Rulau, and is entered with a single well-engraved gang punch. The host Flowing Hair half dollar is cream-gray and has virtually full legends, with the tops of BER slightly worn into the rim. The obverse displays minor mint-made adjustment marks, but no abrasions are relevant. (#6052)
- 3610** 1795 2 Leaves VG10 PCGS. O-110a, R.3. A pair of bold die cracks on the upper right obverse field identify the later die stage. Light to medium gray fields highlight the slightly lighter design motifs. Carefully preserved and mighty close to Fine status. (#6052)

Two Leaves 1795 Half Dollar, O-125, AU55

- 3611** 1795 2 Leaves AU55 PCGS. O-125, High R.4. A 9 x 8 berries configuration on the obverse, with the variety confirmed by the two outside right berries and the leaf tips to the left of the second A in AMERICA. The reverse die is also prominently clashed in a line from the bottom of the eagle's left (facing) wing. Very scarce variety aside, this is simply an attractive Flowing Hair half dollar, minimally worn with remarkable detail on Liberty's portrait. Deep reddish and blue-gray colors cover most of each side, and while the peripheries show a measure of softness, the overall eye appeal is excellent. For the multitudinous Two Leaves 1795 half dollar varieties, Population: 23 in 55, 34 finer (10/10).
From The Eagle Harbor Collection, Part Two. (#6052)

- 3612** 1795/1795—Improperly Cleaned—NGC Details. VG. O-112, R.4. The first logotype impression was too low, touching the dentils, and the date was repunched north with a wide spread. Cream-gray centers are bounded by gunmetal-gray borders. Cleaned and possibly whizzed with tooling marks on the right obverse field. (#6055)

1796 16 Stars Half Dollar
O-102, Outstanding VG10

3613 1796 16 Stars VG10 PCGS. CAC. O-102, High R.5. The Draped bust Small Eagle half dollar of 1796-1797 saw a paltry mintage of 3,918 pieces, making it one of the rarest of U.S. type coins. This low production figure can be attributed to several factors, the most important of which may have been that most bullion depositors wanted dollars for their silver, not half dollars or smaller denomination coins. Second, an illegal silver standard of 0.900 fine in effect for 1794-1795 coinage instead of the 0.8924+ prescribed by the Mint Act of 1792 discouraged merchants and bankers from bringing silver bullion to the Mint for coinage into any denomination (see Don Taxay, *U.S. Mint and Coinage*, p. 89, for a discussion of the effect this illegal standard had on the dollar amount depositors received for their silver). Third, a yellow fever epidemic forced the closing of the mint from late August to late November 1797. Finally, the years 1794 and 1795 saw a relatively hefty production of more than 300,000 half dollars of the Flowing Hair design type.

The present 1796 16 stars offering is an amazing coin in several respects. It displays excellent design definition for the grade, including relatively strong detail in Liberty's middle and lower hair and that atop the head. The date, stars, and letters in LIBERTY all stand out, as do the reverse letters, wreath, and fraction. About one third of the plumage shows in the eagle's wings while virtually all of the tail feathers are evident. Portions of the left (right facing) claw are visible and the right (left facing) leg is completely separated from the torso. As these features point to relatively strong Fine detail we feel this coin has been conservatively graded by PCGS.

The multicolored toning is another outstanding attribute of the present specimen. Light to medium gray patina is highlighted by golden-orange, sea-green, rose, and bluish-gray on the obverse and subtle apricot and silver-gray on the reverse. Two minuscule marks on the right (left facing) breast and a few more under the left (right facing) wing will help pedigree the coin. The lack of a die crack from the rim through the first four stars indicates an earlier die state. All in all, this is a wonderful piece for a 200 year+ coin that has seen moderate circulation.

Ex: Laurence H. Gardner Collection from the Buffalo and Erie County Historical Society (Stack's, 3/2005, Choice Fine), lot 167; William H. LaBelle, Sr. Collection (American Numismatic Rarities, 7/2005, NGC Fine 12), lot 1147; Ira and Larry Goldberg (9/2005, NGC Fine 12), lot 1706; Bowers and Merena (1/2010, PCGS VG10, CAC), lot 353. (#6058)

- 3614** 1806 Knobbed 6, Large Stars VF35 PCGS. CAC. O-105, R.2. An earlier die state of the O-105 without the crack through left-side stars. Deep gold, rose, and mauve toning over most of each side with patches of lighter color at the worn high points. (#6074)

**Near-Mint 1806 Draped Bust Half
Pointed 6, No Stem, O-109**

- 3615** 1806 Pointed 6, No Stem AU58 PCGS. O-109, R.1. Mottled blue, silver, and gray toning enhances the surfaces of this attractive near-Mint half dollar. The strike is slightly soft on the central details, but little actual wear is detected. Much original mint luster shines through the patina. The O-109 variety is identified by the spike in the dentils between star 7 and L in LIBERTY. Population: 16 in 58, 16 finer (10/10).
From *The Eagle Harbor Collection, Part Two*. (#6073)

BUST HALF DOLLARS

**Scarce O-113a Capped Bust, Small Stars
1807 Half Dollar, AU58**

- 3616** 1807 Capped Bust, Small Stars AU58 PCGS. O-113a, R.3. The scarce later die state of this distinctive reverse, which has prominent die lines crossing through the letters of E PLURIBUS UNUM. Cracked around the left side and softly struck at the eagle's wing-to-neck junctures, but an immensely lustrous and scarcely worn example with streaks of gold and charcoal toning against silver surfaces. (#6087)
- 3617** 1807 Capped Bust, Large Stars VF35 PCGS. CAC. O-114, R.3. The scarce Large Stars variety, a separate *Guide Book* variety that collectors desire in all grades. This attractive piece exhibits light gray toning on both sides with faint traces of luster. (#6088)
- 3618** 1808 MS61 NGC. O-105, R.3. The letters AT are rotated clockwise relative to the rest of STATES on this softly lustrous Mint State example. Toning is largely gold, peach, and orange with a few streaks of gray on the obverse and arcs of blue-green along the upper reverse. An attractive coin for the MS61 grade with few significant abrasions. For the non-overdate varieties, Census: 10 in 61, 47 finer (10/10). (#6090)

Select Mint State 1808 Half, O-103

- 3619** 1808 MS63 NGC. O-103, R.1. A relatively plentiful variety in circulated grades, identified by the joined letters AM in AMERICA. In Select condition, of course, it is significantly less accessible. This is an attractively lustrous gold-tinged example from a later die state, which shows clashes and erosion, as well as the beginnings of cracks through the reverse lettering. (#6090)

Select O-106a 1808 Half Dollar

- 3620** 1808 MS63 PCGS. O-106a, R.2. While the arcing die crack on the late-state obverse is the most prominent signal on this Select piece, the reverse diagnostics (recutting of the E in AMERICA, the dot just to the left of the top of the shield) are the most secure method of identification. Blue, lavender, and gold toning embraces each side. Housed in a green label holder. (#6090)

**Colorful MS63 1809 Half
O-109a, III Edge**

- 3621** 1809 III Edge MS63 PCGS. O-109a, R.2. The O-109a is actually the most common of the three major states for this die pair, distinguished by a die break through the middle of AMERICA but not extending to the denomination. The III edge, though not visible through the holder, with generous peach, blue, and violet toning over a warmly lustrous obverse and a flashy reverse. Housed in a green label holder. (#6094)

Popular 1811/10 Half, O-101, MS61

3622 1811/10 MS61 PCGS. O-101, R.1. This overdate is more popularly known as the “Punctuated Date,” as a dot like a decimal point appears between the two halves of the date. This example is softly struck at left but better-defined at right, gold-toned at the margins with a frosty texture to the silver interiors. (#6099)

3623 1811 Small 8 MS62 NGC. O-109, R.2. A heavy die crack crosses the scroll and continues into the wing, immediately identifying this die marriage. This highly attractive example has rich iridescent toning on both sides, with satiny underlying luster and sharp design definition. (#6097)

Select Small 8 1811 Half, O-110

3624 1811 Small 8 MS63 PCGS. O-110, R.1. An earlier state of this accessible die pair, distinguished by the joined AM in AMERICA on the reverse. An appealing Select coin with golden outer toning, frosty luster, and a strike that strengthens from left to right. For the various Small 8 die pairs, Population: 21 in 63, 23 finer (10/10). (#6097)

O-103 1812 Half Dollar, MS62

3625 1812 MS62 PCGS. O-103, R.1. This variety is distinguished by die lines, both to the right of Liberty's clasp on the obverse and in the field below the eagle's beak on the reverse. A lustrous Mint State example with rich blue outer toning and broad inner circles of peach, minimally abraded for the grade. (#6100)

3626 1814 AU58 PCGS. O-105, R.2. The obverse diagnostic “ear bars” are far from the only important clash on this near-Mint example, as distinct letters from E PLURIBUS UNUM are readable under Liberty's figure. Strongly lustrous with layers of gold and rose toning. (#6105)

Near-Mint O-101a 1817/3 Half Dollar

3627 1817/3 AU58 PCGS. O-101a, R.2. The more common later die state of the 1817/3 overdate with a crack across the top of the denomination. Green-gold and violet patina graces much of each side, and the luster is essentially uninterrupted. Just a touch of rub across the high points precludes an even finer designation. (#6111)

1817 Half Dollar, MS62, O-112a

3628 1817 MS62 NGC. O-112a, R.2. The later reverse die state with a crack running through UNITED and the first two letters of STATES. Gold, orange, and blue overtones grace light gray surfaces with attractive luster. Several light nicks appear on Liberty's neck, just left of the diagnostic die lines on the obverse. (#6109)

Small 8 1818/7 Half Dollar, O-102a, MS62

3629 1818/7 Small 8 MS62 PCGS. O-102a, R.2. A die break has filled in the upper loop of the over-punched 8, though the “horns” of the 7 are still readily visible. An attractive and frosty example that is well-defined overall and shows peripheral gold, green, and charcoal elements. For the Small 8 overdate variety, Population: 5 in 62, 7 finer (10/10). (#6114)

Large 8, O-101a 1818/7 Half, MS61

3630 1818/7 Large 8 MS61 NGC. O-101a, R.1. The Large 8 Overdate obverse, paired with a late (cracked) state of the reverse that has a gap in the dentils below the C in the denomination. A lustrous piece with generous gold and peach overtones across each side. Scattered wispy marks and a bit of choppiness on the high points contribute to the grade. (#6115)

3631 1818 MS62 NGC. O-114a, R.3. Mostly bright silver surfaces with delicate gold and champagne toning adds to the eye appeal of this desirable Mint State piece. A few darker toning splashes are evident on each side. (#6113)

3632 1819 AU58 PCGS. O-114, R.3. A splendid near-Mint example with full satin luster and outstanding eye appeal. Both sides of this piece have a trace of gold and iridescent toning that gathers near the borders. (#6117)

3633 1820 Curl Base 2, Small Date AU58 PCGS. O-103a, R.2. This late die state piece is highly lustrous with only a trace of wear on the highest design points. Both sides are brilliant and satiny with delicate peripheral gold toning. (#6121)

3634 1820 Square Base Knob 2, Large Date AU58 PCGS. O-104, R.4. This scarce die marriage is seldom seen any finer than the present near-Mint example. Both sides possess excellent eye appeal that results from the satiny silver luster and sharp design motifs. (#6122)

3635 1820 Square Base No Knob 2, Large Date AU50 PCGS. CAC. O-106, R.1. Golden-tan fields encompass steel-blue motifs. Traces of luster beckon from protected regions. A lovely and problem-free Bust half that displays only moderate wear on the highpoints of the portrait. (#6123)

3636 1821 AU58 PCGS. O-104, R.1. Certified years ago and remaining in its green-label PCGS holder is a delightful near-Mint example with satiny luster beneath deep gold and iridescent toning on both sides. (#6128)

3637 1821 AU58 PCGS. O-107, R.3. This sensational near-Mint example is close to the Condition Census for the scarce O-107 die marriage, the rarest of the date. Both sides have underlying satin luster with bold design features. (#6128)

3638 1821 MS62 NGC. O-106, R.1. This satin Mint State beauty is mostly bright silver with speckled golden-brown and iridescent toning on both sides. The design elements are sharp and the eye appeal is excellent. (#6128)

O-103 1821 Half Dollar, MS63

3639 1821 MS63 NGC. O-103, R.2. The reverse is the key attribution side, specifically the defective serifs at the bottom of the A and E in STATES. Strong yellow-gold to peach color graces impressively lustrous surfaces, while the lower reverse also shows dots of deeper reddish-brown color. For the various die pairs, Census: 14 in 63, 13 finer (10/10). (#6128)

**Choice AU 1822/1 Capped Bust Half
Important O-102 Marriage**

3640 1822/1 AU55 PCGS. O-102, High R.4. The combination of the overdate obverse and a reverse with a strong center dot between shield lines 4 and 5 identifies the extremely scarce O-102 die marriage. This attractive coin has a sharp strike that is diminished only by a trace of wear on the highest points of the central devices. Delightful shades of gold and lavender toning grace the peripheries of this coin, while the centers are brilliant and lustrous. This example is clearly a Condition Census piece, perhaps third or fourth finest known.

Stephen Herrman reports only 14 AU examples in his Auction Records book, spanning a decade of sales, and most of the listed coins are cleaned or are otherwise imperfect. The present specimen is a delightful exception to that rule. A single Mint State piece is recorded in Herrman's list, but that piece from the Byers Collection was uncertified and realized a price commensurate with AU50 grade coins selling at about the same time. The auction record for any example of the 1822 O-102 die combination, according to Herrman, is \$10,350 realized for the AU58 PCGS Witham Collection coin that we sold at Boston in our 2010 ANA Sale. The present AU55 PCGS specimen is nearly the equal of the Witham coin.

Colorful Select 1822 Half, O-106a

3641 1822 MS63 NGC. O-106a, R.3. The later state of this single-use reverse is distinguished by a die crack through the leaves of the olive branch, the nearby wing feathers, and UNITED STATES. Strongly lustrous and intensely toned with blue-to-green and gold-orange colors that become dappled at their border-zones. (#6129)

3642 1823 Patched 3 AU58 PCGS. O-101a, R.1. The late die state of this obverse has a distinctive repaired 3, and it is known as the Patched 3 obverse. Earlier die states are called the Broken 3. This delightful piece has deep gold and steel toning with frosty underlying luster. (#6133)

3643 1823 MS62 NGC. O-103, R.2. An exceptional example with steel-blue peripheries surrounding lighter golden toned centers on both sides. The surfaces retain frosty luster with bold design motifs. (#6131)

3644 1823 MS62 PCGS. O-107, R.2. A relatively common variety, with this Mint state example retained in a green-label PCGS holder from certification years ago. Both sides are sharply detailed with full satin luster beneath gold and iridescent toning. (#6131)

Ugly 3 1823 Half, O-110a, MS62

3645 1823 Ugly 3 MS62 NGC. O-110a. Ex: Brown. One of the early Mint's worse patch-up jobs, the Ugly 3 may have strengthened that digit in the date, but it came at a stunning aesthetic cost. This late-state example has thick, saturated patina on each side, deep peach with muted blue-green elements at the central obverse and peripheral reverse. (#6134)

3646 1824/1 AU58 PCGS. O-101, R.2. This lovely overdate is a satiny and highly lustrous near-Mint example. The surfaces host light reddish-gold toning at the centers, within a frame of blue-green and iridescent toning at the borders. (#6139)

Choice 1824/1 Half Dollar, O-101a

3647 1824/1 MS64 NGC. O-101a, R.2. Olive-green, sea-green, rose-gold, and stone-gray enrich this moderately toned and satiny near-Gem. The strike is sharp throughout, and visible marks are limited to a pair of brief hair-thin lines on the right obverse field. Combined 1824/1 NGC Census: 8 in 64, 3 finer (10/10). (#6139)

Famous 'Various Dates' 1824 Half The O-103 Overdate, AU58

3648 1824 Overdate AU58 PCGS. O-103, R.1. The infamous "Various Dates" overdate, which has the 4 over a 2 and a 0...at least! This is a frosty example of the *Guide Book* legend, mainly silver in color with gold-to-orange toning across parts of the margins. Well struck with only slight evidence of rub. For the variety, Population: 16 in 58, 33 finer (10/10). (#6138)

3649 1824 MS63 ICG. O-106, R.2. Although plentiful as a variety, few high grade examples are known, and this piece falls within the Condition Census. Both sides have silver-gray surfaces with a few splashes of reddish-brown toning. The design motifs are mostly bold. (#6137)

3650 1826 AU53 PCGS. O-108a, R.1. Several cracks are noted on this late die state. The reverse has a crack from the border to UNITE, the top of the scroll, and on to S OF, though it does not continue to AM as noted in Overton. Hints of champagne toning grace the lustrous silver surfaces on each side of this splendid specimen. *Ex: The Donald R. Frederick Collection of Early U.S. Coinage: Bayside Part II (Heritage, 4/2010), lot 3110.* (#6143)

Flashy O-118a 1826 Half, MS63

3651 1826 MS63 NGC. O-118a, R.1. A die line through the UN of UNUM confirms the variety, while die cracks across the tops of UNITED STATES and AMERICA reinforce the O-118a state. A fantastically lustrous Select example that has light green-gold outer toning surrounding more dusky blue-to-violet interiors. A degree of weakness is noted on the 5 in the denomination. (#6143)

**Gem 1826 Half Dollar
O-118a, Late Die State**

- 3652** 1826 MS65 NGC. O-118a, R.1. A late state of the dies, with the characteristic die breaks at the top of NITED STATES and MERICA. The present coin is a delightful gem, with sharply detailed design elements and iridescent shades of gold, gray, and powder-blue toning. Strong mint luster shines through the toning, creating outstanding eye appeal. While the 1826 Capped Bust half is not rare as a date, examples in MS65 condition are definitely scarce. *From The W. Philip Keller Collection of U.S. Colonials.* (#6143)

O-101 1827/6 Half Dollar, MS63

- 3653** 1827/6 MS63 NGC. O-101, R.2. The in-common overdate obverse with curl to the right of the 7, paired with a reverse that shows recutting on the serif of the C in the denomination and a nearby die crack. Great flashy luster with light lemon-gold central toning and margins that are largely silver save for a patch of royal-blue at the top of the cap. (#6147)
- 3654** 1827 Square Base 2 AU58 PCGS. O-141, R.3. A middle to late state that has a die line connecting the two ends of the large C in the denomination. Frosty luster with just a touch of rub on the high points and light gold-peach obverse peripheral toning that yields to deeper blues and violet over much of the reverse. *From The Eagle Harbor Collection, Part Two.* (#6144)
- 3655** 1827 Square Base 2 MS63 NGC. O-105, R.3. Soft, frosty mint luster shines through the deep gold and gray toning on both sides of this sharply defined half dollar. The surfaces are pleasing with few blemishes for the grade. (#6144)
- 3656** 1828 Square Base 2, Large 8 MS62 PCGS. O-109, R.3. This lovely half dollar has light silver surfaces and satin luster with peripheral iridescence on each side. It has a look very similar to many of the Eliasberg coins that were sold in 1997, although that collection did not have an O-109. (#6150)

**Square Base 2, Small 8, Large Letters
O-115 1828 Half, MS62**

- 3657** 1828 Square Base 2, Small 8, Large Letters MS62 PCGS. CAC. O-115, R.2. The die lines stretching from the left side of the motto scroll to the eagle's nearby wing are diagnostic for the exclusive reverse of the O-115. A strongly lustrous example with a decent strike and rich, dappled blue-green and rose patina, the former color appearing mostly at the margins. (#6151)

**Lustrous O-117 1828 Half Dollar, MS64
Square Base 2, Small 8, Large Letters**

- 3658** 1828 Square Base 2, Small 8, Large Letters MS64 PCGS. O-117, R.1. The prominently doubled serif on the C in the denomination is a ready giveaway. Strongly lustrous and well struck for the date with prominent peach overtones. While the reverse displays considerable die erosion, the peripheral crack for the O-117a die state is not in evidence. (#6151)
- 3659** 1830 Small 0 MS63 PCGS. O-104, R.3. Rich apple-green and golden-brown toning graces this lustrous and impressively unabraded Select Capped Bust half. Most of the star centers are incomplete, but the strike is otherwise intricate. Certified in an old green label holder. (#6156)

Elusive O-105 1830 Small 0 Half, MS63

- 3660** 1830 Small 0 MS63 PCGS. O-105, R.4. The reverse with its recutting on the A in STATES is paired with a Small 0 obverse that has the curl under the TY in LIBERTY flow through instead of coming to a point. Rich peach and muted blue hues mingle over lustrous surfaces on this Select example, well struck and attractive for the grade. (#6156)

3661 1832 Small Letters MS62 PCGS. O-119, R.2. This highly attractive Mint State example is one of only a few similarly quality representatives surviving from the die pair. Although a common variety, most known pieces are in lower grades. This piece olive and gold iridescence over frosty underlying luster. (#6160)

3662 1833 MS62 NGC. CAC. O-108, R.1. A pleasing Mint State piece, this satiny representative has brilliant centers with peripheral gold and iridescent toning. (#6163)

**1834 Capped Bust Half, MS64
Large Date, Large Letters, O-101**

3663 1834 Large Date, Large Letters MS64 PCGS. O-101, R.1. The 1834 Capped Bust half dollar claims a large mintage of 6.4 million pieces, with 21 varieties known for the date. The present coin represents the available O-101 variety, with the Large Date, Large Letters design and the large, single curl above the forehead. The present coin is a lustrous Choice Mint State example, with sharply defined devices and shades of gold and ice-blue toning. Population: 56 in 64, 14 finer (10/10).

From The Eagle Harbor Collection, Part Two. (#6164)

Near-Gem O-103 1835 Half Dollar

3664 1835 MS64 NGC. O-103, R.2. Sun-gold and steel-blue toning embraces this lustrous and minimally abraded near-Gem. A sharp strike with incompleteness limited to the curl above the ear. Although the O-103 is regarded as common, it becomes very rare above the MS64 level. Our permanent auction archives, which date to 1991, show only a single appearance in MS64 or finer, an NGC MS65 that sold for \$5,175 in August 2006. (#6168)

**1835 Capped Bust Half, MS64+
High-End, O-101 Specimen**

3665 1835 MS64+ NGC. O-101, R.1. Easily identified by the imperfect knob on the 5 in the date, and the recut 5 in the denomination, the O-101 is an available, popular variety. The coin offered here is a high-end Choice specimen, with a sharp strike and vibrant luster. The surfaces are graced by deep blue and gold patina, with extraordinary eye appeal.

From The W. Philip Keller Collection of U.S. Colonials. (#6168)

REEDDED EDGE HALF DOLLARS

Important Reedded Edge 1836 Half, XF40

3666 1836 Reedded Edge XF40 PCGS. The famous and low-mintage Reedded Edge half dollar of 1836, offered here as a richly toned XF example. Light wear across the high points has left flickers of luster in the fields, which offer prominent blue-gray, pearl, gold-orange, and medium-gray hues. Solid eye appeal for this historic steampower issue. (#6175)

**1836 Capped Bust Half Dollar, AU50
Scarce Reedded Edge Example**

3667 1836 Reedded Edge AU50 ANACS. From a limited mintage of 1,200 pieces, the 1836 Reedded Edge half dollar is much scarcer than its 1837 counterpart. The present coin is lightly circulated, with attractive gold, green, and violet toning. The surfaces display traces of mint luster, and the devices retain much original detail. (#6175)

3668 1838 AU50 ANACS. Chestnut-tan toning blankets this lightly abraded and briefly produced silver type coin. Traces of luster cling to the surfaces. The reverse displays minor gray verdigris.
From The W. Philip Keller Collection of U.S. Colonials. (#6177)

3669 1839-O AU50 PCGS. A lightly worn example of this popular obverse-mintmark New Orleans half dollar issue. Soft flickers of luster filter through deep rose-violet and gold-gray patina. (#6181)

Near-Mint 1839-O Capped Bust Half Prominent Obverse Mintmark

3670 1839-O AU58 NGC. From the final year of the Capped Bust design, the 1839-O half dollar bears the distinctive obverse mintmark so prized by type collectors. This specimen shows only the slightest traces of circulation, with sharply detailed devices and much original mint luster remaining. Extensive die cracks are evident on both sides. Census: 39 in 58, 50 finer (10/10). (#6181)

SEATED HALF DOLLARS

3671 1839 No Drapery VF35 PCGS. The 1839 No Drapery Seated Liberty half dollar is a better date in circulated grades, and very rare in Mint State. This specimen shows some signs of circulation, but all major detail is still present on the design elements, and the pleasing surfaces retain much original mint luster. This issue enjoys great popularity with type collectors, as well as series enthusiasts.
From The Sandy Beach Collection. (#6230)

3672 1839 No Drapery XF45 PCGS. Light silver-gray surfaces with green-to-gold overtones offer excellent quality for the grade. A lightly worn but highly pleasing example of the short-lived No Drapery subtype.
From The Eagle Harbor Collection, Part Two. (#6230)

Rare Mint State No Drapery 1845-O Half

3673 1845-O No Drapery MS61 PCGS. The 1845-O No Drapery is one of the few die polish varieties to receive separate *Guide Book* listing. The drapery near the elbow was inadvertently removed by a mint worker attempting to efface clashmarks on the obverse die. Caramel-gold and dove-gray compete for territory across this dusky and satiny New Orleans half dollar. The strike is full aside from slight inexactness on the eagle's left (facing) ankle, and the fields display only inoffensive contact. Population: 1 in 61, 4 finer (10/10). (#6250)

3674 1846 Tall Date MS61 NGC. Rich gray luster with generous peach and rose overtones. A well-defined example of the Tall Date with few significant abrasions for the grade. (#6252)

3675 1848-O MS62 PCGS. Well-defined at left and center, though the right-side stars show softness. An impressively lustrous piece with light silver-gray luster that shows cloud-gray and green-gold elements mostly at the margins. Population: 6 in 62, 12 finer (10/10). (#6261)

3676 1854-O Arrows MS62 PCGS. Peach to plum toning embraces the lustrous surfaces of this Arrows O-mint half. Well struck for the type with a touch of roughness on the high points. (#6280)

3677 1855-S Arrows—Damaged, Cleaned—NGC Details. XF. An important issue from the second year of operation at San Francisco. Porous silver surfaces are cleaning-bright, and patches of damage appear to the left of Liberty's right (facing) arm and under the first A in AMERICA. (#6284)

3678 1856-O MS64 PCGS. Lightly gold-toned on the obverse with a bright and silvery reverse. A great near-Gem New Orleans half dollar from the antebellum era. Population: 34 in 64, 8 finer (10/10). (#6288)

3679 Three-Coin New Orleans Half Dollar S.S. Republic Set—Shipwreck Effect—NGC. Unc. All coins recovered from the S.S. Republic and showing various issuing authorities, as theorized by die markers and progression. Includes an 1860-O half, a "United States" issue; an 1861-O half, W-08, a "Louisiana" issue; and an 1861-O half, W-14, a "Confederate States" issue. Comes in a hard case with certificate of authenticity, book-style slipcover, and information disc. (Total: 3 coins)

An All-Brilliant, Fully Struck 1861 Half, MS65

3680 1861 MS65 NGC. The 1861 is a high-mintage, high-availability date, and as such is a popular choice for a No Motto type coin. This is an all-brilliant example that displays complete striking details on each side, including all the eagle's feathers, the star centrils, and Liberty's head. The fields are bright and the reverse shows faint evidence of die striations. A wonderful Gem type coin for the collector who needs a brilliant No Motto half. Census: 23 in 65, 7 finer (10/10). (#6302)

Attractive MS62 1865-S Half Dollar

3681 1865-S MS62 PCGS. CAC. WB-102. Small Thin S. Caramel-gold and stone-gray blend throughout this intricately struck and satiny Gem. Clashed near Liberty's raised elbow and opposite above the right (facing) claw. Marks are surprisingly few, although we note minor contact near the right foot of the 1 in the date. Population: 2 in 62, 17 finer (10/10). (#6314)

Choice AU 1872-CC Half Dollar

- 3682 1872-CC AU55 PCGS. CAC.** Deep gold-gray with prominent sunset-orange and blue-violet elements. A well struck coin, minimally abraded with only minor wear, and easily one of the most appealing survivors from this early and much-circulated Carson City minor silver issue. Population: 10 in 55, 7 finer (10/10). (#6334)

- 3683 1873-CC Arrows—Improperly Cleaned—NGC Details. XF.** A well struck, lightly worn example of this important Arrows Carson City half dollar issue. The interiors are subdued pearl-gray after a past cleaning, though violet-blue elements appear near the rims, particularly on the reverse. (#6344)

- 3684 1874-CC Arrows Fine 12 NGC.** Steel-gray and paler pearl-gray colors prevail on this Carson City piece, though a few places of deeper color are also present. The letter E in LIBERTY is virtually worn away, but the rest of the detail is consistent with a Fine designation. (#6347)

- 3685 1875-CC AU55 PCGS. CAC.** Rich golden-brown and olive with lavender-rose elements in parts of the fields. Flickers of luster reach through the patina, and only minor wear is in evidence on the central devices. Population: 18 in 55, 70 finer (10/10). (#6350)

Lustrous Gem 1875-S Half Dollar

- 3686 1875-S MS65 PCGS.** Medium golden-gray toning confirms the originality of this lustrous Gem. The reverse is gorgeously preserved, and the obverse field displays only minor marks. The strike is good with slight incompleteness limited to the upper obverse border. Population: 51 in 65, 10 finer (10/10). (#6351)

Impressive Gem 1875-S Half Dollar

- 3687 1875-S MS65 PCGS.** A gorgeous S-mint Gem with prominent patches of blue-green and peach toning over most of each side. Windows of bright silver luster add spice to the eye appeal, and the level of detail on Liberty's head is exquisite. Though 3.2 million pieces were struck for this issue, PCGS has graded only 10 coins finer (10/10). (#6351)

- 3688 1877-CC MS61 PCGS.** Type Two Reverse. Pleasingly detailed with a number of wispy abrasions in the fields but intact luster. Faintly gold-toned at the margins but minimally patinated in pale silver-gray centers. (#6356)

Exquisite MS65 1877-S Seated Half

- 3689 1877-S MS65 PCGS. CAC.** Type One Reverse. The peach-gold centers are framed by ocean-blue peripheries. A razor-sharp and lustrous Gem that boasts splendidly preserved surfaces. The 1877-S is the last of the collectible San Francisco issues of the series, since mintages dropped to token levels after the silver dollar was re-introduced. Population: 25 in 65, 16 finer (10/10). (#6357)

Brilliant MS65 1879 Seated Half

- 3690 1879 MS65 PCGS.** A tiny mintage of 4,800 business strikes ensures the scarcity of the 1879. At the time, the Philadelphia Mint was too busy making silver dollars to pay much attention to the other silver denominations. This is a brilliant and semi-prooflike Gem that has a sharp strike and lightly abraded fields. (#6361)

Attractive MS66 1881 Half Dollar

3691 1881 MS66 PCGS. CAC. Out of just 10,000 business strikes produced, this Premium Gem is among the best survivors. Both sides are essentially silver-white with minor toning elements, patches of cloudiness on the obverse and golden peripheral hues on the reverse. Well-defined with generous frost on the devices. Population: 10 in 66, 3 finer (10/10). (#6363)

3692 1882 MS62 Prooflike NGC. Boldly reflective through a considerable layer of gauzy gold-gray and greenish toning. Strongly struck devices offer a touch of contrast, thanks to generous frost. One of just 4,400 business strikes produced. (#6364)

3693 1889 MS61 NGC. Lustrous beneath a muted rainbow of orange, gold, blue-green, and rose. Well-defined with few abrasions in the fields but a degree of roughness on the high points. One of 12,000 business strikes produced. Census: 4 in 61, 74 finer (10/10). (#6371)

PROOF SEATED HALF DOLLARS

3694 1871 PR62 PCGS. Faint golden tints visit intense pearl-gray mirrors. A low-contrast specimen that shows numerous small hairlines through the fields but is appealing nonetheless. (#6429)

Gorgeous Gem Cameo Proof 1871 Half

3695 1871 PR65 Cameo PCGS. CAC. The combination of Cameo-grade contrast and Gem preservation rarely comes around on this post-Civil War issue, and Seated proof connoisseurs will want to take a close look at this specimen. Silver interiors are strongly contrasted, while the borders have golden toning touched in blue at the upper obverse. Population: 1 in 65 Cameo, 1 finer (10/10). (#86429)

1877 Half Dollar, PR64+ Cameo High-End, Sharply Contrast Example

3696 1877 PR64+ Cameo PCGS. Type Two Reverse, with the closed bud next to the lowest olive leaf. While there was a generous number of strikes for circulation (8.3 million), a mere 510 proofs were produced of the 1877 half. This piece is not quite brilliant, but very nearly so with just the faintest traces of pale golden color on each side. The devices are noticeably contrasted against the depth of mirrored reflectivity in the fields. Exceptional quality for the grade. Population: 2 in PR64+ Cameo, only one finer, a PR66 Cameo (10/10). (#86438)

Sharply Contrast 1880 Half, PR65 Cameo

3697 1880 PR65 Cameo PCGS. Type Two Reverse. Second year in the low-mintage decade of 1880s. Only 9,755 circulation strikes were produced along with another 1,355 proofs. This is a lovely proof that appears undergraded. The fields are deeply mirrored and the devices are nicely frosted on each side, providing strong contrast. The central brilliance is outlined with light rose color around the margins. Population: 21 in 65 Cameo, 7 finer (10/10). (#86441)

3698 1881 PR64 NGC. Type Two Reverse. Exquisitely detailed with rich blue, violet, and peach patina over each side. The toning on the obverse is nearly opaque, while that of the reverse permits greater reflectivity. (#6442)

1883 Seated Liberty Half Dollar, PR65 Attractive, Iridescent Patina

3699 1883 PR65 NGC. Iridescent shades of green, blue, and lavender toning enhance the deeply reflective surfaces of this sharply detailed Premium Gem. A substantial mintage of 1,039 proof Seated Liberty half dollars was achieved in 1883, but few specimens have been as well preserved as the coin offered here. Census: 39 in 65, 27 finer (10/10). (#6444)

- 3700 1883 PR64 Cameo PCGS.** Both sides are distinctly contrasted in texture, thanks to exquisite frost on sharply struck devices. The obverse has sharp distinction between blue-violet outer toning and gold-orange inner patina, while the reverse has a more muted appearance and transition. Population: 33 in 64 Cameo, 16 finer (10/10). (#86444)

**Gem Proof 1884 Seated Half
High Quality Proof, Attractive Patina**

- 3701 1884 PR65 PCGS.** A rare Gem proof 1884 Seated Liberty half dollar, from a mintage of 875 pieces. The design elements are sharply rendered, to complement the deeply mirrored fields. The surfaces display iridescent blue, lavender, and pale green toning. Housed in a green label holder. Population: 19 in 65, 11 finer (10/10). (#6445)

- 3702 1884 PR63 Cameo PCGS.** Light golden patina at the borders with a single streak of charcoal color at the lower right reverse crossing the silver reflectivity of the faintly hairlined fields. Softly frosted devices supply distinct contrast. Population: 10 in 63 Cameo, 19 finer (10/10). (#86445)

- 3703 1885 PR64 Cameo PCGS.** A light golden cast hovers mostly at the rims of this gleaming near-Gem Cameo specimen. Faintly hairlined fields surround lightly but distinctly frosted devices. Population: 18 in 64 Cameo, 13 finer (10/10). (#86446)

Vividly Toned PR65 1886 Seated Half

- 3704 1886 PR65 NGC.** The Philadelphia Mint struck 886 proof Seated Liberty half dollars in 1886, to complement the tiny business-strike mintage of 5,000 pieces. The present coin is a magnificent Gem, with iridescent lime-green and cerulean-blue patina. The surfaces are deeply mirrored and the devices are sharply rendered. Although not designated as a Cameo, strong elements of field-device contrast are evident. Census: 22 in 65, 26 finer (10/10). (#6447)

- 3705 1888 PR63 PCGS.** Golden tints appear mainly at the margins, leaving the centers prominently mirrored and faintly gray-toned. Moderately hairlined in the fields with appreciable contrast on the obverse, though the reverse falls short of Cameo status. (#6449)

BARBER HALF DOLLARS

**1892 Barber Half, MS66
Splendid, Sharply Struck First-Year Example**

- 3706 1892 MS66 PCGS.** An outstanding representative of this popular first-year issue. Although nearly 1 million 1892 halves were struck, at the MS66 level this issue becomes a rarity, and it is extraordinarily difficult to find any finer. This highly lustrous Premium Gem has light golden toning and is sharply struck throughout. The details are razor-sharp, and the surfaces are essentially pristine. Trivial marks near the mouth are barely worthy of mention. A splendid high-grade example that would make a wonderful addition to any type collection. Population: 38 in 66, 11 finer (10/10). (#6461)

**Gem 1892-S Barber Half Dollar
First Year of Design**

- 3707 1892-S MS65 PCGS.** Despite having a relatively low original mintage of slightly more than one million pieces, the 1892-S should be relatively available in high grade due to its status as a first-year issue. This is not at all the case, as Lawrence suggests in his book *The Complete Guide to Barber Halves*. He writes that, when one locates an extant '92-S Half, they will have a 95% chance that the coin will grade either AG or Good. The MS65 example we are offering in this lot is lightly toned with speckled olive-gray patina around the borders. The centers are essentially brilliant. Crisply impressed throughout, the obverse reveals only a few wispy abrasions that would seem to preclude an even higher grade. Population: 12 in 65, 3 finer (10/10).
Ex: New York ANA Auction (Superior, 8/2002), lot 1006, FUN Signature Auction (Heritage, 1/2005), lot 7432, realized \$4,312. (#6464)

**Premium Gem 1893 Barber Half Dollar
Tied for Finest Certified at PCGS**

3708 1893 MS66 PCGS. CAC. The sharply defined surfaces are thickly frosted and are almost free from even the tiniest abrasions. Both sides have a silver-gray appearance, and display touches of aqua, beige, and gold in selected areas. The 1893 is scarce but collectible in Mint State. Most Uncirculated examples are found between MS62 and MS64. Premium Gems are both rare and desirable. Population: 8 in 66, 0 finer (10/10). (#6465)

3709 1900-S MS63 PCGS. Gold and orange overtones with small windows of silver mostly at the margins. A lustrous Select piece from the turn of the century with wispy marks on the high points. Population: 16 in 63, 29 finer (10/10).(#6488)

Lustrous Select 1907-S Half Dollar

3710 1907-S MS63 PCGS. CAC. Faint golden tints grace pale silver surfaces, and small dots of deeper color appear within the word STATES on the reverse. Well-defined with a few small digs in the fields but solid overall eye appeal for this lower-mintage and little-saved issue. Population: 11 in 63, 21 finer (10/10). (#6511)

Vibrant MS65 1908-D Half Dollar

3711 1908-D MS65 PCGS. Both sides offer prominent, vibrant luster with more than a hint of satin. Pale silver centers yield to gold, orange, peach, violet, and blue patches at the rims. Strongly detailed with just a few shallow marks at the lower portrait precluding an even finer designation. Population: 25 in 65, 12 finer (10/10). (#6513)

3712 1910-S MS62 PCGS. A lustrous example, lightly slide-marked on the obverse, that is the "tale of two coins." The obverse is minimally toned save for gold-orange at the borders, while deep violet to mauve shadings consume the reverse. Population: 11 in 62, 50 finer (10/10).(#6520)

**Premium Gem 1910-S Barber Half Dollar
Vibrant, Frosty Luster**

3713 1910-S MS66 PCGS. CAC. The 1910-S Barber half dollar claims a mintage of nearly 2 million pieces, but the issue is surprisingly difficult to locate in high grade. Premium Gem examples are quite rare. The present coin is a delightful specimen, with a razor-sharp strike, vibrant mint luster, and wisps of light gold toning. Housed in a green label holder. Population: 13 in 66, 4 finer (10/10). (#6520)

PROOF BARBER HALF DOLLARS

3714 1893 PR63 Cameo NGC. An attractively contrasted example of this second-year issue with silver-white frost and pearl-gray mirrors accented in blue-violet and gold at the margins. Small hairlines and scattered contacts contribute to the grade. Census: 8 in 63 Cameo, 67 finer (10/10).(#86540)

**1903 Barber Half Dollar PR65
Dramatic Toning**

3715 1903 PR65 NGC. Mottled gold, gray, and violet toning hallmarks this impressive proof Barber quarter. The surfaces are reflective, and the devices are sharply detailed, except for a touch of softness on the right point of the shield. Only 755 proofs were struck in 1903 and Gem specimens are very scarce. Census: 51 in 65, 64 finer (10/10). (#6550)

Gleaming PR67 1903 Half Dollar

3716 1903 PR67 NGC. Though struck in the brilliant era of Barber half dollar proofs, this coin offers appreciable (if not Cameo-grade) contrast on each side. Dappled blue outer toning yields to essentially unpatinated centers that offer either frost or bold mirrors. Census: 19 in 67, 3 finer (10/10). (#6550)

- 3717 1906 PR64 PCGS. CAC.** Rich olive-green and steel-blue patina embraces this unabraded and sharply impressed Choice specimen. Only 675 proofs were struck. Encased in a first generation holder. (#6553)
- 3718 1910 PR64 NGC.** Gold-orange and pearl-gray toning prevails on each side, though splashes and lines of violet and blue patina are also prominent. A lovely near-Gem specimen that shows just a few too many hairlines for a finer grade. (#6557)
- 3719 1913 PR64 PCGS.** Sharply struck with glassy, reflective fields. Dappled gold and plum elements grace the margins, most visibly on the reverse. Light but ultimately grade-defining hairlines appear on the cheek.
From The Eagle Harbor Collection, Part Two. (#6560)

Gem Proof 1915 Half Dollar

- 3720 1915 PR65 NGC.** With just 450 pieces produced, the 1915 is one of the low-mintage issues at the tail end of the proof Barber half dollar series. Offered here is an attractive Gem, strongly reflective through rich and dappled toning that is gold and green-blue on the obverse with duskier versions on the reverse. Census: 23 in 65, 38 finer (10/10). (#6562)

WALKING LIBERTY HALF DOLLARS

- 3721 1916-S AU58 NGC. CAC.** A near-Mint example of this first-year issue with nearly intact luster. Generally silver surfaces show areas of milky patina, but there is only minor evidence of rub. (#6568)
- 3722 1916-S—Improperly Cleaned—NGC Details. Unc.** Softly struck at the usual high points but with no trace of wear. Both sides have largely retoned yellow-to-orange following a minor but distinct past cleaning. (#6568)

First-Year MS64 1916-S Half

- 3723 1916-S MS64 PCGS.** Just over half a million pieces were produced for this first-year S-mint Walker issue. The present example has textured, lustrous fields in pale silver. A rim nick is noted over the E in UNITED on the reverse, and the centers show typical striking softness. PCGS has graded 99 finer examples (10/10). (#6568)

- 3724 1917-D Obverse MS63 ANACS.** Strongly lustrous with rich patina in blue, gold, and orange with slivers of bright untuned space. A Select example of the popular Obverse Mintmark subtype, housed in a small-format ANACS holder. (#6570)
- 3725 1917-D Obverse MS63 PCGS.** A few little flecks of iridescent green, blue and gold appear at the margins, especially around the sun. Well struck on Liberty's thumb and head, though the skirt has more typical softness. A lustrous and attractive Select example. (#6570)

Mintmark on Reverse 1917-D Half, MS65

- 3726 1917-D Reverse MS65 NGC.** Mintages seldom tell the whole story of a date's rarity, and the difference between the Obverse Mintmark and Reverse Mintmark 1917-D Walking Liberty halves is a case in point. The Reverse Mintmark has a mintage approaching 2 million pieces, while the Obverse Mintmark type just tops three-quarters of a million coins. Unsurprisingly, the Reverse Mintmark is more common in low circulated grades, but by the XF level, the Reverse Mintmark is costlier, and at the Gem level it is a condition rarity. While this example is a trifle soft on Liberty's head, the branch hand is better-defined than usually seen, and subtly textured silver surfaces are minimally marked with a hint of antique-gold color. Census: 19 in 65, 4 finer (10/10). (#6571)

**Gem 1918 Walking Liberty Half Dollar
Sharp Strike, Attractive Luster**

3727 1918 MS65 PCGS. CAC. The 1918 Walking Liberty half dollar was produced in large numbers, but the survival rate was low for this issue. Examples in Gem Mint State condition are surprisingly elusive. The present coin is a spectacular Gem, with sharply detailed design elements and brilliant, lustrous surfaces. Population: 91 in 65, 8 finer (10/10). (#6574)

3728 1918-D MS62 PCGS. Well struck for the type with slightly better definition than usual on Liberty's branch hand, though it is still weak. Generous silver luster with few serious abrasions. (#6575)

**Choice 1918-S Walking Liberty Half
Scarce Issue, Vibrant Mint Luster**

3729 1918-S MS64 PCGS. CAC. The 1918-S Walking Liberty half dollar was produced in large quantities because of a pressing need for coinage in the booming economy at the end of World War I. Few examples were saved by collectors, and the issue is scarce-to-rare in Mint State grades today. The present coin is an attractive Choice specimen, with gold and russet toning and bright mint luster. The 1918-S is unknown with full striking details, and this example displays the usual softness on Liberty's hand and head. Only 30 coins have been certified in higher numeric grades at PCGS (10/10). (#6576)

**1918-S Walking Liberty Half, MS64
Lustrous, Toned Surfaces**

3730 1918-S MS64 PCGS Secure. This frosty near-Gem is highly lustrous with brilliant silver surfaces that host splashes of steel, dusky gold, and iridescent toning. The strike shows typical weakness at the center, a characteristic that plagues nearly every pre-1921 Walker. PCGS has only certified 30 finer pieces (10/10). (#6576)

3731 1919-D AU50 PCGS. CAC. This remarkable light gray example has hints of luster on each side with delicate gold and steel toning. Perhaps most important is the bold strike, as even in AU50 grade, the design details are stronger than those seen on many Mint State survivors. (#6578)

**1919-D Walking Liberty Half, AU58
Elusive Issue, Strong Luster**

3732 1919-D AU58 PCGS. CAC. The 1919-D Walking Liberty half dollar is one of the most elusive dates of the series, and near-Mint examples are quite scarce. The present coin shows the typical softness on Liberty's hand and the eagle's leg, but the head displays better detail than most specimens seen. The surfaces exhibit strong mint luster, with wisps of gold and ice-blue toning. (#6578)

3733 1920 MS64 NGC. A satiny near-Gem that glimmers under rich patina, gold-gray and blue with scattered lavender and violet elements. Well struck for the date, though Liberty's branch hand shows a measure of the usual softness. (#6580)

**1923-S Walker, MS64
With Sparkling Mint Luster**

3734 1923-S MS64 NGC. CAC. The surfaces of this exceptional piece display bright, flashy mint frost, undoubtedly one of the reasons CAC endorsed this coin. The central details are soft, as usual, and there are just a couple of field marks that explain the MS64 grade. The 1923-S has a mintage of only 2.1 million pieces and is worth a substantial premium right down to Good. (#6586)

**1927-S Walking Liberty Half Dollar, MS65
Among the Finest Certified at NGC**

3735 1927-S MS65 NGC. The 1927-S Walking Liberty half dollar enjoyed a mintage of nearly 2.4 million pieces, but the date circulated heavily, and few examples were saved by collectors. The present coin is a spectacular Gem, with vibrant mint luster and hints of pale golden toning. The strike is better than average for this date, with some incompleteness of detail noted on Liberty's hand and the eagle's leg. Census: 31 in 65, 0 finer (10/10). (#6587)

- 3736 1928-S MS62 PCGS.** Softly struck as usually seen but with few abrasions aside from a mark where Liberty's branch hand should be. Bright silver luster shows occasional gray and reddish-tan spots, most notably under the left side of Liberty's skirt. (#6588)

Lustrous MS64+ 1928-S Half Dollar

- 3737 1928-S MS64+ PCGS.** Strong silver luster with gold and peach overtones. Softly struck in the centers, as often seen, but Liberty's head has pleasing detail. Excellent quality by near-Gem standards but just a few too many marks to reach the next level. PCGS has graded just 59 coins as MS65 or better (10/10). (#6588)

- 3738 1929-D MS65 NGC.** Dusky peach-gold and gunmetal-gray patina dominates the obverse of this beautifully preserved Gem. The reverse is only faintly toned. Luster sweeps both sides, and the strike is decidedly above average. (#6589)

**1929-D Walking Liberty Half Dollar, MS66
Excellent Eye Appeal**

- 3739 1929-D MS66 PCGS. CAC.** The 1929-D Walking Liberty half dollar was a well produced issue, with a limited mintage of just over 1 million pieces. The present coin is a magnificent Premium Gem, with sharply rendered design elements, vibrant mint luster, and tremendous eye appeal. Housed in a green label holder. Population: 60 in 66, 1 finer (10/10). (#6589)

**1929-S Walking Liberty Half Dollar, MS65
Brilliant Surfaces**

- 3740 1929-S MS65 NGC.** The 1929-S Walking Liberty half dollar claims a fairly small mintage of 1.9 million pieces, but the survival rate for the issue is surprisingly high. Almost all 1929-S halves exhibit weak definition on Liberty's head and hand, as well as the eagle's leg. This coin shows some softness in these areas, but the effect is overshadowed by the booming mint luster. The brilliant surfaces show only minor imperfections. (#6590)

**1934-S Walking Liberty Half Dollar, MS66
Attractive Toning**

- 3741 1934-S MS66 PCGS.** The 1934-S Walking Liberty half dollar is the rarest date of the middle series, with a reported mintage of 3.6 million pieces. The present coin is a scarce Premium Gem, with strong mint luster and a needle-sharp strike. Iridescent shades of gold and ice-blue toning enhance the pleasing surfaces. Population: 86 in 66, 5 finer (10/10). (#6594)

**Premium Gem 1935-S Walking Liberty Half
Scarce, High-Grade Middle Date**

- 3742 1935-S MS66 NGC.** The 1935-S is one of the most elusive middle dates of the Walking Liberty half dollar series, and examples in Premium Gem condition are quite scarce. The present coin is a lustrous, sharply struck Premium Gem, with mostly brilliant surfaces and hints of ice-blue toning. Census: 51 in 66, 3 finer (10/10). (#6597)

**1936 Walking Liberty Half, MS68
Nearly Perfect Surfaces**

- 3743 1936 MS68 NGC.** This is an exceptional 1936 half. The surfaces are so clean, it is literally possible to count the tiny imperfections with the aid of a loupe. Each side shimmers with satiny mint luster that has a pale overlay of golden-rose color that deepens slightly around reverse margin. Truly an extraordinary Walking Liberty half, one that is not just one of the finest known 1936s, but one of the finest Walkers known. Census: 4 in 68, 0 finer (10/10). (#6598)

Superb Gem 1936-D Half Dollar
Vibrant Luster, Sharp Strike

- 3744 1936-D MS67 NGC.** More than 4.2 million Walking Liberty half dollars were minted at the Denver Mint in 1936. The issue is easily located in lower Mint State grades, but Superb Gems are rare. The present coin is a magnificent specimen, with sharply detailed devices, vibrant mint luster, and brilliant surfaces. Census: 24 in 67, 0 finer (10/10). (#6599)
- 3745 1937 MS67 PCGS. CAC.** Light green-gold outer toning with pale dove-gray color across the frosted centers. A well struck Superb Gem example of this issue which is extremely rare any finer. PCGS has certified just two such pieces (10/10).(#6601)

Magnificent MS67 1938 Walking Liberty

- 3746 1938 MS67 PCGS Secure.** Dappled walnut-brown toning graces this lustrous and exceptionally preserved Superb Gem. Essentially perfect aside from a slightly incomplete strike on the fingers of the branch hand. Liberty's head and skirt lines show full detail. None have been certified finer by PCGS (10/10). (#6604)
- 3747 1938-D MS65 PCGS. CAC.** Light green and gold toning over much of otherwise silver surfaces. Deeper forest-green elements are dappled at the upper obverse rim. Great eye appeal for this lower-mintage issue.(#6605)
- 3748 1938-D MS66 PCGS. CAC.** Bright and frosted luster dominates the eye appeal of this Premium Gem. Great eye appeal for this issue of fewer than half a million pieces. PCGS has certified just 24 coins finer (10/10).(#6605)
- 3749 1939 MS67 NGC. CAC.** Pleasingly detailed on the branch hand with light gold-to-gray toning across immensely lustrous surfaces. Fantastic eye appeal even by Superb Gem standards.(#6606)
- 3750 1941-S MS66+ NGC.** A frosty short-set Premium Gem that comes mighty close to Superb status. Silver-white surfaces are beautifully preserved, and while the branch hand shows little detail, the overall eye appeal is grand. NGC has graded 17 numerically finer examples (10/10).(#6613)

- 3751 1944-D MS67 PCGS. CAC.** The devices are fully struck, as expected, and the surfaces are bright and satiny with a noticeable tinge of golden around the obverse rim. Superlative quality. (#6622)
- 3752 1944-S MS66 PCGS. CAC.** Minimally toned save for hints of wheat-gold at the margins. This impressively lustrous Premium Gem is a trifle softly struck in the usual places, but the overall eye appeal is great. PCGS has certified just five finer pieces (10/10). (#6623)
- 3753 1944-S MS66 PCGS.** Large S, the usual mintmark size for this World War II issue. A lustrous and well preserved Premium Gem with attractive delicate honey, lime, and gunmetal toning. The strike is above average, although incomplete as nearly always for the issue.(#6623)
- 3754 1946 MS67 NGC.** Better-defined than usually seen, particularly on Liberty's head and hands. Gleaming silver surfaces show suggestions of gold and blue. Census: 31 in 67, 0 finer (10/10). (#6627)
- 3755 1946-S MS67 NGC.** A gorgeous coin with bright and swirling silver luster. Softly struck on the highest design elements but otherwise an entirely attractive Superb Gem. Census: 50 in 67, 0 finer (10/10).(#6629)

**PROOF WALKING LIBERTY
HALF DOLLARS**

Near-Gem Proof 1936 Half Dollar

- 3756 1936 PR64 NGC.** Two decades after Mint officials insisted against brilliant-finish proofs for the then-new Walking Liberty design, the first such pieces were produced in 1936. This near-Gem is one of the 3,901 specimens sold, strongly reflective in the fields with little patina. Small hairlines contribute to the grade. (#6636)

Prized Gem Proof 1936 Half Dollar

- 3757 1936 PR65 NGC.** Light layers of golden patina grace the strong mirrors on this first-year proof Walking Liberty half dollar. The remarkable detail on the central devices must have come as a revelation to collectors at the time, who would have been accustomed to the weakness of business strikes. (#6636)

Superb Gem Proof 1936 Walker

3758 1936 PR67 NGC. Delicate almond-gold toning visits this sharply struck and pristine Superb Gem. Although the Walking Liberty half was introduced in 1916, no proofs were struck for the next two decades. Perhaps because collector attention was focused on the plethora of silver commemoratives offered in 1936, proof sales were low that year. Coinage of proofs continued annually, at ever-increasing levels, until entry into World War II ended the proof subset of the series. The low mintage 1936 became the key date of the seven-year run of proofs, and high grade specimens are subject to enormous demand. (#6636)

3759 1937 PR66 NGC. CAC. A sensational Premium Gem proof, this 1937 Walker has fully brilliant silver surfaces with deeply mirrored fields and satiny devices. (#6637)

3760 1937 PR67 NGC. CAC. A sensational example, this Superb Gem proof is fully brilliant and boldly defined with white surfaces. The fields are deeply mirrored and serve as a nice frame to the satiny white devices. (#6637)

3761 1939 PR67 NGC. Distinctive golden color is this Superb Gem's most immediately visible feature. Flashy fields are exquisitely preserved. NGC has certified 71 numerically finer examples (10/10). (#6639)

3762 1940 PR66 ANACS. Boldly impressed with excellent mirrors under a light layer of cream-silver toning. Small splashes of blue patina dot the rims. Housed in a small-format ANACS holder. (#6640)

Fantastic PR68 ★ 1940 Half

3763 1940 PR68 ★ NGC. A gleaming and carefully preserved specimen that derives much of its Star-designated eye appeal from canary-gold toning at the borders. Exquisitely detailed with a touch of contrast between the mirrored fields and the delicate frost across the central devices. Neither NGC nor PCGS has certified a numerically finer example (10/10). (#6640)

Colorful PR68 1941 Walking Liberty Half

3764 1941 PR68 NGC. The AW initials are absent, as suggested by the No AW designation on the holder insert. Adolph Weinman's monogram was raised in low relief on reverse dies for this series. If they were lapped to provide a mirrored field or to remove clashmarks, the monogram could be inadvertently removed by a mint worker, as is the case here. More significant to the advanced collector is the pristine preservation, full strike, and attractive medium honey-gold, lime-green, orange, and lilac toning. (#6641)

1942 Cameo Walker, PR66 An Impressive, Contrasted Example

3765 1942 PR66 Cameo NGC. Cameo proof Walking Liberty half dollars are among the rarest of all coin types, especially in this numeric level of preservation. This piece has full brilliance with deeply mirrored fields and only a trace of toning confined to the reverse rim. As expected, the design elements exhibit bold definition. Truly a Premium Gem for the finest collection. Census: 1 in 66 Cameo, 1 finer (10/10). (#86642)

FRANKLIN HALF DOLLARS

- 3766** 1962 MS65 Full Bell Lines PCGS. Ex: Poole Collection. Attentively struck with a delicate layer of golden toning over brightly lustrous surfaces. A few small ticks appear on the bell to the left of the crack. PCGS has graded just four finer Full Bell Lines pieces (10/10). (#86682)
- 3767** 1963 MS65 Full Bell Lines PCGS. A final-year Gem, solidly struck with great luster under light gray and green-gold color. A single shallow mark runs diagonally on Franklin's cheek. (#86684)

PROOF FRANKLIN HALF DOLLAR

Type Two PR69 Deep Cameo 1956 Half

- 3768** 1956 Type Two PR69 Deep Cameo PCGS. The more accessible Type Two variant with bold eagle feathers, presented here in practically perfect form. Outstanding contrast with only a couple of "milk spots" in the upper obverse fields. PCGS has certified 39 examples as PR69 Deep Cameo, and they are tied for finest in the *Population Report* (10/10). (#96697)

SMS KENNEDY HALF DOLLARS

Remarkable 1965 SMS Kennedy Half PR67 Ultra Cameo, Most Elusive of the 1965-67 Special Mint Set Issues

- 3769** 1965 SMS MS67 Ultra Cameo NGC. The 1965 through 1967 Special Mint Sets were a compromise that pleased no one. Collectors missed their glassy, brilliant-white proof coins that they had become accustomed to—and Mint Bureau personnel would just as soon have not produced any silver (even 40%) coins at all, as some Washington politicians were thoroughly convinced that "demon hoarders" caused the mid-1960s silver coin shortage, when the true sources were much more complex.
- Most 1965-67 SMS Kennedy halves lack much in the way of field-device contrast, but this piece is a remarkable exception. This Superb Gem Ultra Cameo 1965 SMS coin has such high white-on-black contrast that it nearly resembles a true proof, and its desirability is further enhanced by its status as the most difficult of the three 40% silver issues to find at the Ultra Cameo/Deep Cameo designation. The surfaces are essentially mark-free. Census: 21 in 67 Ultra Cameo, 0 finer (10/10). (#96845)

1967 SMS Kennedy Half Memorable MS68 Ultra Cameo

- 3770** 1967 SMS MS68 Ultra Cameo NGC. The 1967 40% silver Kennedy half is generally the most available (if far from common) of the three 1965-67 Special Mint Set issues, but all three are in great demand from Registry Set collectors and the many series aficionados. However, even non-Cameo or Ultra/Deep Cameo SMS Kennedys seldom achieve the near-perfect MS68 grade. The combination of the two makes this a memorable coin that will undoubtedly experience strong bidding. Superdeep contrast abounds on both sides of this white-on-black coin, which many would mistake for a true proof. Long searching reveals surfaces essentially free of even the smallest distraction. While NGC has certified nearly 200 examples of the issue in Ultra Cameo, this is one of only nine pieces to make the cut at MS68, with none finer (10/10). (#96847)

PROOF KENNEDY HALF DOLLARS

Elusive 1964 Accented Hair Kennedy Half PR68 Ultra Cameo

- 3771** 1964 Accented Hair PR68 Ultra Cameo NGC. FS-401. Although considered a "variety," the 1964 Accented Hair proofs in reality are elusive first-year subtypes, the first issued before President Kennedy's widow, Jacqueline Bouvier Kennedy, asked the Mint to deemphasize the part in the martyred president's hair. With practice, collectors can learn to spot the V shape in the hair, although the missing lower-left serif on the I in LIBERTY is an easier diagnostic for many. Few Accented Hairs are found at the Ultra Cameo level, and fewer still will grade PR68. An untoned silver-on-black, highly contrasted proof, essentially perfect, one of nine PR68 Ultra Cameos at NGC, with a single PR69 Ultra Cameo finer (10/10). (#96801)

Clad PR70 Deep Cameo 1976-S Half

- 3772** 1976-S Clad PR70 Deep Cameo PCGS. A simply flawless representative of the standard-composition proof Bicentennial half dollar. Hints of golden color grace the obverse margins, while the interior fields sport a perfect gleam. The devices are perfectly sculpted with just the right amount of frost. One of just 16 specimens awarded the ultimate grade by PCGS (10/10). (#96811)

EARLY DOLLARS

Benson's VF Flowing Hair 1795 Dollar
B-5, BB-27, Three Leaves

- 3773** 1795 Flowing Hair, Three Leaves VF20 PCGS. B-5, BB-27, R.1. Ex: Benson. The pearl-gray centers are framed by caramel-gold, powder-blue, and plum-red. The portrait displays wear consistent with the grade, yet the eagle's left (facing) wing has exemplary definition. We can mention only a pair of small marks between star 1 and the 1 in the date.
Ex: *Benson Collection, Part II (Ira & Larry Goldberg, 2/2002)*, lot 1143, which realized \$3,565. Purchased by Dr. Benson from Ira S. Reed for \$17.50 in May 1944. (#6852)

XF 1795 Flowing Hair Silver Dollar
Three Leaves, B-5, BB-27

- 3774** 1795 Flowing Hair, Three Leaves XF40 NGC. B-5, BB-27, R.1. Bowers-Borckardt Die State II. A handsome example of the important and popular Flowing Hair dollar type. The cream-gray devices mildly contrast with lavender and apple-green fields. A small obverse clip at 2 o'clock is of mint origin, and the same can be said for the few faint adjustment marks near UNITED. The breast feathers are worn, but the wings are richly detailed, and abrasions are surprisingly absent. (#6852)

Choice XF 1795 Flowing Hair Dollar
Three Leaves, B-5, BB-27

- 3775** 1795 Flowing Hair, Three Leaves XF45 PCGS. B-5, BB-27, R.1. Bowers-Borckardt Die State II or III, left ambiguous by the die-flow in the area of the die crack off the left wreath stem. The B-5, BB-27 is easily the most accessible of the 1795 silver dollars in general and the Three Leaves subtype in particular, as all other Three Leaves die pairs are scarce to extremely rare. This is an attractive Choice XF representative that offers rich reddish-gold and lavender-gray patina over most of each side. Lightly rubbed, most visibly at the light area on the eagle's breast, with a cluster of adjustment marks on the portrait that should not be mistaken for post-striking abrasions.
From *The Eagle Harbor Collection, Part Two*. (#6852)

- 3776** 1795 Flowing Hair, Two Leaves PCGS Genuine. B-4, BB-14, R.3. The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a Fine specimen that has been cleaned. Additional minor imperfections are noted on each side, yet this is a desirable Flowing Hair dollar for the date or type collector. (#6853)

- 3777** 1795 Flowing Hair, Two Leaves—Improperly Cleaned—NCS. VG Details. B-9, BB-13, R.4. Bowers-Borckardt Die State II with obvious clashmarks from the wings on the field near Liberty. The pearl-gray obverse is thickly hairlined and minutely granular, while the steel-gray and cream reverse has a more natural appearance. A pinscratch is noted above the eagle's beak. (#6853)

**AU Sharpness 1795 Draped Bust Dollar
Off Center Bust, B-14, BB-51**

- 3778** 1795 Draped Bust, Off Center—Repaired, Improperly Cleaned—NCS. AU Details. B-14, BB-51, R.2. About half of the eagle's breast feathers show on this lightly circulated first-year Draped Bust dollar. The right obverse field may have been smoothed, and both fields are mildly granular. Retoned in arcs of mauve and gunmetal-gray. The reverse has a minor rim ding at 7:30. (#96858)

**Small Date, Small Letters 1796 Dollar
B-1, BB-66, Choice XF**

- 3779** 1796 Small Date, Small Letters XF45 PCGS. B-1, BB-66, R.4. While there are three distinct Small Date, Small Letters die pairs, as opposed to two for Small Date, Large Letters and just one for Large Date, Small Letters, the various Small Date, Small Letters combinations are either very scarce or extremely rare. The B-1, BB-66 is in the "very scarce" category, and thanks to excellent preservation, an excellent example of the die pair. Considerable luster remains on each side, filtering through a thick layer of gold-gray, orange, blue, and violet patina. Aside from a small nick on the neck, the portrait is free of most distractions. For the Small Date, Small Letters type as a whole, Population: 24 in 45, 38 finer (10/10).
From The Eagle Harbor Collection, Part Two. (#6859)

**AU Details 1797 Silver Dollar
10x6 Stars, Large Letters, B-3, BB-71**

- 3780** 1797 10x6 Stars, Large Letters—Scratched—NCS. AU Details. B-3, BB-71, R.2. Bowers-Borckardt Die State III. When viewed with the unaided eye, this is a magnificent Draped Bust dollar with substantial mint luster and only slight wear on the eagle's breast. Beneath the rich golden-brown and steel-gray toning resides myriad wispy obverse pinscratches. The reverse is undisturbed save for a couple of pinscratches near the right wreath stem. (#6865)

**1797 Draped Bust Dollar, Fine 15
B-1, BB-73**

- 3781** 1797 9x7 Stars, Large Letters Fine 15 PCGS. CAC. B-1, BB-73, R.3. Only three die varieties are known for the 1797 Draped Bust dollar, with the BB-73 recognized by the 9x7 obverse stars pattern and the large letters in the reverse legend. The present coin shows significant wear, but all major design elements remain intact, with much interior detail still present. The pleasing surfaces display blue-steel and gray patina. (#6863)

- 3782** 1798 Large Eagle, Pointed 9 VF20 PCGS. B-30a, BB-116, R.5. Bowers-Borckardt Die State VI, extensively cracked with "blob" at the first A of AMERICA. A quality midrange piece, toned gold and blue over still-lustrous surfaces, that is housed in a green label holder. (#6873)

**1798 Draped Bust Dollar, VF35
'Blundered Stars Reverse', B-24, BB-124**

- 3783** 1798 Large Eagle, Pointed 9 VF35 ANACS. B-24, BB-124, R.2. The BB-124 variety utilizes the "Blundered Stars Reverse" die, with the stars placed too high, in a line pattern. The obverse is quite similar to some other obverse dies, and John W. Haseltine actually confused this obverse with the BB-122 design when he published his seminal work on the series in 1881. The present coin shows light-to-moderate wear on the devices, with gunmetal-blue and gray patina. (#6873)

**XF 1798 Heraldic Eagle Dollar
10 Arrows, B-21, BB-107**

- 3784** 1798 Large Eagle, Pointed 9, 10 Arrows XF40 PCGS. B-21, BB-107, R.5. Incorrectly designated by PCGS as a Five Stripes variety. Each of the six vertical stripes in the shield has four lines. This is a pleasing Heraldic Eagle dollar with light to medium chestnut-gold and stone-gray toning. The borders offer glimpses of lilac and jade-green patina. Remaining luster is obvious within design elements, and both sides are refreshingly unabraded. (#6876)

**XF Sharpness 1798 10 Arrows Dollar
Large Eagle, B-13, BB-108**

- 3785** 1798 Large Eagle, 10 Arrows—Improperly Cleaned—NCS. XF Details. B-13, BB-108, R.3. Bowers-Borckardt Die State II. This stone-gray early dollar displays ample luster within the hair, plumage, stars, and legends. The surfaces are subdued and faintly hairlined from cleaning, and a few thin marks are noted, mostly on the central reverse. (#6876)

**Choice AU 1798 Heraldic Eagle Dollar
Ten Arrows, B-13, BB-108**

- 3786** 1798 Large Eagle, 10 Arrows AU55 NGC. B-13, BB-108, R.3. Bowers-Borckardt Die State II with a radial die crack near the L in LIBERTY. Chestnut-brown and gunmetal-blue toning drapes this partly lustrous Choice AU early dollar. Moderate mint-issued adjustment marks are present on the central obverse and on the field above the bust tip, but post-strike abrasions are completely inconsequential. (#6876)

**1799 Draped Bust Dollar, AU50
B-10, BB-163**

- 3787** 1799 7x6 Stars AU50 PCGS. B-10, BB-163, R.2. The BB-163 variety is easily recognized by the die break that nearly encircles the reverse, running from the border near the final S in STATES, through OF AMERICA, the eagle's tail, arrows, wing, and STA of STATES. The present coin is a lightly circulated example, with much remaining mint luster, under steel-blue and gold patina. *From The Eagle Harbor Collection, Part Two.* (#6878)

**1799 7x6 Stars Bust Dollar, AU58
Deeply Toned and Problem-Free, B-12, BB-160**

- 3788** 1799 7x6 Stars AU58 NGC. B-12, BB-160, R.3. Bowers-Borckardt Die State III. The "No Berries" reverse. Berries, or fruits, were once present on the olive branch of the reverse die (as seen on BB-158 and BB-159) but have been lapped away, as made. The dies are rotated a few degrees counterclockwise. Bowers estimates between 35 to 70 examples of BB-160 have survived in all AU grades.

This is an impressive near-Mint example that has only minor wear on the cheek, shoulder, and ribbon. Deep gray toning covers the nearly unblemished surfaces. Luster shimmers across most of the reverse, and also fills Liberty's hair and the obverse margin. A significant opportunity for the alert specialist. (#6878)

**B-5, BB-157 1799 Dollar
7x6 Stars, AU58**

3789 1799 7x6 Stars AU58 NGC. B-5, BB-157, R.2. Bowers-Borckardt Die State III, cracked through STATES and AMER(ICA) but not vertically through the first T in STATES. This is a modestly worn example of one of the more accessible 1799 Bust dollar die pairs, a coin that retains immense luster in the fields. Dappled blue-to-violet border toning is more prominent on the reverse, lightening into gold-to-gray color across the centers. Well struck for the type, and the coin's surface marks are mostly inoffensive, though a few stuttering lines of coin-to-coin contact appear in the right obverse field. Overall, an eminently pleasing piece that will find a home in a high-end type or date collection. (#6878)

3790 1799 8x5 Stars Fine 15 NGC. B-23, BB-159, R.4. Bowers-Borckardt Die State III with "wave" clashmarks (actually cloud impressions) between date and bottom of bust. Significantly worn yet with appreciable radiance in gold-to-gray fields. (#6881)

**Choice VF 8x5 Stars 1799 Dollar
B-23, BB-159**

3791 1799 8x5 Stars VF35 PCGS. B-23, BB-159, R.4. Bowers-Borckardt Die State II. The sole Bust dollar variety with an 8x5 obverse star arrangement. This example has deep tobacco-brown and cream-gray toning. Examination with a lens reveals no relevant abrasions, and the remaining design detail is pleasing, particularly on the reverse. (#6881)

3792 1800 VG8 ANACS. B-16, BB-187, R.2. Bowers-Borckardt Die State III with break to the left of the second S in STATES. Deep blue-gray color through the obverse fields with lighter olive-pearl on the worn high points. (#6887)

3793 1800—Obverse Graffiti—NCS. Fine Details. B-16, BB-187, R.2. Bowers-Borckardt Die State III. Illegible faint cursive letters are pinscratched on the obverse field, a legacy from a proud long ago owner. This chestnut-gray early dollar has bold shield lines and a fully readable E PLURIBUS UNUM. (#6887)

**Charming AU 1800 AMERICA! Dollar
B-19, BB-192**

3794 1800 AMERICA! AU50 PCGS. CAC. B-19, BB-192, R.2. Chestnut-tan, dove-gray, and aquamarine shades enrich this impressive early dollar, which has pockets of shimmering luster within the hair and wings. Liberty's cheek and hair shows light wear, but no marks are readily evident. The *Guide Book*-listed AMERICA! variety derives its name from a die scratch after the final A in the legend that resembles the letter I. Population: 13 in 50, 12 finer (10/10). (#6892)

3795 1800 12 Arrows—Rim Damage, Improperly Cleaned—NCS. VF Details. B-17, BB-196, R.1. Bowers-Borckardt Die State IV with crack from star 6 to hair ribbon. A moderately worn example that shows numerous rim bumps and partial retoning from a past cleaning, partly gold-to-gray, the rest deep violet-charcoal. (#6890)

1801 Dollar, B-1, BB-211, Fine 12 Details
Rare Terminal Reverse Die State

3796 1801—Scratched—ANACS. Fine 12 Details. B-1, BB-211, R.3. Bowers-Borckardt Die State V, “very rare,” marked by a die failure (seen as a light gray spot) over the E in AMERICA and extending to the adjacent letters. The light gray color continues to the rest of the worn high points, while the fields medium-gray to charcoal. Scratches on the obverse portrait with an “X” near the die failure on the reverse, but these are unlikely to dissuade the die state enthusiast. (#6893)

3797 1801—Improperly Cleaned—NGC Details. VF. B-2, BB-212, R.3. Bowers-Borckardt Die State II with “double collar” clash mark. Moderately worn and mostly retoned blue-gray and gold-orange after a past cleaning, though the surfaces are still somewhat bright. (#6893)

XF Details 1803 Small 3 Dollar
B-5, BB-252

3798 1803 Small 3—Improperly Cleaned—NGC Details. XF. B-5, BB-252, R.3. The Small 3 obverse is distinguished by the small gap between the 1 and 8 in the date and how the 3 nearly touches the truncation of the bust. Lightly worn with pale gray at the worn high points and deeper greenish-gray retoning through the rest of the piece. Both sides have disturbed luster from a past cleaning, and the space to the right of the lowest curl shows a dig. (#6900)

GOBRECHT DOLLAR

1836 Original Gobrecht Dollar, PR45
Die Alignment I, Judd-60
A Lovely, Problem-Free Example

3799 1836 Name on Base, Judd-60 Original, Pollock-65, R.1, PR45 PCGS. Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the D in DOLLAR). There is no evidence of the straight die clash over the eagle's wing, indicating this is an early December striking. While these coins were struck as shallowly mirrored proofs, there is no evidence of reflectivity remaining in the fields on this piece. Rarely are Gobrecht dollars found with such pleasing surfaces as seen here. Slight friction is seen over the high points of the devices, but there are none of the often-seen cleaning, retoning, or plugging. Looking with a loupe at the surfaces the only “defects” we see are a couple of tiny planchet flakes out of the exergual area, one on each side of the date, and a few other shallow planchet depressions scattered elsewhere. The coin overall is light gray with attractive charcoal accenting surrounding the devices. The strike is sharp overall. *From The Eagle Harbor Collection, Part Two.* (#11225)

SEATED DOLLARS

3800 1840—Improperly Cleaned—NGC Details. Unc. Strongly struck at the centers, less so on the rims, with mustard-gold and blue-violet retoning across most of each side. A small sliver of silver color crosses Liberty's lower legs. (#6926)

3801 1842 AU55 PCGS. CAC. Softly swirling luster is abundant on this lightly circulated coin, which also shows a bit of flash when viewed head-on. Blue, violet, and silver toning is dappled with orange elements near the rims. Small abrasions to the right of Liberty's figure contribute to the grade. (#6928)

3802 1846 AU55 PCGS. Medium-gray through the centers with pearl and gold accents, while deeper charcoal elements prevail at the margins. A desirable Choice AU coin with only minor wear on well struck devices. (#6932)

3803 1849—Improperly Cleaned—NGC Details. Unc. Well-defined for the type with only minor peripheral softness and no trace of wear. The uniform luster in the fields is clearly unnatural, though light gold-to-gray toning softens the appearance. (#6936)

3804 1859-O MS61 PCGS. A frosty O-mint Seated dollar that is essentially silver-white save for hints of peripheral gold and a patch of blood-red on the eagle's left (facing) wing. Numerous wispy abrasions appear in parts of the fields, and several digs are present on Liberty's knee. (#6947)

1860 Seated Liberty Dollar, MS64 Prooflike Surfaces

3805 1860 MS64 PCGS. CAC. The 1860 Seated Liberty dollar is rare in Choice Mint State condition. The coin offered here exhibits reflective, prooflike surfaces, but die features confirm its status as a business strike. The devices are strongly impressed, except for some softness on the right obverse stars. The pleasing surfaces are graced by delightful shades of violet and green toning. Population: 27 in 64, 6 finer (10/10). (#6949)

3806 1860-O MS61 PCGS. An antebellum Seated dollar with plenty of flash to the silver luster, particularly on the reverse. A single small spot of dark toning appears on the left side of the gown. No trace of wear, though considerable coin-to-coin contact just above Liberty's foot contributes to the grade.
From The Eagle Harbor Collection, Part Two. (#6950)

3807 1866 Motto AU58 PCGS. Gold-orange overtones are prominent at the margins, while the flashy fields and frosted interior devices are pearl-gray. A lightly rubbed but entirely appealing example of this first-year Motto Seated dollar issue. Population: 20 in 58, 46 finer (10/10).
From The Eagle Harbor Collection, Part Two. (#6959)

Choice 1870 Seated Liberty Dollar Sharp Strike, Brilliant Surfaces

3808 1870 MS64 NGC. While the 1870 dollar is relatively available in circulated grades, Mint State coins are difficult to come by. We present here a nice near-Gem with silver surfaces that exhibit sharply struck design elements, indeed better struck than usually seen for the issue. A few minute marks preclude Gem status. Census: 16 in 64, 4 finer (10/10).
Ex: Queller Family Collection of Silver Dollars (Heritage, 4/2008), lot 2127, realized \$7,475. (#6963)

3809 1872 AU50 PCGS. Generous gold and orange overtones grace still-lustrous silver surfaces. A lightly worn but pleasing example of this late-date Seated dollar issue. (#6968)

Pleasing Fine 15 1872-CC Seated Dollar

3810 1872-CC Fine 15 PCGS. With just 3,150 pieces produced and most of them significantly worn, the 1872-CC Seated dollar poses a challenge regardless of grade. This is a pleasing coin for the Fine grade range, worn through the center of the word LIBERTY but otherwise with effectively VF detail elsewhere. Rich gray surfaces have a gold-orange cast and a couple of curving marks at the upper right obverse. (#6969)

Low-Mintage 1872-CC Dollar, AU53

3811 1872-CC AU53 NGC. The 1872-CC dollar has a low mintage of 3,150 pieces. Of course, only a fraction of that mintage exists in the marketplace today. Rusty Goe 2003 estimates between 200 and 300 examples are extant in all grades, most of which are less than XF. Most of the original luster is intact on this gold-tinged specimen, which shows the light wear and moderate contact marks expected of a short spate in circulation. The strike is somewhat soft on the upper obverse, leaving some peripheral stars and some of the details of Liberty's face less than full. Census: 6 in 53, 26 finer (10/10). (#6969)

PROOF SEATED DOLLARS

1852 Seated Liberty Dollar, PR63 Rare, Classic Restrike

- 3812** 1852 Restrike PR63 PCGS. CAC. Walter Breen, along with other researchers, has spent much time studying proof 1852 Seated dollars. Breen concluded that 90% of all proofs are restrikes, although his evidence for the statement is unclear. The 1993 Bowers *Silver Dollar Encyclopedia* lists six different varieties of proofs. The present specimen, due to the extent of polished areas within the vertical shield lines, appears to be Bowers proof variety 6, which he states is a restrike variety. Perhaps wisely, PCGS has simply certified all of the 1852 proofs in its holders as restrikes (PCGS #6995). NGC has certified only three proofs as originals, which makes that issue essentially noncollectible. The present restrike displays lightly dappled cream-gray and chestnut toning, with a full strike and contact-free surfaces. Hairlines are also elusive, although slightly subdued field reflectivity corresponds to the grade. Cameo contrast is evident but moderate. Housed in an old green label holder. Population: 4 in 63, 4 finer (10/10). (#6995)

3813 No Lot.

Important PR63 Cameo 1864 Seated Dollar

- 3814** 1864 PR63 Cameo PCGS. A captivating Civil War-era Seated dollar specimen with considerable field-to-device contrast. The coin has a light golden cast overall, both to the frost on the central figures and in fields which are occasionally clouded. Lightly hairlined with a few contacts, particularly at the right obverse. Population: 9 in 63 Cameo, 12 finer (10/10). (#87007)

**Stunningly Toned PR66 ★
1866 Motto Seated Dollar**

- 3815 1866 Motto PR66 ★ NGC. CAC.** Ex: Simpson. The circulation-strike production of the 1866 Seated dollar, the first of the With Motto type, was generous within the context of the series, at 48,900 pieces. This complemented a nominal emission of 725 proof coins. The present example offers sharp striking details, with lovely, dark iridescent gold, blue, and green toning on both sides—another stunning piece from this marvelous collection that will appeal to the many collectors of originally toned coins. This feature undoubtedly contributed to the NGC Star accolade. The devices are frosty, with the fields somewhat reflective. The surfaces are virtually pristine. (#7014)

**Choice Proof Cameo 1868 Dollar
Strong Contrast**

- 3816 1868 PR64 Cameo PCGS.** Proof mintage of Seated Liberty dollars was a mere 600 pieces in 1868, distributed with the proof sets of the year. Examples with the celebrated Cameo designation are rare today. The present coin is a pleasing Choice specimen, with deep mirrors and sharply contrasted, frosty devices. Light touches of gold toning highlight the brilliant surfaces. Population: 24 in 64 Cameo, 6 finer (10/10). (#87016)

**1869 Seated Liberty Dollar, PR62
Spectacular Toning**

- 3817 1869 PR62 PCGS. CAC.** Spectacular, but patchy, shades of lavender, gold, and ice-blue toning dominate the appearance of this attractive proof dollar. The strike is razor-sharp throughout, and the fields are brightly reflective. The 1869 Seated Liberty proofs claim a small mintage of 600 pieces, and high grade examples are scarce today. (#7017)

1869 Seated Liberty Dollar, PR67 Cameo
Brilliant Mirrors, Exquisite Strike
Among the Finest Certified

3818 1869 PR67 Cameo NGC. Only 600 proof Seated Liberty dollars were minted in 1869. Walter Breen identified three different die varieties for the issue, each one determined by different placement of the date. The coin offered here is a representative of variety number 3, with the date slightly above center and the point of the shield above the serif of the 1 in the date. As to the availability of this variety, Breen notes “Rarer than preceding.” Considered as a date, examples in PR67 Cameo are extremely rare. Currently, NGC has certified only 3 coins in this exalted grade, with none finer, while PCGS has graded no coins in PR67 Cameo, also with none finer. Both services have certified a single specimen in PR67 Ultra/Deep Cameo, again with none finer (10/10).

Most 1869 proof dollars were sold as part of the proof sets for the year. These sets were quite popular, and auction appearances began almost immediately. An 1869 set containing the silver dollar was offered as lot 90 of a Valuable Collection of Coins and Medals (Edward Cogan, 9/1869), where it realized \$3.50. Recent auction appearances have been most impressive. The spectacular PR67 ★ Cameo dollar in lot 1159 of the Los Angeles Signature Auction (Heritage, 7/2009) realized \$40,250.

The present coin is a magnificent Superb Gem specimen, with fully struck, frosty devices. The most intricate details of Gobrecht's Seated Liberty design are brought up to full advantage on this exquisite example. The pristine fields display a fathomless depth of reflectivity, and the field-device contrast is profound. The surfaces are brilliant throughout, and overall eye appeal is tremendous. We expect spirited competition from series enthusiasts when this lot is called. (#87017)

1871 Seated Liberty Dollar, PR63 Cameo
Rare Cameo Example

- 3819 1871 PR63 Cameo PCGS. A generous mintage of 960 proof Seated Liberty dollars was achieved in 1871, but few survivors exist with the intense cameo contrast of the present coin. The devices exhibit exacting, three-dimensional detail, and the fields are deeply mirrored, with hints of gold toning. Population: 15 in 63 Cameo, 10 finer (10/10). (#87019)

Gem Proof 1872 Seated Liberty Dollar
Sharp Strike, Vivid Toning

- 3820 1872 PR65 NGC. A generous mintage of 950 proof Seated Liberty dollars was accomplished in 1872, but the survival rate for proofs of this era was low compared to the earlier Civil War issues. Most examples were sold as part of proof sets, but some specimens undoubtedly went unsold, and were melted. Examples in Gem condition are very scarce today. The present coin displays razor-sharp definition on all design elements, and brightly reflective mirrored fields. The central devices gleam with silver highlights, while the fields are graced by iridescent shades of golden-brown and violet patina. Overall eye appeal is extraordinary. Census: 44 in 65, 22 finer (10/10). (#7020)

TRADE DOLLARS

Gorgeous Gem 1873-S Trade Dollar

- 3821 1873-S MS65 NGC. A first-year Trade dollar out of San Francisco, beautifully lustrous with strong silver swirls beneath a delicate layer of intermittent golden toning. The devices are better-defined than usually seen, particularly at the obverse margins. Easily one of the best-preserved examples of this first-year San Francisco issue. Ordinarily, collectors point to first-year dates as likely candidates to have been saved by private individuals, but with the specifically commercial nature of the Trade dollar, this potential source of high-grade survivors is less prominent than for other series. Census: 2 in 65, 2 finer (10/10). (#7033)
- 3822 1875-CC AU55 PCGS. CAC. Type One Reverse. Berry under talon. A lightly worn Carson City Trade dollar that retains considerable luster beneath dappled gold-gray and tan toning. (#7038)

Near-Gem 1875-S Trade Dollar

3823 1875-S MS64 PCGS. CAC. Type One Reverse. Large S. Toned light cream-gray with occasional blushes of apricot patina. A minimally abraded Choice silver type coin that has sweeping luster and minor granularity on the obverse field near star 11. Sharply struck except for softness on the right (facing) leg of the eagle. (#7039)

3824 1876 MS63 PCGS. Type One Obverse and Reverse. A strongly lustrous Select coin with hints of golden color over satiny silver surfaces. The reverse shows heavy die polish, most notable at the "broken" F in OF. Housed in a first-generation holder. (#7041)

3825 1876 MS63 NGC. Type One Obverse, Type Two Reverse. A lustrous Select example of this Philadelphia Trade dollar issue, toned dappled green-gold at the margins with more gray at the centers. Well struck and attractive. (#7041)

3826 1876-S MS62 NGC. Type One Obverse, Type Two Reverse. Small S mintmark. A sharply struck and highly lustrous representative with a pronounced prooflike effect in the obverse field. Lightly abraded with a thin staple scratch shows in the left obverse field, but a desirable type coin nonetheless. (#7043)

Appealing Choice 1877-S Trade Dollar

3827 1877-S MS64 PCGS. CAC. The Large S mintmark is lightly repunched. The obverse is lightly die doubled on the right border of Liberty's scroll. Rich golden-brown and ice-blue patina endows this lustrous and sharply struck near-Gem. The reverse is well preserved, while the obverse displays moderate marks. Housed in an old green label holder. (#7046)

1877-S Trade Dollar, MS64 High Mintage, Low Survival Rate

3828 1877-S MS64 PCGS. Large S. In spite of a record-breaking mintage of 9.5 million pieces, the 1877-S Trade dollar is a scarce date in Choice Mint State condition, and PCGS has certified only 32 coins in higher numeric grades (10/10). Most of the mintage was used in the China trade. The present coin is sharply struck and lustrous, with traces of green and lavender toning. *From The Eagle Harbor Collection, Part Two.* (#7046)

1877-S Trade Dollar, MS65 Flashy, One-Sided Prooflike Example

3829 1877-S MS65 NGC. Large S. This wonderful S-mint Gem Trade dollar, which is also the issue with the highest mintage for the series, would make an excellent and interesting addition to a date or type set. Each side offers crisp detail at both the centers and the margins, and the generally silver-white surfaces show glimpses of reddish-tan toning near the rims. The luster offers interesting contrast between the strong cartwheel on the obverse and the striking mirrors of the reverse. Both the figure of Liberty and the eagle exhibit considerable frostiness. Census: 28 in 65, 4 finer (10/10). (#7046)

PROOF TRADE DOLLARS

- 3830 1876 PR61 NGC. CAC.** Type One Obverse, Type Two Reverse. The rich cream-gray surfaces display attractive golden-brown and ocean-blue colors when the piece is rotated beneath a light. The obverse field exhibits hairlines appropriate to the grade. (#7056)

Select Proof 1877 Trade Dollar

- 3831 1877 PR63 PCGS.** One of just 510 proof specimens struck for this Trade dollar issue, a coin that is distinctly contrasted through gold-orange and gray toning that gives way to blue at the margins. Small contact marks are clustered near Liberty's knee. The first-generation holder does not list any sort of Cameo designation. For non-Cameo pieces, PCGS has graded 62 coins finer (10/10). (#7057)

1877 Trade Dollar, PR64 Cameo Low Mintage of 510 Pieces

- 3832 1877 PR64 Cameo PCGS. CAC. Type Two Obverse, Type Two Reverse.** The 1877 proof Trade dollar boasts a tiny mintage of 510 pieces. The issue is known for its deeply mirrored fields and brilliant surfaces, as exemplified by the present coin. The fully struck, frosty devices contrast boldly with the reflective fields to produce a dramatic cameo effect. Examples of such high quality are seldom encountered. Population: 15 in 64 Cameo, 5 finer (10/10). (#87057)

Select Proof Cameo 1878 Trade Dollar Proof-Only Issue, Vivid Toning

- 3833 1878 PR63 Cameo PCGS. CAC.** The Philadelphia Mint only produced Trade dollars in proof format in 1878, with a reported mintage of 900 pieces. The present coin is patinated in vivid, iridescent shades of green, blue, and lavender, with deeply reflective fields beneath the toning. The boldly impressed devices ensure profound cameo contrast. Population: 31 in 63 Cameo, 25 finer (10/10). (#87058)

PR66 Cameo 1879 Trade Dollar First of the Proof-Only Dates

- 3834 1879 PR66 Cameo NGC.** While 1878 is the first proof-only Philadelphia Trade dollar issue, the 1879 is far more famous, as it is the first date for which only proofs were coined (both Carson City and San Francisco made business strikes in 1878). With a generous mintage of 1,541 pieces, the 1879 Trade dollar is available for a price in most grades, though at the PR66 Cameo level seen here, it is a rarity. Strong silver mirrors have a delicate layer of gold-tinged gray patina, and while the well-defined devices are lightly frosted, the contrast is undeniable. A few tiny lint marks appear on each side. Census: 16 in 66 Cameo, 15 finer (10/10). (#87059)

Incredible PR68 Cameo 1879 Trade Dollar

3835 1879 PR68 Cameo NGC. CAC. The year 1879 would see the deaths of two important figures in U.S. Mint history. Former Mint Director Henry Richard Linderman, who had resigned in December 1878 and was the subject of a congressional inquiry accusing him of official misconduct, died on January 27 at age 53, with a cloud of suspicion hanging over him. Linderman was an avid numismatist who could not resist the temptation to have unusual Mint delicacies made for his own delight and profit. Chief engraver William Barber would pass away on August 31, after a vacation at the beach.

Linderman's successor, Horatio Burchard, took more than three months before he announced the appointment of the disliked Charles Barber, William's son, to fill the post. The Trade dollar denomination was obsoleted by the Morgan dollar, introduced in 1878. Treasury Secretary John T. Sherman was a bitter foe of the denomination, ending it (for circulation purposes) with the stroke of a pen on February 22, 1878. The Trade dollar issues from 1879 through 1883 were proof-only affairs. (The 1884 and 1885 Trade dollars were *pieces de caprice* that may have been struck later.) The 1879 leads off the string of series-ending proofs, produced to the extent of only 1,541 pieces.

Since the Trade dollar series had ended for circulation, savvy collectors held on to their low-mintage proof examples. But one has to wonder why the proof Trade dollars were issued for public consumption for a period of five years inclusive, from 1879 through 1883. Perhaps they were made as a numismatic smokescreen to keep the public eye away from even more elusive fare, including the controversial pattern stellas produced in gold and other metals, and the lovely "Schoolgirl" silver dollar patterns, also dated 1879 and designed by George T. Morgan, the assistant engraver at the Mint.

This marvelous 1879 Trade dollar is among the highest-graded proofs of the entire issue regardless of date. The fields are absolutely pristine and brilliant, with no trace of toning. The strike is full throughout, and the deeply mirrored fields engender dramatic contrast with the frosty devices. The eye appeal is simply outstanding on this unimprovable specimen. Census: 7 in 68 Cameo, 0 finer (10/10). (#87059)

Gorgeous PR68 Cameo 1880 Trade Dollar

3836 1880 PR68 Cameo NGC. A stunner of a specimen that is as close to perfect as a Cameo example can get, at least in the eyes of the NGC Census, where it is one of just eight Cameo coins graded PR68 with none numerically finer (10/10). While the strike is a trifle blunt on the right-side obverse stars, the rest of this coin is boldly detailed with moderate and distinctive frost across the devices. Potent mirrors show only a few wisps of gray toning, and the overall cameo effect is bold. While nearly 2,000 pieces were produced for this proof-only issue, few can match up to this example's incredible surface quality; each side is practically faultless. (#87060)

3837 1882 PR61 PCGS. Light blue-green and rich peach hues over impressively reflective surfaces. Boldly impressed but with significant hairlines on each side and scattered contacts in the reverse fields. (#7062)

**1882 Trade Dollar, PR64 Cameo
Scarce Proof-Only Issue**

3838 1882 PR64 Cameo PCGS. CAC. Trade dollars were only produced in proof format in 1882, with a generous mintage of 1,097 pieces. Examples in Choice condition, with cameo contrast are quite rare today. The coin offered here is fully struck, with incredibly deep mirrors, and brilliant surfaces. Only a few, tiny obverse surface marks prevent a higher grade. Population: 33 in 64 Cameo, 12 finer (10/10). (#87062)

**1883 Trade Dollar, PR66
Prized Proof-Only Issue**

3839 1883 PR66 NGC. The 1883 Trade dollar claims a proof-only mintage of 979 pieces, and the issue represents the final commercial offering of this denomination in Trade dollar format. The present coin is a stunning Premium Gem, with deeply reflective, brilliant fields and an exemplary strike. Census: 24 in 66, 12 finer (10/10). (#7063)

End of Session One

The same Heritage that you have trusted for decades has expanded to New York to serve you better.

HERITAGE NEW YORK | 445 PARK AVENUE | NEW YORK, NEW YORK 10022 | 212-486-3500

Heritage Auction Galleries, The World's #1 Rare Coin Dealer & Auctioneer, is now open in New York to serve all your numismatic needs.

MORGAN DOLLARS

- 3840 1878 8TF MS63+ Prooflike PCGS. VAM 14.8.** Per VAMworld.com, "the 1878-P VAM-14.8 is one of the ultra rare 8TF coins. VAM-14.8 was struck as a proof and the dies were reused as a business strike. Because of rarity, the business strike typically sells for higher premiums than the proof." This is a flashy and lightly toned example that is brilliant save for obverse peripheral apricot patina.
- 3841 1878 8TF MS65 PCGS. VAM-17.** The 1878 Morgan dollar is popular as the first date of the design and the only year with the eight tail feathers motif. This specimen is well struck, with reflective, prooflike fields on the obverse, and brilliant frosty mint luster on the reverse. (#7072)
- 3842 1878 8TF MS65 PCGS. VAM-20.** A Hot 50 Variety. Both sides of this Eight Tailfeathers Gem are flashy. The minimally toned obverse has a generally cartwheel appearance to the luster, while the reverse is more overtly prooflike. (#7072)
- 3843 1878 7/8TF Strong MS65 PCGS. CAC. VAM-37.** Obvious fragments of four additional tailfeathers are evident beneath the primary seven tailfeathers. Booming luster sweeps this well struck and unmarked first-year Gem. Only a hint of tan toning denies full brilliance. One tiny planchet flake (as made) near the shoulder curl. (#7078)
- 3844 1878 7TF Reverse of 1878 MS65 PCGS. VAM-84A, R-5.** Imprecisely designated as VAM-84 on the PCGS insert. The E in LIBERTY is partially and faintly clashed beneath the tailfeathers. The N in IN is also faintly evident near Liberty's neck. This VAM is also noted for a dash below the date, and a "broken" base on the D in DOLLAR. Attractively toned apple-green, cream-gray, lemon-gold, and cherry-red with one thin mark near the profile. (#7074)
- 3845 1878 7TF Reverse of 1879 MS65 PCGS.** This frosty and lustrous Gem is only a mark or two away from the finest quality that PCGS has ever certified. Both sides exhibit bold design definition with exceptional aesthetic appeal. PCGS has only certified six finer examples (10/10). (#7076)
- 3846 1878-CC MS65 PCGS. CAC.** A sharply struck, Gem example of this first year Morgan dollar from the charismatic Carson City Mint. The lustrous surfaces are patinated in shades of gold, green, and violet, with most of the color on the obverse. (#7080)
- 3847 1878-CC MS65 PCGS.** Richly toned with coffee-gold color over most of the obverse and deep blue-violet at the margins of that side and across much of the reverse. A Gem from the first year of the Carson City Morgan dollar series. (#7080)
- 3848 1878-CC MS65 PCGS.** A richly toned first-year Carson City Morgan dollar with deep blue outer toning on the obverse around a peach-to-gold interior. The reverse has a similar pattern but different colors, with pale olive-gold on the outside surrounding a light blue core. (#7080)
- 3849 1878-CC MS65 PCGS.** Boldly impressed and frosty with a single fleck of dark patina on the upper left wing. The rest of this Carson City piece is lightly toned silver, a minimally abraded and charming Gem. (#7080)

- 3850 1878-CC MS65 PCGS.** The 1878-CC is a perennially popular issue as it is both the first year of the Morgan design and it was struck in Carson City. This is a fully brilliant example that is also fully struck (as most are). There are no obvious or mentionable marks on either side. (#7080)

Lovely MS66 1878-CC Morgan Dollar

- 3851 1878-CC MS66 PCGS.** Delicate tan-gold toning graces this lustrous and precisely struck first year Carson City Morgan. The reverse is nearly pristine, and the obverse has only trivial grazes. The 1878-CC was available in Mint State even before the GSA hoard was distributed, but is surprisingly elusive in the present quality, and PCGS has certified only four pieces above the MS66 level (10/10). (#7080)
- 3852 1878-CC MS63+ Deep Mirror Prooflike PCGS. CAC.** Outstanding field-to-device contrast with occasional skiffs of cloud-white patina over gleaming silver surfaces. High-end within the Select range, though the abrasions around the eagle preclude near-Gem status.
From The Sandy Beach Collection. (#97081)
- 3853 1878-S MS65 PCGS. CAC.** Spectacular cherry-red, jade-green, and lemon-yellow toning consumes the obverse of this introductory year Morgan dollar. The reverse displays only light to medium golden-gray patina. (#7082)

Colorful MS66 ★ 1879 Morgan

- 3854 1879 MS66 ★ NGC.** Magnificent golden-brown, ruby-red, and ocean-blue toning graces the margins of this boldly struck Premium Gem. Essentially immaculate save for a thin mark above the LL in DOLLAR. Despite its high mintage, the 1879 emerges as a conditional rarity at the MS66 level. Census: 5 in 66 ★, none finer with a Star designation (10/10). (#7084)

Mint State 1879-CC Dollar

3855 1879-CC MS60 PCGS. This Mint State 1879-CC dollar is housed in a first-generation PCGS holder. The surfaces have numerous abrasions which account for the grade, though none are of particular significance. Subtle gold toning graces the obverse, while the reverse is lighter silver-white. The first prominent date among the Carson City Morgan dollar keys. (#7086)

1879-CC Morgan Dollar, MS62 Sought-After, Low-Mintage Issue

3856 1879-CC MS62 PCGS. CAC. The 1879-CC Morgan dollar is always in demand as a low-mintage date from the famous Carson City Mint. The present coin displays vibrant, cartwheel mint luster on both sides. The design elements are sharply rendered in most areas, with just a touch of softness on the hair above the ear. A scattering of minor abrasions on the obverse explains the grade, while the reverse displays no mentionable distractions. (#7086)

Shining Select 1879-CC Morgan Dollar

3857 1879-CC MS63 PCGS. Intensely lustrous with a frosty appearance and delicate golden elements that are strongest near the rims. This is a gorgeous Select example of one of the less accessible Carson City Morgan dollar issues, lightly abraded on the portrait but otherwise offering elegant eye appeal. (#7086)

Popular MS64 1879-CC Dollar

3858 1879-CC MS64 PCGS. Light skiffs of cloud-gray toning cross much of this Morgan dollar, while windows of pure silver also appear at the interior fields and golden accents visit the margins. Considerable frostiness graces the devices. Well-defined and attractive for the date, which is available for a price in MS64 but elusive any finer. PCGS has graded just 94 such coins (10/10). (#7086)

Difficult MS64 Prooflike 1879-CC Dollar

3859 1879-CC MS64 Prooflike NGC. CAC. Although easily located in lower grades, the 1879-CC is quite scarce in mid-to-high Mint State grades. Many, if not most, of the 756,000 examples struck were likely melted, and relatively few were released as part of the GSA hoard. Prooflike specimens are especially challenging, with only four finer Prooflike examples graded by NGC and none certified by PCGS (10/10).

The present coin shows some minor contact on Liberty's cheek and the obverse fields, but these marks barely affect the impressive reflectivity throughout the brilliant surfaces. The design elements are boldly defined. This is a rare opportunity for a specialist to acquire one of the key condition rarities in the Morgan dollar series. (#7087)

Capped Die VAM-3 1879-CC Dollar, MS61

- 3860 1879-CC Capped Die MS61 PCGS. VAM-3.** A Top 100 Variety. Large mintmark over small, with additional attempts to efface the undermintmark that only drew attention to the area. This variety is available in Mint State, albeit at a price, as seen here. While moderate abrasions are present on the portrait, including a pair of reed marks on Liberty's nose, the yellow-tinged luster on each side is intact. (#7088)

**1879-CC Morgan Dollar, MS61
Capped Die Variety, VAM-3**

- 3861 1879-CC Capped Die MS61 ANACS. VAM-3.** A Top 100 Variety. The 1879-CC is the second rarest Carson City Morgan dollar, with a mintage of 756,000 pieces. The present coin is a Capped Die example, with a large CC mintmark struck over a smaller CC. The coin is well struck, with a little softness showing on the hair above the ear. The lustrous surfaces show wisps of golden toning, and few abrasions are evident for the grade. (#7088)

**1879-CC Morgan Dollar, MS62
Important Capped Die Variety**

- 3862 1879-CC Capped Die MS62 PCGS. VAM-3.** A Top 100 Variety. The "Capped Die" variety occurred when small CC mintmark was partially effaced from the die and overpunched with a larger CC. This variety is definitely more difficult to locate than the perfect CC type, and has become extremely popular with students of die varieties because of its dramatic appearance. This pleasing example is well struck, with lustrous, brilliant surfaces. (#7088)

**Choice 1879-CC Morgan Dollar
Capped Die, VAM-3**

- 3863 1879-CC Capped Die MS64 PCGS. VAM-3.** A Top 100 Variety, distinguished by the large CC punched over the remains of a partially effaced, smaller mintmark. The present coin is sharply detailed in most areas, with just the slightest softness showing on the hair above Liberty's ear. The surfaces are lustrous and lightly abraded for the grade. Evidence of a grease strike through can be detected in the top reverse quadrant. (#7088)

Beautiful 1879-O Morgan Dollar, MS65

- 3864 1879-O MS65 PCGS.** As a broad generalization, New Orleans Mint coins are among the worst produced of any Mint that coined Morgan dollars. This piece is a delightful exception, with nearly full design definition. It has brilliant and frosty silver luster with no evidence of toning on either side. PCGS has only certified 13 finer pieces. (#7090)

Uncommonly Lustrous 1879-O Dollar, MS65

- 3865 1879-O MS65 PCGS.** This is a lovely O-mint dollar, from an issue that is not often seen in this grade and is a condition rarity any finer. The fields of this lustrous dollar are virtually perfect, with the very few tiny abrasions that are present seen on the devices. The surfaces exude thick mint frost, and light golden-russet toning clings to the peripheries and enhances the overall appeal. (#7090)

Incredible 1879-S Morgan, MS68 Prooflike

3866 1879-S MS68 Prooflike NGC. Among the best produced Morgan silver dollars are the San Francisco Mint pieces struck from 1879 to 1882. This incredible Superb Gem is fully prooflike with mirrored fields around frosty devices. The surfaces are entirely brilliant with no toning on either side. Census: 4 in 68 Prooflike, 0 finer (10/10). (#7093)

3867 1879-S Reverse of 1878 MS64 PCGS. The 1879-S Morgan dollar, with the reverse of 1878, is a scarce variety, recognized by the parallel arrow feathers. The present coin is a well struck Choice example, with golden-brown and ice-blue patina. (#7094)

3868 1880-CC MS65 PCGS. CAC. A frosty Gem, softly struck on the hair over Liberty's ear but amply appealing thanks to delicately frosted luster. Light silver color with considerable gold-to-green elements. (#7100)

3869 1880-CC 8 Over Low 7 MS65 PCGS. VAM-6. A Top 100 Variety. The underdigit shows a considerable length of 7 below the lower loop of the second 8 in the date. This minimally toned Gem has strong cartwheel luster and lushly frosted devices. PCGS has graded 28 finer examples of the variety (10/10). (#7104)

1880-CC Overdate Dollar, Highly Lustrous MS66 8 Over Low 7, Prominent Underdigit

3870 1880-CC 8 Over Low 7 MS66 PCGS. VAM-6. A Top 100 Variety. A prominent overdate that displays the serifs, crossbar, downstroke, and base of the 7. A boldly impressed Premium Gem that has faint gold toning and exuberant luster. The fields are beautifully preserved, and the cheek has only trivial imperfections. Population: 28 in 66, 0 finer (10/10).

Ex: Long Beach Auction (Heritage, 2/2008), lot 1129. (#7104)

MS66 1880-CC 8 Over Low 7 Dollar

3871 1880-CC 8 Over Low 7 MS66 NGC. VAM-6. A Top 100 Variety. Neither the VAM nor the variety is designated on the NGC insert, but the underdigit 7 is obvious within the second 8. Lustrous, untuned, and crisply struck. The fields are practically pristine, and the cheek displays only faint grazes. There must have been a number of leftover 1879-dated obverse dies put to use in 1880, given the number of VAMs from all facilities that show traces of overdates. (#7104)

3872 1880/79-CC Reverse of 1878 MS64 PCGS. VAM-4. A Top 100 Variety. A well struck Choice specimen of this popular overdate, with the remnants of the undertype 79 showing in the last two digits of the date. The lustrous surfaces are patinated in mottled shades of gold, violet, and gray on the obverse, with light traces of gold on the reverse. (#7108)

3873 1880/79-CC Reverse of 1878 MS64 NGC. VAM-4. A Top 100 Variety. A lightly toned and lustrous representative of this popular Carson City VAM, which exhibits the most prominent overdate of the Morgan dollar series. It also marks the final appearance of the Second Reverse, identified by a parallel upper arrow feather. The fields are well preserved, and the cheek displays wispy abrasions. (#7108)

3874 1880/79-CC Reverse of 1878 MS65 PCGS. VAM-4. A Top 100 Variety. The underdigits 79 are strong beneath the 80, and the reverse has the Parallel (top) Arrow Feather style of 1878. Lustrous silver-gray surfaces display sharply struck devices and are minimally abraded. Housed in a green label holder. (#7108)

3875 1880/79-CC Reverse of 1878 MS64 Prooflike PCGS. CAC. VAM-4. A Top 100 Variety. A whisper of tan toning visits this thoroughly lustrous and nicely struck Carson City Morgan. The fields display only minimal contact, and the cheek has only a few moderate grazes. (#7109)

3876 1880-O MS64 PCGS. Micro O. Lustrous and well struck for the type with rich patina. Dusky orange, green, and sage shadings are mainly peripheral on the obverse but cover much of the reverse. PCGS has graded 28 numerically finer examples (10/10). (#7114)

3877 1880-O MS64 PCGS. CAC. Micro O. A Choice Mint State example of this popular Morgan dollar, the present coin displays booming mint luster and sharply defined design elements. The surfaces are brilliant, with a minimum number of minor abrasions for the grade. Visual appeal is outstanding. (#7114)

3878 1880-S MS67+ PCGS. CAC. Medium S. Impressive orange-gold, peach-red, and cobalt-blue toning dominates the upper left obverse. The reverse is brilliant. Sharply struck and lustrous with exemplary preservation. (#7118)

3879 1880/9-S MS66+ PCGS. CAC. VAM-11. A Hot 50 Variety. A high-end Premium Gem Morgan dollar, with a razor-sharp strike and vibrant mint luster. Some dies prepared for service in 1879 were altered to coin dollars in 1880, resulting in the interesting overdate exemplified by the present coin. (#7122)

- 3880 1880/9-S MS67 NGC. VAM-11.** A Hot 50 Variety. Medium S. A remarkably high grade for this popular *Guide Book* variety, which displays die fill within the interior of the 0 in the date. Well struck and close to pristine with a whisper of gold toning near the rims. Census: 9 in 67, 1 finer (10/10). (#7122)

Superb Gem 1881-CC Silver Dollar

- 3881 1881-CC MS67 PCGS. CAC.** The 1881-CC has the second lowest mintage among Carson City Morgan issues, trailing only the 1885-CC. Both dates were in the GSA holdings and are available in typical Mint State, but Superb Gem examples are seldom encountered. This intricately struck and lustrous high grade representative is untuned save for a band of lemon-gold along the left reverse border. (#7126)
- 3882 1881-CC MS64 Deep Mirror Prooflike PCGS. CAC.** Flashy with minor cartwheels in the minimally toned fields. Thickly frosted devices are immensely appealing for this Carson City issue. (#97127)
- 3883 1881-O MS65 NGC.** A sharply struck and brightly lustrous Gem from the romantic New Orleans Mint, this coin features abundant eye appeal to go with its high technical grade. Only eight coins have been certified in higher numeric grades at NGC (10/10). (#7128)
- 3884 1881-O MS65 PCGS.** Sharply struck with sparkling mint luster and lightly toned gold-to-peach over much of the obverse. Scarce as a Gem and highly appealing. Housed in a green label holder. PCGS has graded 12 finer examples (10/10). (#7128)
- 3885 1881-O MS65 PCGS.** An attractive silver-white Gem example of this O-mint issue that has hints of peripheral blue. Great eye appeal for this issue that is available for a price in MS65 but rare any finer; PCGS has certified just 12 such coins (10/10). (#7128)
- 3886 1881-O MS64 Deep Prooflike NGC.** Outstanding reflectivity with considerable field-to-device contrast. The interiors are silver, while the outer zones show a measure of milky patina. (#97129)
- 3887 1881-S MS67 ★ NGC.** Splendid orange-red, ice-blue, and lime-green toning consumes the obverse of this magnificently preserved silver type coin. The reverse displays only faint gunmetal-gray patina. Well struck, as is customary for S-mint issues of the era. (#7130)
- 3888 1881-S MS67 ★ NGC. CAC.** This gorgeously toned Superb Gem's obverse has zones of blue, magenta, yellow, peach, and green-gold around a siver of brilliance found right-of-center. The reverse has an echo of yellow-green color at parts of the margins. (#7130)
- 3889 1881-S MS67 PCGS. CAC.** A strongly lustrous Superb Gem that is flashy on the untuned reverse. The obverse has rich gold-green, orange, magenta, and lavender toning save at the lower left. (#7130)
- 3890 1881-S MS67 NGC. CAC.** A delightful Superb Gem Morgan dollar, with vivid gold, pale green, and violet patina on the obverse, and brilliant surfaces on the reverse. Sharply struck throughout, with vibrant mint luster. (#7130)

Extraordinary 1881-S Dollar, MS68

- 3891 1881-S MS68 PCGS. CAC.** The 1881-S is famous for being one of the most common issues in the Morgan dollar series, if not *the* most common. However, at the lofty MS68 grade tier, even the 1881-S becomes conditionally scarce. This example boasts great technical merit as well as splendid eye appeal. Lovely champagne and turquoise patina blankets the obverse while the reverse shows similar coloration, but only near the periphery. Fully struck, intensely lustrous, and virtually pristine, this is simply a great Morgan dollar in every respect. Population: 91 in 68, 2 finer (10/10). (#7130)

Desirable 1881-S Morgan Dollar, MS68 Prooflike

- 3892 1881-S MS68 Prooflike NGC.** Arguably the most widely available Morgan silver dollar in higher grades, the 1881-S is the logical choice for numismatic connoisseurs who desire an aesthetically pleasing piece for a type collection. This is one such coin, with brilliant silver surfaces, fully mirrored fields, satiny devices, and intricately detailed design motifs. Census: 7 in 68 Prooflike, 0 finer (10/10). (#7131)
- 3893 1882 MS66 NGC.** Silver-gray across most of each side with dots of deep cobalt-blue arcing along the lower obverse. A touch of satiny texture appears in the fields around the portrait. (#7132)
- 3894 1882 MS66 PCGS.** Hints of peach visit the obverse, while the reverse is nearly untuned. Both sides share a sharp strike and potent luster, as well as notable preservation. Housed in an old green label holder. PCGS has graded just six finer pieces (10/10). (#7132)
- 3895 1882 MS64 Deep Mirror Prooflike PCGS.** This sharply struck 1882 Morgan dollar displays deeply reflective, mirrored fields and sharply detailed design elements. A scattering of minor abrasions on both sides is consistent with the grade. Population: 90 in 64 Deep Mirror Prooflike, 20 finer (10/10). (#97133)
- 3896 1882 MS64 Deep Mirror Prooflike PCGS. CAC.** Thickly frosted on the central devices with gleaming mirror-fields that are bright silver. The abrasions present are mostly shallow, though a deeper mark is noted on the eagle's breast. PCGS has graded 20 finer Deep Mirror Prooflike examples (10/10). (#97133)
- 3897 1882 MS64 Deep Mirror Prooflike PCGS.** Bold mirrors show long, narrow "snakes" of brown toning on and near Liberty's portrait. Silver surfaces are otherwise untuned save for a degree of the usual cloudiness. PCGS has graded 20 finer Deep Mirror Prooflike pieces (10/10).
From *The Sandy Beach Collection*. (#97133)

- 3898 1882-CC MS66 PCGS. CAC.** Minimally toned with full-on frosty luster. Strong cartwheels shoot through the fields, and while the portrait shows slight striking softness, both sides are beautifully preserved. (#7134)
- 3899 1882-CC MS66 PCGS.** Bold cartwheels with an undeniable degree of reflectivity in gold-kissed fields. This well struck Carson City coin doubtless hails from the GSA releases, though it is not specifically pedigreed as such. PCGS has graded 53 coins finer (10/10). (#7134)
- 3900 1882-CC MS66 PCGS.** A gorgeous and brilliant Carson City type coin. Lustrous and beautifully preserved. The strike is meticulous, and the eye appeal is exemplary. PCGS has certified 53 numerically finer pieces (10/10). (#7134)
- 3901 1882-CC MS66+ NGC.** Impressively preserved even by Premium Gem standards, and the eye appeal is close to Superb Gem quality. Boldly cartwheeled, modestly toned fields give way to lightly but distinctly frosted devices. NGC has certified just 47 numerically finer examples (10/10). (#7134)
- 3902 1882-CC MS65 Deep Mirror Prooflike PCGS. CAC.** An outstanding Deep Mirror Prooflike piece with fantastic contrast and minimal patina. Thickly frosted devices are well-defined silver-white, while the fields gleam with minor cartwheels and touches of peripheral gold. PCGS has graded 62 finer Deep Mirror Prooflike pieces (10/10). (#97135)

Richly Toned/Near-Brilliant 1882-S Dollar, MS68

- 3903 1882-S MS68 PCGS.** Well defined in all areas of the design and essentially mark-free, with superb sea-green, deep red, and gold patina over the obverse, the reverse shows markedly contrasting near-brilliance. Near technical perfection combines with glorious eye appeal on this ultimate type coin. One of the more available S-mint issues, but rare, and highly desirable, in this impeccable condition. Population: 34 in 68, 0 finer (10/10). (#7140)
- 3904 1882-S MS66 Prooflike PCGS.** Both sides are distinctly reflective, more so on the obverse. Minimally toned save for small patches such as the milky color on Liberty's jawline. Population: 70 in 66 Prooflike, 4 finer (10/10). (#7141)
- 3905 1883-CC MS66 PCGS.** Intensely toned green-gold, rose, and navy-blue on the obverse with similar, paler versions restricted to the margins on the reverse. A lovely Premium Gem example of this popular Carson City Morgan dollar issue. (#7144)

Spectacular MS67 Deep Prooflike 1883-CC Morgan Dollar

- 3906 1883-CC MS67 Deep Prooflike NGC.** While collectors have become accustomed to dollars from the GSA holdings "coming nice," this jaw-dropping Superb Gem is among the flat-out finest Heritage has handled. Not only is it graded MS67, itself an accomplishment considering the circumstances of the GSA dollars' storage, but the fields are profoundly reflective. Boldly impressed devices offer thick silver-white frost and incredible contrast. A few scattered dots of milky color, the most visible of which hover near the eagle's head, add a touch of realism to what would otherwise be an utterly unbelievable coin. Census: 5 in 67 Deep Prooflike, 0 finer (10/10). (#97145)
- 3907 1883-S MS61 ANACS.** A delightful Mint State Morgan dollar, with fine detail on all design elements and bright mint luster. The surfaces display hints of light golden toning, with a scattering of grade-consistent minor abrasions on both sides. (#7148)
- 3908 1883-S MS62 PCGS.** Brightly lustrous with bold cartwheels. Silver interiors yield to splashes of gold-orange, claret, and violet close to the rims. An attractive piece for the grade. (#7148)

3909 1883-S MS63+ PCGS. CAC. The present coin is a high-end Select Mint State example of this better-date Morgan dollar. Tremendous cartwheel mint luster highlights the brilliant surfaces, and the devices are sharply defined. (#7148)

3910 1883-S MS63+ PCGS. CAC. Thickly frosted on the portrait with bold cartwheel luster. Hints of peripheral gold and light layers of cloud-white toning add color to this Select-plus coin. (#7148)

Brightly Lustrous MS64 1883-S Dollar

3911 1883-S MS64 PCGS. Unlike the famous 1880-S and 1881-S type issues, the 1883-S Morgan dollar is among the more elusive S-mint dates in MS64 and especially any finer, where PCGS has graded only 17 such pieces (10/10). This shining near-Gem is mainly silver with just a touch of peripheral gold toning and a line of reed marks to the left of the forehead that precludes an even finer designation. (#7148)

Appealing MS66 Prooflike 1884 Dollar

3912 1884 MS66 Prooflike PCGS. Prooflike 1884 dollars have been elusive from the start, and this Premium Gem in a first-generation holder is among the earliest certified. It is an essentially brilliant example that has brightly reflective mirrors in the fields. Set against the mirrors is a moderate but noticeable amount of mint frost over the devices. The devices are fully struck throughout, and the only "flaw" of note is a tiny brown dot of color at the top of the eagle's breast. Certified in a first generation holder. Population: 4 in 66 Prooflike, 1 finer (10/10). (#7151)

3913 1884-CC MS66 NGC. CAC. The GSA auctions of the 1970s were a boon for Carson City collectors, who have since been able to obtain high grade CC-mint silver dollars at an affordable price. This sharply struck 1884-CC is much nicer than the typical example, since the lightly toned fields and devices show only infrequent delicate marks. (#7152)

3914 1884-S AU58 NGC. Light but distinct wear is noted on the well struck high points. This near-Mint example has great luster remaining in the fields, including a partially prooflike obverse. Hints of gold are noted at the margins. (#7156)

Shimmering 1884-S Morgan Dollar, MS63

3915 1884-S MS63 NGC. Something unusual occurred in San Francisco in 1884: almost the entire mintage of 3.2 million silver dollars produced in that mint were dropped into circulation. With most Morgan dollar issues, large quantities of the original production run were bagged after minting and relegated to storage, many not seeing the light of day again until 1962-64. As a result, very few 1884-S dollars were set aside in Uncirculated condition and it is one of the "Big 5" Morgan dollars for the advanced collector. This is a shimmering, lustrous example that has lovely mint frost over each side. The devices are sharply defined, and the grade is derived from a milling mark that crosses Liberty's jawline and throat and a scrape between the eagle's head and WE in the motto above. These are certainly minor flaws on a coin that all too often seems to come "struck in AU." Census: 42 in 63, 14 finer (10/10). (#7156)

3916 1885-CC MS65 PCGS. Brightly lustrous, especially on the cartwheel reverse. This Carson City beauty has dappled blue-green and sage toning that shows considerable windows of silver color. (#7160)

3917 1885-CC MS65 PCGS. A minimally toned Gem example of this popular Carson City Morgan dollar issue. Well-defined with bold cartwheels in the fields and light frostiness across the devices. (#7160)

3918 1885-CC MS66 NGC. A flashy Premium Gem example of the popular Carson City issue. Twinkling frost highlights well struck and pleasingly preserved devices. NGC has graded 68 numerically finer examples (10/10).(#7160)

3919 1885-CC MS66 NGC. Light frost across devices and fields alike. A minimally toned Premium Gem survivor from this popular Carson City Morgan dollar issue. NGC has graded 69 numerically finer pieces (10/10).(#7160)

3920 1885-CC MS65 Prooflike NGC. An amazing Prooflike Gem 1885-CC Morgan dollar with excellent contrast. The fields are deeply mirrored with minimal patina, and the devices are thickly frosted. NGC has graded just 24 finer Prooflike examples (10/10).(#7161)

3921 1885-CC MS64+ Deep Mirror Prooflike PCGS. Remarkable field reflectivity provides contrast with the evenly frosted motifs. The eye appeal is imposing, and the grade is only limited by occasional moderate marks.
From The Sandy Beach Collection.(#97161)

3922 Lot of 10 1885-O Morgan Dollars MS66 PCGS. A lot of 10 pieces, all graded MS66 by PCGS. Toning ranges from light peripheral olive-gold color to virtual brilliance.(Total: 10 coins)

Dynamic 1885-S Silver Dollar, MS66

3923 1885-S MS66 PCGS. CAC. Wisps of chestnut-gold toning visit this coruscating and impressively unabraded Premium Gem. A good strike overall, although the centers show slight incompleteness. Unlike its 1884-S predecessor, the 1885-S is affordable in Mint State, but most such pieces are in Choice or lesser grades. Population: 28 in 66, 2 finer (10/10). (#7164)

3924 1885-S MS64 Prooflike NGC. The untuned fields provide a surprising level of reflectivity, and the devices are well struck. The obverse is well preserved, and only a few small ticks on the reverse field preclude an even higher grade.(#7165)

3925 1886 MS67 PCGS. CAC. Faint bluish elements appear in the fields of this essentially silver-white Superb Gem. Well struck for the type with a measure of reflectivity at the margins. PCGS has graded only three pieces finer (10/10).(#7166)

3926 1886-O MS62 PCGS. The 1886-O Morgan dollar is easy to locate in lower grades, but high-grade examples are scarce. The present coin is a well struck MS62 specimen, with vibrant mint luster, and brilliant surfaces.(#7168)

Select 1886-O Morgan Dollar

3927 1886-O MS63 PCGS. A well struck, lustrous example of this popular date, from a mintage of 10.7 million pieces. The 1896-O Morgan dollar was plagued by low production values, and high grade specimens are difficult to locate and quite expensive. An attractive MS63 example makes a good balance of quality and value. A scattering of minor abrasions on the obverse explains the grade. (#7168)

3928 1886-S MS65 PCGS. From a low mintage of 750,000 pieces, the 1886-S Morgan dollar is scarce at the Gem level and rare in any higher numerical grade. The present coin is a remarkable Gem, with sharply defined devices and vibrant mint luster. Both sides display speckled gold and gray patina.(#7170)

3929 1887 MS67 NGC. A well struck and immensely lustrous Superb Gem. Surfaces are mainly silver with aspects of border toning, most notably a gold and violet crescent along the lower and left obverse.(#7172)

3930 1887 MS67 NGC. A brightly lustrous Superb Gem, faintly toned-over in pale silver-gray with occasional gold and pink elements. Well struck and beautifully preserved, as demanded of the grade. NGC has graded only two numerically finer examples (10/10).(#7172)

Top-Notch MS66 DMPL 1887 Morgan

3931 1887 MS66 Deep Mirror Prooflike PCGS. This precisely struck Premium Gem is brilliant save for a dab of honey toning on the chin. The preservation is outstanding, and the devices exhibit moderate cameo frost. Encapsulated in a green label holder. Population: 30 in 66 Deep Mirror Prooflike, none finer (10/10).(#97173)

3932 1887-O MS65 PCGS. Pale silver luster with only slight striking softness at the centers. An attractive Gem example of this New Orleans issue, which has just nine finer pieces in the PCGS Population Report (10/10).(#7176)

3933 1887-S MS65 PCGS. Better-defined than often seen with stunning cartwheel luster. Splashes of cobalt-blue and reddish-orange visit the margins, while the centers remain gleaming silver. PCGS has graded just 21 numerically finer examples (10/10).(#7180)

3934 1887-S MS65 PCGS. A stunning Gem Morgan dollar with fully brilliant silver surfaces on both sides, enhanced by splendid pale gold toning at the peripheral areas. All design elements are sharp, and the overall eye appeal is exceptional. PCGS has only certified 21 finer non-prooflike pieces (10/10).(#7180)

- 3935 1889-CC VF20 PCGS.** Deep gold-gray toning over moderately worn surfaces with occasional shading into charcoal. Minimally abraded save for a cut above the eye, though the upper left obverse shows a rim bump. (#7190)
- 3936 1889-CC VF25 PCGS.** Rose and gold peripheral overtones yield to medium-light silver-gray at the centers of this moderately worn Carson City dollar. Minimally abraded for age and wear and a great coin for the grade. (#7190)

Challenging Choice XF 1889-CC Dollar

- 3937 1889-CC XF45 NGC. CAC.** Light, even wear has left considerable luster in the fields, which are smooth beneath layers of gold, green, violet, and gray patina. A handful of small ticks are hidden on and near the central devices. Great eye appeal for this elusive Carson City issue and an excellent addition to a higher-end circulated set. (#7190)
- 3938 1889-CC—Repaired—NGC Details. AU.** A well-defined example with minor wear across lightly luminous, likely cleaned surfaces that are silver-gray in the centers with reddish outer tints. The upper cheek has been repaired to minimize the appearance of a line of reed marks, though three more on the lower jaw are untouched.
- 3939 1889-CC—Repaired, Cleaned—NGC Details. AU.** The low-mintage and little-saved 1889-CC dollar enjoys immense popularity today. This example shows only minor wear, though the portrait has been smooth and the surfaces show clearly unnatural silver luster. Nonetheless, a readily collectible representative. (#7190)

Uncirculated Details Key 1889-CC Morgan

- 3940 1889-CC—Improperly Cleaned—NGC Details. Unc.** This fully struck Carson City dollar has a hint of sun-gold toning. The fields are moderately prooflike, but are subdued from dipping. Surprisingly free from bagmarks, and a coin that many collectors would treasure. The 1889-CC is the key date of the CC-mint Morgan series, represented by only a single example (not the present coin!) within the famous GSA hoard. (#7190)

1889-CC Morgan Dollar, MS61 Lustrous, Sharply Struck Example

- 3941 1889-CC MS61 NGC.** The 1889-CC Morgan dollar is one of the most sought-after issues of the series. The low mintage of 350,000 pieces makes this date the rarest Carson City Morgan, and collectors have always prized the romantic CC mintmark. The present coin offers more eye appeal than the average specimen of this date, which tends to have a weak strike and below-average luster. By contrast, this attractive MS61 piece displays brilliant surfaces, with vibrant mint luster. The strike is razor-sharp, with crisp detail on all design elements. The surfaces exhibit only the minimum number of abrasions for the grade. (#7190)

Important MS61 1889-CC Dollar

- 3942 1889-CC MS61 NGC.** The 1889-CC dollar was not so well-represented as its earlier peers in the Treasury holdings and GSA auctions, and coupled with a naturally low mintage of 350,000 pieces, this has resulted in a supply that is inadequate to current demand, particularly in the various Mint State grades. This is an impressively lustrous MS61 survivor that has a particularly prominent cartwheel effect on the reverse. Both sides have above-average definition and traces of golden peripheral toning that frame pale silver centers. Numerous wispy abrasions and a few more serious marks, such as a cut on the truncation on the bust, combine to account for the grade. (#7190)
-

Lustrous MS61 1889-CC Dollar
Ex: M.J.O.

- 3943 1889-CC MS61 PCGS.** Ex: M.J.O. A well-defined example of this popular Carson City issue with strong luster and no trace of wear. The interiors are mostly silver, while the outer areas have dappled whitish-gray and golden toning that is particularly prominent on the reverse. Marks and nicks on the portrait, especially the neck, determine the grade. (#7190)
-

Richly Toned 1889-CC Morgan Dollar, MS62

3944 1889-CC MS62 PCGS. CAC. Like many dates in the Carson City Morgan dollar series, the 1889-CC has a mintage in the six-digit range. Unlike earlier dates such as the 1885-CC, however, the 1889-CC was not preserved to a great degree in government holdings, and so Mint State examples are elusive today. This MS62 example is attractive for the grade, thanks to strong luster that swirls beneath gray, gold, and russet patina. While a number of small marks appear on the portrait and in the nearby fields, only a few tiny digs to the left of the profile warrant specific mention. A rewarding coin that would make an excellent capstone to a similarly toned Carson City set. (#7190)

3945 1889-S MS65 PCGS. The 1889-S Morgan dollar boasts a low mintage of 700,000 pieces. The present coin is a spectacular Gem, with a sharp strike, brilliant surfaces, and vibrant, frosty mint luster. (#7194)

3946 1889-S MS64 Prooflike PCGS. The flashy white fields and precisely struck devices are refreshingly free from marks, save for a few faint ticks on the reverse field beneath the wings. Encapsulated in an old green label holder. Population: 38 in 64 Prooflike, 7 finer (10/10).(#7195)

3947 1890 MS65 PCGS. While the 1890 Morgan dollar is only scarce in Gem condition, it is virtually impossible to locate in higher grades. The present coin is well struck, with lustrous surfaces and delightful green and powder-blue toning. Currently, PCGS has certified only one coin in higher numeric grade (10/10).(#7196)

3948 1890 MS65 PCGS. CAC. Both sides of this luminous Gem offer warm green-gold and peach patina with slightly more vibrant colors on the obverse. Well struck with excellent preservation overall and a desirable example of this prominent P-mint issue. PCGS has graded just one coin finer (10/10).(#7196)

3949 1890 MS64 Deep Prooflike NGC. Bold mirrors and excellent contrast, the latter thanks to generous frost across the devices. Lightly abraded with thin layers of gauzy gray toning across much of the fields. Census: 39 in 64 Deep Prooflike, 2 finer (10/10).(#97197)

Scarce Tail Bar 1890-CC Morgan, MS63

3950 1890-CC Tail Bar MS63 PCGS Secure. A Top 100 Variety. This VAM perhaps the easiest to identify within the entire Morgan dollar series, since the wide die gouge from the fletchings to the wreath is prominent when seen with the unaided eye. Light chestnut toning drapes lustrous and sharply impressed surfaces. (#87198)

3951 1890-CC MS64 PCGS. CAC. Q. David Bowers considers MS64 the Optimal Collecting Grade for the 1890-CC Morgan dollar, the best combination of quality and value. This piece is sharply struck and lustrous, with a few wisps of gold toning. (#7198)

3952 1890-CC MS64 PCGS. CAC. Frosty silver surfaces are splashed in green and gold, most visibly on Liberty's cheek. A well struck Choice example of this popular Carson City issue. (#7198)

3953 1890-CC MS64 Prooflike NGC. Moderately mirrored on the obverse with even deeper reflectivity and contrast on the reverse. A notable near-Gem with scattered marks in the fields and a few patches of milky color. (#7199)

3954 1890-O MS65 PCGS. Frosted luster with minimally toned surfaces save for a thin line of cloudy patina through and under the word STATES. A few small marks and abrasions appear in the fields surrounding the eagle. PCGS has graded 19 finer examples (10/10).(#7200)

3955 1890-S MS65 NGC. Light gold and ice-blue patina adorns the surfaces of this attractive Gem. The design elements display sharp details throughout, and vibrant mint luster shines through the toning. Eye appeal is quite strong. (#7202)

**Premium Gem 1890-S Morgan
Exemplary Strike, Vibrant Luster**

- 3956 1890-S MS66 PCGS. CAC.** The 1890-S Morgan dollar was a well produced issue, with a large reported mintage of 8.2 million pieces. This date is not rare today, but few survivors can match the quality of the present coin. This spectacular Premium Gem features a razor-sharp strike, and vibrant, frosty mint luster, with virtually pristine surfaces. Only six coins have been certified in higher numeric grades by PCGS (10/10). (#7202)

Radiant 1891 Morgan Dollar, MS65

- 3957 1891 MS65 PCGS.** Gem Morgan dollars dated 1891 are seldom seen, and seldom well produced. This piece is a delightful exception, with silvery surfaces radiating strong mint luster and a sharp strike is present, save for the hair just over Liberty's ear. There are few marks for the assigned grade. PCGS has certified only three examples finer (10/10). (#7204)
- 3958 1891-CC MS64 NGC. CAC.** Bright silver luster with only a few scattered spots of grayish toning. A well struck example overall, though the hair across Liberty's ear shows softness. (#7206)
- 3959 1891-CC MS64 PCGS. CAC. VAM-3.** A Top 100 Variety. Impressive silver luster that takes on a delicate, frosty character across the central devices. Gorgeous and lightly patinated but largely without color, a desirable near-Gem example of this late Carson City Morgan dollar issue. (#7206)
- 3960 1891-CC MS64 PCGS.** A lustrous near-Gem example of this later Carson City Morgan dollar issue, well struck and generally pleasing. Pale silver surfaces show a spot of claret on the upper reverse rim. (#7206)

Surprising MS66 1891-CC Morgan Dollar

- 3961 1891-CC MS66 PCGS. VAM-3.** A Top 100 Variety. While the 1891-CC was present in limited quantities in the GSA releases, making the date available to the collecting public in various Mint State grades, the smaller number of pieces relative to other issues has made higher-graded coins elusive. An MS66 coin, for example, might be attractive if easily replaced for the 1885-CC issue, but in the context of the 1891-CC, an MS66 piece is a condition rarity. This is a well struck example overall, only softly struck a touch on the hair across the ear. Cream-tinted luster is effusive with a few dark dots to the right of the eagle. Population: 25 in 66, 1 finer (10/10). (#7206)

3962 1891-O MS63 Deep Mirror Prooflike PCGS. Great reflectivity with light golden color along the rims. Lightly frosted devices with minor striking softness supply moderate contrast. Scattered abrasions account for the grade. Population: 8 in 63 Deep Mirror Prooflike, 13 finer (10/10).
From *The Sandy Beach Collection*. (#97209)

3963 1891-S MS65 PCGS. CAC. Booming, vibrant mint luster and an exemplary strike are the hallmarks of this charming Morgan dollar. The well preserved surfaces are completely brilliant and eye appeal is outstanding. (#7210)

**1892 Morgan Dollar, MS65
Strong Mint Luster and Eye Appeal**

3964 1892 MS65 PCGS. The 1892 Morgan dollar is a scarce issue in Mint State, and Gem examples are quite elusive. The present coin is a delightful Gem specimen, with sharply detailed devices and brilliant, lustrous surfaces. Eye appeal is quite strong. Currently, PCGS has certified only two coins in higher numeric grades (10/10). (#7212)

**Deep Mirror Prooflike Near-Gem
1892 Morgan Dollar**

3965 1892 MS64 Deep Mirror Prooflike PCGS. Profoundly reflective with top-notch contrast, as attractive as a collector will find for this issue and grade. The mirrors are strong through a light layer of dove-gray toning, while the devices, though softly struck, are insistently frost-white. A small streak of copper-rose toning appears at the back of Liberty's cap. Population: 25 in 64 Deep Mirror Prooflike, 5 finer (10/10).
From *The Sandy Beach Collection*. (#97213)

3966 1892-CC MS62 PCGS. Considerable silver luster with splashes of peripheral gold and orange, most notably at the bottom of the obverse. Softly struck in the centers with roller marks over Liberty's hair and the eagle's breast. (#7214)

3967 1892-CC MS62 PCGS. Lightly toned gold-gray over the reverse, while the obverse is close to brilliant. Well struck with scattered abrasions on the portrait, including a grade-defining mark under the eye. (#7214)

3968 1892-CC MS63 PCGS. Strongly lustrous through a veil of pale gray patina tinged in gold and pink. A trifle softly struck but appealing for the grade with few significant abrasions. (#7214)

3969 1892-CC MS63+ PCGS. Vibrant mint luster and sharply defined design elements characterize this high-end Select Morgan dollar. The surfaces are completely brilliant and only a few minor, grade-consistent marks can be detected. (#7214)

Satiny 1892-CC Morgan Dollar, MS64

3970 1892-CC MS64 NGC. CAC. This satiny near-Gem is a brilliant silver example with a hint of delicate gold toning on the obverse. The fields are reflective, or semi-prooflike as they were once called. This lovely example will serve nicely in a higher grade Mint State set of Morgan dollars. (#7214)

Impressive Gem 1892-CC Silver Dollar

3971 1892-CC MS65 PCGS Secure. Lightly toned and lustrous with a good strike and a remarkably smooth cheek. Both sides are beautifully preserved despite a subtle mark on an obverse denticle at 6 o'clock. A decidedly better Carson City issue, essentially absent from the 1970s GSA auctions that made the CC-mint series popular to collect in Mint State. (#7214)

**Gem 1892-CC Morgan Dollar
In-Demand Carson City Issue**

- 3972 1892-CC MS65 NGC.** The 1892-CC Morgan dollar is always in demand because of its charismatic mintmark. The issue is scarce in Gem condition, and NGC has certified only 13 coins in higher numeric grades (10/10). The present coin is a lustrous Gem, with sharply detailed devices. A few short abrasions near Liberty's lips are the only marks of note. (#7214)

Lustrous 1892-O Morgan Dollar, MS65

- 3973 1892-O MS65 PCGS.** Although somewhat weakly impressed at the centers, this 1892-O Morgan dollar is a lovely Gem with brilliant mint surfaces and wispy toning on both sides. This issue is a condition rarity with only a handful of finer examples, just five certified by PCGS (10/10). (#7216)
- 3974 1892-S AU50 ANACS.** Still-lustrous fields show fragments of cartwheels at the margins. Lightly rubbed across the centers with elements of gold and deep charcoal-gray against pale silver surfaces. (#7218)
- 3975 1892-S AU50 PCGS. VAM-7.** The same obverse die as the Top 100 VAM-2 Doubled Date, but a later die state with less of the date repunching evident. Of course, any AU 1892-S dollar is desirable, since the issue is a significant conditional rarity. This is a lightly toned and problem-free piece with substantial bright luster within the borders and device recesses. (#7218)

Impressive Near-Mint 1892-S Dollar

- 3976 1892-S AU58 PCGS.** Production of Morgan dollars was subject to numerous outside factors: artificial silver purchases, the ebb and flow of miners' fortunes, and the like. One of the most surprising features of the 1892-S dollar and its production of 1.2 million pieces is how *regular* the strikings were: 100,000 coins a month, every month, no exceptions. Examples are accessible for a price up to the Choice AU level, but near-Mint pieces like this coin are genuinely elusive. It offers flashy luster with an effectively prooflike reverse and hints of gold-to-gray toning at the margins. The high points of the well struck devices show light but distinct rub. PCGS has certified 56 examples in the various Mint State grades (10/10). (#7218)
- 3977 1893-CC VF35 PCGS.** A luminous Choice VF coin with prominent lavender and rose aspects to the medium-gray luster. A small dig appears to the right of Liberty's nose. (#7222)
- 3978 1893-CC VF35 PCGS.** Flickers of canary-tinged luster grace generally gray fields. A well struck piece that has close to XF details, though it also shows a number of small digs in the portrait area. (#7222)

- 3979 1893-CC XF40 NGC.** Light golden overtones grace still-lustrous surfaces in pale silver. Minor but distinct wear on the high points with an assortment of abrasions from its time in circulation. (#7222)
- 3980 1893-CC—Improperly Cleaned—NGC Details. AU.** A lightly rubbed example that has retained considerable reflective luster despite a past cleaning. Numerous small abrasions and hairlines appear in the fields, while the portrait shows a few reed marks. (#7222)
- 3981 1893-CC AU50 PCGS.** A lightly circulated example of this popular and elusive final-year Carson City issue. Luster glimmers from the peripheries beneath the rich steel-gray and olive-gold toning. Marks are inconsequential save for an inconspicuous abrasion on the nose. (#7222)

Shining 1893-CC Dollar, MS63

- 3982 1893-CC MS63 PCGS.** Faint greenish-gold outer elements give way to pale silver at the shining centers. This is a Select 1893-CC dollar from the shortened final year of Morgan dollar production at that Mint, well struck overall with minor softness at the hair over Liberty's ear and a curving clash mark to the right of the eagle. (#7222)

Notable Near-Gem 1893-CC Morgan Dollar

- 3983 1893-CC MS64 PCGS.** A crisply detailed and immensely lustrous near-Gem that was struck from a twice-clashed (at least) reverse die. Mostly silver surfaces show splashes of milky and golden colors at the margins of a coin that is faintly patinated overall. PCGS has certified just 10 finer examples of this final Carson City Morgan dollar issue (10/10). (#7222)

Flashy MS62 1893-O Dollar

- 3984 1893-O MS62 PCGS.** With just 300,000 pieces produced, it is little wonder that this New Orleans issue is considered challenging in Mint State, though examples such as this MS62 are generally available for a price. This coin's advantage is its potent and semireflective field luster, though the lightly frosted cheek of Liberty shows a number of scrapes. (#7224)

Famous 1893-S Morgan Dollar Rarity

- 3985 1893-S Genuine PCGS.** The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, the piece has the details of a VF specimen that has been cleaned. Though hairlined under its patina, this moderately worn example has retoned nicely with pearl-gray interior color and deeper gold-to-violet elements at the margins. A readily collectible example of this famous key date.
- 3986 1893-S—Improperly Cleaned—NGC Details. VG.** The surfaces of this low-mintage, key date example are well worn, but much important detail remains intact. Both sides exhibit some roughness and unnatural color from the noted cleaning, but the allure of this sought-after icon is still strong.

**1893-S Morgan Dollar, VG10
Sought-After Key Date**

- 3987 1893-S VG10 PCGS. CAC.** The low-mintage king of the regular-issue Morgan dollar series, the 1893-S is on the want list of every Morgan dollar collector. The present coin displays even wear over all surfaces, with no major distractions, and much original detail remaining. The surfaces exhibit light gray patina, with wisps of champagne toning. (#7226)

VF Details 1893-S Morgan Dollar

- 3988 1893-S—Improperly Cleaned—NGC Details. VF.** Moderately worn like many examples of the 1893-S dollar in the marketplace, though this piece has the added complication of a past cleaning. Lightly hairlined with uniform luster, though light peach-gray retoning has softened the appearance. A collectible example of this important date. (#7226)

**Coveted 1893-S Morgan Dollar
A Choice XF Survivor**

- 3989 1893-S XF45 PCGS.** One of the most popular and most extensively certified Morgan dollar rarities, the 1893-S is available for a price in almost any circulated grade imaginable. The majority of such pieces grade VF or lower, however, and the price becomes stiff at the XF level and above, making an eye for quality important. While this softly struck example is distinctly worn in the centers and the gray-tinged fields show a number of wispy marks, the overall effect is remarkably similar to an AU coin. The wear is perhaps a trifle much for such a designation, with a few abrasions on Liberty's cheek precluding the next level; nonetheless, this is a highly desirable coin. (#7226)

- 3990 1894 VF20 ANACS.** A moderately worn example of the famously low-mintage Philadelphia issue. The lightly abraded portrait and eagle have gold-gray accents, while the rest of the piece has deep charcoal-blue patina. (#7228)

- 3991 1894—Improperly Cleaned—NGC Details. VF.** A deep pearl-gray rare date Philadelphia silver dollar that lacks any consequential bagmarks but displays horizontal hairlines on the portrait. (#7228)

- 3992 1894 VF30 NGC.** Moderately worn but with faint flickers of luster under light gray toning with rose and gold tints. Scattered abrasions with two scrapes behind Liberty's head forming an apparently incidental cross-shape. (#7228)

- 3993 1894—Improperly Cleaned—NGC Details. XF.** A still-luminous piece that has retoned gold-gray and violet from a past cleaning. Small digs appear on the portrait, yet the coin retains considerable overall eye appeal. (#7228)

- 3994 1894—Improperly Cleaned—NGC Details. XF.** Light but distinct wear is concentrated on the high points. Despite a past cleaning, the faintly retoned russet-silver surfaces retain glimpses of original luster close to the rims. Shallow scratches appear behind the eagle's head. (#7228)

- 3995 1894 AU55 PCGS.** Lightly gray-toned across still-lustrous surfaces with touches of yellow near the rims. Scattered wispy abrasions but solid eye appeal for this issue of just 110,000 business strikes. (#7228)

- 3996 1894 AU55 NGC.** Light gray luster remains strong, supplemented by richer coffee-brown and gold-gray hues that appear mainly at the margins. Briefly circulated but appealing for this low-mintage Philadelphia issue. (#7228)

**1894 Dollar, MS63
Even, Silver-White Surfaces**

- 3997 1894 MS63 NGC.** An attractive coin for the grade. The silver-white surfaces reveal relatively few abrasions. The strike is sharp in all areas. The only drawback to a higher grade is slightly dull luster. However, the eye appeal is strong and this would fit nicely into an Uncirculated set of Morgans. (#7228)

- 3998 1894-S MS63 PCGS.** Brightly lustrous with minimal patina and considerable reflectivity for a non-Prooflike piece. Considerable frost on lightly abraded devices adds to the contrast. (#7232)

- 3999 1895-O AU55 NGC.** Hints of green-gold to orange color appear at the margins, and the fields retain considerable luster. Just a touch of rub crosses the highest parts of the devices. A small cut is noted below Liberty's eye. (#7236)

Coveted MS62 1895-O Morgan Dollar

- 4000 1895-O MS62 PCGS.** The 1895-O is a low-mintage issue that is popular regardless of grade. In well-worn condition, there are sufficient examples to meet most of the demand, and even in the better circulated grades, coins are usually available for a price. By the MS62 level, however, the 1895-O is genuinely scarce, and anything finer is a condition rarity. This is an attractive coin for the MS62 level, lightly gold-toned with uncommonly strong luster and a decent strike. While a few long abrasions are present in Liberty's mouth area and wispy abrasions populate gold-touched fields, this is a coin the vast majority of Morgan dollar collectors would be proud to own. Population: 39 in 62, 36 finer (10/10). (#7236)
-

- 4001 1896-O MS62 PCGS.** The 1896-O Morgan dollar is the most difficult coin of the series to locate in Gem condition. The present coin is sharply detailed, with ample mint luster. A scattering of minor abrasions explains the grade, but does little to detract from this coin's appeal. (#7242)
- 4002 1896-S MS62 NGC.** This better date silver dollar has potent luster and light chestnut toning. The centers lack an absolute impression, but the strike is otherwise crisp, and marks are surprisingly few and minor for the MS62 level. (#7244)
-

1896-S Morgan Dollar, MS64

- 4003 1896-S MS64 PCGS. CAC.** The 1896-S Morgan dollar was produced in large numbers, but high quality examples are scarce today. The present coin is a well struck Choice specimen, with a touch of softness on the hair above the ear. The surfaces display wisps of gold and gray toning combined with excellent mint luster. Q. David Bowers considers MS64 the Optimal Collecting Grade. (#7244)
-

Prooflike Premium Gem 1897 Dollar

- 4004 1897 MS66 Prooflike PCGS.** A small gold and steel-blue toning spot is visible on the reverse rim of this otherwise essentially brilliant prooflike silver dollar. This example is tied for the finest of the prooflike pieces certified by PCGS, with a limited population of just 11 coins total (10/10). It is sharply struck with great mirrors and exceptional eye appeal. (#7247)
- 4005 1897-O MS61 NGC.** Softly struck as usual through the centers but pleasingly lustrous and unworn. A thin skin of silver-gray patina turns to milky gold close to the rims. (#7248)
- 4006 1897-O MS61 PCGS. CAC.** Softly frosted luster with a pearl-gray appearance on the obverse and more gold-green elements on the reverse. Scattered wispy abrasions in the fields and slide marks on the cheek contribute to the grade. (#7248)

4007 1897-O MS62 NGC. The 1897-O Morgan dollar was not a well-produced issue, and high grade examples are both rare and expensive. The present coin is a pleasing, well struck MS62 specimen, with frosty mint luster and few abrasions for the grade. (#7248)

4008 1897-S MS64 Deep Mirror Prooflike PCGS. Great mirrors with moderate field-to-device contrast. A few small frost disturbances appear on Liberty's cheek, but aside from minor cloudy toning in spots, the fields are beautiful and suggestive of an even higher grade. PCGS has certified 40 finer Deep Mirror Prooflike pieces (10/10). *From The Sandy Beach Collection.* (#97251)

**Incredible 1898 Morgan Silver Dollar, MS67
None Certified Finer**

4009 1898 MS67 NGC. NGC has graded 16 of these as MS67, and one as MS67 Prooflike. Similarly, PCGS has certified 28 in MS67, and one in MS67 DMPL. Neither service as certified any in MS68 or finer grades, so the present piece must be considered one of the finest known, an incredible Superb Gem. Both sides are fully brilliant and untoned, with frosty mint surfaces and bold design motifs. Census: 16 in 67, 0 finer (10/10). (#7252)

Gorgeous MS67 1898 Dollar

4010 1898 MS67 PCGS. Ex: Gold River/NY City. Faintly frosted across strongly struck devices with distinct cartwheels in the lustrous and carefully preserved fields. A lightly patinated beauty from late in the Philadelphia series that is one of just 28 Superb Gems certified by PCGS with none finer (10/10). (#7252)

4011 1898-O MS67 NGC. CAC. A magnificent Superb Gem Morgan dollar, with a razor-sharp strike and vibrant mint luster. The completely brilliant surfaces are virtually pristine, with incredible eye appeal. Only one coin has been certified in higher numeric grade at NGC (10/10). (#7254)

4012 1898-O MS67 PCGS. CAC. Tied for finest certified by PCGS (10/10) and a beautiful Superb Gem, frosty silver with gold-gray peripheral accents. Smooth surfaces show minor softness at the hair over Liberty's ear. (#7254)

4013 1898-S MS65 PCGS. CAC. Pleasingly detailed, especially on the eagle's breast, which shows great definition on the tiny feathers there. Bright silver luster has hints of blue and a few speckles of cinnamon color, most visibly at 3 o'clock on the obverse rim. PCGS has graded 69 finer examples (10/10). (#7256)

4014 1898-S MS65 PCGS. Bright silver luster dominates each side, while light tan-gold color hugs the margins, especially those of the reverse. Generally well struck with only a few minute marks. PCGS has graded 69 coins finer (10/10). (#7256)

Lustrous MS66 1898-S Dollar

4015 1898-S MS66 PCGS. This Premium Gem example of the 1898-S is uncommonly lustrous beneath a light layer of silver-gray patina that is more prominent on the obverse. Mildly reflective with a hint of contrast, thanks to a delicate layer of frost on well-defined devices, and an all-around attractive coin. PCGS has graded just three finer pieces (10/10). (#7256)

4016 1899 MS65 Prooflike PCGS. CAC. The sharply detailed, frosty devices of this attractive Gem are spotlighted by gleaming, reflective fields. Hints of light gold toning can be detected, adding to the considerable eye appeal. Population: 71 in 65 Prooflike, 7 finer (10/10). *From The Sandy Beach Collection.* (#7259)

4017 1899-O MS67 NGC. A boldly impressed Superb Gem with powerful cartwheel luster. Mainly silver-white but with minor elements of gold-to-orange patina close to the rims. (#7260)

4018 1899-S MS65 PCGS. A flashy Gem that is essentially silver-white with only faint suggestions of gray toning in the fields. The eagle is well-defined, though Liberty's portrait shows more typical softness at the hair over the ear. (#7262)

MS66 1899-S Dollar, Scarce So Fine

4019 1899-S MS66 PCGS. CAC. While the 1899-S is scarce in MS66, it is available on the market with a degree of regularity. Not so finer examples, of which just eight have been certified by PCGS (10/10), creating plenty of incentive for even Registry collectors to pursue a Premium Gem like this. Light, dappled gold-to-gray peripheral toning yields to near-brilliance in the centers. (#7262)

- 4020 1900-O/CC MS64 PCGS. CAC. VAM-8.** A Top 100 Variety. A ghostly undermintmark from the defunct Carson City Mint appears beneath an "O" for a New Orleans facility on its way out. A strongly lustrous near-Gem that has faint gold-green toning at the margins. (#7268)
- 4021 1900-O/CC MS65 PCGS. VAM-8.** A Top 100 Variety. A lovely Gem with all the usual diagnostics for this overmintmarked die pair. Well-defined with just a hint of peripheral gold color over lustrous silver surfaces. (#7268)
- 4022 1900-O/CC MS65 PCGS. VAM-8.** A Top 100 Variety. The smooth, watery fields are untuned, and nearly pristine. There is little field/device contrast noted on either side. Just a few small marks appear on the cheek, all of them consistent with the grade assigned. A great Gem. (#7268)
- 4023 1901 MS60 NGC.** Impressively lustrous with no trace of wear. Moderate to heavy abrasions appear on surfaces that are largely pale silver-gray but also show elements of peach and salmon. (#7272)

Gorgeous 1902-S Morgan Dollar, MS65

- 4024 1902-S MS65 PCGS.** The MS65 grade is called Gem in numismatic terms, and the present piece is the very definition of the word. It is a true beauty with bold design features, frosty and brilliant mint luster, and delicate peripheral golden toning. The few trivial marks on each side are the only limiting factor that prevented an even higher grade. PCGS has only certified 34 finer examples of this scarce Morgan dollar issue (10/10). (#7282)

1902-S Morgan Dollar, MS65 Strong Mint Luster

- 4025 1902-S MS65 PCGS.** Ex: Mike Casper Collection, Part II. The 1902-S Morgan dollar is an available date, produced in fairly large numbers, but seldom encountered at the Gem level. The present coin is a well struck example, showing only the typical softness on Liberty's hair above the ear and on the eagle's breast. The surfaces display vibrant mint luster, and a shallow abrasion by Liberty's chin is the only mark of note. Currently, only 34 coins have been certified in higher numeric grades at PCGS (10/10). (#7282)

- 4026 1903 MS67 NGC.** A splendid Superb Gem Morgan dollar, with sharply detailed design elements, brilliant surfaces, and vibrant mint luster. Only two coins have been certified in higher numeric grades at NGC (10/10). (#7284)

Elusive Gem 1903-S Morgan Dollar

- 4027 1903-S MS65 PCGS.** The 1903-S is an elusive date in the Morgan dollar series, and examples in Gem condition are scarce. The present coin displays sharp striking details on all design elements, and vibrant mint luster on both sides. Only a few inconsequential marks are evident on the attractive, brilliant surfaces. Only 40 coins have been certified in higher numeric grades at PCGS (10/10). (#7288)

Impressive Gem 1903-S Morgan Dollar

- 4028 1903-S MS65 NGC.** A challenging issue in the Morgan dollar series, one that is in demand in all grades. This superlative Gem has much to recommend it: a bold strike, brilliant lustrous fields, nearly mark-free devices, and generous eye appeal. Narrow patches of copper-gold and violet-gray patina at the lower reverse rim grace otherwise near-brilliant surfaces. (#7288)

Lovely 1904 Morgan Dollar, MS65

- 4029 1904 MS65 PCGS.** the 1904 Morgan dollar is a scarce issue that is conditionally rare in Gem or finer grades. This lovely piece is an excellent representative of the issue that is destined for a high grade Registry set of the series. It is fully lustrous with brilliant silver surfaces, satin luster, and sharp design elements, enhanced with light golden toning. PCGS has only certified 14 numerically finer pieces (10/10). (#7290)

Gem 1904 Dollar
Seldom-Encountered, High-Quality Example

- 4030 1904 MS65 PCGS.** Ex: Naples Collection, Part II. The large mintage of nearly 2.8 million Morgan dollars in 1904 was struck with low production values, and high-quality coins are difficult to locate today. It was intended to be the last year of the denomination, but the design was resurrected for a one-year stint in 1921. The present coin is a lustrous, well struck Gem, with bright luster and strong visual appeal. Only 14 coins have been certified in higher numeric grades at PCGS (10/10). (#7290)

1904-S Dollar, MS63
Brilliant and Sharply Struck

- 4031 1904-S MS63 PCGS.** The final few San Francisco Morgan dollars are challenging in Mint State, and the 1904-S can be difficult to locate at the MS63 level. This brilliant example is highly lustrous with sharp design definition. The obverse has a number of tiny abrasions, but the reverse is remarkably clean for the grade. (#7294)
- 4032 1921-D MS66+ NGC. CAC.** Frosty and flashy, a distinctive Premium Gem example of this sole D-mint Morgan dollar issue. Two startling but ultimately attractive streaks of bright "die-burn" luster descend from the AT in STATES to the eagle's wing below. (#7298)
- 4033 1921-S MS65 NGC. CAC.** Strongly lustrous on the obverse, though the reverse has a few of the natural disturbances often seen on the 1921 issues. Well struck for the time with light gold-green influences on pale silver surfaces that easily make Gem quality. (#7300)

Premium Gem 1921-S Morgan Dollar
None Certified Finer at PCGS

- 4034 1921-S MS66 PCGS. CAC.** The 1921-S Morgan dollar was produced in staggering numbers, but only a few examples can match the surpassing quality of the present coin. Light gold and blue-steel toning enlivens the pristine surfaces, with most of the color on the obverse. Mint luster is full and satiny, under the toning, and the design elements are sharply rendered throughout. Population: 27 in 66, 0 finer (10/10). (#7300)

PROOF MORGAN DOLLARS

1880 Morgan Dollar, PR67+ Cameo
Only Coin Certified in this Grade at NGC

- 4035 1880 PR67+ Cameo NGC.** A generous mintage of 1,355 proof Morgan dollars was accomplished in 1880, with most examples sold as part of proof sets of the year. The popularity of proof sets was probably due to demand for the Trade dollar, which was the object of much speculation in 1880. Many proof Morgan dollars have been cleaned or otherwise impaired over the years, but a number of elite, high-grade pieces have survived, including the coin offered here. This specimen is a spectacular Superb Gem, with sharply struck, frosty devices, and deeply mirrored, brilliant fields. The stunning field-device contrast on this piece has culminated in the Cameo designation. This coin is the only example certified in PR67+ Cameo by NGC (10/10). (#87315)

Incredible 1890 Morgan Dollar, PR67+ Cameo

4036 1890 PR67+ Cameo NGC. This black-and-white Cameo proof is a borderline Ultra Cameo example with incredible silver surfaces and no evidence of toning on either side. The NGC Plus designation clearly points to its exceptional quality. Both sides have fully and deeply mirrored fields that serve to frame the frosty, highly lustrous devices.

The original mintage of 590 coins was the result of mediocre workmanship, with most survivors having little contrast, and many having a flat strike. The present piece is a wonderful exception on both counts, and is one of the finer surviving specimens. Census: 1 in 67+ Cameo, 4 finer (10/10). (#87325)

*Silver dollar models by
George T. Morgan*

Magnificent PR68 Ultra Cameo 1895 Dollar
Among the Finest Survivors Imaginable

4037 1895 PR68 Ultra Cameo NGC. Were this magnificent PR68 Ultra Cameo specimen of another date, 1896 perhaps, it would “merely” be one of the finest proof Morgan dollars known. As an 1895, though, it becomes one of the half-dozen most desirable survivors from one of the half-dozen most desirable dates in the series. Out of 880 proofs struck, just a half-dozen coins have been graded PR68 or finer with the Ultra Cameo or Deep Cameo contrast modifier, as of (10/10): four PR68 Ultra Cameos at NGC, one PR68 Deep Cameo at PCGS, and one PR69 Ultra Cameo at NGC at the top of the list.

As the reference books are sure to state, only proofs have been verified for this issue. While *verified* is the appropriate term, as there are many rumors of circulation-strike survivors and a few outside chances (such as an assay coin escaping destruction), research in the last few years by Roger W. Burdette and other scholars has convincingly slammed the door on most theories. One of the 880 proofs, then, is the collector’s only hope of completing the date set.

The 1895 proof issue is known to “come nice” like other dates nearby, and if not for the matter of the business strike, the 1895 would likely be known as an ideal type issue for the series. This specimen shows off how gorgeous examples can be, as its deeply reflective mirrors and thickly frosted devices are beautiful and perfect opposites. Just a hint of golden color touches the reverse rims, and only minor milky patina appears in the space under Liberty’s chin. Exquisitely preserved, as expected of the grade, and simply a marvelous coin. (#97330)

Gleaming Superb Gem Proof 1899 Dollar

- 4038 1899 PR67 NGC.** While the obverse contrast is borderline on this Superb Gem, the reverse alone would be deserving of a Cameo designation. Boldly mirrored and minimally toned silver interiors contrast to the deep gold and claret colors that stick to the rims. A small patch of die polishing lines on the lower jaw has no impact on the technical grade, though the space above the W in WE on the reverse shows a tiny point of contact. All in all, an ideal selection from this issue of 846 pieces that would fit well in most high-end collections and is particularly suited to reverse-up display. Census: 11 in 67, 4 finer (10/10). (#7334)

Lovely 1899 Morgan Dollar, PR63 Cameo

- 4039 1899 PR63 Cameo PCGS. CAC.** This lovely proof Morgan has gold and iridescent toning over most of the obverse, with lighter peripheral gold around a brilliant center on the reverse. A few trivial hairlines prevent a higher grade, but the eye appeal suggests a finer coin. Population: 5 in 63 Cameo, 22 finer (10/10). (#87334)

Select Proof 1901 Morgan Dollar

- 4040 1901 PR63 PCGS.** In addition to its naturally challenging nature, thanks to a mintage of just 813 proofs, the 1901 enjoys a mild increase in demand relative to its peers due to the challenge of finding high-end business strikes of the same date. This is a strongly reflective example, lightly hairlined in pearl-gray centers with deeper lavender, violet, and gold-orange elements at the margins. (#7336)
- 4041 1903 Genuine PCGS. Proof.** The PCGS number ending in .91 suggests Questionable Toning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this piece has the details of a PR60 specimen that has questionable toning. Strongly struck with great mirrors, though the green-gold and electric-blue patina blanketing each side is of dubious origin.

PEACE DOLLARS

- 4042 1921 MS65 PCGS. CAC.** Softly defined as usual at the hair over Liberty's ear, though peripheral elements are slightly above-average. Distinctively toned with patches of deep charcoal in addition to areas of lighter gold-to-orange and pale silver-blue. (#7356)
- 4043 1921 MS65 NGC.** Largely silver-gray interiors with splashes of gold that grow stronger and more orange near the rims. Softly defined on Liberty's central hair, as often seen, but pleasing overall. (#7356)
- 4044 1921 MS65 PCGS. CAC.** Strong luster with golden peripheral accents surrounding pearl-gray centers. This Gem is appealing, if softly struck in the centers like many of its fellows. (#7356)

Exceptional 1921 Peace Dollar, MS66

- 4045 1921 MS66 NGC.** The entire mintage of just over 1 million 1921 Peace dollars was accomplished during the last four days of the year, with the first coin minted at 8:30 A.M., on December 28. Public distribution began a few days later on January 4, 1922, at the New York Sub-Treasury. Like most examples of the High Relief design, this piece lacks full definition at the centers, although it is sharper than usual. The surfaces are brilliant with frosty mint luster and only a few trivial blemishes. It is an exceptional example with only six finer coins certified by NGC (10/10). (#7356)

- 4046 1922-S MS65 ANACS.** The 1922-S Peace dollar is scarce in Gem condition, and quite rare in any higher grade. The present coin is a spectacular Gem, with a razor-sharp strike and vibrant mint luster. (#7359)
- 4047 1922-S MS65 PCGS.** Great quality for the grade. This Gem Peace dollar is well struck with few abrasions. The surfaces emit a soft radiance and the color is mostly white with the reverse revealing a light rose-violet hue. Highly elusive any finer, with just six such pieces certified by PCGS (10/10). (#7359)
- 4048 1924-S MS64 PCGS.** Dappled almond-gold endows lustrous and unblemished surfaces. A crisply struck near-Gem of this conditionally challenging San Francisco issue, which is plentiful in circulated grades but becomes a key date in Gem or finer. (#7364)
- 4049 1926-S MS65+ PCGS. CAC.** A blush of light golden toning adorns the eagle, but the remainder of this lustrous high grade Peace dollar is brilliant. A pleasing example of this conditionally challenging issue. Population: 6 in 65+, 63 finer (10/10). (#7369)
- 4050 1927-S MS64 PCGS.** Softly frosted luster with light golden overtones across pale gray surfaces. A well struck near-Gem that shows just a few wispy but grade-defining abrasions. PCGS has certified 63 finer pieces (10/10). (#7372)
- 4051 1928 MS64 NGC. CAC.** Strikingly sharp design definition through the centers and attractive luster. This near-Gem is toned pale silver-gray through the centers and shows varying gold to orange and violet elements near the rims. NGC has graded 84 finer examples (10/10). (#7373)
- 4052 1928 MS64 PCGS.** A softly frosted near-Gem example of this key Peace dollar issue. Soft silver-gray interiors yield to gold and charcoal-gray at parts of the margins. Well struck for the type. (#7373)
- 4053 1928 MS64 PCGS.** Medium tan-gold toning graces this coruscating and well struck Choice Peace dollar. The fields are remarkably unabraded. Regarded as the key to the series in circulated grades, although in MS64 the 1928 is exceeded in scarcity by the 1934-S and 1924-S. (#7373)
- 4054 1928 MS64 NGC.** Faint chestnut toning visits lustrous and splendidly smooth surfaces. A boldly struck and pleasing example of the famously low mintage issue. (#7373)

Lustrous 1934-S Peace Dollar, MS64

- 4055 1934-S MS64 PCGS. CAC.** Approaching the Gem grade level, this 1934-S Peace dollar is a wonderful representative of the scarce issue, surviving from a mintage of just 1,011,000 coins, barely exceeding that of the 1921 High Relief Peace dollar. This piece has an excellent strike and frosty silver luster, both characteristics usually associated with the '34-S Peace dollar. It is highly desirable in MS64, and only occasionally seen any finer. (#7377)

EISENHOWER DOLLARS

Type Two 1972 Eisenhower Dollar, MS65

- 4056 1972 Type Two MS65 PCGS.** An even veil of pale golden patina drapes the shining surfaces of this series-key Type Two 1972 dollar, distinguished by a high-relief design with indistinct islands on the Earth on the reverse. While the obverse is clean for the grade, a single abrasion is noted at the eagle's neck. Population: 45 in 65, 5 finer (10/10). (#97409)

1972 Eisenhower Dollar, MS65 Scarce Type Two Key

- 4057 1972 Type Two MS65 PCGS.** High relief Type Two dies were used to produce an unknown, but undoubtedly small, number of clad Eisenhower dollars in 1972. The issue is the acknowledged key to the series, and can be distinguished by the weakly defined islands off the coast of Florida on the globe. This attractive specimen is sharply struck, with lustrous surfaces under light gold and lavender patina. Population: 45 in 65, 5 finer (10/10). (#97409)

Near-Perfect 1972-S Silver Eisenhower Dollar, MS69

- 4058 1972-S Silver MS69 PCGS.** Virtual perfection is achieved through near-perfect surfaces, brilliant and frosty luster, and needle-sharp design features. A hint of gold toning appears on the bright silver surfaces of this imposing specimen. Population: 13 in 69, 0 finer (10/10). (#7411)

PROOF EISENHOWER DOLLARS

- 4059** 1972-S Silver PR70 Deep Cameo PCGS. A technically perfect "box Ike" with absolute contrast. A few small suggestions of milky color are present at the margins. Population: 32 in 70 Deep Cameo (10/10). (#97429)

Amazing 1976-S Type One Dollar, PR70 Deep Cameo

- 4060** 1976-S Silver, Type One PR70 Deep Cameo PCGS. The Type One design 1976-S Eisenhower dollars appeared in the 1975 proof sets, while Type Two design coins appeared in the 1976 proof sets. This piece is perfect, with lustrous white devices and deeply mirrored fields. It is entirely brilliant and untuned. Population: 16 in 70 Deep Cameo (10/10). (#97436)

Perfect 1978-S Dollar, PR70 Deep Cameo

- 4061** 1978-S PR70 Deep Cameo PCGS. In addition to its numerical grade, this piece is a deep cameo proof with exceptional contrast. As if that was not enough, it also exhibits delightful light gold toning on each side to heighten its aesthetic desirability. Here is a perfect proof Eisenhower dollar for the connoisseur. Population: 20 in 70 Deep Cameo (10/10). (#97438)

SUSAN B. ANTHONY DOLLAR

- 4062** 1980-P MS68 NGC. Light olive-gold toning has settled over much of this lustrous 1980-P SBA dollar. Well-defined and carefully preserved to a point that transcends even Superb Gem status. Census: 19 in 68, 0 finer (10/10). (#9574)

PRESIDENTIAL DOLLARS

- 4063** (2007) Jefferson, Missing Edge Lettering, Satin Finish MS67 PCGS. A lightly patinated Superb Gem of the Jefferson issue with blank edge. Mint of origin unknown, though the Jefferson pieces were struck only in 2007, so the date is fixed. (#390499)

- 4064** (2007) Madison, Missing Edge Lettering, Satin Finish MS65 NGC. A satin-finished Gem with small cloudy patches in the fields and a blank rim. The Madison dollars were struck in 2007, though whether this coin hails from Philadelphia or Denver is unknowable now. (#396507)

- 4065** (2008) Van Buren, Missing Edge Lettering, Satin Finish MS68 NGC. Aside from minor peripheral spotting, the pale yellow-gold surfaces are practically perfect to the unaided eye. The coin's major imperfection, the missing edge lettering, is in fact its greatest asset. Mint of origin indeterminate. (#407371)

Missing Edge Lettering 2009 Harrison Dollar, MS69 SMS

- 4066** (2009) Harrison, Missing Edge Lettering, Satin Finish MS69 NGC. The surface quality of this Harrison dollar, pale yellow with distinct peach overtones through the fields, is virtually perfect. In the new-format NGC holder, the missing edge lettering is easy to see. Struck in 2009, the only year of the William Henry Harrison design, though the mint of origin is unknown. (#407371)

- 4067** (2009) Tyler, Missing Edge Lettering, Satin Finish MS67 NGC. A bright example with areas of light cloudiness in the fields. Generally smooth surfaces are of Superb Gem quality, while the edge is equally smooth, creating the coin's error value. Dated by the obverse, mint of origin unknown. (#407383)

COMMEMORATIVE SILVER

- 4068** 1893 Isabella Quarter MS64 PCGS. Peach and gold overtones against medium-gray surfaces. Plenty lustrous and well struck for the type, a near-Gem that is housed in a first-generation holder. (#9220)

1900 Lafayette Dollar, MS64 First Silver Dollar Commemorative

- 4069** 1900 Lafayette Dollar MS64 PCGS. DuVall 1-B. The 1900 Lafayette memorial dollar is the first commemorative silver dollar issue, with a distribution figure of 36,026 pieces. Many examples were sold to the general public and show evidence of handling or circulation. The present coin is a delightful Choice specimen, with sharply defined design elements, brilliant surfaces, and strong mint luster. (#9222)

Appealing 1900 Lafayette Dollar, MS65

- 4070** 1900 Lafayette Dollar MS65 PCGS. CAC. DuVall 2-C. A lovely representative of our first American commemorative silver dollar, this example displays frosty silver luster within a frame of delicate gold and iridescent toning on both sides. The design motifs are boldly detailed, and the eye appeal is grand. (#9222)

Elusive MS67 1939-D Arkansas Half

- 4071** 1939-D Arkansas MS67 NGC. Light gold-orange and silver-gray luster overall with a few streaks of deeper brown at the left obverse. The 1939-D Arkansas half dollar rivals the mintmarked 1935/1934 Boone halves for the lowest classic silver commemorative mintage, and Superb Gem examples are condition rarities. Census: 8 in 67, 0 finer (10/10). (#9250)

- 4072** 1939-S Arkansas MS66 PCGS. Softly frosted with a pale silver-gray obverse and warm gold-to-orange overtones on the reverse. A great near-Gem example from this final-year Arkansas issue with an absurdly low mintage of just 2,105 pieces. (#9251)

- 4073** 1939-S Arkansas MS66 NGC. The 1939-S Arkansas Centennial half dollar boasts a low distribution figure of 2,105 pieces, and examples in Premium Gem condition are rare today. The present coin is a delightful specimen, with sharply detailed devices, lustrous surfaces, and iridescent lavender and golden-brown patina. Census: 51 in 66, 2 finer (10/10). (#9251)

- 4074** 1935/34-S Boone MS66 PCGS. CAC. By a single assay coin, the 1935/34-S Boone half has the second-lowest mintage of a classic silver commemorative issue, after its D-mint counterpart. This is a lustrous Premium Gem with silver toning over the centers that deepens to gold close to the rims. (#9264)

- 4075** 1936-S Cincinnati MS66 NGC. The 1936-S Cincinnati commemorative half dollar boasts a low mintage of 5,006 pieces, and examples in Premium Gem condition are very scarce today. The present coin is a well struck example, with satiny mint luster, and faint hints of gold toning. Census: 17 in 66, 2 finer (10/10). (#9285)

- 4076** 1936-D Columbia MS67 PCGS. CAC. The 1936-D Columbia half dollar boasts a tiny distribution figure of 8,009 pieces. Superb Gem specimens are scarce, and only 16 coins have been certified in higher numeric grades at PCGS (10/10). The present coin is sharply detailed, with subtle mint luster, under pale gold and ice-blue toning. (#9292)

- 4077** 1936-D Columbia MS67+ NGC. CAC. Medium golden-gray patina confirms the originality of this highly lustrous and essentially immaculate Superb Gem. An outstanding example of this popular Southern-themed issue. (#9292)

Colorful MS67 1892 Columbian Half

- 4078** 1892 Columbian MS67 NGC. The first American silver commemorative and the fountainhead of the classic series, offered here as an incredible Superb Gem with stunning luster and patina. Green-gold outer toning gives way to lush blue at the interiors. Neither NGC nor PCGS has certified an MS68 representative (10/10). (#9296)

Gorgeous Grant With Star Half Dollar, MS66

- 4079** 1922 Grant With Star MS66 NGC. The popular and challenging With Star subtype of the Grant half dollar, which has a mintage similar to the With Star Grant gold one dollar but enjoys greater popularity and production which is much smaller relative to its "plain" counterpart. Softly struck but delightfully lustrous with rich gold-to-orange luster on the obverse that turns dusky on the reverse. Census: 42 in 66, 7 finer (10/10). (#9307)

- 4080** 1928 Hawaiian—Improperly Cleaned—NGC Details. AU. A lightly worn Hawaiian half with luster too uniform to be natural. Partly retoned peach-orange on the obverse and dappled olive, sage, and gray on the reverse. (#9309)

Lovely 1928 Hawaiian Half, MS62

- 4081** 1928 Hawaiian MS62 PCGS. CAC. Both sides of this Mint State Hawaiian half dollar have gold, blue, and iridescent toning with frosty underlying luster. It is a lovely example of the scarce commemorative issue, one of a handful of commemorative types with a mintage of 10,000 or fewer coins. (#9309)

- 4082 1925 Lexington MS66+ NGC.** Light gold and blue overtones grace pale gray surfaces on this Lexington Premium Gem. Well struck for the design, if a trifle soft on the left side of the building. NGC has graded 12 numerically finer pieces (10/10).(#9318)
- 4083 1921 Missouri MS64 PCGS.** A pale silver piece that has bright yet slightly subdued luster. Softly struck in the usual places but a readily collectible near-Gem example of this challenging classic commemorative issue.(#9330)
- 4084 1921 Missouri MS64 PCGS.** Deep golden-brown over much of the obverse and the outer reverse. More lavender-gray color crosses the central reverse, which shows a typical strike for the issue.(#9330)
- 4085 1921 Missouri MS65 PCGS. CAC.** An elegant survivor with rich, if diffuse luster through toning that ranges from gold and blue at the margins to lavender-magenta and violet-gray in the interiors. Housed in a green label holder. PCGS has graded 29 finer pieces (10/10).(#9330)

**Gem 1921 Missouri Half Dollar
Distinctive 2x4 Design**

- 4086 1921 Missouri 2x4 MS65 NGC. CAC.** The sponsors of the 1921 Missouri half dollar placed the distinctive numerals 2 and 4 on either side of a star on 9,000 examples of this popular commemorative to increase numismatic interest in the pieces. The numbers indicate Missouri's status as the 24th state admitted to the Union. The present coin is a well struck Gem, with bright mint luster, and pleasing gray and lavender patina. (#9331)
- 4087 1923-S Monroe MS65 NGC.** An attractive Gem with softly frosted luster. The obverse has prominent yellow at the center with dappled sage and silver border shadings, while the reverse is near-brilliant.(#9333)
- 4088 1926 Oregon MS67 PCGS.** Powder-blue border toning gives way to tan-and-gray centers on this Oregon Superb Gem. Well struck for the date, though the bow hand shows typical softness. Population: 57 in 67, 2 finer (10/10).(#9340)
- 4089 1928 Oregon MS67 PCGS. CAC.** The obverse is mostly a light russet tone with a gentle blush of fluorescent green and violet coloration at the upper right periphery. The reverse has light copper color. An amply lustrous Superb Gem in a green label holder.(#9342)
- 4090 1928 Oregon MS67+ PCGS.** Carefully preserved even by Superb Gem standards. Warm gold-orange to pink-rose color covers much of the obverse, while the reverse shows more silver. PCGS has graded only one numerically finer example (10/10).
From The South Pass Collection. (#9342)
- 4091 1933-D Oregon MS67 PCGS.** The 1933-D Oregon Trail half dollar features one of the most beautiful designs of the commemorative series, and boasts a low distribution total of 5,008 pieces. The present coin is an exquisite Superb Gem, with sharply detailed devices, bright mint luster, and attractive ice-blue and golden-brown patina. Population: 70 in 67, 0 finer (10/10).
From The South Pass Collection. (#9343)

- 4092 1939 Oregon MS67 NGC.** A bright silver Superb Gem of this final-year Oregon issue with little toning. Excellent design definition and eye appeal. NGC has graded just three numerically finer pieces (10/10).(#9352)
- 4093 1939 Oregon MS67 PCGS.** Vivid shades of ice-blue, golden-brown, and lavender patina adorn the pleasing surfaces of this sharply struck Superb Gem. The 1939 Oregon Trail commemorative half dollar is a favorite of collectors, with a tiny distribution figure of 3,004 pieces. Population: 77 in 67, 4 finer (10/10).
From The South Pass Collection. (#9352)
- 4094 1939-D Oregon MS67 NGC.** Light gold-to-apricot colors at the margins with lustrous silver-gray centers. A Superb Gem from this final-year Oregon issue of just 3,004 pieces, assay coins included. (#9353)
- 4095 1939-D Oregon MS67 PCGS.** The year 1939 saw the final issue of Oregon Trail commemorative half dollars, and the 1939-D boasts a tiny distribution figure of 3,004 pieces. The present coin is a magnificent Superb Gem, with a razor-sharp strike and vivid greenish-gold and lavender toning. Vibrant mint luster adds to the stunning eye appeal.
From The South Pass Collection. (#9353)
- 4096 1939-S Oregon MS67 NGC.** Broad silver luster is minimally toned save for faint echoes of blue. This S-mint is the last of the Oregon commemorative series, the highest-mintage of the 1939 issues by a single assay coin.(#9354)
- 4097 1915-S Panama-Pacific MS65 PCGS. CAC.** Rich blue-violet toning covers much of this lustrous Gem, while the margins show flickers of reddish-orange fire. Well struck and pleasingly preserved, an all-around rewarding coin.(#9357)

Amazing 1915-S Panama-Pacific Half, MS66

- 4098 1915-S Panama-Pacific MS66 NGC.** An amazing example with satin luster that is mostly brilliant white, framed by a trace of champagne toning near the borders on each side. The design elements are well detailed and the surfaces are nearly perfect with only the slightest imperfections. Only 52 finer examples of the issue are currently held by NGC (10/10). (#9357)

Magnificent MS67 1920 Pilgrim Half

- 4099 1920 Pilgrim MS67 PCGS.** Bold toning is the most prominent attribute of this Superb Gem Pilgrim half. Silver-gray dominates the lustrous interior obverse and appears in windows on the reverse, while bold gold, orange, and reddish-brown tones consume the rest of each side. Population: 32 in 67, 0 finer (10/10).
From The South Pass Collection. (#9359)

- 4100 1936 Rhode Island MS67 NGC.** Light gold and ice-blue patina enhances the surfaces of this sharply struck commemorative. Superb Gem 1936 Rhode Island half dollars are quite rare, and no examples have been certified in higher numeric grades at NGC or PCGS (10/10).(#9363)
- 4101 1936 Robinson MS67 NGC.** Lustrous silver at the interiors with gold-to-orange color at the margins and deep violet visible at the rims (and on the edges, thanks to the holder design). A pleasing Superb Gem, tied for numerically finest in the NGC *Census Report* (10/10).(#9369)
- 4102 1935 Spanish Trail MS66 PCGS.** The lustrous gray surfaces display whispers of magenta and greenish-gold around the peripheries, and the design elements are sharply impressed. A well-preserved piece that has just a few stray marks and die striations. (#9376)
- 4103 1925 Stone Mountain MS67 NGC.** Peach, gold, and pink overtones are prominent on this immensely lustrous Superb Gem. Well-defined with dynamic visual appeal for an issue rarely seen any better. (#9378)

Lovely MS68 1925 Stone Mountain Half

- 4104 1925 Stone Mountain MS68 NGC.** Rich, dusky colors swarm the outer zones on this exquisitely preserved Stone Mountain half, with gold, orange, and rose shadings predominant. Small windows of dove-gray are present at the centers as well. Not only one of the best-preserved Stone Mountain halves known, but also one of the most beautiful. (#9378)
- 4105 1936 Texas MS67 PCGS.** Light blue and gold toning drapes each side of this Superb Gem charmer. Hints of rose color are also present away from the well struck devices. PCGS has graded six numerically finer examples (10/10).(#9386)

Magnificent MS68 1936 Texas Half

- 4106 1936 Texas MS68 NGC.** A magnificently preserved example of this third-year Texas commemorative issue, one of 8,911 pieces struck. Dappled amber-green and silver-gray toning covers the obverse, while on the reverse, the former color appears mostly at the upper rim, along with olive. Well struck with lustrous and exquisitely preserved surfaces. Census: 4 in 68, 1 finer (10/10). (#9386)
- 4107 1927 Vermont MS66+ NGC.** A gorgeous coin that straddles the line between Premium Gem and Superb. Silver centers have creamy luster and a measure of peripheral golden color. NGC has graded 17 numerically finer examples (10/10).(#9401)

- 4108 1951-S Booker T. Washington MS67 NGC.** The 1951-S Booker T. Washington commemorative half dollar enjoyed a final distribution total of 7,004 pieces. The present coin is a spectacular Superb Gem, with sharply defined devices and vibrant mint luster. The brilliant centers yield to dark gold and amber toning at the rims. Census: 48 in 67, 0 finer (10/10).(#9426)

COMMEMORATIVE GOLD

- 4109 1903 Louisiana Purchase/Jefferson MS66 NGC.** Strong butter-yellow luster on each side, more satiny on the obverse with brighter cartwheels on the reverse. Great detail and eye appeal, as befits a Premium Gem. NGC has graded 70 numerically finer examples (10/10).(#7443)
- 4110 1903 Louisiana Purchase/McKinley MS65 NGC.** A softly frosted and well struck yellow-gold Gem of the McKinley Louisiana Purchase design. Several copper spots are noted on the obverse. (#7444)
- 4111 1904 Lewis and Clark MS62 PCGS.** Boldly struck with considerable reflectivity in the fields. Pale yellow-gold color shows suggestions of copper within the obverse lettering. (#7447)

MS64+ 1904 Lewis and Clark Gold Dollar Struck From Clashed Dies

- 4112 1904 Lewis and Clark MS64+ PCGS. CAC.** A lustrous lemon-gold near-Gem that has pleasing preservation and is well struck except for the obverse dentils. Both sides are boldly die clashed, as made and highly unusual for any gold commemorative issue. Although the Louisiana Purchase Exposition was held in St. Louis in 1904, the present type was issued for the Lewis and Clark Exposition, which took place a year later in Portland, Oregon. (#7447)

Lustrous 1904 Lewis and Clark Gold Dollar, MS65

- 4113 1904 Lewis and Clark MS65 NGC.** This stunning Gem exhibits rich yellow surfaces and sharp design features. It is characterized by reflective, nearly prooflike fields, and lustrous devices. The Lewis and Clark gold dollars, issued in 1904 and 1905, commemorated the journeys of the famous pair, sent by Thomas Jefferson to explore the Pacific Northwest. Today, examples are plentiful in lower grades, but only occasionally found in Gem or finer grades. (#7447)

Gorgeous MS65+ 1904 Lewis and Clark Dollar

- 4114 1904 Lewis and Clark MS65+ NGC.** Scintillating satiny luster radiates from the pleasing yellow-gold surfaces. This high-end specimen has no distracting handling marks. A touch of softness at the centers just barely keeps this piece from the MS66 level. The Lewis and Clark gold dollars did not sell well when they were originally issued and consequently rank among the scarcest commemoratives today. (#7447)

-
- 4115 1905 Lewis and Clark—Improperly Cleaned—NGC Details. Unc.** With a disposition figure of 10,041 pieces, the 1905 Lewis and Clark gold dollar is considerably more difficult to locate than its 1904 counterpart. This coin features light greenish-gold surfaces and a sharp strike. (#7448)

- 4116 1905 Lewis and Clark MS62 NGC.** Considerable reflectivity in lemon-gold fields. This is a well-defined second-year Lewis and Clark coin, though also one with light to moderate abrasions in the fields. (#7448)

- 4117 1915-S Panama-Pacific Gold Dollar MS64 NGC.** Soft but intriguing butter-yellow luster takes on frosty attributes at the peak of the laborer's cap. A well-defined near-Gem example of this increasingly popular commemorative gold issue. (#7449)

- 4118 1915-S Panama-Pacific Gold Dollar MS64 PCGS.** Deep orange-gold with subdued but rewarding luster. A well struck and attractive near-Gem example of this important commemorative gold dollar issue. (#7449)

- 4119 1915-S Panama-Pacific Gold Dollar MS64 PCGS.** More lively in appearance than many Pan-Pac gold dollars, and the yellow-gold luster is effusive. A pleasing near-Gem representative of this distinctively designed gold dollar commemorative. (#7449)

- 4120 1915-S Panama-Pacific Gold Dollar MS64 NGC.** Rich yellow-orange luster with variations into copper-red at the reverse borders. A well struck near-Gem that offers considerable eye appeal for the grade. (#7449)

**1915-S Panama-Pacific Gold Dollar, MS67
Beautifully Patinated Surfaces**

- 4121 1915-S Panama-Pacific Gold Dollar MS67 PCGS.** The exposition in San Francisco in 1915 had a dual purpose: to commemorate the opening of the Panama Canal and to celebrate the rebuilding of the city after the devastating earthquake in 1906. This coin is one of the most attractive examples of the gold dollar we can remember seeing. The surfaces are nearly perfect, as one would expect, but what really adds pop is the subtle interplay of rose and pale lilac patina on each side. Population: 48 in 67, 0 finer (10/10). (#7449)

-
- 4122 1915-S Panama-Pacific Quarter Eagle—Improperly Cleaned—NGC Details. Unc.** Dusky yellow surfaces have odd luster and hairlines from a past cleaning, but there is no trace of wear. Among the more accessible examples of this classic gold commemorative issue. (#7450)

Lustrous MS64 1915-S Panama-Pacific Quarter Eagle

- 4123 1915-S Panama-Pacific Quarter Eagle MS64 NGC.** Though the usual striking softness is noted over the high points, the recessed details are finely chiseled on this luminous butter-yellow example. Pumpkin-orange peripheral accents ring the reverse. An eye-appealing coin that presents more attractively than the Choice Mint State designation might suggest. (#7450)
-

**Round 1915-S Panama-Pacific
Fifty Dollar, MS61**

4124 1915-S Panama-Pacific 50 Dollar Round MS61 NGC. Three-figure mintages are distinctive wherever they fall in U.S. numismatics, but especially in the context of the 20th century. Due to their enormous price, the two varieties of 1915-S Panama-Pacific fifty dollar coins each wound up with three-figure net mintages, and the round version had just 483 pieces sold, a record low for the classic commemorative series. This is an impressive MS61 example of the famous round version, far better-looking than one might expect for the grade, pale yellow-gold with subtle luster and well struck devices. Close inspection reveals slide marks on the portrait and the owl, though none of these are readily visible at a distance. (#7451)

4125 1916 McKinley MS66 NGC. Canary-yellow color with occasional suggestions of deeper hues. A well struck and warmly lustrous coin that boasts strong eye appeal. NGC has certified 65 numerically finer examples (10/10). (#7454)

MS67 ★ 1916 McKinley Gold Dollar

4126 1916 McKinley MS67 ★ NGC. Golden-tan toning, a razor-sharp strike, and dynamic cartwheel luster demonstrate formidable eye appeal. The second commemorative gold dollar type that honored martyred President McKinley, who previously appeared on a 1903 Louisiana Purchase issue. Census: 1 in 67 ★, none finer with a Star designation (10/10). (#7454)

4127 1917 McKinley MS64 NGC. Satiny yellow-orange luster with a greenish copper streak behind McKinley's head. Softly struck but with pleasing surfaces that merit a near-Gem designation. (#7455)

4128 1922 Grant No Star—Obverse Scratched—NGC Details. Unc. Boldly struck with bright lemon-gold luster. While a straight-then-curving staple scratch affects Grant's portrait, the reverse displays well. (#7458)

4129 1922 Grant No Star MS62 NGC. An impressively lustrous yellow-gold example of the No Star or "Plain" Grant gold dollar. Softly struck at the usual spot on the portrait's head and abraded in the left obverse field, yet a pleasing coin for the grade. (#7458)

No Star 1922 Grant Dollar, MS66

4130 1922 Grant No Star MS66 NGC. CAC. Housed in an older-format holder that does not specify "No Star," though visual inspection makes the distinction obvious. Swirling yellow-gold luster has faint orange overtones in general and an area with greenish hues that is centered on the edge of Grant's profile. NGC has graded 86 numerically finer No Star pieces (10/10). (#7458)

**Premium Gem 1922 Grant Gold Dollar
Popular With Star Design**

- 4131 1922 Grant With Star MS66 NGC.** The Grant With Star gold dollar boasts a low distribution total of 5,000 pieces. The enigmatic incuse star apparently has no significance in relation to Grant, but the design has always been popular with collectors as a mark of distinction. The present coin is a spectacular Premium Gem, with sharply defined devices and frosty mint luster. The pleasing surfaces are an attractive orange-gold color, with hints of rose. (#7459)
- 4132 1926 Sesquicentennial MS64 PCGS. CAC.** The 1926 Sesquicentennial quarter eagle claims a distribution total of 46,019 pieces. The present coin is a well struck Choice Mint State example, with lustrous yellow-gold surfaces highlighted by wisps of rose. A few minor abrasions on the reverse prevent a Gem designation. (#7466)
- 4133 1926 Sesquicentennial MS64 NGC.** Rich orange-gold luster with distinct violet-to-lavender overtones that are most prominent at the central reverse. Well struck with just a few too many small marks to qualify for a finer grade. (#7466)
- 4134 1926 Sesquicentennial MS64 PCGS. CAC.** Bright mint luster radiates from the pleasing greenish-gold surfaces of this Choice Sesquicentennial quarter eagle. The design elements are well struck and visual appeal is outstanding. (#7466)
- 4135 1926 Sesquicentennial MS64 NGC.** A shining near-Gem with rich wheat-to-yellow color. A well struck coin that is pleasing for the grade, from an issue that is notoriously elusive any finer. (#7466)
- 4136 1926 Sesquicentennial MS64 PCGS.** Bold and swirling yellow-gold luster on the obverse with a duskier honey-gold hue on the reverse. A well struck near-Gem that shows just a few too many small marks to qualify for the next designation. (#7466)

Gem 1926 Sesquicentennial Two and a Half

- 4137 1926 Sesquicentennial MS65 PCGS. CAC.** Olive-gold and orange intermingle throughout this lustrous and intricately struck Gem. Minimally abraded, and a charming example of the final classic commemorative gold type. Independence Hall, depicted on the reverse, later appears on the Bicentennial Kennedy half. Housed in a green label holder. (#7466)

MODERN ISSUES

- 4138 1996-W Olympic/Cauldron Gold Five Dollar MS70 NGC.** The 1996-W Olympic Cauldron five dollar gold commemorative boasts a small mintage of 9,210 pieces. The present example is a virtually perfect coin, with immaculate honey-gold surfaces, vibrant mint luster, and razor-sharp striking details. (#9738)

Library of Congress 2000-W Bimetallic Ten, MS70

- 4139 2000-W Library of Congress Bimetallic Ten Dollars MS70 NGC.** A technically flawless of the uncirculated-format Library of Congress bimetallic ten dollar, a low-seller in its time but increasingly popular for its unique niche in U.S. numismatics. The outer gold ring is as perfect as the platinum interior, and the whole is satiny and delightful. (#9784)

**2000-W Library of Congress
Bimetallic Ten, MS70**

- 4140 2000-W Library of Congress Bimetallic Ten Dollars MS70 PCGS.** While bimetallic coins are a familiar part of everyday coinage in other parts of the world, such as Canada and the European Union countries, the most famous bimetallic U.S. coin is the gold-platinum Library of Congress ten dollar commemorative. The example offered here was awarded a perfect grade by PCGS, and ordinary inspection shows no cause for dispute. (#9784)

MODERN BULLION COINS

- 4141 1987 Silver Eagle MS70 NGC.** A fantastic second-year silver American Eagle with swirling luster and faultless eye appeal when on display. The reverse has a handful of tiny milk spots. (#9808)

Stunning 1987-S Silver Eagle PR70 Deep Cameo

- 4142 1987-S Silver Eagle PR70 Deep Cameo PCGS.** This stunning Deep Cameo proof is, needless to say, equal to the finest certified, a perfect proof specimen that is destined for the finest cabinet. Reaching the pinnacle of coin grading, this example is one of exactly 100 so graded at PCGS. (#9809)

- 4143 1987-W One-Ounce Gold Eagle PR70 Deep Cameo PCGS.** A gleaming and perfect specimen from the second year of the proof American Eagle gold series, thickly frosted on the devices with flawless field-to-device contrast. A Registry collector essential. (#9815)

- 4144 1988 Silver Eagle MS70 NGC.** Both sides have great swirling luster, though that of the reverse is a trifle brighter. Well-defined with a few low-contrast suggestions of milk spotting scattered around the eagle. (#9816)

- 4145 1990 Silver Eagle MS70 NGC.** A bright silver example judged by NGC to be technically flawless. Milk spots are noted on the reverse, most notably under the olive branch and near the second A in AMERICA. (#9836)

Ultimate 1991 Silver Eagle, MS70

- 4146 1991 Silver Eagle MS70 NGC.** Through the end of October 2010, NGC has certified 69,669 1991 silver Eagles, or about 1% of the original mintage. This piece is one of just 95 coins that has achieved the ultimate MS60 grade. Both sides are brilliant and blemish-free with satiny silver luster. (#9846)

- 4147 1992 Silver Eagle MS70 NGC.** Beautifully detailed and technically a marvel. The luster shows a few pinpoint irregularities as struck, but there are no patently obvious milk spots. (#9856)

- 4148 1993 Silver Eagle MS70 NGC.** A technically unimpeachable example of this silver American Eagle issue. The reverse has low-contrast milk spots scattered near the rims, as well as a similarly low-contrast ring going up to the edge. (#9866)

Sensational 1993-P Silver Eagle PR70 Ultra Cameo

- 4149 1993-P Silver Eagle PR70 Ultra Cameo NGC.** A sensational black-and-white Ultra Cameo proof, this 1993 American Eagle silver piece is one of a relatively small number of surviving specimens. NGC has certified nearly 11,000 of these 1993-P proof coins but only 250 have received the top grade. (#9867)

Flashy 1993-P Silver Eagle PR70 Deep Cameo

- 4150 1993-P Silver Eagle PR70 Deep Cameo PCGS.** Over the years since they were issued, PCGS has certified nearly 4,700 1993-P proof eagles, but only 58 of those submissions have been returned to their owner with the coveted PR70 Deep Cameo grade. This brilliant silver representative has amazing cameo contrast between the mirrored fields and lustrous devices. (#9867)

- 4151 1994 Silver Eagle MS70 NGC.** This MS70 example is pale silver with swirling luster and excellent obverse display characteristics. The sharp eye will see a group of three small disturbances near 7 o'clock on the reverse rim. (#9876)

- 4152 1994-P Silver Eagle PR70 Ultra Cameo NGC.** Profoundly contrasted and marvelously appealing. Even under magnification, the technically solid nature of the surfaces remains unshakable. (#9877)

**Gorgeous 1994-P Silver Eagle
PR70 Deep Cameo**

- 4153** 1994-P Silver Eagle PR70 Deep Cameo PCGS. Similar to the 1993-P proof silver Eagle, this 1994-P has reached the top of the grading chart, one of just 54 coins that PCGS has graded PR70 Deep Cameo. Both sides have singular contrast between the fields and devices. Here is an excellent opportunity for the advanced collector or connoisseur. (#9877)

1995-W Silver Eagle, PR69 Deep Cameo

- 4154** 1995-W Silver Eagle PR69 Deep Cameo PCGS. A fabulous example of the well recognized key to the Silver Eagle series. This virtually perfect specimen has profound field-device contrast and dramatic black-on-white flash when tilted in the light. Only 30,125 pieces were minted, and only two Deep Cameo survivors have been certified in higher numeric grade at PCGS (10,10). (#9887)

**1995-W Silver Eagle, Key Issue
PR69 Ultra Cameo**

- 4155** 1995-W Silver Eagle PR69 Deep Cameo PCGS. There is no other date in the American Eagle silver series that approaches the 1995-W for mintage and rarity. With a combined total population of 4,638 coins at PCGS and NGC, it also has one of the highest submission and resubmission rates of any silver Eagle, with more than 15% of the original mintage certified by the two grading services.
An amazing near-perfect proof, this silver Eagle is fully brilliant and untoned, with exceptionally sharp design motifs and remarkable cameo contrast. (#9887)

**Stunning 1995-W Silver Eagle
PR69 Ultra Cameo**

- 4156** 1995-W Silver Eagle PR69 Ultra Cameo NGC. Only 30,125 of these proof silver eagles were minted and sold with the sets to collectors with high coin collecting budgets. Instantly and perhaps unwittingly creating a rarity, the Mint's decision undoubtedly cost them many customers. Today, the existing supply of these coins is entirely inadequate to satisfy collector demand, resulting in high prices.

A fully brilliant and untuned proof, this pristine specimen approaches perfection with its bold design features and amazing surfaces. (#9887)

**Near-Perfect 1995-W Silver Eagle
PR69 Ultra Cameo**

- 4157** 1995-W Silver Eagle PR69 Ultra Cameo NGC. They say the rich get richer, and those collectors who had a budget that allowed purchasing sets in 1995 now have a significant return on their investment, with high prices for these silver coins and substantially higher gold prices as well.

Both sides of this beauty are brilliant with a high degree of contrast. The surfaces are essentially perfect with no visual sign of imperfection. (#9887)

**Incredible 1995-W Silver Eagle
PR69 Ultra Cameo**

- 4158** 1995-W Silver Eagle PR69 Ultra Cameo NGC. The 1995-W proof silver Eagles were only available in complete five-piece American Eagle proof sets that also included the four different gold coins. Many collectors only purchased the silver proofs due to budget constraints, and the 10th Anniversary proof set offering was met with outrage.
This nearly perfect proof has exceptional contrast on both sides, with brilliant and untuned silver surfaces, and exquisite design definition. (#9887)

**1995-W Silver Eagle, PR70 Ultra Cameo
In-Demand, Key Date**

4159 1995-W Silver Eagle PR70 Ultra Cameo NGC. A gorgeous, virtually perfect specimen of this key issue in the American Silver Eagle series. From a limited mintage of only 30,125 pieces, the meager supply is totally inadequate to satisfy the demand from collectors. The W mintmark only appears on this issue in the Silver Eagle series, prior to the year 2000.

The present coin is fully struck, with every detail of Adolph Weinman's classic obverse design showing to full advantage. The fields display a fathomless depth of reflectivity, and the field-device contrast is stunning. Incredible eye appeal and the highest possible technical grade combine to make this coin a prize for the advanced collector. (#9887)

**1999 Silver Eagle, MS70
Perfect Rendition of the Classic Design**

4161 1999 Silver Eagle MS70 NGC. Adolph Weinman's classic Walking Liberty obverse design has never been displayed to better advantage than on this magnificent bullion coin. The details of Liberty's hand, head, and the eagle's trailing leg were almost always weakly impressed on even the most sharply struck examples of the vintage half dollar series this design was originally created for. In contrast, every detail is fully brought up on this Silver Eagle specimen. The brilliant surfaces exhibit vibrant, satiny mint luster, as well. The 1999 Silver Eagle claims a large mintage of 7.4 million pieces, but examples in MS70 condition are quite scarce. Currently, only 77 coins have been certified in this exalted grade by NGC (10/10). (#9947)

Amazing 1996 Silver Eagle, MS70

4160 1996 Silver Eagle MS70 NGC. With a mintage of about 3.6 million coins, the 1996 silver eagle is scarce when compared to all others, with the lowest Mint State mintage of any issue. This amazing example is one of just 124 similar pieces awarded the top grade at NGC, representing just one piece of every 596 examples submitted. Both sides have satiny silver luster and bold design definition. (#9900)

Flawless 2000 Silver Eagle, MS70

4162 2000 Silver Eagle MS70 NGC. Since the coins first rolled off the presses in 2000, NGC has certified 76,882 examples of the 2000 silver Eagle but only 160 of those coins have received the MS70 grade, or just one out of every 480 coins submitted to that service. This perfect example is one of the 160, and it is flawless with bright silver luster and satiny surfaces. (#9949)

- 4163 Three-Coin 20th Anniversary Silver Eagle Set NGC.** Housed in a custom NGC holder. Includes a 2006-W MS70, a 2006-P Reverse Proof PR70, and a 2006-W PR70 Ultra Cameo. An attractive display. (Total: 3 coins)
- 4164 Two-Coin 2006-W 20th Anniversary Silver and Gold Set.** A two-piece set in the original packaging, cases, etc., with the coins essentially as issued. Includes the **uncirculated one-ounce silver eagle** and **uncirculated one-ounce gold eagle**. (Total: 2 coins)
- 4165 2006-W 20th Anniversary Gold and Silver Coin Set.** A pair of uncirculated-finish coins in the original government packaging, including leather-topped case. Includes the **2006-W one-ounce gold eagle** and **2006-W one-ounce silver eagle**, both essentially as issued. (Total: 2 coins)
- 4166 2006-W One-Ounce Gold Eagle MS70 NGC.** Early Releases. Technically flawless with a shining sense of modern perfection. While it does not influence the technical grade, a shallow depression to the left of the main eagle's right wingtip is of some interest. (#89989)
- 4167 2006-W 20th Anniversary One-Ounce Gold Eagle MS70 NGC.** Bright, satiny, perfect. That is this MS70 20th Anniversary one-ounce beauty in a nutshell. Pale yellow-gold surfaces show a hint of rich peach color above the outstretched wings of the eagle. (#89993)
- 4168 2006-W 20th Anniversary One-Ounce Gold Eagle PR70 Ultra Cameo NGC.** A gleaming specimen that is perfect in every respect. Glittering fields are as flawless as the strike on the contrasting devices. (#99984)
- 4169 2006-W One-Ounce Gold Eagle Reverse Proof PR70 NGC.** The famous 20th Anniversary one-off type with startling "inverse contrast" between heavily polished, gleaming devices and frosted fields. Technically flawless with hints of peach in the tan-gold color. (#89995)
- 4170 2006-W One-Ounce Gold Eagle Reverse Proof PR70 PCGS.** PCGS designated as a "First Strike." A technically flawless representative of the stunning Reverse Proof one-ounce gold. Liberty has never gleamed so brightly. (#89995)
- 4171 2006-W One-Ounce Gold Buffalo PR70 Deep Cameo PCGS.** PCGS designated as a "First Strike." Excellent contrast between the textured-yet-reflective fields and the frost on the broad devices. A memorable and technically flawless coin. (#99990)

COINS OF HAWAII

- 4172 1847 Hawaii Cent MS63 Brown PCGS. Medcalf 2CC-2.** Crosslet 4 obverse, berry under first A in HAWAII on the reverse. The most accessible die pair for the 1847 Hawaii cents, offered here as a Select "Brown" example with considerable faded orange at the margins. (#10965)

1883 Hawaii Ten Cents, MS64 Sharp Strike, Good Luster

- 4173 1883 Hawaii Ten Cents MS64 PCGS. CAC.** The 1883 Hawaii dime is less available than its quarter counterpart, especially in high grade. The present coin is an attractive Choice Mint State example, with sharp details, and iridescent gold, violet, and ice-blue toning. Much original mint luster is evident beneath the patina. Population: 32 in 64, 30 finer (10/10). (#10979)

Elusive XF Hawaii 1879 Hobron Token 12 1/2 Cents, Kahului and Wailuku Railroad

- 4174 1879 Kahului and Wailuku Railroad 12 1/2 Cents XF40 NGC.** Medcalf 2TE-8. These copper one real tokens were produced by railroad owner Captain Thomas H. Hobron and could be redeemed at his general store in Kahului, Maui. A lightly circulated and unmarked golden-brown example. Struck several degrees off center toward 1:30, and the rotated reverse exhibits prominent strike doubling. Listed on page 397 of the 2011 Guide Book. (#600515)
-

GSA DOLLARS

Superb Gem GSA 1879-S Dollar

- 4175 1879-S MS67 NGC. CAC.** A GSA S-mint, remarkably well-preserved with a light layer of gold-tinged patina across immensely lustrous silver surfaces. Band-certified by NGC in the black holder of issue with CAC sticker applied on the right front band. No boxes, papers, or related items included with this lot. (#7092)

Reverse of 1878 1880/79-CC Dollar An Important GSA Gem

- 4176 1880/79-CC Reverse of 1878 MS65 NGC. VAM-4.** A Top 100 Variety. Thickly frosted central devices and cartwheel fields appear under a light layer of gold-to-gray patina. Carefully preserved and an appealing Gem, rendered all the more appealing by the black GSA holder of issue, which is band-certified. No boxes, papers, or other ephemera included. (#7108)
- 4177 1881-CC MS66 NGC.** Originally sold in the “mixed” category, ostensibly due to the faint golden toning along the left obverse, though the buyer must have been thrilled to see the thickly frosted ivory-white portrait. This Premium Gem is band-certified in the holder of issue with accompanying black box and two informational cards. (#7126)
- 4178 1881-CC MS64 Prooflike NGC. VAM-2.** The two 8s exhibit prominent recutting. This low mintage Carson City dollar is beautifully toned. The obverse is light sun-gold with blushes of powder-blue and cherry-red. The reverse is stone-white save for partial peripheral bands of apricot. The eagle exhibits pleasing frost relative to the flashy reverse field.
From The Sandy Beach Collection. (#7127)
- 4179 1881-CC MS64 Prooflike NGC. CAC. VAM-2.** Die fill within the upper loop of the second 8 is strongly reminiscent of the 1880-CC VAM-6. A flashy and intricately struck Choice Carson City Morgan that is brilliant save for an obverse arc of peach toning between 12 and 3 o'clock.
From The Sandy Beach Collection. (#7127)
- 4180 1884-CC MS66 NGC. VAM-2.** The 18 in the date is clearly recut. Dazzling luster, pleasing preservation, and delicate gold toning ensure the eye appeal of this nicely struck Premium Gem. Faint roller marks on the chin are of mint origin. (#7152)

- 4181 1890-CC MS62 NGC.** A minimally toned example, band-certified in the black GSA holder of issue with government-issue box and certificate. The obverse shows a number of abrasions on the portrait, though the reverse has a better appearance. (#7198)
- 4182 1890-CC MS63 NGC.** A strongly lustrous Select example with only light skiffs of patina and faint gold-rose overtones. Well struck with wispy abrasions on the portrait that account for the grade. Band-certified in the black GSA holder of issue, but without a box or literature. (#7198)
- 4183 1891-CC MS62 NGC. VAM-3.** A Top 100 Variety. The popular “Spitting Eagle,” offered here band-certified in a black GSA holder with box and serial-numbered certificate. Strongly silver surfaces show grade-defining abrasions on the portrait, though the reverse has a cleaner appearance. (#7206)

ERRORS

MS64 Red Lincoln Memorial Cent Multiple Struck Copper Layer

- 4184 Undated Lincoln Memorial Cent—Multiple Struck Copper Layer—MS64 Red PCGS.** 4.6 grains. This post-1982 cent clung to the reverse die following the first strike, then was struck at least two additional times, with the hammer die rotating between strikes. The additional strikes caused the wafer-thin reverse copper layer to separate from the rest of the predominantly zinc cent. A high partial cap is present on the “obverse” between 12 and 3 o'clock.

Double Struck MS63 Red 1972-D Cent Second Strike Flipover and 65% Off Center

- 4185 1972-D Lincoln Cent—Double Struck, Second Strike Flipover and 65% Off Center—MS63 Red NGC.** The first strike was normal, but the coin failed to properly eject and was struck a second time, widely off center toward 2 o'clock, at 10 o'clock relative to the reverse of the first strike. The coin flipped between strikes, and the second strike is uniface obverse, since a newly fed planchet (not included) blocked the reverse die.

**Gem 1994 Cent on a 1994-P Dime
The Classic ‘11 Cents’ Error**

- 4186** 1994 Cent—Struck on a 1994-P Dime—MS65 ANACS. A classic “11 cents” error with Lincoln’s portrait framed by the outline of an upside-down Roosevelt head. Great luster with strong design overlap and prominent gold-to-olive overtones at the obverse margins and the reverse. This Gem is housed in a small-format ANACS holder and comes with a wood display case.

**Undated Triple Struck Die Cap
Jefferson Nickel, MS66**

- 4187** Undated Jefferson Nickel—Triple-Struck Die Cap—MS66 NGC. Reflective at the obverse, which is at the bottom of the die cap “well,” suggesting a proof despite NGC’s Mint State designation. To the right of the main strike is a split edge from a secondary impression, while a small arc of a third impression appears at the top. Not encapsulated by NGC due to dimensions, though the piece comes with an NGC photo-certificate.

**Undated Kennedy Half Dollar Struck on a Nickel
With Obverse Brockage, MS66**

- 4188** Undated Kennedy Half Dollar—Struck on a Struck Nickel With Obverse Brockage—MS66 NGC. A complicated and fascinating error. A Jefferson nickel came between Kennedy half dollar dies, but was also partially occluded on the obverse by another planchet. The dies came together, impressing the Kennedy design but leaving a curved void impression at the top of the obverse. The reverse shows the undertype clearest, with the left side of Monticello visible at the lower left edge.

- 4189** 20-Piece Lot of Sacagawea or Presidential Dollar Type Two Planchets NGC. A roll quantity (!) of Type Two (upset rim) blank planchets for the Sacagawea or Presidential dollar series. Pieces as-issued with the usual abrasions found on unstruck planchets, no edge lettering. A distinctive lot for the error enthusiast.

WASHINGTONIA

**Original Silver Baker-160 Civic Procession AU53
Washington Birth Centennial Medal**

- 4190** (1832) Philadelphia Civic Procession, Silver AU53 NGC. Baker-160. Perfect dies. A briefly circulated example of this very rare Washington birth centennial medal. Toned caramel-gold and olive-gray with substantial satin luster and no noticeable marks. Per the 1999 Rulau and Fuld revision of *Medallic Portraits of Washington*, less than ten examples are known.

U.S. MINT MEDALS

**Massachusetts Charitable Mechanic Association
Gold Medal Awarded to Lane Manufacturing Co.
Julian AM-33, Unc Details**

- 4191** Massachusetts Charitable Mechanic Association Gold Medal—Improperly Cleaned—NGC Details. Unc. Julian AM-33. Awarded to Lane Manufacturing Co. in 1874 for a “circular saw mill,” per engraving. The obverse vignette by Christian Gobrecht makes this medal type, almost always found struck in gold, highly popular. Both sides show mirrors, though these are impaired by hairlines from a past cleaning, and the lower reverse shows discoloration at the date.

Scarce 1869 Transcontinental Railroad Medal

4192 Bronze 1869 The Oceans United by Railway Medal. Julian CM-039. This Uncertified medal has Uncirculated detail but exhibits light rim scratches. Obverse: Bust Right of President Grant. Reverse: Train crossing mountainous landscape. Fully struck and attractive with powder-blue undertones beneath the rich chocolate-brown patina. Housed in a well preserved golden-brown box with floral scrollwork on top and bottom that appears contemporary with the medal.

4193 1860 Mint Cabinet Medal MS63 Brown NGC. Julian-MT-23b, Baker-326. Bronze, 60 mm per the holder (59 mm per Julian). Commemorative design for the "Washington Cabinet of Medals" by Paquet, his bust of Washington after Houdon. Cherry and orange overtones to medium-brown surfaces.

TEXAS TOKENS

4194 El Paso Saloon Tokens. Included are: (ca. 1910) **Lobby Saloon**, Good for 1 Beer—Environmental Damage—NGC Details, XF, brass, deep reddish patina in the fields; (ca. 1910) **Acme Saloon**, Good for 5 cents, AU50 NGC, brass, pleasing, original surfaces with a few expected field marks, this is the famous saloon where the outlaw John Wesley Hardin was killed; and a second **Acme Saloon**, Good for 1 Beer—Environmental Damage—NGC Details, XF, brass, deep brown and charcoal surfaces. (Total: 3 tokens)

4195 El Paso Saloon Tokens. Included are: (ca. 1910) **Toltec Social Club**, Good for 5 cents, MS61 NGC, brass, variegated surfaces with slight corrosion on the reverse, the Toltec allegedly has a ghost that inhabits the upstairs, according to *Spirits of the Border* by Hudnall and Wang; (ca. 1910) **Centennial Saloon**, Good for 12.5 cents, XF45 NGC, German silver, even wear, problem-free surfaces; (ca. 1910) **The Ranch Saloon**, Good for 5 cents—Environmental Damage—NGC Details, VF, brass, the piece has a square hole, several scratches on each side, and corrosion with brown and charcoal color; and (1888) **The Parlor**, Good for 1 Drink, XF45, German silver, R-TX-SP-18, two-sided pictorial with Old Church on one side and the Court House on the other, attractive, problem-free surfaces. (Total: 4 tokens)

4196 West Texas. Included are: (ca. 1900) **N. R. Langtry**, Texas, Good for 1 Sheep—Environmental Damage—NGC Details, XF, German silver, shallow corrosion on the obverse and dark patina around the devices; and a (ca. 1900) **Warren McDowell & Co.**, Juno, Texas, Good for 25 cents, AU58 NGC, German silver, bright surfaces with light streaks and a scratch between the 2 and 5 on the reverse. (Total: 2 tokens)

4197 Panhandle and North Texas Saloon Tokens. Included are: (ca. 1910) **Higgins Saloon**, Higgins, Good for 5 cents, AU55 NGC, brass, uniface token with incuse lettering, a few light scratches on the reverse, Higgins had only 425 inhabitants in 2000; and a (ca. 1900) **Red River Saloon**, Gainesville—Environmental Damage—NGC Details, XF, white metal, areas of deep corrosion on each side. (Total: 2 tokens)

4198 Fort Worth and Sweetwater. Included are: (ca. 1900) **Cattle Exchange Saloon**—Scratches—NGC Details, XF, brass, great pictorial of a steer on the reverse, unfortunately scratched on the steer and lightly on the obverse, deep brown and green-brown color; (ca. 1900) **James Bros./Brunswick Balke Collender Company**, Good for 10 cents—Improperly Cleaned—NGC Details, AU, brass, interesting pictorial on the reverse of a pool table, light in color with traces of some sort of glossy substance most likely related to the cleaning process around several peripheral letters; and a (ca. 1900) **B.M. Jones Saloon**, Sweetwater, Good for 5 cents, VF30 NGC, brass, even wear, deeper color over the lettering with green-brown fields. (Total: 3 tokens)

4199 Dallas Saloon and Pool Hall. Included are: (ca. 1885) **Mayer's Garden**, 5 cents, NCS Genuine, octagonal, brass, in our opinion the piece has VF Details with a scratched reverse, bright yellow-green color overall; (ca. 1890) **C. and T. Co. - Brunswick**, Good for 1 Smoke, XF45 NGC, brass, reddish tinged surfaces, great pictorial on the reverse of a pool table; and a (ca. 1910) **S. Lang Saloon**, Good for 5 cents Drink, MS62 NGC, brass, bright yellowish-green surfaces, uniface with incuse lettering, reverse is heavily striated. (Total: 3 tokens)

4200 North-Central Texas. Included are: (ca. 1900) **J.D. Weaver, Corsicana**, Good for 2 1/2 cents in Trade, VF20 NGC, white metal, heavy but even wear, pictorial on obverse of a pool table, reverse is rotated 100 degrees; (ca. 1900) **City Drug Store, Bowie**, Good for 5 cents—Environmental Damage—NGC Details, XF, the surfaces show corrosion and cleaning, and are thus over-bright; and a (ca. 1910) **W.A. Bass Pabst Beer, Hubbard City**, Good for One Glass at any Saloon or Beer Joint—Improperly Cleaned—NGC Details, AU, white metal, bright from hairlining, a few scattered flan defects. (Total: 3 tokens)

4201 East Texas. Included are: (ca. 1900-1920) **Kennedy Bros., Grapeland** (south of Tyler), Good for 5 cents—NCS Genuine—the piece appears to have AU Details with some corrosion, brass or copper, reddish-brown surfaces with a minor scratch in the center of the obverse; and a (ca. 1900) **Fair Play Saloon, Fair Play** (near Carthage), Good for a 5 cent Drink—Environmental Damage—NGC Details, AU, brass, light reddish-tinted corrosion is noted on each side with intermingled yellow-brown. (Total: 2 tokens)

Delmonica Saloon Token From Comanche, Texas White Metal, MS61

4202 Comanche Saloon Token. (Ca. 1900) **Delmonica Saloon, Comanche**, Good for 2 1/2 cents, white metal, MS61 NGC. The very Texan-named town of Comanche is near Abilene. The Delmonica Saloon was apparently owned by the Haney and Gabbert Brothers, whose names are imprinted on the obverse. The surfaces are extensively abraded, but still bright overall.

4203 Waco. Included are: (ca. 1910) **Dr. Pepper advertiser**, Waco, Good for a Dr. Pepper at Any Fountain—Scratches—NGC Details, VF, German silver, lots of Dr. Peppers were bought with this token and the high points of the design show greenish-brown accents from use and there are a couple of horizontal scratches from the field into George Washington's neck (apparently George was a Pepper too); (ca. 1910) **Hill County Saloon**, Waco, Good for 5 cents—Environmental Damage—NGC Details, VF, brass?, each side is heavily corroded and shows rusty-red color; and a (ca. 1910) **The Turf**, Waco, Good for 12 1/2 cents—Damaged—NGC Details, VF, brass, it appears impact affected a small portion in the center of the obverse, otherwise evenly worn with bright surfaces. (Total: 3 tokens)

4204 Temple and Bartlett Saloon Tokens. Included are: (ca. 1895) **Twentieth Century Saloon**, Temple, Good for 12 1/2 Cents in Trade, XF40 NGC, brass, good color and even wear over the high points of the design, a couple of shallow obverse scratches are noted; (ca. 1910) **The Moss Rose Saloon**, Temple, Good for 12 1/2 Cents in Trade, AU58 NGC, brass, excellent yellow-green color with the expected numerous but small handling marks; (ca. 1900) **Billy & Joe's Saloon**, Temple, Good for 12 1/2 Cents—Environmental Damage—NGC Details, XF, brass, light corrosion gives each side a matte-like appearance with the usual reddish hue; and a (ca. 1910) **Centennial Bar**, Bartlett (lies in both Bell and Williamson counties), Good for 1 Bottle of Texas Beer—Environmental Damage—NGC Details, AU, white metal plating, scattered light to heavy corrosion on each side with most of each side bright, the top of the reverse shows a core composed of something other than white metal (wood or cardboard?). (Total: 4 tokens)

4205 German-Texas Saloons. Included are: (ca. 1900) **Palace Saloon**, Schulenburg, Good for 5 cents in Trade, MS60 NGC, white metal, a few widely scattered patches of corrosion are noted on the obverse as well as the expected abrasions for an MS60, bright color; and a (ca. 1905) **Max's Saloon**, Fredericksburg, Good for a 5 cent Drink, AU50 NGC, brass, rich green color with reddish colored accents over the lettering. (Total: 2 tokens)

4206 Austin Saloon and Trade Tokens. Included are: **S.A. Carlson**, Good for 5 cents in Trade, MS61 NGC, white metal, bright and original surfaces with the expected numerous, small to medium-sized abrasions; **Dummy Line Saloon**, Good for 10 cents in Trade, MS61 NGC, white metal, the fields are bright and semireflective, and there are fewer-than-expected abrasions for the grade; (ca. 1910) **Eugene Martin**, Good for 5 cents in Trade—Environmental Damage—NGC Details, XF, brass, the fields are dark but we do not see evidence of actual environmental damage, the devices are brightly contrasting yellow; and a (ca. 1910) **Ravy's Saloon**, Good for 1 Drink—Environmental Damage—NGC Details, XF, brass, the surfaces show uniform porosity but there is plenty of detail and the devices are brightly accented against the deeper-colored fields. (Total: 4 tokens)

1880s White Elephant Pictorial From Austin
Unlisted in Copper, VF Details

4207 White Elephant Pictorial, Austin. R-TX-AU-17B. 1880s W.B. Newton, Proprietor, copper—Damaged—NGC Details, VF. Valued as an interesting pictorial from Austin, this piece is struck in copper rather than the usual German silver, and as such is unlisted in Rulau (1999). This was recognized also by NGC and apparently accounts for the 17B designation in the attribution. The surfaces do not show damage, as such, but are finely porous over each side. Reddish-brown color.

4208 Austin Pictorials. Included are: (ca. 1900) **Palace Saloon**, Good for 1 Drink—Damaged—NGC Details, XF, copper, the damage is in the form of an attempted puncture below the horse (fine pictorial of a horse, by the way), the surfaces otherwise are remarkably clean and free from marks; (ca. 1885) **Iron Front Merchant Token**, Genuine NCS, German silver, large pictorial of a Longhorn steer, the piece appears to have the details of an XF, bright overall with darker peripheral toning, the Iron Front was a famous watering hole for cowboys in Austin; (1887-1903) **C.G. Frenzel**, Good for 5 cents in Trade—Environmental Damage—NGC Details, Unc, brass, pictorial of pool table, numerous small spots of carbon are on each side as well as larger areas of corrosion, but the surfaces are still bright yellow, C.G. Frenzel operated the Turner Hall Saloon on 18th and Lavaca Streets from 1887 to 1902; and an (1880s) **Cosmopolitan Hotel**, Good for 1 Drink, XF40 NGC, German silver, attractive two-sided pictorial, even wear over the high points with untampered, originally toned surfaces. (Total: 4 tokens)

4209 Central Texas Saloons. Included are: (ca. 1900) **Oak Hall Saloon**, Mart, Good for 12 1/2 cents—Damaged—NGC Details, XF, white metal, the damage is in the form of an X on the obverse and several deep areas of corrosion on each side; (ca. 1910) **Mat. Smith Saloon**, Lampasas, Good for 12 1/2 cents in Trade—Environmental Damage—NGC Details, AU, brass, the surfaces are uniformly porous with much darker color; and a (ca. 1880) **J.S.W. & Co/Collender**, San Saba, Good for 1 Drink—Environmental Damage—NGC Details, VG, white metal, heavily worn on each side, the reverse has a pool table pictorial, deeply toned around the devices. (Total: 3 tokens)

4210 Wiedeville (Near Brenham). Included are: (1921) **C. Wiede & Son**, Good for 10 cents in Trade, MS66 NGC, aluminum, bright and shimmering, the reflective fields only "flaws" are a couple of patches of incomplete die polish; (1921) **C. Wiede & Son**, Good for 15 cents in Trade, MS66 NGC, aluminum, slight golden toning, the reverse shows evidence of circular lathe lines; and a (1921) **C. Wiede & Son**, Good for \$1 in Trade, MS67 NGC, aluminum, essentially flawless surfaces, this reverse also shows heavy, circular lathe lines. Wiedeville has essentially vanished and today its primary claims to a community is the Lutheran church there. (Total: 3 tokens)

Bryan Saloon Counterstamp on 1855-O Half
J.L. Barnes, TX-BY-1, Good 4

4211 Bryan Saloon Counterstamp. TX-BY-2. J.L. Barnes Saloon Bryan, Tex counterstamp on an 1855-O Arrows half dollar. Good 4. J.L. Barnes counterstamped at least five half dollars in addition to at least three quarters and one Mexican two reales. Brunk states the counterstamping date is not known, but indicates it must be prior to 1880, which is when a person with this name shows up on the census in Harris County, 90 miles from Bryan. The coin is heavily worn and the counterstamp was punched in almost 90 degrees from an upright position. Deeply toned with original surfaces.

4212 San Antonio Saloons. Included are: (ca. 1900) **G. Schramm's Saloon**, Good for 5 cents at the Bar—Scratches—NGC Details, VF, German silver, the pearl-gray surfaces are heavily scratched on each side; (ca. 1910) **Union Saloon**, Good for 5 cents in Trade—Bent—NGC Details, XF, copper, medium to deep brown surfaces, the bend is imperceptible in the holder; (ca. 1892-1897) **White House Saloon**, Take Me To—Scratches—NGC Details, AU, white metal, TX-SA-225, scratched on the reverse where there is also a nice pictorial of the Alamo. (Total: 3 tokens)

- 4213 San Antonio Saloons, Part Two.** Included are: (ca. 1910) **J.A. Christ, Turf Saloon**, Good for 12 1/2 Cents, MS61 NGC, brass, bright yellow-gold color with one larger spot on the reverse; (ca. 1900) **Crescent Saloon**, Good for 5 cent Drink or Cigar—Environmental Damage—NGC Details, VF, copper, the dark brown fields show just a couple of spots of minor corrosion, the devices display contrasting bright yellow-green color; (ca. 1895) **Deurling's Saloon**, MS61 NGC, brass, this uniface token has bright, uniform yellow-green color with a couple of grade-limiting scratches on the reverse; and a (ca. 1900) **O. Ewart**, Good for One Glass Beer—Environmental Damage—NGC Details, XF, brass, light corrosion around the devices, otherwise deep greenish-brown color, a couple of scratches on the reverse. (Total: 4 tokens)
- 4214 San Antonio Saloons, Part Three.** Included are: (ca. 1910) **Henry's Buck Horn Saloon**, Good for 5 cents in Trade—Environmental Damage—NGC Details, Fine, TX-SA-60, heavily corroded and bright from cleaning; (ca. 1910) **Iron Front Saloon**, Good for 5 cents in Trade, VF30 NGC, brass, smooth surfaces, even wear, and rich color; and a (ca. 1910) **Menger Hotel Bar**, Good for 1 Drink, AU55 NGC, copper-nickel, TX-SA-92, pleasing surfaces with a slight reddish tint, located next to the Alamo, in 1898 Theodore Roosevelt recruited the Rough Riders in the lobby of the Menger. (Total: 3 tokens)
- 4215 San Antonio Saloons, Part Four.** Included are: (ca. 1900) **Albert's Saloon**, Good for 2 1/2 Cents in Trade, AU58 NGC, TX-SA-8, copper-nickel, TX-SA-8, Star of David pictorial in the center of the obverse, minor verdigris and slight spots of corrosion on the otherwise pearl-gray surfaces; (ca. 1910) **Bull Brothers Saloon**, Good for 2 1/2 Cents at the Bar, MS61 NGC, German silver?, R-SAN-20, bright surfaces with a thin tracing of charcoal around the devices; (1885-1894) **Jim Brady & Co. Office Bar**, I.O. U. 12 1/2 Cents, XF45 NGC, German silver, TX-SA-22, problem-free surfaces; and a (ca. 1910) **Butcher's Exchange Saloon**, Good for 5 Cents in Trade—Environmental Damage—NGC Details, VF, brass, reddish-brown corrosion is interspersed over each side and each side has either one or three circular imprints. (Total: 4 tokens)
- 4216 San Antonio Saloons, Part Five. Pictorials.** Included are: (1881-) **Albert's Saloon**—Environmental Damage—NGC Details, Unc, TX-SA-7 (not SA-4 as indicated on the insert), aluminum, bright surfaces with a few spots of oxidation on the obverse, two-sided pictorial with a buck head elk on the obverse and The Cradle of Texas Liberty (The Alamo) on the reverse; and an (ca. 1880-1890s) **Elite Saloon**, Good for One Drink, MS62 NGC, German silver, intricate two-sided pictorial with Santa Ana's army attacking the Alamo on the obverse, the reverse shows Gov. Tower, pleasing surfaces overall with a couple of spots of corrosion on the reverse. (Total: 2 tokens)
- 4217 San Antonio Merchants.** Included are: **Ball's**, Let Us Go To Ball's and Take Something—Environmental Damage—NGC Details, VF, German silver, the surfaces show heavy corrosion and deep reddish color; **Ball's**, Let Us Go To Ball's and Take Something, XF45 NGC, German silver, a problem-free survivor with slight, even wear over the high points; and a **FCO. P. Peña Guerra, San Antonio Viejo**, Bueno Por 12 1/2 c en Mercancias, XF40 NGC, brass, pleasing overall surfaces. (Total: 3 tokens)
- 4218 San Antonio and Twohig.** Included are: (1885-1898) **Southern Hotel Bar**, Good for One Drink—Scratches—NGC Details, XF, German silver, dual pictorial with the Alamo on the obverse and Mission San Jose on the reverse, scratches in the upper left reverse field, pleasing original surfaces otherwise; and a (ca. 1910) **M.C. McInnes & Co.**, Good for 5 cents, Twohig, Texas, MS63 NGC, German silver, a few light spots on each side, this all-Spanish token has Precio Fijo (Fixed Price) in the center of the obverse, we believe this to be a fantasy piece as we can find no trace of a Twohig, Texas, however John Twohig was a wealthy San Antonio businessman. (Total: 2 tokens)
- 4219 San Antonio Pictorials.** Included are: (ca. 1885) **Monroe Pratt**, Good for 12 1/2 Cents, AU58 NGC, German silver, weakly struck, original surfaces, great pictorial on the obverse of a woman riding a horse; and an (1878-1897) **A. Scholz, Palm Garden**, Good for One 12 1/2 Cent Drink—Environmental Damage—NGC Details, VF, German silver, extensive reddish tinted corrosion over each side, great pictorial of the Palm Garden on the obverse. (Total: 2 tokens)
- 4220 Alamo Souvenir Medal.** (1890s) **Texas Souvenir Medal** MS64 Prooflike NGC. White metal. 38 mm. Extremely well-made, one-side pictorial medal with the Alamo on the obverse. The reverse has Travis / Crockett / Bowie / 1836 in the center, surrounded by wreath. The surfaces are fabulously preserved with no oxidation or mentionable problems, and as indicated by NGC, the fields are bright and reflective. Holed at the top.
- 4221 Obscure Towns Near Houston.** Included are: (1880s-1890s) **H. Runge & Co. Gin & Mill Machinery, Cuero**—Harshly Cleaned—NGC Details, Unc, white metal, one-sided pictorial of large machine (gin?) on the obverse, heavily hairlined; and a (ca. 1908) **Theo. W. Wehring, Bleiblerville**, Good for 25 cents in Merchandise, NCS Genuine, in our opinion the piece has the details of an AU, brass, scalloped edge, faint traces of the original yellow-green finish can still be seen around the devices, Bleiblerville is an unincorporated area near Houston but it has its own post office and zip code. (Total: 2 tokens)
- 4222 Gulf Coastal Cities.** Included are: (ca. 1900) **Sazarac Saloon, Houston**, Good for 10 Cents in Trade—Improperly Cleaned—NGC Details, XF, brass, bright for the grade, even wear; **Y.M.C.A., Beaumont**, Good for 1 Towel—Environmental Damage—NGC Details, XF, white metal, numerous areas of corrosion on each side; and a (ca. 1900) **Eureka Club, Port Arthur**, Good for 5 Cents in Merchandise, AU55 NGC, white metal, light gray surfaces with lighter accented devices. (Total: 3 tokens)
- 4223 Aransas Pass.** Included are: (1892) **D. Herzfeld, Aransas Pass City**, Good for 12 1/2 Cents in Trade—Scratches—NGC Details, AU, TX-AH-7, German silver, heavily scratched in the upper right obverse field, nice pictorial on the obverse of a sailing ship; and a (ca. 1900) **San Jacinto Saloon**, Good for 5 in Trade, XF45 NCG, brass, probably also from Aransas Pass as it is similar to lot 6808 in our September 2006 auction which is also from the San Jacinto Saloon (and misspelled Arkansas rather than Aransas), pleasing and problem-free surfaces with darker color surrounding the devices. (Total: 2 tokens)
- 4224 Towns Near San Antonio.** Included are: (ca. 1900-1920) **Schmitt's Saloon, Castroville**—Genuine—NCS, German silver, in our opinion the piece has the details of a VF and has been bent, scratched, and corroded; (ca. 1910) **A. Coutret, Jr., Charco** (near Victoria), Good for 25 Cents in Trade—Genuine—NCS, brass, in our opinion the piece has the details of an AU, bright surfaces with occasional dabs of reddish patina; and an (ca. 1885) **Chamber of Commerce Saloon, Brackett(ville)**, I.O.U. One Drink—Genuine—NCS, German silver, in our opinion the piece has the details of an AU and has been holed, even corrosion over each side and subdued color. (Total: 3 tokens)
- 4225 Marion (Near San Antonio).** (ca. 1900) **Waldorf Club Saloon**, Good for 5 Cents at the Waldorf Club Saloon—Environmental Damage—NGC Details, XF, Brass. Even porosity gives the surfaces a matte-like appearance. Greenish-brown patina. Does another exist?
- 4226 Border Towns.** Included are: (ca. 1910) **Eagle Saloon, Laredo**, Good for 5 Cents in Merchandise—Environmental Damage—NGC Details, XF, copper, the obverse is smooth and problem-free and the reverse has light, even porosity; (ca. 1905) **Guadacanal, La Feria** (near Brownsville), Good for 5 Cents in Beer or Food—Genuine—NCS, German silver, in our opinion the piece has the details of an AU with light corrosion, dull, variegated gray surfaces; (ca. 1895) **Cattle Exchange, Del Rio**—Genuine—NCS, TX-DR-3, silver, in our opinion the piece has the details of an XF and has been cleaned, bright surfaces with a large Longhorn pictorial on the obverse; and an (ca. 1890s) **Vale Cajuelas Cafe, Rio Grande** (near Big Bend), Vale 2 (Cents)—Improperly Cleaned—NGC Details, AU, German silver, brightness is seen around the obverse devices and over the entire reverse. (Total: 4 tokens)

PATTERNS

Judd-73 Restrike 1838 Half Dollar, PR62

- 4227** 1838 Half Dollar, Judd-73 Restrike, Pollock-77, R.5, PR62 PCGS. The obverse, once attributed to Chief Engraver William Kneass, is more likely the work of assistant Christian Gobrecht. It depicts a large draped bust of Liberty facing left. A level flying eagle faces left, dominating the reverse. A restrike that has five different die cracks on the reverse. Struck in silver with a reeded edge. Fully struck and minimally toned with pleasing frost throughout the devices. The fields exhibit faint hairlines and subdued reflectivity. (#11288)

Popular 1859 Judd-228 Indian Cent Pattern, MS65

- 4228** 1859 Indian Cent, Judd-228, Pollock-272, R.1, MS65 PCGS. CAC. Snow-PT4. A popular transitional Indian cent pattern. The obverse has the regular issue 1859 Indian cent obverse design, and the reverse displays the issued 1860 Indian cent reverse. Struck in copper-nickel with a plain edge. Both sides have lovely tan luster with splashes of lemon and orange toning and bold design motifs. The reverse field is slightly reflective. Population: 61 in 65, 10 finer (10/10). (#11932)

Gem Proof Judd-325 1863 Ten Cents Interesting Postage Currency Pattern

- 4229** 1863 Ten Cents, Judd-325, Pollock-390, Low R.6, PR65 PCGS. The obverse depicts an ornamental shield with an inverted laurel wreath suspended from a ring. A pair of crossed arrows is behind the shield, with EXCHANGED FOR U.S. NOTES around the perimeter. The reverse has 10 CENTS 1863 in the center, with * POSTAGE CURRENCY * ACT JULY 1862 around. Struck in silver with a plain edge. Postage Currency was a half-hearted attempt to return coins to Civil War commerce. Ultimately, fractional currency was eventually issued instead. Deep apple-green, sun-gold, and rose-red toning blankets this satiny, well struck, and desirable Gem. Population: 2 in 65, 0 finer (10/10). (#60482)

Transitional 1866 No Rays Shield Nickel
Judd-507, PR65

- 4230 1866 Shield Five Cents, Judd-507, Pollock-591, R.5, PR65 PCGS.** This transitional pattern lacks the rays found on regular issue 1866 Shield nickels. Struck in nickel with a plain edge. The reverse differs slightly from 1867 No Rays business strikes, since a star points to the center of the first A in AMERICA, rather than between AM. Some rare 1867 proofs were struck from this reverse subtype, which is believed to be the first No Rays die. The fields on this piece are bright and deeply reflective, and each side shows just a bit of light patina. A lovely, Gem proof example of this popular Shield nickel pattern. (#60703)

Proof 1866 Seated Dollar in Copper
Reeded Edge, Judd-541

- 4231 1866 Dollar, Judd-541, Pollock-606, Low R.6—Improperly Cleaned—NGC Details. Proof.** The familiar Liberty Seated design, with the scroll and motto IN GOD WE TRUST added to the reverse. Both obverse and reverse designs were adopted to coin regular-issue 1866 silver dollars. Struck in copper with a reeded edge. A sharply struck specimen, cleaned in the past but with considerable remaining eye appeal thanks to orange and rose elements against the prevailing mahogany-olive color. (#60739)

1867 Shield Nickel Dies Trial in Copper
Judd-573, Pollock-650, MS65 Brown

- 4232 1867 Shield Nickel, Judd-573, Pollock-650, Low R.6, MS65 Brown PCGS.** Similar to the regular issue 1867 No Rays Nickel, but struck in copper (instead of copper-nickel) with a plain edge. Judd-573 has two variants, which slightly differ in the arrangement of the stars on the reverse. Pollock-650 has a star centered between the AM in AMERICA, unlike Pollock-649 which features the star beneath the first A in AMERICA. This boldly struck Gem has intermingled chestnut and walnut-brown colors. A network of fine die cracks on the obverse border suggest that the dies were in use prior to the production of this die trials piece. Clearly a circulation strike rather than the usual proof format for a pattern. Housed in a green label PCGS holder. (#60884)

- 4233 1869 Three Cent Nickel, Judd-676, Pollock-753, 755, R.4—Improperly Cleaned—NGC Details. Proof, AU Details.** Similar to the contemporary three cent nickel, except the date is larger and the denomination pillars are smooth. Struck in nickel with a plain edge. Lightly rubbed and cleaned in the past with scattered contact marks and a rim flaw at the upper left reverse, which suggest that this may have been carried as a pocket piece. (#60901)

1869 Standard Silver Dime, PR64
Judd-708, Deeply Toned and Upper-End

- 4234 1869 Standard Silver Ten Cents, Judd-708, Pollock-787, R.5, PR64 PCGS. CAC.** On the obverse Liberty faces right, wearing a headband that is adorned with a single large star in the forehead area. UNITED STATES OF AMERICA borders the upper periphery, with IN GOD WE TRUST in a curved ribbon below. Reverse: STANDARD SILVER around upper edge with 10 / CENTS in an oak and laurel wreath. Struck in silver with a plain edge. This is a fairly common Standard Silver issue both with a reeded edge and plain edge. It was also struck in copper and aluminum. The surfaces show deep blue-green toning and the fields are brightly reflective with the often-seen heavy die striations. (#60933)

**Judd-725 1869 Standard Silver Quarter
Struck in Aluminum**

- 4235** 1869 Standard Silver Quarter Dollar, Judd-725, Pollock-806, High R.7, Genuine PCGS. Proof. The PCGS number ending in .97 suggests Environmental Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, the piece has the details of a PR60 specimen that has environmental damage. Liberty faces left in a cap with stars. The Standard Silver reverse has a wreath of oak and laurel leaves with 25 CENTS crowded inside while the date is below. Struck in aluminum with a reeded edge. Greenish-brown oxidation spots, as seen on many aluminum pieces, dot each side. Nonetheless, this is an important example of its extremely rare variety. Previously certified as PR64/64 by NCI, insert included. (#60952)

**Judd-1293 1873 Trade Dollar Pattern
PR64 Cameo**

- 4236** 1873 Trade Dollar, Judd-1293, Pollock-1435, R.4, PR64 Cameo NGC. The design is similar to the issued Trade dollar, but Liberty's left hand rests on a globe, right hand holds a staff, and plow handles are behind the globe. On the reverse, the banner bearing E PLURIBUS UNUM is clutched by the eagle's beak, which also clutches a Federal shield in place of the usual olive branch. Struck in silver with a reeded edge. Moderately contrasted under rich patina in blues and gold-grays. Soft definition on the high central elements points to the striking problems that ultimately doomed the design. Census: 10 in 64, 4 finer (10/10). (#61578)

**1882 Liberty Nickel Pattern
Judd-1690, PR50**

- 4237** 1882 Liberty Head Five Cents, Judd-1690, Pollock-1892, R.5, PR50 ANACS. Ex: 2000 ANA Sale. This Liberty nickel pattern closely approximates the issued 1883 No Cents variety, although there are slight differences in the positioning of the devices relative to the stars and peripheral legends. Struck in nickel with a plain edge. This is a true transitional striking for the Liberty nickel; in fact, in the past it has been described as the "exact issue of 1883." Just the slightest trace of rub is seen on each side. The fields retain deep reflectivity with noticeable cameo contrast evident also. Gray-rose patina is seen over each side. Ex: 2000 ANA Sale (Bowers and Merena, 8/2000), lot 4083. (#62095)

**Annular 1885 Cent Pattern
Judd-1740, Pollock-1950, PR45**

- 4238** 1885 One Cent, Judd-1740, Pollock-1950, High R.6, PR45 PCGS. This annular pattern cent has a central perforation with a smooth, raised edge. The obverse has UNITED STATES OF AMERICA above with the date 1885/3 at the bottom of that side. On the reverse, ONE CENT is in large letters at the top with a small shield below flanked by laurel sprigs. Struck in silver with a plain edge. This is Eastman Johnson's design, a clever but eventually unadopted concept. This proof shows considerable rub on the sage-silver surfaces, consistent with time spent as a pocket piece, for example. (#62181)

GOLD DOLLARS

Rare Gem 1849 Closed Wreath Gold Dollar

- 4239 1849 Closed Wreath MS65 PCGS. CAC.** The 1849 Closed Wreath gold dollars are much rarer than their Open Wreath counterparts, especially in high grade. The present coin is an impressive Gem, with a razor-sharp strike and bright mint luster, under rich orange and rose-gold patina. Population: 14 in 65, 3 finer (11/10). (#7503)

- 4240 1849-O Open Wreath MS62 NGC.** Effusive luster with streaks of startling brilliance amid the canary-yellow frost over each side. A charming Mint State coin with few severe abrasions. NGC has certified 75 numerically finer pieces (10/10).(#7508)

- 4241 1850-D XF40 ANACS. Variety 2-C.** Sole die pair for the year. Typically soft strike on the high parts of the devices with yellow-gold outer areas and green-gold centers. This moderately abraded Dahlonega gold dollar is housed in a small-format holder. (#7511)

1851 Gold Dollar, MS66 Excellent Color and Luster

- 4242 1851 MS66 PCGS.** With a mintage of 3.3 million pieces, the 1851 gold dollar is an available date, especially popular with type collectors. Of course the population drops off in higher grades, and the 1851 is rare at the Premium Gem level. This spectacular specimen features pinpoint definition on the devices, with vibrant mint luster, and pleasing orange-gold surfaces. Housed in a green label holder. Population: 21 in 66, 9 finer (10/10). (#7513)

- 4243 1852 MS64 NGC. CAC.** A frosty and boldly defined Choice Mint State example, this Type One gold dollar is suitable for a high quality gold type set or specialized collection of gold dollars. The eye appeal of this piece is excellent despite a few trivial surface marks. (#7517)

- 4244 1852-C AU50 PCGS. Variety 2.** The only collectible reverse die of this Charlotte issue, identified by repunching below the 1 in the date. This original green-gold representative has its share of luster about the design, and the few field marks are faint and unimportant. A strike-through on the A in DOLLAR is mint-made and typical for the variety. (#7518)

Shimmering MS64 1852-O Gold Dollar

- 4245 1852-O MS64 NGC.** The 1852-O is the rarest Type One gold dollar after the 1850-O. Doug Winter (2006) estimates 50-60 examples are extant in all Mint State grades, and this near-Gem seems tied with several others at the lower range of the Condition Census for the issue. This is a fully original 1852-O gold dollar, the surfaces shimmering with bright yellow-golden hues. Most of the devices are free of mentionable striking incompleteness, save for a typical area of central weakness on the reverse. Pleasingly vibrant luster enhances the eye appeal of this already attractive representative. Census: 5 in MS64, 1 finer (10/10). (#7520)

- 4246 1853 MS64 NGC. CAC.** Pleasingly detailed for the type, especially on the often-weak hair below the coronet. Deep butter-yellow color with considerable satin to the luster. Struck from slightly rotated dies. (#7521)

1853-D Gold Dollar, Unc. Details Low-Mintage D-Mint Favorite

- 4247 1853-D—Obverse Scratched—NGC Details. Unc. Variety 5-G.** The only variety for the date. The 1853-D gold dollar is a low-mintage issue, with a reported production figure of 6,583 pieces. Doug Winter estimates a surviving population of 110-120 examples in all grades. The present coin is a sharply struck specimen, with greenish-gold, semiprooflike fields. As noted on the holder, the obverse fields display a scattering of abrasions, only two of which are worthy of mention. (#7523)

- 4248 1853-O MS62 NGC.** Brighter than usually seen with a considerable reflective component to the luster. Well struck for the type with pale yellow-gold surfaces. A pleasing O-mint gold dollar. (#7524)

Near-Gem 1854 Type Two Gold Dollar

4249 1854 Type Two MS64 NGC. The first year of the type collector classic, offered here as a remarkable near-Gem. Both sides have rich, blossoming luster in a succession of deep yellows and oranges, and while the strike is hardly full in the centers, features such as the knot in the bow are remarkably well-defined for a Type Two gold dollar. The Type Two gold dollars from Philadelphia are among the most sought-after coins in the series, and while adequate supply makes the two dates “available for a price” even in lower Mint State grades, by the near-Gem level the 1854 is elusive. NGC has graded just 35 numerically finer pieces (10/10). (#7531)

4250 1855 AU58 NGC. This attractive Type Two gold dollar has lustrous light yellow surfaces and sharp design motifs including an unusually sharp date. Only a trace of wear prevents a Mint State grade. (#7532)

4251 1855 MS61 NGC. The 1855 gold dollar is a popular choice for type collectors seeking an example of the three-year Type Two design. The present coin is lightly struck in the centers, as most are, but the peripheral devices are sharp. The lustrous surfaces are light greenish-gold, with rose highlights. (#7532)

1855 Gold Dollar, MS64+
In-Demand Type Two Issue

4252 1855 MS64+ PCGS. CAC. The 1855 gold dollar was produced in large numbers, but production values were not high, resulting in a limited supply of high grade examples. Adding to the popularity of this issue is its status as a short-lived 19th century type coin. The Type Two design was only minted from 1854-1856, and type collectors compete intensely for high grade specimens of this issue. Both sides of the present coin show heavy clashmarks, as often seen on this date, but the design elements are well struck. The reverse lettering and the date are much bolder than usually seen on the 1855, and the obverse shows just a touch of softness on LIBERTY. The surfaces are an attractive orange-gold color, and the mint luster is especially vibrant. The high-end status of this coin is confirmed by the plus designation. (#7532)

4253 1855-O AU50 PCGS. Deep butter-yellow color in the centers turns even deeper at the rims, particularly on the reverse. An important representative of this sole O-mint Type Two gold dollar issue. (#7535)

4254 1855-O AU53 NGC. Hints of green appear on the light yellow surfaces of this scarce Type Two gold dollar. A small rim blemish is evident at 9 o'clock. (#7535)

**1855-O Gold Dollar, MS61
Last O-Mint Gold Dollar**

- 4255 1855-O MS61 NGC.** The 1855-O is the only Type Two gold dollar from the New Orleans Mint, with a mintage of 55,000 pieces. Few examples were saved by collectors, and the issue is rare in Mint State. The present coin is well struck, with prooflike greenish-gold surfaces. Census: 21 in 61, 39 finer (10/10). (#7535)

Desirable 1855-O Gold Dollar, MS61

- 4256 1855-O MS61 NGC.** The only New Orleans Mint gold dollar of the Type Two design, the 1855-O is highly popular with type collectors. This lovely piece has light green-gold luster with frosty surfaces. The strike is sharp, although the 8 is a trifle weak as usual. Here is an attractive and rare gold dollar. Census: 21 in 61, 39 finer (10/10). (#7535)
- 4257 1856-S Type Two AU50 NGC.** The 1856-S Type Two gold dollars were the last of their design, struck a full year after the other Mints transitioned to the Type Three. This lightly worn yellow-orange example retains considerable luster in the fields, which are occasionally reflective. (#7536)

Pleasing XF 1856-D Gold Dollar

- 4258 1856-D XF40 PCGS. CAC. Variety 8-K.** The only known dies, hardly a surprise given the minuscule mintage of 1,460 pieces. This is a charming green-gold example. Neither side has any remotely relevant abrasions. We do note a few vertical roller marks on the portrait, as struck from an indifferently prepared planchet, and minor mint-made clashmarks outline the profile. The U in UNITED and the 5 in the date are lightly brought up, as usual for this rare Dahlonga issue. (#7543)
- 4259 1857 MS64 NGC. CAC.** Excellent detail for this early issue in the Type Three series. Crisp yellow-gold luster takes on canary elements close to the rims. A great near-Gem. (#7544)

- 4260 1857-C—Improperly Cleaned—NGC Details. AU. Variety 1.** Sole die pair for the year. Though cleaning has disturbed the faintly green-gold luster, the well-defined central devices show scant evidence of wear. (#7545)

**1857-C Gold Dollar, AU50
An Underappreciated Charlotte Issue**

- 4261 1857-C AU50 PCGS. Variety-1.** This low-mintage Charlotte issue is well-known for its uniform softness of high point detail. This piece is no exception (it appears there are no exceptions), but the surfaces are generally lightly abraded with no mentionable marks on either side. The color is subdued with a reddish underlying tint. Only 13,280 pieces were struck, and today it is estimated that of the 300-400 that are known only 38-47 are Almost Uncirculated. (#7545)
- 4262 1858 MS63 PCGS. CAC.** Rich canary-gold luster with elements of both green and sun-yellow scattered in the fields. A well struck Select coin from early in the Type Three series. Population: 24 in 63, 35 finer (10/10). (#7548)

Low-Mintage 1858-D Gold Dollar, XF45

- 4263 1858-D XF45 PCGS. Variety 10-M.** The only die pair identified from a mintage of 3,477 gold dollars at Dahlonga in 1858. This pleasing piece has light green-gold surfaces with considerable light orange and iridescent toning near the obverse and reverse borders. A lovely example for the grade, combining quality and affordability. (#7549)
- 4264 1859 MS63 PCGS. CAC.** A scarce issue, the 1859 gold dollar is elusive in all Mint State grades. This piece has frosty yellow and honey-gold surfaces, an attractive example despite evidence of central weakness on both sides. Population: 42 in 63, 51 finer (11/10). (#7551)
- 4265 1859-S AU58 NGC.** Only a slight trace of wear interrupts the rich orange-gold luster of this desirable gold dollar. The surfaces have a few insignificant marks, including minor rim blemishes at 3 o'clock on the obverse. Census: 42 in 58, 15 finer (10/10). (#7554)
- 4266 1861 MS64 NGC. CAC.** A faintly green-gold near-Gem struck from distinctly clashed dies. Excellent definition on the fine details of Liberty's hair and the often-weak lower wreath area. (#7558)
- 4267 1861 MS64+ PCGS. CAC.** A top-notch near-Gem that has an inherently flashy quality to sun-yellow surfaces. A few breaks in the shallow frosty "skin" of the coin reveal patches of startling peripheral brilliance. (#7558)

- 4268 1871 MS61 NGC.** Considerable mirrors on distinctly green-gold surfaces. A well-defined example that shows scattered wispy abrasions and a small disturbance off the last feather in the headdress. Census: 19 in 61, 63 finer (10/10). (#7571)
- 4269 1871 MS61 NGC.** A flashy canary-yellow coin that is well struck and pleasing. Small flaws in the fields and a couple of slide marks on the cheek combine to account for the grade. (#7571)
- 4270 1873 Closed 3 MS61 NGC.** Minor surface marks on each side limit the grade of this pleasing gold dollar. Both sides have evidence of prooflike fields around satiny devices. Census: 18 in 61, 34 finer (10/10). (#7574)
- 4271 1876 MS62 Deep Mirror Prooflike ANACS.** Boldly struck with impressive reflectivity, even by the standards of this low-mintage gold dollar issue. Rich yellow-gold color shows minor orange accents which complete the eye appeal. (#7577)
- 4272 1880 MS65 ★ NGC. CAC.** A gleaming Gem with a prominently reflective, virtually Prooflike obverse, though the reverse has less visible mirrors. Crisply detailed and gorgeous with pale canary-gold color. (#7581)

**1880 Gold Dollar, MS68+
Only One Coin Certified Finer at PCGS**

- 4273 1880 MS68+ PCGS.** A minuscule mintage of 1,600 business-strike gold dollars was accomplished at the Philadelphia Mint in 1880. The present coin is one of the finest surviving examples, with prooflike orange-gold surfaces, and an exemplary strike. The eye appeal of this piece is simply overwhelming. Population: 22 in 68, 1 finer (11/10). (#7581)

**1880 Gold Dollar, MS66 Prooflike
Impressive and Nicely Mirrored**

- 4274 1880 MS66 Prooflike NGC.** With its combination of MS66 quality and the scarcity suggested by an original mintage of only 1,600 pieces, this is sure to be a very popular item with both date and type collectors. The surfaces are bright and flashy with strong prooflike fields. The devices have a chiseled appearance that tells of the coin's complete striking definition. Some slight counterclockwise die rotation is also noted. Census: 8 in 66 Prooflike, 8 finer (10/10). (#77581)

**1881 Gold Dollar, MS67+
High-Quality, Low-Mintage Example**

- 4275 1881 MS67+ PCGS. CAC.** A high-end Superb Gem specimen of this always in-demand gold dollar, from a tiny mintage of 7,620 pieces. Incredibly bright mint luster catches the eye on both sides of this magnificent coin, complementing the needle-sharp strike and attractive, greenish-gold surfaces. Population: 82 in 67, 36 finer (11/10). (#7582)

**1881 Gold Dollar, MS67+
Spectacular Eye Appeal**

- 4276 1881 MS67+ PCGS. CAC.** A small mintage of 7,600 gold dollars was achieved by the Philadelphia Mint in 1881. Luckily, the issue was hoarded by speculators, and some truly magnificent examples have been preserved. The present coin is a high-end Superb Gem, with an exemplary strike and prooflike, orange-gold surfaces. Eye appeal is spectacular. Population: 82 in 67, 36 finer (10/10). (#7582)

**Superb Gem 1882 Gold Dollar
Prooflike Surfaces, Outstanding Eye Appeal**

- 4277 1882 MS67 NGC. CAC.** Brightly reflective prooflike fields are the norm for 1882 gold dollars, from a tiny mintage of 5,000 pieces. The present coin offers glittering greenish-gold surfaces that contrast boldly with the sharply struck devices. Eye appeal is outstanding. Census: 36 in 67, 12 finer (10/10). (#7583)

Incredible 1883 Gold Dollar, MS67

- 4278 1883 MS67 NGC. Attractive brassy-gold surfaces on this Superb Gem yield partially prooflike fields that establish some contrast with mildly frosted motifs. A well executed strike brings out sharp definition on the design elements, and close examination reveals no mentionable marks. Jeff Garrett and Ron Guth (2006) mention that they often see copper stains and rim irregularities on examples of this issue. No such blemishes exist on this particular example. (#7584)

Important 1884 Gold Dollar, MS67

- 4279 1884 MS67 NGC. Business strike gold dollars from the mid 1880s are elusive, partly due to high proof mintages that satisfied most contemporary collectors. Considered a hoard date at one time, those coins are well distributed today, and high grade examples are rare. This piece has reflective, prooflike light yellow surfaces with subtle contrast. Census: 14 in 67, 6 finer (10/10). (#7585)

Premium Gem 1887 Gold Dollar Prooflike Surfaces

- 4280 1887 MS66 PCGS. The 1887 gold dollar boasts a low mintage of just 7,500 pieces. Fortunately, the survival rate is relatively high, even for high grade pieces. At the Premium Gem level, the 1887 is only very scarce, rather than "impossible." The present coin displays vivid orange-gold color, with immaculate, prooflike surfaces. Housed in a green label holder. Population: 55 in 66, 23 finer (10/10). (#7588)

- 4281 1887 MS66 PCGS. CAC. Effusive, softly frosted yellow-gold luster marks this Premium Gem as a beautiful business strike. Exquisitely detailed and carefully preserved, a delicate charmer. Population: 55 in 66, 23 finer (10/10). (#7588)

- 4282 1888 MS64 NGC. A flashy example of this penultimate gold dollar business strike issue, rich yellow-gold at the margins with paler straw-gold color at the interiors. Exquisitely detailed and slightly satiny. (#7589)

Frosty 1889 Gold Dollar, MS67

- 4283 1889 MS67 NGC. Any Superb Gem gold dollar is a wonderful coin, and the present piece issued at the very end of that series is a beauty. Both sides have sharp design details, frosty light yellow luster, and pristine surfaces. NGC has only certified 16 finer examples in more than 20 years of coin grading (10/10). (#7590)

PROOF GOLD DOLLARS

Amazing 1859 Gold Dollar PR64 Ultra Cameo

- 4284 1859 PR64 Ultra Cameo NGC. This gorgeous near-Gem Ultra Cameo proof is extremely desirable for its deep honey-gold color and amazing contrast. Deeply mirrored fields frame the yellow-gold devices that retain full frosty mint luster. A few faint hairlines and other blemishes clearly limit the grade of this example. Census: 2 in 64 Ultra Cameo, 5 finer (10/10). (#97609)

1870 Gold Dollar, PR65 Cameo
Only One Coin Certified Finer at NGC

4285 1870 PR65 Cameo NGC. Only 35 proof gold dollars were minted in 1870, and some of them were probably not sold. While most advanced collectors of the era ordered proof sets to fill their runs of current coins, it is known that some prominent numismatists chose to acquire Mint State specimens instead in 1870. The actual number of proof 1870 gold dollars released from the mint is not known, but experts believe no more than 12-15 specimens are extant today in all grades.

The present coin is a sharply detailed Gem, with frosty devices and deeply mirrored fields. The surfaces are a light greenish-gold color and the field-device contrast is exceptional. Currently, NGC has certified only this coin in PR65 Cameo, with a single example finer (10/10). (#7620)

Gorgeous PR66 1885 Gold Dollar

4286 1885 PR66 PCGS. CAC. While the high mintages of proof 1880s gold dollars, a trend spurred at least in part by their popularity as gifts among the Northeastern elite, has made such pieces readily available in lesser grades, coins finer than Gem remain elusive and prized. This PR66 example was certified during the green-label era, and both sides show considerable contrast, though it is questionable whether it would merit a Cameo designation today. Gleaming fields are mostly rich yellow-gold, though both obverse and reverse show considerable cores of pale silvery color. Population: 15 in 66, 3 finer (10/10). (#7635)

Lovely 1885 Gold Dollar, PR64 Cameo

4287 1885 PR64 Cameo PCGS. CAC. A stunning Cameo proof, this 1885 gold dollar has rich orange-gold surfaces. Both sides have deeply and fully mirrored fields that surround its frosty and sharply defined design motifs. Minor scratches inside the right branch of the wreath prevent a higher grade. Only one of every six PCGS submissions are designated Cameo or Deep Cameo. Population: 3 in 64 Cameo, 3 finer (11/10). (#87635)

Proof 1888 Gold Dollar

- 4288 1888 Genuine PCGS. Proof.** The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable, and the holder lists "Surfaces Tooled." In our opinion, this piece has the details of a PR60 specimen that has been lacquered and has foreign matter trapped in the lacquer. Yellow-gold fields gleam with luster, and the strike on the devices is sharp. A thoroughly appealing piece for a coin in a PCGS Genuine holder, with the appearance most reminiscent of a Select proof. (#7638)

Choice XF 1839-D Two and a Half

- 4291 1839-D XF45 PCGS. Winter 1-B, McCloskey-B, Variety-25, R.4.** The scarcer of the two die varieties known for this important issue, the only one of the Classic quarter eagle type from the Dahlonega Mint. A scant 13,674 pieces were struck, and the few hundred survivors are in great demand. This pale green-gold example has plentiful traces of luster, and marks are inconsequential aside from a faded thin diagonal mark on the jaw. Encased in a green label holder. Population: 27 in 45, 53 finer (11/10). (#7700)

CLASSIC QUARTER EAGLES

1834 Classic Head Quarter Eagle, MS61 Premium Quality for the Grade

- 4289 1834 Classic MS61 NGC. Breen-6138, Variety-1, R.1.** The Small Head variety. The most plentiful of four known 1834 Classic Head quarter eagle varieties. This lustrous green-gold example has excellent surfaces for the grade, with only a few small abrasions on each side. The central obverse and reverse design details are remarkably well defined. (#7692)

Pursued AU50+ 1839-D Quarter Eagle

- 4292 1839-D AU50+ PCGS. CAC. Winter 1-A, Variety-26, R.3.** A lightly circulated example of this popular Dahlonega issue, which is essential to a complete type set from the legendary Southern branch mint. Better struck than usual, with incompleteness limited to the junction of the shield with the left (facing) wing. The straw-gold surfaces display no consequential marks, although Liberty's cheek has a small oblong flan flaw, as made. Population: 19 in 50, 34 finer (11/10). (#7700)

LIBERTY QUARTER EAGLES

Elusive AU 1839 Two and a Half

- 4290 1839 AU50 PCGS. Breen-6148, Variety-21, R.3.** Only a single die marriage is known for the final-year 1839, a scarce issue with a low mintage of 27,021 pieces. This is a dusky tan-gold AU example with a pleasing strike and an original appearance. Essentially unabraded save for three faint pinscratches, two on the upper reverse field and the third above Liberty's lip. (#7698)

Smooth AU 1840-C Two and a Half

- 4293 1840-C AU50 PCGS. Variety 1.** The sole dies. An intricately struck Charlotte two and a half that benefits from the absence of consequential marks. Luster glimmers from design elements, and the honey-gold surfaces are luminous. The mintage was only 12,822 pieces. Housed in a green label holder. Population: 19 in 50, 32 finer (11/10). (#7718)

Lustrous AU53 1842-C Quarter Eagle

- 4294** 1842-C AU53 PCGS. **Variety 1.** Sole die pair for the year. With a mintage of just 6,729 pieces, this earlier Charlotte quarter eagle is a condition rarity even in the better circulated grades. This still-lustrous example offers a mix of old-gold honey-orange and elements of lighter yellow. Well struck with only a handful of significant marks. Population: 4 in 53, 9 finer (10/10). (#7724)

Mint State Sharpness 1843-C Quarter Eagle Plain 4, Large Date

- 4295** 1843-C Large Date, Plain 4—Improperly Cleaned—NGC Details. **Unc. Variety 1.** No wear is evident on this green-gold Charlotte quarter eagle, which is from a die state early enough to show slight repunching beneath the 8 in the date. The fields are faintly hairlined, and the centers show softness of strike, but no abrasions are apparent, aside from an inconspicuous thin mark on the left (facing) wing. (#7728)
- 4296** 1843-D Large D—Improperly Cleaned—NGC Details. **XF. Variety 4-H.** Not specifically listed as such on the holder, but the huge mintmark is crammed into the available space. Yellow-gold surfaces are glossy from cleaning with several abrasions on and to the left of the portrait. (#7730)

Luminous Choice AU 1844 Quarter Eagle

- 4297** 1844 AU55 NGC. **CAC.** A still-lustrous Choice AU example of this pre-California Gold Rush quarter eagle issue, luminous on the obverse with a brighter appearance on the yellow-gold reverse. Well struck for this low-mintage date, though the eagle's legs show a measure of the usual softness. Census: 13 in 55, 21 finer (10/10). (#7734)
- 4298** 1844-D VF25 PCGS. **Variety 5-H.** The more commonly seen of two varieties for the year. Yellow-orange with a VF-appearing obverse and a seemingly more worn reverse, though the latter is due to a typically soft strike. Remarkably radiant for a VF-range piece. (#7736)

Choice XF 1844-D Quarter Eagle

- 4299** 1844-D XF45 PCGS. **Variety 5-I.** The rarer of the two known die marriages for this challenging Dahlonega issue, which has a mintage of only 17,332 pieces. The present lot is an evenly struck tan-gold quarter eagle with moderate wear on Liberty's forehead and the curl above the ear. Marks are mostly inconsequential, although we note a brief pinscratch between stars 4 and 5. (#7736)

- 4300** 1845-D Fine 15 NGC. **Variety 6-I.** This straw-gold low mintage Dahlonega quarter eagle has surprisingly sharp definition on the stars. A loupe reveals marks on Liberty's jaw and near the arrowheads that are consistent with diverse antebellum circulation. (#7738)

- 4301** 1845-D—Improperly Cleaned—NGC Details. **AU. Variety 6-I.** Sole die pair for the year. Typically soft strike but with little wear on the high points. Greenish-gold surfaces show the after-effects of cleaning, and a rim depression appears just above 3 o'clock on the obverse. (#7738)

- 4302** 1845-O Fine 15 PCGS. This storied quarter eagle issue was once thought to be a major rarity, primarily because it was unlisted in the Mint report for the year. B. Max Mehl claimed discovery of the 1845-O in the early 20th century. Although considerably worn, this example is attractive with natural honey-gold surfaces and faint hairlines only visible under close inspection. (#7739)

1847-C Two and a Half, XF45

- 4303** 1847-C XF45 PCGS. **Variety 1.** Luster occupies the reverse border, and outlines individual stars. The coronet and shield are also lustrous. LIBERTY is lightly brought up, but the overall strike is sharp. This scarce Charlotte Mint quarter eagle is free from distracting marks and has light olive-green and straw-gold color. (#7745)

**Near-Mint 1848 Quarter Eagle
Low-Mintage Issue, Rare in High Grade**

- 4304 1848 AU58 NGC.** Although the regular-issue 1848 Liberty Head quarter eagle tends to be overshadowed by its famous CAL. counterpart, the 1848 is a rare issue in its own right. Only 6,500 regular quarter eagles were minted at the Philadelphia Mint in 1848, and near-Mint examples are quite rare today. The present coin is a well struck example, with the usual weakness on the eagle's leg. The prooflike surfaces display mingled green and rose-gold hues. Census: 13 in 58, 19 finer (10/10). (#7748)

Attractive 1848-C Quarter Eagle, XF45

- 4305 1848-C XF45 PCGS. Variety-1.** The usually seen variety of 1848-C quarter eagles. The date has an obvious downward slant from left to right. This lovely Choice XF specimen has light green-gold surfaces with considerable remaining luster for the grade. Population: 23 in 45, 39 finer (10/10). (#7750)
- 4306 1848-D Genuine PCGS. Variety 10-M.** The PCGS number ending in .95 suggests Scratched as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been scratched. A pinscratch between stars 11 and 13 is only mildly distracting, while faint hair-thin marks on the cheek and beneath the chin are of little interest. A thread is struck-in near the bust tip, and golden toning beneath the right wing conceals faded abrasions. Well struck with lustrous borders. (#7751)
- 4307 1848-D—Improperly Cleaned—NGC Details. XF. Variety 10-M.** This Dahlonga quarter eagle displays moderate wear on the eagle. The obverse has sharper detail, although a few small ticks are noted on the rim. Faint hairlines are evident beneath rich green-gold toning. Only 13,771 pieces were struck. (#7751)

**1849 Quarter Eagle, MS63
Only Two Coins Certified Finer**

- 4308 1849 MS63 PCGS.** The 1849 Liberty Head quarter eagle boasts a modest mintage of 23,294 pieces, and the date is very rare in Select Mint State condition. The coin offered here displays sharply defined design elements on the obverse, but a touch of softness shows on the eagle's leg on the reverse. The surfaces are a light greenish-gold color, with bright mint luster on the obverse and areas of prooflike reflectivity on the reverse. Population: 5 in 63, 2 finer (10/10). (#7752)

**Choice AU 1849-D Quarter Eagle
Scarce, Low-Mintage Date**

- 4309 1849-D AU55 NGC. Variety 11-M.** The 1849-D quarter eagle is a scarce date, from a mintage of 10,945 pieces. Doug Winter estimates a surviving population of 115-135 examples in all grades, with 25-31 specimens extant in AU. Two varieties are known, with this coin representing the more available Variety 11-M, characterized by the higher position of the date. The present coin is a sharply detailed, orange-gold example, with much original mint luster. (#7754)
- 4310 1850-O AU58 NGC. CAC.** From a mintage of just 84,000 pieces, the 1850-O quarter eagle is a scarce issue in all grades. Doug Winter estimates a surviving population of 175-225 examples, with perhaps 36-41 specimens extant at AU levels. This coin is well struck, with some typical softness seen on the central reverse. The lustrous surfaces are a bright greenish-gold color. Census: 65 in 58, 11 finer (10/10). (#7758)
- 4311 1851 MS64 PCGS. CAC.** Hints of orange grace rich butter-yellow surfaces that show more than a touch of satin in their texture. A strongly struck near-Gem with generous eye appeal. PCGS has graded just four coins finer (10/10). (#7759)

Desirable 1851-D Quarter Eagle, XF45

- 4312 1851-D XF45 PCGS. Variety 14-M.** The only known variety for the date. Light yellow and orange-gold surfaces retain traces of luster in the protected areas, visible through dusky toning. Rather sharply defined for the date and the grade, and a desirable representative from a low mintage of 11,264 coins. Population: 24 in 45, 33 finer (10/10). (#7761)
- 4313 1851-O AU58 PCGS. CAC. Breen-6214.** The date is lightly repunched near the bases of the digits. A pleasing green-gold Borderline Uncirculated New Orleans quarter eagle that has a smooth appearance and considerable peripheral luster. Population: 10 in 58, 14 finer (10/10).(#7762)
- 4314 1853 MS64 PCGS. CAC.** This yellow-gold near-Gem has satiny fields laced with honey-orange hues. Well-defined at the margins, though areas such as Liberty's brow and the eagle's legs show a measure of weakness. Population: 61 in 64, 6 finer (10/10). (#7767)
- 4315 1854-O AU55 PCGS.** Plentiful luster brightens the margins and devices of this lovely orange-gold Choice AU New Orleans type coin. Remarkably free from abrasions. Expect to pay a premium to secure this example, which is housed in a green label holder. (#7772)

Near-Mint 1855-C Two and a Half

- 4316 1855-C AU58 PCGS. Variety 1.** A pumpkin-orange Borderline Uncirculated example of this desirable low mintage Charlotte issue. The luminous surfaces are free from consequential contact, and the strike is reasonable despite customary incompleteness on the lower half of the eagle and on the uppermost stars. A stingy 3,677 pieces were struck. Population: 5 in 58, 7 finer (11/10). (#7775)
- 4317 1856-O AU50 NGC.** The mintage of 21,100 coins is a good indication of the scarcity of 1856-O quarter eagles. These coins were considered scarce in 1893, when Augustus Heaton wrote about New Orleans quarter eagles: "The rarest date is 1841, and 1842, '39, '56, '40 and '57 are scarce." An attractive light yellow representative, this piece has satiny surfaces with some remaining luster. (#7780)

Exceptional AU55 1857-D Quarter Eagle

- 4318 1857-D AU55 PCGS. Variety 20-M.** A pleasing orange-gold Choice AU Dahlonega two and a half. Bright luster dominates the peripheries and fills the devices. The strike is uncommonly sharp for the remote Georgian facility, with the usually-seen mushiness limited to the denticles. No marks are evident. The color and quality of the present piece ensures it will hammer for a significant premium over the typical example. A mere 2,364 pieces were struck. Certified in a green label holder. Population: 15 in 55, 27 finer (11/10). (#7783)
- 4319 1857-S AU55 NGC.** Intense orange-gold color is luminous with occasional pockets of brighter yellow. A briefly circulated but undeniably appealing San Francisco quarter eagle. (#7785)
- 4320 1859 Old Reverse, Type One AU58 NGC.** The rarer of the two 1859 subtype varieties, identified by the top two arrowheads, which barely touch on the Old Reverse but are clearly separated on its successor. Pockets of bright luster illuminate the margins of this momentarily circulated example. Smooth save for a single hair-thin mark above the eagle's head. (#97788)
- 4321 1859 Old Reverse, Type One MS61 NGC.** The mintage of 39,364 quarter eagles was distributed more or less evenly between old hub and new hub reverse dies, but few of either survive in Mint State grades. Although weak at the centers, this satiny Mint State piece has excellent eye appeal with satiny pink luster. Census: 18 in 61, 15 finer (10/10).(#97788)

1860 Old Hub Reverse, AU58 A Scarce Subtype

- 4322 1860 Old Reverse, Type One AU58 PCGS.** Vibrant sun-yellow and orange-gold colors dominate each side of this notable near-Mint example. The central devices are crisply struck and show only the slightest trace of friction. A handful of tiny abrasions are present in the shining fields, but these are minor quibbles in context. Population: 3 in 58, 8 finer (10/10). (#97791)

**Gem 1861 Quarter Eagle, New Reverse
Only One Coin Certified Finer at NGC**

- 4323 1861 New Reverse, Type Two MS65 NGC.** The 1861 quarter eagle, with the new reverse, is a favorite issue with type collectors seeking a representative piece from the Civil War era. Of course, examples in Gem Mint State condition are quite rare. The present coin is a lustrous Gem, with rose-gold surfaces and an exemplary strike. Census: 13 in 65, 1 finer (10/10). (#7794)

Intriguing AU53 1862/1 Quarter Eagle

- 4324 1862/1 AU53 NGC. FS-301.** This *Guide Book* variety went unidentified by collectors for nearly a century after its striking, and today, high-end circulated examples are conditionally rare. This is one such coin, mildly reflective in wheat-gold fields. The long feature under the left side of the date is readily visible under magnification. For the variety, Census: 4 in 53, 38 finer (10/10). (#7797)

Important Near-Mint 1863-S Quarter Eagle

- 4325 1863-S AU58 PCGS.** Strongly struck through the centers with bright yellow-gold surfaces that show only a trace of friction. Minimally abraded with great all-around eye appeal that is rarely associated with S-mint Liberty quarter eagles, much less a Civil War date. Population: 3 in 58, 3 finer (10/10). (#7799)

- 4326 1864—Mount Removed—NCS. Good Details.** Only 2,824 pieces were struck and surprisingly few have survived, unlike the 1866 which has a similar production. This well circulated example is glossy and a bit bright from cleaning. A horizontal pinscratch crosses the eagle. The edge is damaged near 12 o'clock, where a mount was removed. (#7800)

- 4327 1869 AU58 PCGS. CAC.** A lovely example, this near-Mint 1869 quarter eagle has brilliant yellow luster with reflective fields around boldly detailed design elements. Only 4,300 of these were minted, and few survive any finer. Population: 20 in 58, 7 finer (11/10). (#7809)

- 4328 1869-S AU58 PCGS. CAC.** Saturated lemon-yellow color with just a few watery areas in the fields. This is a gorgeous near-Mint coin, softly struck on the eagle and lightly rubbed yet immensely appealing for the issue. Population: 17 in 58, 14 finer (10/10). (#7810)

- 4329 1871-S MS61 NGC.** Dynamic luster fills the borders and devices of this canary-gold example. The strike is good except for softness on the eagle's left (facing) leg. A meager mintage of 22,000 pieces ensures the rarity of Uncirculated survivors. Census: 10 in 61, 18 finer (10/10). (#7814)

- 4330 1874 AU58 NGC.** Fantastically reflective fields, as befits this low-mintage issue. Well-defined with just a touch of rub across the canary-gold central devices. (#7821)

Impressive MS64 1878-S Quarter Eagle

- 4331 1878-S MS64 PCGS. CAC.** While the 1878-S quarter eagle has a more generous mintage than many of its contemporaries, it is nonetheless a condition rarity above the Select level. This is an attractive near-Gem with bright yellow luster and strong definition across the portrait and eagle. Population: 9 in 64, 1 finer (11/10). (#7829)

**Choice 1878-S Quarter Eagle
Prooflike Surfaces, Nice Contrast**

- 4332 1878-S MS64 NGC.** If this coin did not have an S mintmark, it could easily be mistaken for a proof. The greenish-gold surfaces are brightly reflective, and contrast boldly with the frosty devices. The strike is razor-sharp throughout, and no mentionable imperfections are noted. Census: 15 in 64, 3 finer (10/10). (#7829)

- 4333 1879 MS64+ PCGS.** Exquisitely detailed with positively effusive sun-gold luster. The epitome of a near-Gem, just one or two marks away from qualifying for the next level. PCGS has graded just 15 coins in MS65 or better (10/10). (#7830)
- 4334 1879-S AU55 NGC.** Impressively lustrous, almost flashy, with just a touch of rub on well struck surfaces. Scattered small abrasions appear in the fields. Previously graded MS60 by Accugrade; insert accompanies lot. (#7831)
- 4335 1896 MS64 PCGS. CAC.** Deep amber-gold luster swirls with generous orange overtones. A well-defined near-Gem from an issue of just 19,000 business strikes. PCGS has graded 86 coins finer (10/10). (#7848)
- 4336 1900 MS65 PCGS. CAC.** Strong orange overtones grace the yellow-gold surfaces of this turn-of-the-century Gem. Boldly struck with a touch of satin to the luster. PCGS has certified 62 finer pieces (10/10). (#7852)
- 4337 1900 MS66+ NGC. CAC.** Sea-green and caramel-gold toning embraces this needle-sharp and coruscating high grade quarter eagle. The obverse exhibits a partial wire rim. Census: 1 in 66+, 33 finer (10/10). (#7852)

**Superb Gem 1902 Quarter Eagle
None Certified Finer at PCGS**

- 4338 1902 MS67 PCGS. CAC.** The 1902 Liberty Head quarter eagle was a well produced issue and enjoys great popularity with type collectors. The present coin is a magnificent Superb Gem, with pristine yellow-gold surfaces and rose highlights. Fully struck, this specimen also possesses especially vibrant mint luster. Population: 29 in 67, 0 finer (11/10). (#7854)
- 4339 1905 MS66 NGC.** A well-defined Premium Gem with rich yellow-gold luster that blossoms over each side. Ideal for the type enthusiast. NGC has certified 98 numerically finer examples (10/10). (#7857)

PROOF LIBERTY QUARTER EAGLE

**Sharp 1884 Quarter Eagle, PR64 Cameo
A Well-Mirrored Orange-Gold Specimen**

- 4340 1884 PR64 Cameo PCGS.** The decade starting with 1878 showed continuous increases in the mintages of proof quarter eagles with a single exception: 1884, in which the official mintage fell from 82 coins to just 73 pieces. About half of that production survives today, though few examples are as attractive as this PR64 Cameo coin. The contrast is bold, and slight variation is noted in the orange-gold color of the mirrors. This sharply impressed specimen shows small contact marks that influence the technical grade, as well as minor lint marks, which do not. Population: 2 in 64 Cameo, 2 finer (10/10). (#87910)

INDIAN QUARTER EAGLES

Premium Gem 1908 Quarter Eagle First Year of Design

- 4341 1908 MS66 PCGS. CAC.** The year 1908 saw the first use of the incuse Indian Head design, and this date is in great demand among first-year type collectors. The 1908 is scarce in Premium Gem condition, and anything finer is virtually unobtainable. This high-quality Premium Gem displays pinpoint definition on all design elements, with attractive greenish-gold surfaces, and vibrant mint luster. Population: 89 in 66, 2 finer (11/10). (#7939)

Gorgeous MS66 1908 Indian Quarter Eagle

- 4342 1908 MS66 PCGS.** Rich satin luster with a mixture of gold and orange elements. This first-year Indian quarter eagle is magnificently preserved with a better strike than is seen on many later examples. An ideal selection for a Premium Gem-level type or date set. PCGS has certified a mere two finer pieces (10/10). (#7939)

- 4343 1909 MS63 NGC.** Understated yellow luster with just a hint of flash. This is a well struck Select example from early in the Indian quarter eagle series. (#7940)

Well Struck 1909 Quarter Eagle, MS64

- 4344 1909 MS64 NGC. CAC.** Hints of frostiness and rose color grace strongly lustrous yellow-orange surfaces. Well-defined by the standards of this second-year Indian quarter eagle issue, though minor softness is noted on the pendants in the necklace. Small shiny spots from luster scrapes appear on the headband and above the date. (#7940)

Splendid 1909 Indian Quarter Eagle, MS65

- 4345 1909 MS65 NGC. CAC.** This splendid Gem Indian quarter eagle is a wonderful representative of the design with bold design features and frosty greenish-gold surfaces. While available from time to time at this grade level, finer examples are rarely encountered. NGC has only certified 20 finer pieces, for example (10/10). (#7940)

Impressive MS66 1909 Quarter Eagle

- 4346 1909 MS66 PCGS.** Premium Gem, the level of preservation of the present offering, is the finest grade in which the 1909 quarter eagle can be acquired, as there are no Superb Gems in the combined certified population (10/10). The sharpness of strike stands out on this example. The headdress feathers show excellent detail, as does the eagle's plumage, including that on the shoulder. Exceptionally lustrous with attractive apricot-gold patina laced with whispers of mint-green. An inoffensive hair-thin mark to the left of the Indian's neck is noted solely for accuracy. (#7940)

- 4347 1911 MS64 NGC.** Bold yellow-orange luster with unusual but distinctive tones, including a shimmering “band” that runs diagonally across the lower right obverse. Impressively detailed and a delightful near-Gem. (#7942)
- 4348 1911 MS64 NGC.** The strike is unusually sharp on this satiny honey-gold Choice Indian type coin. Most of the headdress feathers are fully impressed. Study beneath a loupe fails to find any remotely mentionable marks. (#7942)
- 4349 1911 MS64 NGC. CAC.** Boldly defined, particularly on the Indian’s necklace, with uncommonly strong yellow-gold luster that takes on lemony hues at parts of the margins. A near-Gem with noteworthy eye appeal. (#7942)

Key 1911-D Quarter Eagle, AU Details

- 4350 1911-D—Improperly Cleaned—NGC Details. AU.** A lightly circulated specimen of this popular key date, this coin displays lustrous yellow and rose-gold surfaces. The devices are sharply detailed in most areas, but a little softness shows on the lower headdress feathers. The 1911-D Indian quarter eagle is acknowledged as the rarest date of the series, from a mintage of 55,680 pieces. (#7943)

Choice AU 1911-D Quarter Eagle Sought-After Key Date

- 4351 1911-D AU55 NGC.** A lightly circulated example of this low-mintage, key date. The present coin features well detailed devices, with just a little softness on the lower headdress feathers. The surfaces are brightly lustrous, with attractive yellow and rose-gold color. Only a few minor abrasions are detected on both sides. (#7943)

Popular 1911-D Quarter Eagle, AU58

- 4352 1911-D AU58 NGC.** A scarcely worn key-date coin that has most of the attributes of a fully Mint State representative at a fraction of the price. Sun-gold surfaces offer orange overtones, which are more visible on the obverse. Modestly abraded, as expected for the grade, but only a line above E PLURIBUS UNUM warrants individual mention. (#7943)

1911-D Indian Quarter Eagle, Unc Details Sharply Struck

- 4353 1911-D—Obverse Improperly Cleaned—NGC Details. Unc.** An attractive specimen of this low-mintage key, the coin offered here displays pleasing yellow-gold surfaces, with hints of rose color. The design elements are sharply rendered, with fine detail present on the headdress feathers and the eagle’s leg. Strong mint luster is evident on all surfaces. (#7943)

Lustrous MS61 1911-D Quarter Eagle

- 4354 1911-D MS61 PCGS.** A well-defined mintmark and Mint State surface quality make this 1911-D quarter eagle a great candidate to fill the key slot in a date set. While the strongly lustrous yellow-gold surfaces show a number of abrasions, wispy and otherwise, this piece is sure to attract considerable bidder interest. (#7943)

Satiny 1911-D Quarter Eagle
Attractive MS62 Example

4355 1911-D MS62 PCGS. The Denver Mint by 1911 had made half eagles and eagles of the new Indian Head design in each of the previous three years, but the 1911-D quarter eagle would mark the facility's first foray into producing the smallest authorized gold denomination. All three of the 1911-D gold coinages would be small compared to contemporary issues: 72,500 half eagles would be made, along with 55,680 quarter eagles and 30,100 eagles.

Although the 1911-D quarter eagle's mintage is greater than that of the eagle, the quarter eagle stands out much more prominently in its series than the eagle does compared to its peers: Several Indian Head eagle issues are rarities, while the 1911-D quarter eagle is the only uncommon issue in that series.

This is an impressive example that has reddish-gold color over most of each side. The strike is uniformly strong and only a few field marks account for the MS62 grade. An attractive, satin-surfaced example of this popular key issue. (#7943)

Distinguished MS64+ 1911-D Quarter Eagle

4356 1911-D MS64+ PCGS. CAC. Of the numerous PCGS-graded 1911-D quarter eagles, this is one of only four MS64 pieces to be given the Plus modifier, and that service has graded just 19 coins as numerically finer (10/10). This is an important representative of the famous Indian two and a half key date, yellow-gold with peach peripheral tinges and considerable luster. All design details are well-defined, from the central devices to peripheral elements and the all-important mintmark. An ideal selection for the collector who wants a 1911-D quarter eagle as high-end as the rest of his or her set. (#7943)

**1913 Indian Quarter Eagle, MS65
Challenging Date in Gem Condition**

4357 1913 MS65 PCGS. CAC. Despite the large mintage of 722,000 pieces, the 1913 Indian quarter eagle is an elusive date in Gem condition. The present coin is a delightful Gem, with yellow-gold surfaces, highlighted by strong hints of rose. The devices are sharply detailed, and the luster is attractive. Population: 87 in 65, 5 finer (11/10). (#7945)

4358 1914 MS62 PCGS. Prominent yellow-orange luster with hints of honey-gold. Though this well struck piece shows a number of small ticks and wispy marks, there are few serious abrasions. (#7946)

4359 1914 MS62 NGC. Sun-yellow with solid luster and distinct orange overtones. Small ticks and a number of wispy abrasions preclude Select status, yet the overall eye appeal is solid for the grade. (#7946)

1914-D Quarter Eagle, MS64+

4360 1914-D MS64+ NGC. David Akers considers the 1914-D the rarest Indian quarter eagle in Gem condition or above, making this high-end Choice specimen particularly attractive as a balance of quality and value. Like most examples of this date, the striking details are a little soft on the headdress feathers and the eagle's leg. The pleasing rose-gold surfaces radiate frosty mint luster. (#7947)

Choice 1914-D Quarter Eagle

4361 1914-D MS64 NGC. Vibrant mint luster radiates from the yellow-gold surfaces of this Choice Mint State quarter eagle. The design elements exhibit sharp details throughout. The 1914-D is a challenging date in higher Mint State grades, and most collectors find a nice MS64 example makes an appropriate choice for their collection. (#7947)

Pleasing MS64+ 1914-D Quarter Eagle

4362 1914-D MS64+ NGC. A magnificent near-Gem of the penultimate Denver Mint issue. The orange-gold surfaces are lustrous and appear unabraded aside from trivial grazes on the lower left obverse field. The strike is sharp save for the lowest headdress feathers, and the eye appeal is exquisite. (#7947)

**Gem 1915 Indian Quarter Eagle
Sharply Detailed Specimen**

4363 1915 MS65 NGC. The 1915 Indian quarter eagle is a scarce date in Gem condition, and only four coins have been certified in higher numeric grades at NGC (10/10). The present coin features needle-sharp definition on all design elements, especially the headdress. The surfaces are an attractive rose-gold color, and strong mint luster adds to the visual appeal. (#7948)

4364 1925-D MS64+ NGC. Well-defined at the outer areas, though the center of the portrait has a curious area of softness. Sun-gold luster shows orange tints on the reverse. (#7949)

- 4365 1925-D—Rotated Dies—MS64+ NGC.** The reverse is rotated approximately 45 degrees counterclockwise from its proper position relative to the obverse. Yellow-orange luster graces surfaces that come close to Gem quality.
- 4366 1925-D MS65 NGC.** An attractive rose-gold Gem specimen of this popular Indian quarter eagle, the 1925-D is a favorite date with type collectors. This specimen exhibits a bold strike, unusually sharp for a 1925-D, which was often struck from buckled dies. (#7949)
- 4367 1925-D MS65 NGC.** Swirling sun-yellow luster is softly frosted with hints of orange. Solidly struck with just a couple of tiny ticks hidden in the feathers of the bonnet. NGC has graded 40 numerically finer examples (10/10). (#7949)
- 4368 1926 MS64+ PCGS. CAC.** A high-end Choice Mint State example of this popular Indian quarter eagle, with a needle-sharp strike and excellent mint luster. This piece displays pale rose-gold surfaces and outstanding eye appeal. (#7950)
- 4369 1926 MS65 PCGS. CAC.** The 1926 Indian quarter eagle is an available date in lower Mint State grades, but it requires some patience to find an example in Gem condition. The present coin is a well struck Gem, with rose-gold surfaces and bright mint luster. (#7950)
- 4370 1927 MS64 NGC. CAC.** A well-defined yellow-gold coin with occasional glimpses of peripheral sun-orange. Bright and occasionally frosty, a delightful near-Gem. (#7951)
- 4371 1927 MS64 PCGS.** Rich yellow luster with bold sun-gold aspects in the obverse fields. A well struck near-Gem from the late series of the Indian quarter eagle design. (#7951)
- 4372 1928 MS65 PCGS.** The frosty obverse of this late-date Gem is pale yellow-gold, while the reverse is more sun-yellow with orange aspects. Well-defined overall with impressive surface quality. PCGS has graded a mere 10 coins finer (10/10). (#7952)
- 4373 1928 MS65 NGC.** An extraordinary Gem that approaches the finest available quality for any Indian quarter eagle. Gorgeous rose toning graces frosty yellow-gold luster. Bold details and excellent surfaces. (#7952)
- 4374 1929 MS64+ NGC. CAC.** A luminous near-Gem with unblemished fields and crisply impressed devices. A charming example of the final date of this widely collected type. (#7953)
- 4375 1929 MS64+ NGC. CAC.** A satiny pumpkin-gold two and a half with undisturbed surfaces and a reasonable strike on the headdress. The mintage for this type issue is less than its half eagle counterpart, yet the latter is a great rarity due to extensive melting. (#7953)

Desirable MS65+ 1929 Two and a Half

- 4376 1929 MS65+ NGC.** The 1929 quarter eagle was better distributed than its higher mintage half eagle counterpart, but in quality approaching the MS66 level, it suddenly emerges as a major conditional rarity. This is a well preserved and attentively struck Gem with smooth, glimmering butter-gold surfaces. Census: 1 in 65+, 2 finer (10/10). (#7953)

THREE DOLLAR GOLD PIECES

- 4377 1854—Improperly Cleaned—NGC Details. AU.** Careful rotation beneath a light reveals patches of hairlines on this lightly circulated first year type coin. The straw-gold surfaces are glossy but pockets of luster are evident, particularly within the headdress. (#7969)
- 4378 1854—Scratches, Cleaned—NGC Details. AU.** A first-year three dollar gold with considerable remaining detail. Yellow-gold surfaces are dulled from a past cleaning with a number of small digs, a few of which lengthen into scratches. (#7969)
- 4379 1854 MS60 NGC.** Strongly lustrous at yellow borders and pale straw-gold centers. This first-year piece has no trace of wear, though close inspection turns up the numerous fine abrasions and long marks which account for the grade. (#7969)
- 4380 1854-O—Reverse Scratched—NGC Details. AU.** The sole three dollar gold issue struck at New Orleans and a popular date for it. Lightly worn with dusky yellow luster and an "X" scratched under the left ribbon end. (#7971)

1855 Three Dollar Gold Piece, MS64+ Vibrant Luster, Strong Eye Appeal

- 4381 1855 MS64+ PCGS. CAC.** Mintage of three dollar gold pieces fell to 50,555 pieces in 1855, and few high grade examples were saved at the time of issue. Examples in high-end Choice Mint State condition are quite rare. The present coin is a delightful MS64+ specimen, with vivid greenish-gold surfaces and orange highlights. The striking details are sharp in most areas, with just a little softness evident on the ribbon bow. The mint luster is especially vibrant, enhancing the terrific eye appeal. The following population data reflects the overall rarity of the 1855 three dollar gold piece in Choice condition, without regard to the newly established (and highly regarded) plus designation. Population: 19 in 64, 4 finer (10/10). (#7972)

**1856 Three Dollar Gold, MS62
Strong Luster, Vivid Color**

- 4382 1856 MS62 PCGS. CAC.** The 1856 three dollar gold piece claims a low mintage of 26,010 pieces, and the issue is quite scarce in Mint State grades. The present coin features attractive orange-gold surfaces, with vibrant mint luster under the patina. The strike is a little soft on the hair and ribbon bow. Population: 44 in 62, 66 finer (11/10). (#7974)

Flashy MS62+ 1856 Three Dollar

- 4383 1856 MS62+ NGC.** At first glance, the smooth, semi-prooflike fields and sharply impressed devices suggest a significantly higher grade might be in order. Close examination locates a diagonal pinscratch on the cheek and a few faded minor marks on the jaw. The 1856 is a better date, much scarcer in Mint State than the 1854 or 1878. Census: 1 in 62+, 39 finer (10/10). (#7974)
- 4384 1856-S XF45 NGC.** Medium S. Out of four (or five, if one counts the 1870-S) San Francisco three dollar gold issues, the 1856-S is the most accessible, though at only 34,500 pieces struck, it is undeniably scarce. Orange-tinted luster fills the legends and headaddress, while wear is principally confined to the device highpoints. (#7975)

**1860-S Three Dollar, XF45
Rare Mintmarked Issue**

- 4385 1860-S XF45 PCGS.** Rich green-gold surfaces are accompanied by bright orange luster in the protected areas on each side of this important three dollar piece. With the exception of the unique 1870-S, this was the last three dollar gold piece coined at San Francisco, and it was from a limited mintage of just 7,000 coins. Those factors combine to make this one of the most desirable and popular three dollar gold coins. (#7981)

-
- 4386 1868 AU55 NGC.** A lightly rubbed example with yellow-gold luster of varying hue and pockets of reflectivity hidden next to the devices. Scattered abrasions with a scrape just above the point of the bust. Nonetheless, a desirable example of this low-mintage post-Civil War three dollar gold issue. (#7989)

- 4387 1874 AU55 ANACS.** Softly struck with minor wear but generous yellow-gold mirrors. This minimally abraded type set coin is housed in a small-format ANACS holder. (#7998)

Delightful 1874 Three, MS62

- 4388 1874 MS62 NGC.** The 1874 three ranks among the highest mintage issues of the denomination, third highest behind 1854 and 1878. It is an excellent choice for type collectors. this piece satiny light yellow luster with slightly weak design elements. A few faint blemishes limit the grade, but otherwise are of no concern. (#7998)

-
- 4389 1878—Improperly Cleaned—NGC Details. AU.** A well struck example of this popular three dollar gold type issue, the last such date chronologically. Lightly worn with yellow-gold surfaces that show unnatural luster from a past cleaning. (#8000)

- 4390 1878 AU58 NGC.** Great luster with only minor friction on the high points. This near-Mint example has a few scattered abrasions on bright yellow-gold surfaces. A solid type coin. (#8000)
- 4391 1878 AU58+ PCGS.** A high-end, near-Mint specimen of this popular 19th century type coin, with well detailed devices and vibrant mint luster. The orange-gold surfaces are lightly abraded, with hints of rose color in sheltered areas. (#8000)
- 4392 1878 AU58 PCGS.** A briefly circulated example of this popular type issue, well struck with considerable luster remaining in the yellow-gold fields. A handful of light abrasions are commensurate with the grade. (#8000)

**1878 Three Dollar, MS62
Favorite Type Coin**

- 4393 1878 MS62 PCGS.** A favorite coin of type collectors, the 1878 three dollar gold piece boasts a large mintage of 82,304 pieces. The present coin displays rich orange-gold surfaces, accented by strong, vibrant mint luster. This piece shows the typical softness on the hair, plumes, and lower wreath. (#8000)

**1882 Three Dollar, AU58
Popular Low-Mintage Date**

- 4394 1882 AU58 PCGS.** This prooflike near-Mint example has lustrous orange-gold surfaces. The obverse has a couple faint hairlines, and both sides have scattered abrasions. Only 1,500 of these coins were struck with a small overall survival rate, although a quantity of Mint State pieces are known, along with quite a few AU55 and AU58 grade coins. (#8004)

**1885 Three Dollar Gold Piece, AU58
Only 801 Pieces Struck**

- 4395 1885 AU58 PCGS. CAC.** From a tiny mintage of 801 pieces, the 1885 three dollar gold piece is scarce-to-rare in all grades. The present coin is well struck, with only slight traces of wear on the devices. The semiprooflike surfaces are a pleasing orange-gold color. Population: 20 in 58, 86 finer (10/10). (#8007)

**1886 Three Dollar, MS62 Deep Prooflike
The Only 1886 So Designated**

- 4396 1886 MS62 Deep Prooflike NGC.** With only 1,000 strikes for circulation, minus an unknown number of pieces that may have been melted as unsold, makes most 1886 threes reflective to some degree. This piece has exceptionally deep fields with the contrasting, frosted devices that give the coin its DPL status. Numerous small abrasions are scattered over each side, but the only mark of any note is located horizontally between DOLLARS and 1886. The bright yellow-gold surfaces show just a touch of red. Sharply struck throughout. This is the only coin NGC has designated as Deep Prooflike for this date (10/10). (#8008)

PROOF THREE DOLLAR GOLD PIECE

Select Proof 1876 Three Dollar Gold

4397 1876 PR63 PCGS. Between 1874 and 1878, the two most famous years for three dollar gold type coins, production of the denomination was all but nonexistent. The 1,468 business strikes made in 1877 were the only such pieces between the two bookend years. In 1875 and 1876, only proofs were struck, and these two dates are among the most popular and sought-after dates in the series, as well as the most challenging.

In the case of the 1876 issue, the *Mint Report* lists production of just 45 specimens, though in the Bowers-Winter reference *The United States \$3 Gold Pieces 1854 - 1889*, the authors suggest that at least a few more were struck. Garrett and Guth, in their *Encyclopedia of U.S. Gold Coins*, take this premise a step further and assert that this second, unrecorded run of proofs was struck with a different obverse die from the first. In practice, few collectors focus on such concerns, preferring simply to acquire an attractive example as a capstone to a set.

This Select proof, housed in a first-generation holder, has appreciable contrast that might qualify it for a Cameo designation today. Yellow-gold mirrors show scattered cloudiness, but the overall eye appeal is strong. A long, thin contact in the upper hair is the most important contributor to the grade assigned, though it is also well-hidden and easily missed on casual inspection. In sum, this is a specimen that has great potential to reward the winning bidder. (#8040)

EARLY HALF EAGLES

1800 Half Eagle, AU Details BD-4 Example, With Recut M

- 4398** 1800—Reverse Damage—NGC Details. AU. Breen-6439, BD-4, R.4. With a reported mintage of 37,628 pieces, the 1800 half eagle is known in five different die varieties. The BD-4 variety features a blunt 1 in the date and a recut M in AMERICA. John Dannreuther believes about 125-175 examples of the BD-4 variety survive in all grades. The present coin is a well detailed, greenish-gold specimen, with strong mint luster. Some light tooling is evident at the first T in STATES. (#8082)

1805 Half Eagle, AU Details Slightly Scarce BD-1 Variety

- 4399** 1805—Harshly Cleaned—NGC Details. AU. Breen-6445, BD-1, High R.3. A substantial mintage of 33,183 half eagles was achieved in 1805, with five die varieties known for the date. The BD-1 variety is identified by the perfect 1 in the date and the position of the leaf touching I in AMERICA on the reverse. The BD-1 variety probably accounts for 10,000-15,000 pieces of the original mintage, and John Dannreuther estimates a surviving population of 175-225 examples in all grades. The present coin retains nearly all of its original detail, with overly bright, lightly abraded greenish-gold surfaces. (#8088)

1806 Round Top 6 Five Dollar BD-6, MS61

- 4400** 1806 Round Top 6, 7x6 Stars MS61 NGC. Breen-6448, BD-6, R.2. While there is just one Round Top or Knobbed 6 die pair for the 1806 half eagle, compared with no less than five Pointed 6 varieties, the single Knobbed 6 die pair is more accessible than the rest combined and is an important type issue in its series. This MS61 representative has undeniable charm, thanks to considerable satin in the pale yellow-gold luster. The outer areas are a trifle soft, but the interiors are better-defined than often seen. The obverse shows no prominent adjustment marks, while the reverse has only a small patch at the upper left of the shield. (#8089)

Choice 1809/8 Half Eagle
BD-1, Only Known Variety
Popular Scarce Date

4401 1809/8 MS64 NGC. Breen-6458, BD-1, High R.3. A relatively small mintage of 33,875 half eagles was achieved in 1809, with a single die variety known for the date. The 1809/8 is a representative of the Capped Bust Left, Large Bust design, which was used from 1807-1812. Considered as a date, the 1809/8 is the rarest issue of the design type, although other years have individual varieties that are much more elusive. John Dannreuther estimates a surviving population of 250-325 examples in all grades, and the issue is quite rare in Choice Mint State condition.

Traditionally, the half eagles minted in 1809 have been classed as overdates, but many experts question whether the undertype of the final digit is an 8 or just a misplaced 9. The remains of some figure is easily noticed under the 9, but the visible curve does not seem to match either the 8 or 9 punch used on this die. Dannreuther points out the final 9 is actually from a larger punch than the other digits in the date. The undertype may be a smaller 9, placed slightly out of position. The die may have been repunched with the larger 9 to correct the alignment of the final numeral.

The present coin is a delightful Choice Mint State specimen, with light greenish-gold surfaces that show no significant distractions. A doubled center dot is noted under Liberty's ear, and the reverse shows numerous clashmarks, especially in the field above the eagle's wings. This example is sharply struck, with fine detail present on Liberty's hair and all star centers boldly defined. The surfaces are brightly lustrous, and eye appeal is outstanding. Currently, NGC has certified 29 coins in MS64, with nine examples finer (10/10). (#8104)

AU 1810 Large Date, Large 5 Half Eagle, BD-4

- 4402** 1810 Large Date, Large 5 AU50 NGC. Breen-6459, BD-4, R.2. Bass Dannreuther Die State c/b. Luster fills the margins, wings, curls, and drapery of the present early half eagle. The strike is incomplete at the centers, particularly on the eagle's neck, but actual circulation wear is moderate. The fields are unblemished, and the eye appeal is attractive. BD-4 is among the more available die marriages of the John Reich's Capped Bust Left design, but the scarcity and allure of the type ensures that supplies are insufficient to meet demand. (#8108)

- 4403** 1824—Plugged, Damaged—NCS. Genuine. Breen-6482, BD-1, High R.5. A circular plug is evident at 12 o'clock on the obverse, and opposite at 6 o'clock on the reverse. Peripheral design elements have been tooled, and the devices exhibit heavy wear. A dig is noted between stars 4 and 5, and a few pinscratches cross the lower left obverse. A collectible example of this rare early five. (#8132)

CLASSIC HALF EAGLES

- 4404** 1834 Plain 4 AU53 PCGS. Second Head, Breen-6502, McCloskey 2-A, R.1. This nicely struck first-year yellow-gold type coin has considerable luster and the expected number of small field marks. A date set of Classic half eagles is readily collectible at the AU level. (#8171)

- 4405** 1834 Crosslet 4 Fine 12 NGC. Second Head, Breen-6503, McCloskey 5-D, R.4. A very scarce variety with Script 8 and Crosslet 4 in the date. Dusky orange-gold examples have scattered light abrasions and significant wear. The margins show violet overtones and a rim scrape near 3 o'clock on the obverse. (#8172)

- 4406** 1835 AU53 NGC. First Head, Breen-6504, McCloskey 1-A, R.2. Deep orange-gold luster with khaki overtones in radiant fields. Softly struck on the high points but with little actual wear. Dark encrustation at the margins gives this coin a great "old gold" look. (#8173)

**Choice 1835 Classic Head Half Eagle
Only One Coin Certified Finer**

- 4407** 1835 MS64 NGC. McCloskey 1-A, R.2. From a reported mintage of 371,534 pieces, the 1835 Classic Head half eagle is known in seven different die varieties. The present coin represents the relatively available McCloskey 1-A variety, with a block 8 in the date. The 1835 is reasonably easy to locate in lower Mint State grades, but it is a prime condition rarity in higher grades. Currently, NGC has certified six coins in MS64, with a single specimen finer, while PCGS has graded 10 Choice examples, with none finer (10/10).

The present coin is an attractive Choice example, with pleasing greenish-gold surfaces, highlighted by hints of rose at the peripheries. The strike is needle-sharp throughout, with fine detail present on the hair and eagle's claws. Subtle, satiny luster radiates from all surfaces and eye appeal is outstanding. (#8173)

- 4408 1836 AU53 PCGS Secure. First Head, Breen-6507, McCloskey 1-A, R.4.** Well struck with considerable lemon-yellow radiance. A lightly worn example with a reddish copper spot on the obverse rim just below star 12. (#8174)
- 4409 1838 XF40 PCGS. CAC. Breen-6514, McCloskey 1-A, R.2.** A sharply struck, lightly circulated specimen of the 1838 half eagle, with light greenish-gold surfaces, and much original mint luster remaining. Quite popular with type collectors seeking an example of the Classic Head design type.
From The Sandy Beach Collection. (#8176)

LIBERTY HALF EAGLES

- 4410 1839-C—Scratches—NGC Details. XF. Variety 1.** The 1839-C differs from subsequent Charlotte issues in that it has an obverse mintmark, and the sleepy-eyed portrait of Liberty differs slightly from the more familiar portrait that remained in use into the Taft Administration. This sharply detailed piece has original peach and apple-green toning, but wispy field pinscratches emerge when it is carefully rotated beneath a light. (#8192)
- 4411 1840 Broad Mill Genuine PCGS.** The PCGS number ending in .98 indicates Surface Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been damaged. A cluster of short but deep pinscratches is noted on the field above the eagle's right (facing) wing. A few specks of PVC residue are noted on the D in UNITED and near the obverse rim at 6 o'clock. The borders display noticeable luster. (#8194)
- 4412 1840 Narrow Mill AU55 NGC. CAC.** This handsome Choice AU No Motto half eagle displays rich sun-gold toning, and marks are inconsequential save for a few faded ticks on the portrait near the chin. The devices are evenly impressed and exhibit little evidence of wear, although luster is confined to design elements. (#8194)
- 4413 1842 Small Letters XF45 NGC.** This is a honey-gold No Motto five with noticeable luster and a delightfully unabraded appearance. Although less rare than its Large Letters counterpart, the 1842 Small Letters variety is nonetheless a challenge to locate in any grade. (#8207)

1843 Half Eagle, MS64 Only One Coin Certified Finer

- 4414 1843 MS64 NGC.** The production of Philadelphia Mint Liberty Head half eagles increased exponentially in 1843, to a whopping total of 611,205 examples (only 27,578 pieces were minted the previous year). Few examples of this prodigious mintage were saved for numismatic purposes, and high grade specimens are quite rare today. Current data from the grading services reveals NGC has certified 10 examples in MS64, with a single specimen finer, while PCGS has graded only three coins at the Choice level, with none finer (10/10).

The present coin is an attractive Choice specimen, displaying areas of prooflike reflectivity in the fields. The design elements are sharply defined, and the surfaces are a pleasing greenish-gold color, with highlights of rose. (#8213)

4415 1844-C—Reverse Graffiti—NGC Details. XF. Variety 1. Sole die pair for the year. The orange-influenced yellow-gold obverse is a trifle bright but appealing. A pair of X marks scratched into the fields on either side of the eagle account for the details grade. (#8220)

4416 1845-O—Improperly Cleaned—NGC Details. AU. This lower mintage New Orleans half eagle has a subdued yet luminous appearance. Faded luster fills the reverse border. No marks are significant, although a faded pinscratch is noted beneath the chin. (#8225)

4417 1847—Improperly Cleaned—NGC Details. AU. The peak of the 7 is clearly repunched. Not to be confused with the Guide Book variety, a prominently misplaced date. Although designated as AU by NGC, the present piece has full design detail, but is lackluster and mildly granular with a slightly glossy and luminous appearance. (#8231)

4418 1847-D VF25 PCGS. CAC. Variety 16-M. A moderately worn yellow-orange piece with scattered abrasions and faint glimmers of peripheral luster. An accessible example of Dahlonega gold. (#8234)

4419 1849 AU55 NGC. A yellow-orange example from the famous year for gold, lightly rubbed but with considerable diffuse luster remaining in the fields. Scattered small abrasions contribute to the grade. Census: 7 in 55, 55 finer (10/10). (#8240)

1849-C Liberty Head Half Eagle, AU58 Favorite C-Mint Type Coin

4420 1849-C AU58 NGC. Variety 1. Its mintage of 64,823 pieces makes the 1849-C half eagle an available date from this mint, and a favorite issue with mintmark type collectors. The variety is easily diagnosed by the placement of the date to the right of the bust. Doug Winter estimates a surviving population of 275-375 examples in all grades, with 65-75 specimens extant in AU. The present coin is a premium-quality, near-Mint piece, with greenish-gold surfaces and ample mint luster. The strike is sharp for a C-mint issue, with just a little softness evident on the eagle's leg. Census: 20 in 58, 30 finer (10/10). (#8241)

Still-Lustrous AU50 1850-C Half Eagle 'Weak C,' Bold Mintmark Appearance

4421 1850-C Weak C AU50 PCGS. CAC. Variety 4. Not specifically labeled as "Weak C" on the holder, and while it is Variety 4, the mintmark is bolder than usually seen. Lightly worn with considerable yellow-gold radiance on the obverse, though the reverse is more subdued with elements of orange. Small, scattered abrasions account for the grade. (#8244)

Choice XF 1850-D Half Eagle

4422 1850-D Weak D XF45 PCGS. Variety 23-O. Not specifically labeled "Weak D" on the holder, but the appearance of the mintmark and the heavy peripheral die cracks on that side leave little doubt as to its status. Well struck for the type with light wear across the devices and considerable yellow-gold radiance remaining in moderately abraded fields. (#8245)

1852 Five Dollar, MS63, Ex: Pittman Bright, Semiprooflike Fields

4423 1852 MS63 NGC. Ex: Pittman. The superlative quality of this piece has been recognized and valued for decades, as indicated by the pedigree of known past collections in which it has resided. This is somewhat surprising as the 1852 is a relatively common coin in Uncirculated grades. But the uncommon surfaces seen here make it a memorable example of the No Motto type. The fields show die striations, which have in turn imparted a bright, semiprooflike sheen to each side. The striking details are strong but not absolutely complete, and there are a few small, grade-consistent marks on each side. Census: 21 in 63, 17 finer (10/10). *Purchased privately from Ralph E. Elser on 11/5/1949 for \$15; Pittman I (Akers, 10/1997), lot 999, where it brought \$9,900.* (#8250)

1852-D Five Dollar, AU55 A Challenging Issue in This Grade

4424 1852-D AU55 PCGS. Variety 27-U. The 1852-D is one of the higher-mintage Dahlonega fives and can be found in lower grades with little difficulty. However, in Choice AU it is much more challenging than its mintage of 91,584 pieces might suggest. Only 45-57 AU examples are believed known today, and eye appeal is generally low on most pieces. This is an interesting piece as it clearly demonstrates that the mint was striving to produce a better-looking product, at least for part of the production run. The fields show noticeable die striations, which in turn give the coin a semiprooflike gleam on each side. The strike has a bit of high point softness on each side, but considerable mint luster still surrounds the devices. One of more appealing 1852-D fives. (#8252)

- 4425 1853-C VF35 PCGS. Variety 2.** A scarcer die pairing with the 1 in the date nearly touching a denticle. This pumpkin-gold Choice VF Charlotte gold piece has a typical strike and a couple of moderate marks near the chin. Noticeable luster emerges from the shield and legends. (#8254)

**Tied for Finest Certified 1854
Half Eagle, MS64**

- 4426 1854 MS64 NGC.** Garrett and Guth note about this underrated issue: "The mintage for the 1854 Philadelphia half eagle is much lower than on some of the other so-called common dates for the No Motto type. As would be expected, the date is scarce in most grades." They further mention that "Mint State coins are much rarer than most price references would indicate." This near-Gem, tied for numerically finest in the combined certified population (10/10), is as good a candidate as any for the date to get its due. Swirling luster enlivens peach outer hues and yellow interiors. The strike and preservation are impressive, and the all-around eye appeal is delightful. (#8256)

AU53 Large D 1854-D Half Eagle

- 4427 1854-D Large D AU53 PCGS. Variety 30-W.** The reverse die is unlisted in Douglas Winter's reference to the Dahlonega Mint gold coins. A straw-gold half eagle with subdued fields and no mentionable contact aside from thin marks on the obverse rim near 9 o'clock and a glimpse of planchet striations on the shoulder of Liberty's bust. The strike is above average with softness limited to the eagle's neck and fletchings. (#8258)
- 4428 1856-D XF40 PCGS. Variety 33-BB.** Originally toned in peach and green-gold shades. Luster outlines the letters and devices. The fields display only faint marks. Fewer than 20,000 pieces were struck. Encapsulated in a green label holder. (#8268)

Sharp VF25 1861-C Half Eagle

- 4429 1861-C VF25 PCGS. CAC. Variety 1.** Only a single die pair is known for this final Charlotte issue, struck just prior to the start of the Civil War. Per Breen, a small portion of the mintage (887 pieces) was struck by the Confederacy, and those coins can be identified (Breen-6651) by the presence of a die crack above AMERI. The present coin exhibits the die crack, but we are nevertheless uncertain whether it represents a Federal or Confederate striking. We can say that the devices are well detailed for the VF25 grade, and there are no noticeable marks, although the left obverse field and upper reverse field are slightly granular. (#8289)
- 4430 1866-S No Motto VF20 PCGS. CAC.** Yellow-orange with a degree of dark encrustation at the margins. A moderately worn example of this final No Motto half eagle issue, lightly abraded but fundamentally pleasing. Population: 7 in 20, 31 finer (10/10). (#8300)
- 4431 1870-S—Improperly Cleaned—NGC Details. XF.** The San Francisco Mint struck half eagles annually between 1854 and 1888, but many issues within that 35-year span have very low mintages. For the 1870-S, only 17,000 pieces were struck. This example has glimpses of mint luster, but is faintly hairlined and has a reeding mark near star 3. (#8321)

Distinctive AU53 1875-CC Five Dollar

4432 1875-CC AU53 NGC. This coin offers an unusual and distinctive appearance for a Carson City five, a blend of coppery radiance and golden flash. Light wear crosses much of the high points and a number of small digs are scattered in the fields, but the overall eye appeal is memorable. A great example of a lower-mintage date. Census: 14 in 53, 15 finer (10/10). (#8337)

4433 1880 MS65 NGC. Crisply detailed with bright and slightly satiny straw-gold luster. An impressively preserved example of this high-mintage issue, an ideal selection for the type enthusiast collecting at the Gem level. NGC has certified 22 pieces at the MS65 level but only one coin finer (10/10).(#8351)

1880-CC Half Eagle, AU55 Scarce Carson City Issue in High Grade

4434 1880-CC AU55 PCGS. The 1880-CC half eagle is a scarcer date than the reported mintage of 51,107 pieces would suggest, especially in high grades. Doug Winter estimates the surviving population numbers around 275-325 examples in all grades, with 49-59 specimens extant in AU. The coin offered here is a sharply struck example, with pleasing rose-gold surfaces and much original mint luster. Population: 30 in 55, 29 finer (10/10). (#8352)

4435 1880-S MS64 NGC. Strongly struck with pale wheat-gold luster through much of the obverse but richer yellow and orange colors elsewhere. A gorgeous near-Gem that offers a touch of satin. NGC has certified 17 finer pieces (10/10).(#8353)

4436 1880-S MS64+ PCGS. CAC. Strong sun-yellow luster with a blush of rose in the portrait areas. A gorgeous coin that shows a few shallow marks around and to the left of the date but is otherwise minimally abraded. PCGS has graded only one finer example (10/10).(#8353)

4437 1881 MS64+ NGC. CAC. Bold orange overtones grace rich yellow-gold surfaces that show a measure of satin on the obverse. A well-defined and beautiful coin that comes oh-so-close to Gem quality.(#8354)

1882-CC Half Eagle, AU58 Popular Mintmarked Type Coin

4438 1882-CC AU58 PCGS. CAC. Light orange-gold surfaces, sharply struck devices, and subtle, original mint luster are show case features of this popular Carson City half eagle. The 1882-CC is not difficult to locate in lower grades, but it is quite scarce at the near-Mint level. Population: 71 in 58, 12 finer (10/10). (#8359)

Lustrous 1882-CC Half Eagle, AU58

4439 1882-CC AU58 NGC. CAC. This issue had a substantial mintage of 82,817 coins, although most of those entered commercial channels, and relatively few have survived in higher grades. NGC and PCGS have combined to grade just 45 finer Mint State examples. Only a trace of wear is evident on the high points of this lovely Carson City half eagle. The surfaces have soft, frosty green-gold luster with traces of orange patina. (#8359)

Important MS64 1884 Five Dollar

4440 1884 MS64 NGC. It is true that the 1884 has a fairly low mintage, especially relative to the 1880 through 1882 Philadelphia issues. Yet its scarcity in Mint State is nonetheless surprising. Since those examples saved were set aside strictly due to bullion content, the 1884 is very rare in MS64 and higher grades. The present near-Gem is crisply struck and lustrous with sun-gold color and distributed minor field grazes. Census: 3 in 64, 1 finer (10/10). (#8364)

Faintly Reflective AU53 1884-CC Half Eagle

- 4441 1884-CC AU53 NGC.** A lightly worn Carson City half eagle that combines antique-gold hues and considerable field reflectivity, which is most prominent in the protected areas near the devices. Attentively struck and modestly abraded, though a few shallow marks and grazes are noted on the portrait. (#8365)

Elusive Near-Gem 1884-S Liberty Half Eagle

- 4442 1884-S MS64 NGC.** One of many San Francisco Mint condition rarities in the Liberty half eagle series is the 1884-S, with a mintage of 177,000 coins, but rarely seen better than MS63. Lower grade coins are considered scarce while MS64 or finer coins are extremely rare. This piece frosty yellow luster with peripheral olive patina. The surfaces exhibit trivial marks, all entirely inconsequential. Here is an excellent opportunity for the advanced half eagle collector. Census: 19 in 64, 2 finer (10/10). (#8366)
- 4443 1885-S MS64 PCGS.** The obverse is flashy, while the reverse has a bold cartwheel appearance. Strong yellow-gold outer color pales dramatically at the interiors, particularly on the obverse. PCGS has graded just 37 coins finer (10/10).(#8368)
- 4444 1890-CC AU58 NGC.** A touch of duskiness settles over the luminous yellow-gold surfaces, and light rub crosses the high points. Nonetheless, this is a well struck piece that will appeal to the collector seeking a representative of Carson City gold. (#8376)

Important Select 1890-CC Half Eagle

- 4445 1890-CC MS63 PCGS. CAC.** Rich yellow-to-orange luster swirls across each side of this late-date Carson City five. Well-defined central figures show no serious abrasions, though assorted wispy marks populate each side. Narrow copper spots appear along the upper obverse and reverse borders. Population: 32 in 63, 28 finer (11/10). (#8376)
- 4446 1891 MS63 NGC.** Well-defined with a rich orange-gold cast. The luster is mostly frosty, though a few breaks for brilliance create startling contrast at the upper reverse. Census: 36 in 63, 17 finer (10/10).(#8377)
- 4447 1891-CC MS62 PCGS. CAC.** Great central definition with frosty wheat-gold swirls in the centers that give way to deeper yellow-orange close to the rims. Light to moderate marks affect the surfaces, but the overall eye appeal is solid. A great half eagle from the late period of the Carson City Mint.(#8378)
- 4448 1891-CC MS62 NGC.** A well-defined sun-gold example with warm and inviting luster. Lighter at the faintly abraded interiors with slightly deeper hues close to the rims.(#8378)

Shining MS61 1893-CC Half Eagle

- 4449 1893-CC MS61 PCGS.** An impressively detailed final-year Carson City example with light yellow-gold luster that swirls across each side. Outstanding eye appeal for the MS61 grade with few significant abrasions, though the area near Liberty's brow shows a disturbance that justifies the designation. Population: 26 in 61, 43 finer (10/10). (#8384)

1893-CC Five, MS62
Bright, Lustrous, Yellow-Gold Surfaces

4450 1893-CC MS62 NGC. The 1893-CC five is one of the most available issues in the 19-coin series of CC half eagles. This piece has bright yellow-gold color, strong mint luster, and an even, strong strike on both sides. This would make an excellent CC type coin as it is a final-year issue and one of the more affordable examples in Uncirculated condition. (#8384)

4451 1894 MS64 NGC. CAC. Strongly patinated yellow-orange surfaces show flickers of rose. A satiny near-Gem example of this late 19th century issue, ideal for the type enthusiast. NGC has certified 14 numerically finer pieces (10/10).(#8387)

4452 1894-O MS61 NGC. Luster fills the borders of this moderately abraded sun-gold example. The final New Orleans Liberty half eagle issue has a mintage of just 16,600 pieces, a considerable reduction from the prior year's O-mint production of fives. (#8388)

4453 1896 MS64 NGC. Exquisitely detailed with generous yellow-gold luster that is mostly frosted with small windows of brightness. A few scattered small marks and scrapes account for the grade. Census: 30 in 64, 5 finer (10/10).(#8392)

4454 1900 MS64 NGC. CAC. Satiny and beautiful. A delicate patina layer graces rich yellow-orange fields and exquisitely struck devices. A highly desirable turn-of-the-century near-Gem. (#8400)

4455 1901-S MS64 NGC. This pleasing near-Gem offers swirling yellow-gold luster on well-preserved surfaces. Strongly struck save for softness at the upper right obverse stars. (#8404)

4456 1901-S MS65 NGC. CAC. A turn-of-the-century beauty with generous frosty luster on orange-tinged yellow-gold surfaces. Well struck and pleasingly patinated, an utterly charming S-mint five. NGC has certified 89 numerically finer examples (10/10). (#8404)

4457 1903 MS64 NGC. This lower mintage near-Gem Liberty five has a prooflike obverse and cartwheel luster throughout the reverse. The strike is intricate, the reverse is nearly pristine, and the obverse field has only wispy abrasions. (#8407)

4458 1904 MS64 NGC. Hints of sun-gold grace the pale canary-yellow surfaces of this strongly struck near-Gem. Delicate but largely undisturbed luster carries the eye appeal. (#8409)

Desirable 1904 Liberty Five, MS66

4459 1904 MS66 PCGS. The 1904 is a well-known date for type purposes, but that is not a given in Premium Gem condition. Only 13 pieces have been certified in MS66 by PCGS, with five finer (10/10). This example is fully struck and bright mint luster swirls around both sides as it is slowly tilted beneath a light. Both sides are exceptionally clean, and overall the coin is suggestive of an even higher grade. (#8409)

Striking MS66+ 1907 Half Eagle

4460 1907 MS66+ NGC. CAC. An absolutely gorgeous coin with great surface quality even by Premium Gem standards. Bold cartwheel luster, yellow-gold with a touch of orange, frames sharply struck and carefully preserved devices on each side. NGC has certified just eight numerically finer examples (10/10). (#8416)

PROOF LIBERTY HALF EAGLES

1892 Half Eagle, PR67 Ultra Cameo Single Finest Certified Example Incomparable Quality and Eye Appeal

4461 1892 PR67 Ultra Cameo NGC. By the 1890s, the craftsmen of the Philadelphia Mint had thoroughly mastered the art of proof coinage. The annual proof set offerings were immensely popular with collectors, and the program provided a tidy profit every year for the Mint's coffers. Because of their large intrinsic value, gold proofs were ordered less frequently than the minor and silver issues, but collectors like Virgil Brand and John M. Clapp could be counted upon to order sets every year. The 1892 proof half eagle claims a comparatively large mintage of 92 pieces, but the issue seems to be just as rare today as the lower-mintage dates of the era. Jeff Garrett and Ron Guth estimate only 20-30 examples are extant in all grades.

The coin offered here may be the finest-known specimen of this rare issue. Current population data reveals NGC has certified only this coin in PR67 Ultra Cameo, with none finer in any designation, while PCGS has graded no specimens in their corresponding PR67 Deep Cameo grade, also with none finer (10/10). A search of auction records indicates Heritage has handled only one 1892 proof with this kind of cameo contrast in previous auctions, the PCGS graded Choice proof Deep Cameo example in the Long Beach Signature Auction (Heritage, 5/2009), lot 1702. As nice as that coin was, it cannot compare to this magnificent example.

The present coin possesses mirrored fields with fathomless depths of reflectivity. The surfaces display the characteristic orange-peel texture found on the best proofs of the era, while the design elements are fully struck and frosty. The profound field-device contrast gives the coin an intense black-on-gold flash when the coin is tilted in the light. The visual appeal of this specimen is breath taking. This coin deserves a place in the finest collection or Registry Set. (#98487)

Still-Mirrored PR55 1903 Half Eagle, An Entry-Point to Classic Proof Gold

4462 1903 PR55 PCGS. A lightly circulated proof from the brilliant era, distinctly rubbed with a number of contacts but also bold mirrors remaining in the protected areas of the yellow-gold fields. Impaired yet impressive, a coin that could make an affordable entry into the world of classic proof gold coinage. Population: 5 in 55, 42 finer (10/10). (#8498)

Prized PR67+ Cameo 1903 Half Eagle

4463 1903 PR67+ Cameo NGC. In a move well-known to enthusiasts today but perplexing to the affluent collectors of the era, the Mint after 1901 changed its method of manufacturing proof gold. Where the former method involved polishing only the exposed fields of the proof dies—the highest portion—leaving the device crevices frosted, the change involved polishing the device crevices as well. This resulted in proof gold coinage in which the pleasing and desired, sometimes profound contrast between mirrored fields and frosty devices was either reduced or eliminated.

The changed manufacturing method also means that post-1901 proof gold certified as Cameo or Deep/Ultra Cameo is considerably more elusive than the pre-1902 coins.

Dr. Robert Loewinger's *Proof Gold Coinage of the United States* notes that the proofs “made during the years 1902-1907 have satiny or semibrilliant devices rather than frosty devices ...” (The new gold designs introduced in 1907 and 1908 were not conducive to production with mentionable field-device contrast.)

The present example is the sole PR67+ Cameo piece certified by NGC, with one PR68 Cameo finer (10/10); the finest at PCGS are two PR65 Cameo pieces. Among the first attributes the viewer notices on this piece, however, is the pristine overall surface preservation, with an expectedly full strike and virtually no visible contact. A tiny obverse blemish near the rim below star 13 is the only mentionable flaw. The raised devices—the recessed areas in the die—appear to have been polished but not heavily, reducing the overall contrast which is notable but not profound.

This pristine coin is a gorgeous piece, nearly unimprovable either technically or aesthetically. It represents another important opportunity for connoisseurs of proof gold to obtain a splendid piece from this fine collection. (#88498)

Prized PR64 Cameo 1907 Half Eagle

- 4464 1907 PR64 Cameo PCGS. CAC.** An unusual and distinctive Cameo specimen from the last proof date in the Liberty half eagle series, one of just 92 pieces struck. Like most brilliant-era Cameo coins, this piece is not thickly frosted on the devices, but considerable contrast exists between the mirror-fields and the minimally polished devices. A handful of small disturbances in the fields, including a contact to the left of Liberty's chin, contribute to the grade. A lovely piece that would make a fitting finisher to a challenging date set. Population: 5 in 64 Cameo, 4 finer (10/10). (#88502)
-

INDIAN HALF EAGLES

- 4465 1908 MS63 NGC.** Rich gold-orange color for this first-year Indian half eagle with prominent patches of rose at the lower right obverse and upper right reverse. Lightly abraded but generally attractive for the Select level. (#8510)
-

First-Year Near-Gem 1908 Indian Half Eagle

- 4466 1908 MS64 PCGS. CAC.** Though public reaction to the Pratt quarter eagle and half eagle designs of 1908 was mixed, the coins were saved in quantity, and today, the 1908 half eagle is one of the few Indian fives to be accessible in MS64 condition. This lustrous example, well struck with a mostly yellow obverse and a more orange reverse, has greenish outer accents and grand eye appeal. (#8510)
-

Gorgeous MS64+ 1908 Indian Five

- 4467 1908 MS64+ PCGS. CAC.** In 1908, Christian Gobrecht's 1839 Liberty Head design finally gave way to the novel sunken-relief stylings of Bela Lyon Pratt. This Indian five from that pivotal first year has swirling yellow-gold luster with orange overtones at the obverse margins and on the reverse. Boldly detailed and delightful with preservation close to the Gem level. (#8510)
-

Pleasing MS64+ 1908-D Half Eagle

- 4468 1908-D MS64+ NGC.** A fantastic first-year example of this D-mint Indian half eagle issue, available for a price in the near-Gem range but a definite condition rarity any finer. This captivating piece makes a case for MS65 with bold yellow-orange to rose luster, but it shows just a few too many small marks to achieve that grade. NGC has graded just four coins as Gem or better (10/10). (#8511)

Handsome MS64+ 1909 Five Dollar

- 4469 1909 MS64+ NGC. CAC.** A satiny and razor-sharp olive-gold Indian five that boasts splendidly unabraded fields and devices. The 1909 generally trades at type prices, but at the MS64 level, it is approximately six times scarcer than its high mintage Denver Mint counterpart, per the (11/10) NGC Census. In MS65, the 1909 is twice as rare as its 1908 predecessor, which perhaps was set aside as souvenirs in the first year of issue due to the novelty of its design, despite the purchasing power of a half eagle in that era. (#8513)

**1909 Indian Half Eagle, MS65+
High Quality, Sharply Struck Example**

- 4470 1909 MS65+ PCGS. CAC.** A large mintage of 627,060 Indian half eagles was achieved at the Philadelphia Mint in 1909, and the issue is reasonably available in lower Mint State grades today. The date becomes quite scarce at the Gem level, and any higher grade is virtually unobtainable, so this MS65+ example represents the highest quality the average collector can aspire to. Currently, only eight coins have been certified in higher numeric grades at PCGS (10/10).

The present coin is an impressive high-end Gem, with a razor-sharp strike, and bright mint luster. The surfaces are an attractive yellow-gold color, with rose highlights, and eye appeal is outstanding. (#8513)

-
- 4471 1909-D MS64 NGC.** Slight orange casts grace the obverse and (to a greater extent) the reverse, while the luster is mainly yellow-gold. Well struck with a few small abrasions, most visibly to the right of the eagle's head. (#8514)
- 4472 1909-D MS64 NGC. CAC.** A brightly lustrous near-Gem example of this popular type issue, well struck with great wheat-gold color. Smooth and attractive. While the date is available for a price in MS64, anything finer is genuinely scarce; NGC has certified just 79 such pieces (10/10). (#8514)
- 4473 1909-D MS64 NGC. CAC.** Rich yellow-orange color overall with patches of deeper, almost brown-infused luster at the margins. A well struck and attractive near-Gem that would fit well in a type set of similar appearance. (#8514)

AU Sharpness 1909-O Half Eagle

- 4474 1909-O—Improperly Cleaned—NGC Details. AU.** A well struck example of New Orleans gold's swan song, lightly circulated and cleaned but with considerable inherent appeal. Violet-tinged orange-gold surfaces show few obvious hairlines at a distance, though the luster is subdued, and only minor wear is visible on the highest design elements. (#8515)

1909-O Five Dollar, AU55 Low-Mintage Key

- 4475 1909-O AU55 PCGS.** This low-mintage key issue has a well-formed mintmark, and it is clearly an O. The mintage of the 1909-O is impressively low at only 34,200 pieces, and it has a correspondingly low availability. Just the slightest friction is seen on this lovely example. The surfaces are bright and covered with rich red patina on each side. The lower feathers on the headdress and the upper portion of the eagle's wing show softness of strike. (#8515)
- 4476 1910 MS64 NGC.** Bold yellow-gold luster through the centers with slight paling to wheat at the margins. A strongly defined example with decidedly above-average surface quality for the issue. NGC has certified just 28 numerically finer pieces (10/10). (#8517)

Challenging MS64+ 1910 Indian Five

- 4477 1910 MS64+ PCGS. CAC.** A lovely caramel-gold near-Gem whose intricate strike, coruscating luster, and undisturbed surfaces combine to proclaim its quality. The 1910 often trades as a type coin, but per the (11/10) PCGS Population Report, it is the second-scarcest Philadelphia issue at the MS64 level, trailing only the key date 1929. Population: 6 in 64+, 18 finer (11/10). (#8517)

- 4478 1910-S MS61 PCGS.** Saturated yellow-gold luster with patches of lavender on the outside. Well struck for the type with small, choppy marks across the upper reaches of the design. (#8519)
- 4479 1911 MS64 NGC. CAC.** Uncommonly strong luster with a cartwheel effect on the yellow-gold reverse. This is a well-defined and attractive near-Gem from an issue seldom found any finer. (#8520)

1911 Indian Ten, MS64 Favorite Type Coin

- 4480 1911 MS64 NGC. CAC.** The 1911 Indian half eagle is a favorite issue with type collectors because its large mintage translates into ready availability in high grade. The present coin is a Choice Mint State example, with pleasing rose-gold surfaces, and subtle mint luster. Like most examples of the 1911, the strike on this specimen shows some softness on the headdress feathers. (#8520)

Choice Mint State 1911 Indian Half Eagle Nice Color and Luster

- 4481 1911 MS64 NGC.** A Choice Mint State example of this popular type coin, from a mintage of 915,000 pieces. The surfaces are a light yellow-gold color, with rose highlights. The coin is well struck, with the typical softness evident on the lower headdress feathers. The lustrous surfaces exhibit only a few minor abrasions. (#8520)

Near-Mint 1911-D Half Eagle

- 4482 1911-D AU58 PCGS.** Primarily sun-yellow luster with occasional windows into paler canary-gold at the centers. A well struck and scarcely worn example of this lower-mintage Indian five dollar issue, modestly abraded on the obverse with a few more serious digs on and above the eagle's folded wing. (#8521)

Low-Mintage AU58 1911-D Five Dollar

- 4483 1911-D AU58 PCGS.** While the quarter eagles and eagles of the same date are more famous, the 1911-D half eagle is also an elusive issue with a five-figure mintage. This moderately worn but still-lustrous near-Mint coin has minor wear on the centers. Saturated yellow-gold color dominates the obverse, while the reverse has a more orange cast. (#8521)

Important Mint State 1911-D Half Eagle

- 4484 1911-D MS60 ANACS.** Like its more famous quarter eagle counterpart, the 1911-D half eagle is an important issue with a mintage in the five figures. While this well struck orange-gold and yellow-gold example shows a number of slide marks and deeper abrasions, neither side shows any evidence of wear. Housed in a small-format ANACS holder. (#8521)

Fantastic 1911-S Indian Five, MS64

- 4485 1911-S MS64 NGC.** The mintage of nearly 1.5 million San Francisco half eagles in 1911 was one of the highest in the entire Indian series. However, nearly all of those saw circulation, and today the average certified grade is only 56. Since operations began in 1986, PCGS and NGC have a combined population of just 34 coins, with only 11 finer. The 1911-S is one of the prime condition rarities in the Indian half eagle series. This piece is a wonderful near-Gem with frosty light yellow luster and splashes of dark patina on each side. Census: 15 in 64, 4 finer (10/10). (#8522)
- 4486 1913 MS64 PCGS.** Uncommonly lively luster is this near-Gem's greatest selling point. Yellow-gold interiors swirl in the light, while the more orange margins offer a slightly subdued counterpoint. Shallow scrapes are noted to the left of the eagle. PCGS has graded 48 finer examples (10/10). (#8525)

1913-S Indian Half Eagle, MS62
Attractive Better Date

- 4487 1913-S MS62 PCGS. CAC.** The 1913-S Indian half eagle is a better date in the series, especially in high grades. The present coin is a well struck MS62 example, with just a little softness evident on the lower headdress feathers and the mintmark. The lustrous surfaces display attractive greenish-gold color, with light rose highlights. (#8526)

Beautiful MS64+ 1914 Half Eagle

- 4488 1914 MS64+ NGC.** A lustrous khaki-gold near-Gem. The strike is complete save for occasional intricacies of the headdress plumes, and the surfaces display only isolated faint marks that generally require a loupe to find. 1914 was the final year that all three mint facilities of the era struck half eagles. Census: 5 in 64+, 19 finer (10/10). (#8527)
- 4489 1914-D MS62 PCGS.** Rich gold-orange luster overall with more yellow elements at the interiors and occasional green-gold at the margins. Light and wispy abrasions combine to account for the grade. (#8528)
- 4490 1914-D MS63+ PCGS.** This honey-gold Indian five is mildly luminous and displays an above average strike. One slender tick on the cheekbone, but abrasions are otherwise inconsequential. (#8528)

Gem 1914-D Indian Eagle
Rare Issue in High Grade

- 4491 1914-D MS65 NGC.** As a date, the 1914-D Indian half eagle is a reasonably available issue, with a reported mintage of 247,000 pieces. However, the population falls off considerably in higher Mint State grades. At the Gem level, the 1914-D is quite rare, and anything finer is virtually unobtainable. The present coin is a delightful Gem, with attractive rose-gold surfaces. The design elements are well detailed, with just the slightest softness apparent on the lower headdress feathers and the eagle's leg. The surfaces are lustrous, with ample eye appeal. Census: 14 in 65, 1 finer (10/10). (#8528)
-

Bela Lyon Pratt

**1916-S Half Eagle, MS64+
Scarce Issue in Choice Condition**

4492 1916-S MS64+ PCGS. CAC. From a mintage of 240,000 pieces, the 1916-S Indian half eagle is a scarce issue in Choice Mint State condition. The present coin is a high-end Choice specimen, with well struck devices, frosty mint luster, and attractive rose-gold surfaces. Population: 72 in 64, 9 finer (10/10). (#8532)

**Near-Mint 1929 Half Eagle
Last of the Circulating Fives**

4493 1929 AU58 NGC. That a majority of the 1929 fives were melted in the 1930s is an unspoken assumption among many numismatists; otherwise, the small pool of survivors makes little sense. The 1929 fives were a last gasp for the denomination, the first half eagles struck since 1916 and the last made until 1986. This straw-gold example remains strongly lustrous with wheat and pink accents. Minor rub crosses the high points, indicative of either brief circulation or a short time spent as a pocket-piece. An appealing coin that would make a great finisher to an otherwise Mint State set. (#8533)

EARLY EAGLES

1798/7 Capped Bust Eagle, XF45 Scarce 9x4 Stars, BD-1 Variety

4494 1798/7 9x4 Stars XF45 PCGS. Breen-6836, Taraszka-9, BD-1, High R.4. Two varieties of 1798 Capped Bust Right eagles are known to numismatists today, both struck from 1797 obverse dies that were overdated with the later date. The reverse die is believed to be one of three created by John Smith Gardner in 1796. The present coin represents the BD-1 variety, easily recognized by the 9x4 obverse star pattern. The 2011 *Guide Book* reports the mintage of the BD-1 variety as 900 pieces, but other sources believe as many as 1,600 examples may have been struck. Die state evidence indicates this issue was actually struck before some of the 1797 dated eagles, further confusing the issue. The BD-1 is certainly a scarce variety today, with John Dannreuther estimating a surviving population of 80-100 pieces in all grades.

As a general rule, collecting large denomination gold coins did not become popular until the 1930s, but the early eagles are an exception to this axiom. The historical importance of these early issues, and the short length of the series (1795-1804) tempted many early numismatists to include them in their collections. The 1798/7 was prized as a date, and the two separate varieties were quickly recognized by early catalogers. In lot 851 of the Randall Collection (Woodward, 6/1885), the cataloger noted:

"1798 No. 2; die altered from 1797; 13 stars, 4 of which are facing; splendid proof, one of the rarest of the eagles."

The present coin shows light wear on the well struck devices, but most original detail remains intact. Likewise, most original mint luster is still present. The pleasing surfaces are an attractive greenish-gold color, and only minor abrasions can be detected. A characteristic die crack is observed, from the edge, through L in LIBERTY, and through the cap. Population: 4 in 45, 19 finer (10/10). (#8560)

XF Details BD-2 1801 Ten Dollar

4495 1801—Improperly Cleaned—NGC Details. XF. Breen-6843, Taraszka-25, BD-2, R.2. The BD-2 variety, one of the few early gold die pairs not to be at least scarce, is perhaps the most important Bust Right ten dollar gold issue to type collectors. While this example was cleaned in the past, leaving numerous hairlines across subdued yellow-gold surfaces, the devices remain pleasingly detailed. A rim bump is noted at 11 o'clock on the obverse. (#8564)

Select 1801 Capped Bust Right Eagle
Popular Type Issue, BD-2
Sharp Strike, Strong Luster

4496 1801 MS63 NGC. Breen-6843, BD-2, R.2. The 1801 Capped Bust Right eagle claims a substantial mintage of 44,344 pieces, with only two varieties known for the date. The present coin represents the more available BD-2 variety, recognized by the position of star 8 near the cap, with two points aimed at the cap, and star 13 near the bust. A new style of punch was used for the obverse stars, with long spindly points. John Dannreuther estimates the BD-2 variety accounts for 30,000-40,000 pieces of the original mintage, with a surviving population of 600-800 examples in all grades. The date enjoys great popularity with type collectors, because it is the most available issue of the series in high grade.

One mystery concerning the 1801 eagle is the series of die marks showing boldly at the top fold of the cap on many specimens. In his notes, Harry Bass reported, "Nine vertical spines in cap," but he did not speculate on the cause of this feature. Anthony Taraszka attributed the spines to clash marks from the shield on the reverse, but the marks do not line up correctly to fit this explanation. The spines remain a tantalizing mystery for specialists to puzzle over.

The present coin is an impressive Select Mint State example, with sharply defined design elements. Fine detail is evident on Liberty's hair, and the star centers are boldly impressed. The enigmatic spines are clearly visible on the cap. The pleasing surfaces are a light greenish-gold color, and show only minor, grade-consistent abrasions. Vibrant, original mint luster radiates from all surfaces, and the visual appeal is compelling. Census: 45 in 63, 29 finer (10/10). (#8564)

AU Sharpness 1803 Eagle, Extra Star, BD-5

4497 1803 Extra Star—Improperly Cleaned—NGC Details. AU. Breen-6845, Taraszka-30, BD-5, High R.4. Legendary numismatist Harry W. Bass, Jr. is credited with the discovery of the extra star on the reverse of the present variety. Among the two Large Reverse Stars varieties known for the date, only BD-5 is collectible, since BD-6 is extremely rare.

The orange-gold surfaces are a bit bright from cleaning. Light wear has removed the traces of the "extra star" from the rightmost cloud. Die adjustment marks run northeast to southwest in the center obverse. A couple of other diagonal adjustment marks on the lower hair curls and adjacent field run northwest to southeast. The surfaces otherwise display only light abrasions, and a wealth of pleasing detail remains. (#88565)

LIBERTY EAGLES

4498 1850 Large Date AU55 PCGS. CAC. A canary-gold No Motto example that is devoid of distracting marks. Luster emerges from design elements, especially on the reverse. The strike is bold save for the stars, which were deeply hubbed and have lightly impressed centers. Population: 18 in 55, 17 finer (10/10).(#8603)

4499 1850 Small Date XF45 PCGS. CAC. The elusive Small Date with significant space between the date and the nearby devices. This Choice XF example has strong yellow-gold luster with light abrasions and wear. Scattered greenish overtones complete the eye appeal. Population: 22 in 45, 36 finer (10/10).(#8604)

4500 1850 Small Date AU50 NGC. A sun-yellow example of the Small Date variety, softly radiant with scattered abrasions and orange overtones. Bluntly struck on the obverse stars but with better interior definition. (#8604)

4501 1852 AU53 PCGS. CAC. The undisturbed sun-gold and lime surfaces lack consequential marks, and definition is crisp except on the stars. An ideal No Motto collector coin. Struck from rotated dies. Population: 29 in 53, 48 finer (10/10).(#8608)

4502 1853 AU58 PCGS. Bright yellow-gold luster and considerable eye appeal. Just a touch of rub affects the high points of the well struck devices, though the fields also show a number of shallow scrapes. Population: 27 in 58, 26 finer (10/10).(#8610)

**1853 Ten Dollar, MS60
Popular No Motto Type Coin**

4503 1853 MS60 NGC. A relatively high mintage issue but the vast majority of survivors are XF or less with Mint State pieces quite elusive, as are most gold coins from this decade. The yellow-gold surfaces are typically marked for the grade. Fully lustrous.
Ex: Superior (1/2004), lot 944; 2005 FUN Auction (Heritage, 1/2005), lot 9209. (#8610)

4504 1854 AU55 NGC. CAC. Luster brightens the borders of this scarce No Motto issue. The pale pumpkin-gold surfaces are only moderately abraded, with no individually distracting marks. Just 54,250 pieces were issued, and only a handful survive in Uncirculated condition. (#8613)

4505 1854-O Large Date AU55 NGC. CAC. The simply gargantuan date dominates the exergue. A radiant yellow-gold example that is scarcely worn with considerable prooflike reflectivity found in the protected areas. (#8614)

**1855-S Liberty Head Eagle, XF45
Rare, Low-Mintage Date**

4506 1855-S XF45 PCGS. CAC. The 1855-S Liberty Head eagle is one of the scarcest issues of the No Motto type, with a tiny mintage of 9,000 pieces. The present coin is a well detailed, lightly worn specimen, with orange-gold surfaces, and much original mint luster. Population: 16 in 45, 14 finer (10/10). (#8618)

4507 1856-S XF45 NGC. Medium S. A bright and well defined representative of the early San Francisco Mint, which struck far more double eagles during the 1850s than all other gold denominations combined. The reverse has two tiny rim dings near 6 o'clock. (#8621)

4508 1857 AU53 NGC. A scant mintage of 16,606 pieces ensures the scarcity of the 1857. Luster is particularly prominent on the reverse legends. The fields display typical marks, and minor rim nicks are noted at 10 and 4 o'clock on the obverse and at 7 o'clock on the reverse. (#8622)

4509 1860 AU50 NGC. Rounded or five-fold hairbun subtype. A lightly circulated yellow-gold No Motto ten with moderately marked surfaces. A mere 15,055 eagles were struck at Philadelphia in 1860, and survivors are elusive. (#8631)

4510 1861 AU53 NGC. Rounded Bun subtype. Well struck in the centers for this Civil War date, though the peripheral stars show more typical softness. Yellow-orange surfaces retain considerable luster through light wear and moderate abrasions. (#8633)

- 4511 1869-S VF35 PCGS. CAC.** A yellow-orange example with faint luminosity through lightly abraded fields, worn just beyond the XF threshold but highly appealing. One of just 6,430 pieces produced. (#8656)

Rare Choice XF 1871 Liberty Ten

- 4512 1871 XF45 NGC.** The 1871 is one of the many unheralded rarities of the Liberty eagle series. Only 1,790 business strikes were issued, and none have been certified as Mint State by NGC. The present desirable Choice XF example has substantial prooflike luster at the margins, and the devices exhibit only light wear. No abrasions merit individual description. Census: 6 in 45, 26 finer (10/10). (#8660)

**1871-S Ten Dollar, XF45
Only 16,500 Pieces Struck**

- 4513 1871-S XF45 PCGS.** Each auction we are reminded of the absolute and conditional scarcity of S-mint gold and silver coins from the 1860s and 1870s. The reason is obvious when one thinks about it. There was a good reason the federal government opened a mint in San Francisco, with the vast amounts of precious metals being mined there was a pressing need to convert the locally mined raw ore into spendable coinage. Coins such as the 1871-S ten dollar slipped into circulation and stayed there. There are apparently no Uncirculated examples known. This Choice XF is well-defined for the issue and grade with noticeably reddish-tinted surfaces. Several unfortunate scratches are seen in the left obverse field. (#8662)

-
- 4514 1872-S XF45 PCGS.** A richly detailed representative of this elusive San Francisco issue. Luster brightens design recesses, and marks are surprisingly few, although a few small gray spots are present. A scant 17,300 pieces were issued. Encapsulated in a green label holder. Population: 26 in 45, 25 finer (10/10). (#8665)

Appealing XF 1873-S Liberty Ten

- 4515 1873-S XF40 PCGS.** A splendidly detailed orange-gold representative with substantial luster across the eagle and reverse periphery. The slightly bright surfaces are unmarked save for two pinscratches near the mouth and eye of Liberty. Due to banker and importer preference for double eagles, only 12,000 1873-S tens were struck. Certified in a green label holder. Population: 9 in 40, 19 finer (11/10). (#8668)

Bold Choice VF 1874-CC Ten

- 4516 1874-CC VF35 PCGS.** Carson City eagles from the 1870s are rare, and most issues would be regarded as very rare if they belonged to a more widely collected series. The 1874-CC is the sole exception, as it can be found with patience in VF through AU55 grades. The present straw-gold piece shows considerable plumage detail on the wings, and only a pair of old minor reeding marks on the portrait merit passing mention. (#8670)

-
- 4517 1877-S Genuine PCGS.** The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, the piece has the details of an AU specimen that has been cleaned. Well-defined for this low-mintage issue with minimal wear, though the canary-yellow interiors are artificially bright.

- 4518 1878-S AU50 NGC.** The 1878-S completed a lengthy run of low mintage, rare date San Francisco eagles that began in 1857. During the same era, huge numbers of twenty dollar pieces were coined annually at the same facility, since that denomination was more convenient for accounting large sums. This is a bold straw-gold example with noticeable luster on the hair, eagle, and legends. (#8682)

Handsome Low-Mintage AU 1880-O Ten

- 4519 1880-O AU50 PCGS.** This rare date New Orleans eagle has much more luster than the usual AU50 Liberty ten, and the strike is sharp throughout. Faint horizontal roller marks on the cheek are of mint origin. Expect to pay a sizeable premium for this pleasing green-gold example, which is encapsulated in an old green label holder. A meager 9,200 pieces were struck, and PCGS has certified only seven coins in grades above AU55. Population: 29 in 50, 42 finer (11/10). (#8689)

Seldom Seen MS63+ 1880-S Ten

- 4520 1880-S MS63+ PCGS.** Despite a fairly high mintage of more than 500,000 pieces, the 1880-S is rare at the MS63 level, and is very rare any finer. This is likely due to its relatively early date, prior to the large-scale export of gold coins to Europe that began circa-1893. This is an impressive khaki-gold representative with potent luster, a pleasing strike, and attractive preservation. Population: 1 in 63+, 5 finer (11/10). (#8690)
- 4521 1881-O XF40 PCGS.** The New Orleans Mint reopened in 1879 to coin silver dollars, but the facility also struck limited quantities of eagles each year through 1883, though the emphasis is on *limited*, as the 1881-O mintage was only 8,350 pieces. The sharpness and extent of the luster are impressive for the XF level, and the honey-gold color is original. There is one concealed mark on Liberty's jaw. Encased in a green label holder. (#8693)

Scarce Choice 1882 Ten Dollar

- 4522 1882 MS64 NGC. CAC.** An orange-gold Choice example of this high mintage but conditionally rare ten dollar issue. The 1882 is easily secured in grades through MS63, but non-numismatic storage has made near-Gems difficult to find. The present sharply struck and lustrous piece has the obverse appearance of an even finer grade, although a few small marks above the upper arrowhead deny such an assessment. Census: 58 in 64, 2 finer (10/10). (#8695)

- 4523 1882 MS62 Prooflike NGC.** A sharply struck and profoundly reflective piece with pale yellow-gold surfaces. Moderately abraded in the fields but appealing for an MS62 Prooflike. (#78695)

- 4524 1882-O XF45 PCGS. CAC.** The New Orleans Mint opened in 1879 with the express purpose of coining silver dollars. Yet a small number of eagles were also struck annually through 1883, and all survivors from that span are pursued by Southern gold collectors. An original olive-green and peach-gold piece with pleasing detail and ample luster. Obverse field marks are consistent with the grade. (#8697)

Underappreciated Uncirculated 1882-O Ten

- 4525 1882-O MS60 PCGS.** Since just 10,820 1882-O tens were struck, and most or all went into local Southern commerce, it comes as no surprise that the issue is very rare in Mint State. Nonetheless, such pieces are much more affordable than O-mint twenties of comparable conditional scarcity. This typically abraded example is sharply struck aside from star 13, and cartwheel luster dominates the entire reverse as well as the obverse margin. Population: 3 in 60, 5 finer (11/10). (#8697)
- 4526 1883 MS63 NGC. CAC.** Mintages of Liberty tens dropped significantly in 1883 after millions were struck between 1880 and 1882. Unsurprisingly, the 1883 is very scarce at the Select level. The present fully struck example provides unbroken luster and lacks individually noticeable abrasions. Census: 94 in 63, 5 finer (10/10). (#8699)
- 4527 1883-S MS61 NGC.** The 1883-S is a collectible yet very scarce issue from a meager mintage of 38,000 pieces. This representative has original apricot and apple-green toning. Luster penetrates the fields, and although the obverse is abraded, the reverse displays only minor contact. (#8702)

Elusive Select 1884 Ten Dollar

- 4528 1884 MS63 PCGS.** Rich peach-gold toning is dominant, although the margins offer apple-green shades. Lustrous and crisply struck with the expected distributed minor abrasions. A low mintage issue that is infrequently encountered so well preserved. Population: 17 in 63, 6 finer (11/10). (#8703)
- 4529 1884-S MS62 PCGS.** A peach-gold better date eagle that boasts sweeping luster and an exacting strike. The reverse is minimally abraded. Encapsulated in a green label holder. Population: 54 in 62, 5 finer (10/10). (#8705)
- 4530 1884-S MS62 PCGS.** An attractive orange-red representative of this lower mintage and conditionally challenging issue. Well struck and only moderately marked. An excellent value relative to its scarcity and gold content. Encased in a green label holder. Population: 54 in 62, 5 finer (10/10). (#8705)

Rare Near-Gem 1885 Ten Dollar

4531 1885 MS64 PCGS. Unlike the 1880 to 1882 Philadelphia issues, each of which was struck in excess of 1 million pieces, the 1885 has a relatively low mintage of 253,462 pieces. Uncirculated examples are scarcer than expected, but readily collected in grades through MS62. Near-Gems, however, are rare, and only a single example has been certified by PCGS as Gem or finer (1/10). This lustrous and sharply impressed example has lime-green borders and apricot fields and devices. No marks merit mention, and the eye appeal is excellent for this much better date. (#8706)

4532 1885-S MS63 PCGS. Coruscating luster lights up gold-orange surfaces that are moderately patinated. A solidly struck and gorgeous Select example of this S-mint favorite. PCGS has graded only one numerically finer representative (10/10).(#8707)

Significant 1885-S Liberty Ten, MS64

4533 1885-S MS64 NGC. The 1885-S is relatively scarce in Uncirculated grades, with most certified examples in AU55 to MS63 holders. The issue is extremely rare at the MS64 level, and none are known any finer. The present near-Gem is sharply struck and boasts vibrant luster. The reverse is well preserved, and the obverse displays only scattered small ticks. Census: 2 in 64, 0 finer (10/10). (#8707)

4534 1886-S MS63+ PCGS. The 1886-S is regarded as a common issue in abraded Mint State, but it becomes desirable as the grade approaches Choice. Boldly struck and lustrous with sea-green margins and apricot interiors. Population: 2 in 63+, 11 finer (10/10).(#8709)

4535 1887 MS61 PCGS. CAC. The 1887 is a much better date, due to a mintage of 53,600 pieces and an absence of sizeable overseas bank vault hoards. This satiny example has boldly struck devices, original green-gold color, and the expected number of faded field marks. Population: 19 in 61, 25 finer (10/10).(#8710)

4536 1888-S MS63 PCGS. CAC. The orange-gold centers are framed by olive-tinged margins. Precisely struck and lustrous with minimum contact save for a faint vertical pinscratch on the back of Liberty's neck. PCGS has certified only three pieces in higher grades, all as MS64 (10/10).(#8714)

4537 1889 AU55 PCGS. A strongly struck piece with prominent luster that is pale yellow-gold. Lightly abraded with minor but distinct wear on the high points. Population: 17 in 55, 51 finer (10/10). (#8715)

4538 1890 MS62 PCGS. This low mintage Philadelphia eagle has unencumbered luster and a bold strike. Marks are moderate for the grade, and are evident primarily on Liberty's neck and the right obverse field. Population: 82 in 62, 15 finer (10/10). (#8717)

4539 1893 MS64 NGC. CAC. This green-gold near-Gem displays exemplary luster and a precise strike. The reverse is beautifully preserved, and the obverse exhibits only faint field grazes. (#8725)

4540 1893-O MS62 PCGS. Conditionally scarce with only eight pieces graded higher by PCGS (10/10). Sharply defined with softly frosted yellow-orange surfaces that show scattered light to moderate abrasions. One of just 17,000 pieces produced. (#8727)

4541 1895-O MS62 NGC. Boldly impressed with strong and swirling luster on each side. Scattered light to moderate abrasions pepper the obverse, while the reverse shows fewer and less severe marks. NGC has graded just 12 numerically finer examples (10/10). (#8733)

4542 1897-O MS61 PCGS. CAC. All New Orleans tens are scarce in Mint State, and the 1897-O is no exception. This canary-gold representative is crisply struck aside from the final two stars. No marks merit individual mention, although the obverse field is abraded. Just 42,500 pieces were struck. (#8738)

Impressive Gem 1900-S Ten Dollar

4543 1900-S MS65 NGC. This turn-of-the-century date has a contradictory presence in the Mint State tiers of preservation. For example, Garrett and Guth note: "A substantial number of circulated examples are known, but Mint State pieces are quite scarce and can be difficult to locate in grades above MS-62."

On the other hand, the very next sentence states that "Despite the rarity of Uncirculated examples, there are some special 1900-S eagles at the very highest levels." This Gem is one such treasure, alone at the MS65 level in the combined certified population with four finer grading events (10/10). Yellow-orange surfaces are boldly lustrous, and the central devices are sharply struck. Only the lowest stars show softness, and this is readily forgivable in the context of the overall eye appeal. (#8746)

- 4544 1901 MS64 NGC. CAC.** A turn-of-the-century charmer with warm satiny luster, mainly butter-yellow but with generous peach overtones. Small, scattered abrasions, particularly one on the cheekbone and another between stars 1 and 2, account for the grade. (#8747)
- 4545 1901 MS64 PCGS.** A lovely near-Gem that has original dusky khaki-gold toning along with vivacious cartwheel luster and a precise strike. Inspection with a loupe reveals only faint abrasions. (#8747)
- 4546 1901 MS64 PCGS. CAC.** Rich olive and peach toning alternate across this lustrous and sharply impressed Liberty type coin. Careful rotation reveals only minor contact, and the eye appeal is unassailable. (#8747)
- 4547 1901 MS64+ NGC. CAC.** This boldly struck straw-gold Choice Liberty type coin exhibits dynamic luster and an especially smooth reverse. The obverse displays only moderate surface grazes. (#8747)
- 4548 1901-S MS64 ★ NGC.** This high-end Choice Mint State Liberty Head eagle displays bright mint luster on orange and rose-gold surfaces. The design elements are fully brought up and eye appeal is nothing short of stunning. Census: 5 in 64 star, 5 finer (10/10). (#8749)
- 4549 1902 MS63 PCGS.** From a low mintage of 82,400 pieces, the 1902 Liberty Head eagle is a scarce date in Select Mint State condition. The present coin displays abundant eye appeal, with bright mint luster and sharply detailed design elements. Population: 91 in 63, 22 finer (10/10). (#8750)
- 4550 1902 MS63 PCGS.** Although its 20th century vintage and Philadelphia origins imply the 1902 is common, that is incorrect given its low mintage of 82,400 pieces. This is a lustrous butter-gold example with no distracting marks. The strike is decent, though several stars lack fully defined centils. (#8750)
- 4551 1903-O MS62 PCGS.** A strongly struck, moderately satiny example of this O-mint issue from the 20th century. Pleasing color is pale yellow in the centers with deeper orange elements close to the rims. (#8753)
- 4552 1904 MS63 NGC.** A lemon-gold Select representative of this later but lower mintage Philadelphia issue. Luster dominates the sharply struck and carefully preserved surfaces. An appealing opportunity to secure this moderately better date. (#8755)
- 4553 1905 MS62 NGC. CAC.** A well struck honey-gold example of this lower mintage Philly emission. Bagmarks are uncommonly few in number for the grade, although careful rotation reveals occasional faint hairlines on each side. (#8757)
- 4554 1905 MS64 PCGS.** A lemon-tinged near-Gem that possesses an intricate strike and coruscating luster. The portrait and fields display only faint marks. Considerably scarcer than type issues such as the 1901-S and 1901. Population: 79 in 64, 22 finer (10/10). (#8757)
- 4555 1905-S MS61 PCGS.** Per the PCGS Population Report, the 1905-S is the rarest 20th century business strike issue in Mint State. This is a lustrous example that has a good strike and rich apricot-gold toning. The 1905-S Population: 25 in 61, 47 finer (10/10). (#8758)
- 4556 1905-S MS61 PCGS.** The 1905-S is much scarcer than indicated by its mintage. The issue was apparently released into local circulation, and relatively few examples emerged from European bank holdings. The present pumpkin-gold coin has booming luster and a sharp strike. Small abrasions are distributed and consistent with the grade. (#8758)

- 4557 1906-D MS64 NGC. CAC.** A solidly struck and satiny eagle from the first year of operation for the Denver Mint. Generous orange overtones grace well-preserved yellow surfaces. NGC has graded 25 numerically finer pieces (10/10). (#8760)

Noteworthy MS63 1906-O Liberty Eagle

- 4558 1906-O MS63 PCGS. CAC.** The 1906-O is the last of the ten dollar issues from the New Orleans Mint, and its lower mintage ensures rarity at the Select level. This is a fully struck piece with exemplary eye appeal. The khaki-gold surfaces are lustrous and uncommonly unabraded for the designated grade. Population: 35 in 63, 16 finer (11/10). (#8761)
- 4559 1907 MS64 NGC.** A sun-gold Choice final-year type coin whose booming luster and sharp strike proclaim the eye appeal. The die preparation weakened the vertical shield lines, as made. (#8763)

INDIAN EAGLES

- 4560 1907 No Periods MS62 NGC.** A yellow-gold introductory year Indian ten that possesses good luster and a bold strike. All marks encountered are inconsequential for the grade. (#8852)
- 4561 1907 No Periods MS62 NGC.** Light yellow-orange luster on the obverse with a more overt orange-gold hue on the reverse. Several near-horizontal abrasions on the cheek contribute to the grade. (#8852)

No Periods 1907 Saint-Gaudens Eagle, MS63

- 4562 1907 No Periods MS63 PCGS.** Yellow-gold luster with orange undercurrents that are more visible on the reverse. While the strike across the center of the portrait is typically soft, the eagle's detail rates as slightly above-average. Assorted wispy abrasions and a few deeper marks combine to account for the grade. (#8852)

**Choice 1907 Indian Eagle, No Periods
Important First-Year Type Coin**

- 4563 1907 No Periods MS64 PCGS.** A well struck, Choice Mint State specimen of this popular first-year type coin, the example offered here exhibits the slightly soft detail always seen on Liberty's hair. The peripheral design elements are strongly impressed, and the mint luster is excellent on both sides. The pleasing surfaces are light greenish-gold, with ample eye appeal. (#8852)

**Premium Gem 1907 Indian Ten
Popular No Periods Type**

- 4564 1907 No Periods MS66 NGC.** The 1907 No Periods eagle is the first business-strike issue to employ Saint-Gaudens' esteemed Indian Head design. A substantial mintage of 238,864 pieces was achieved, and many examples were saved by the general public, as well as contemporary numismatists. As a result, while Premium Gem examples are scarce, they can be located with patience.

The present coin is a magnificent Premium Gem, with glittering, satiny luster and pleasing greenish-gold surfaces. The details of Liberty's hair are a little soft, as always seen on this issue, but the peripheral devices are sharp. Overall eye appeal is overwhelming. (#8852)

- 4565 1908 No Motto MS62 PCGS.** Sun-yellow luster is strong with occasional orange elements. Well struck with several small to moderate abrasions in the left obverse field and extending to the portrait. (#8853)

- 4566 1908-D No Motto AU58 NGC.** Generally yellow-gold luster is undimmed for the most part, though minor friction is noted on the softly struck high points. Several small cuts are noted on and near the headdress, and a copper spot appears between the eagle's legs. (#8854)

**1908-D Indian Eagle, MS62
First Year of Motto Design**

- 4567 1908-D Motto MS62 PCGS.** The 1908-D With Motto Indian eagle claims one of the largest mintages of the series, at 836,500 pieces. Paradoxically, the issue is quite rare in high grade. The present coin displays light greenish-gold surfaces, with strong highlights of rose color. The design elements are strongly impressed, and mint luster is attractive. (#8860)

- 4568 1908-S AU55 PCGS.** A briefly circulated representative of a low-mintage San Francisco issue, well struck with considerable yellow-gold luster remaining on each side. Small to moderate abrasions appear to the left of the date, and a degree of encrustation is noted in the mintmark area. (#8861)

Shining MS62 1908-S Ten Dollar

- 4569 1908-S MS62 NGC.** Bold, almost flashy luster with an undercurrent of satin that is especially noticeable on the reverse. Great design definition, though the portrait and eagle both show digs and abrasions of varying severity. Nonetheless, an attractive example of this earlier With Motto Saint-Gaudens ten dollar issue. NGC has graded 64 numerically finer pieces (10/10). (#8861)

- 4570 1909-D AU58 PCGS.** Pale yellow and deeper sun-gold mingle on this lightly circulated D-mint ten dollar. It has a smooth appearance save for a few ticks on and near Liberty's face. (#8863)

- 4571 1909-D MS61 NGC.** Luminous with orange overtones to yellow surfaces. Coppery patches appear to the left of Liberty's chin, and a number of small abrasions and scrapes combine to account for the grade. (#8863)

Shining MS64 1909-D Ten Dollar

4572 1909-D MS64 NGC. CAC. One of the few 20th century issues to evoke dismay in the Garrett-Guth *Encyclopedia of U.S. Gold Coins* is the 1909-D ten dollar, which receives this comment: "They exhibit average to below-average strikes and lack the explosive luster seen on earlier dates." This near-Gem is a delightful exception to the rule, pleasingly detailed with bold cartwheel luster on slightly satiny yellow-gold surfaces. Hints of orange visit the reverse, which also shows a handful of shallow but ultimately grade-defining field scrapes. Census: 27 in 64, 8 finer (10/10). (#8863)

4573 1909-S AU58 PCGS. Lustrous yellow-gold with considerable orange elements. Evidence of wear is scant, though the bottom of Liberty's chin shows several abrasions. (#8864)

4574 1910-D MS64+ NGC. CAC. Vibrant luster coruscates throughout the splendidly smooth surfaces of this canary-gold near-Gem. The strike is bold save for moderate incompleteness on portions of the branch. (#8866)

4575 1910-S AU58 PCGS. Dusky gold-orange surfaces show only trifling evidence of wear, though this near-Mint example picked up a number of scrapes and abrasions from its short time in circulation, most notably at the base of the neck. Nonetheless, a readily collectible example of this S-mint issue. (#8867)

4576 1911 MS64 PCGS. Vibrantly lustrous with rich yellow-gold color and elements of honey and orange. A vertical mark on Liberty's jawline and a small scrape above the eagle's tailfeathers contribute to the grade. PCGS has graded 88 finer examples (10/10). (#8868)

4577 1911 MS64 NGC. CAC. Warm butter-yellow luster with prominent orange overtones. A well struck near-Gem that is just a few light abrasions away from an even finer grade. (#8868)

Sparkling MS66 1911 Ten Dollar

4578 1911 MS66 PCGS. CAC. The 1926 and 1932 are the most familiar type issues in the With Motto Saint-Gaudens ten dollar series, but among earlier dates, the 1911 is one of the stronger candidates. High-end examples are available for a price even at the Gem level, though Premium Gems such as the present piece are conditionally rare. Sun-yellow fields have exuberant luster and suggestions of orange close to the rims. The design definition is appealing, and the surfaces are smooth. This delightful coin is housed in a green label holder. Population: 18 in 66, 9 finer (10/10). (#8868)

Near-Mint 1911-D Saint-Gaudens Ten

4579 1911-D AU58 PCGS. An important key issue in the Indian eagle series, mintage 30,100 examples. This piece has lightly abraded surfaces, as usual for the date and grade, but only a trace of rub and coppery patina on the high points preclude a fully Mint State designation. Finer-graded pieces are elusive in today's marketplace. (#8869)

Near-Mint 1911-D Ten Dollar

- 4580 1911-D AU58 NGC.** A charming yellow-gold example with strong luster that takes on orange overtones in the light. Well struck with friction rather than distinct wear on the high points, though an abrasion at the truncation of the bust warrants individual mention. High-end for this issue of just 30,100 pieces. (#8869)

Uncirculated Sharpness 1911-D Ten

- 4581 1911-D—Improperly Cleaned—NGC Details. Unc.** At 30,100 pieces, the 1911-D has the lowest mintage of any business strike Indian ten. This fact has long commanded the attention of numismatists, who have made the 1911-D a semi-key to the series, behind only the mass-melted 1920-S and 1933. This is a well struck and nearly bagmark-free example that provides unbroken cartwheel luster. The surfaces are slightly subdued, and the sun-gold color is slightly bright. (#8869)

Low-Mintage 1911-S Ten, MS61

- 4582 1911-S MS61 NGC.** With just 51,000 pieces struck, the 1911-S is among the lowest-mintage Saint-Gaudens eagle issues, a fact that has attracted considerable collector interest. Yellow-gold surfaces offer pale luster tempered by moderate abrasions and a measure of alloy in the left obverse field. Census: 29 in 61, 56 finer (10/10). (#8870)

- 4583 1912 MS63 NGC.** A beautiful peach-gold representative whose sweeping luster and smooth surfaces deliver superior eye appeal for the grade. The 1912 is technically a different design subtype than its Indian eagle predecessors, since it has 48 stars (instead of 46 stars) on its edge. Encapsulated in a former generation holder. (#8871)

- 4584 1914 MS63+ PCGS.** Scintillating cartwheel luster bathes this well struck and impressively preserved lower mintage Indian ten. Only a faded thin mark near the chin prevents an even finer grade. (#8875)

Lustrous MS61 1914-S Ten Dollar

- 4585 1914-S MS61 PCGS. CAC.** Softly lustrous on the obverse with stronger currents on the reverse. Well struck with scattered light to moderate abrasions on the devices. The color shifts from wheat-gold to yellow-orange depending on the light, save for a copper-spot "anchor" over star 9 along the upper obverse. (#8877)

Near-Gem 1914-S Ten Dollar Rare Any Finer

- 4586 1914-S MS64 PCGS.** It is easy to overlook the 1914-S among the many condition rarities and low-mintage dates in the Saint-Gaudens eagle series. Yet specialists know that Gem and better representatives are hard to come by—there are just 26 in the combined certified population (10/10)—and even near-Gems such as the present piece are very scarce. This shining yellow-orange example is well struck for the type, if softly detailed at the hair over Liberty's ear, and the overall eye appeal is great for the grade. Just a few shallow horizontal ticks on the portrait preclude a finer designation. (#8877)

- 4587 1916-S AU58 PCGS.** Rich orange-gold luster is virtually intact, and only a trace of friction crosses the well-defined high points. Mildly abraded with a mark on the chin, but overall a highly pleasing coin. (#8880)

- 4588 1916-S MS60 NGC.** Satiny yellow-gold surfaces have generous peach overtones. Moderate to heavy abrasions, including a cut on Liberty's cheek, account for the grade. (#8880)
- 4589 1926 MS64 PCGS.** Fantastically lustrous as many examples of this type issue are, though the sharp definition on the central devices sets this yellow-gold near-Gem apart. A deserving coin for the discerning collector. (#8882)
- 4590 1926 MS64 NGC. CAC.** A lovely example of the popular and relatively plentiful 1926 Saint-Gaudens ten, one of two dates most often chosen for type collections due to their availability. Light yellow surfaces display traces of green and pink. Appealing for the grade, though not to Gem standards. (#8882)
- 4591 1926 MS64 PCGS.** An orange-gold near-Gem of the only collectible issue from the Roaring Twenties. Lustrous and well preserved with excellent eye appeal. Housed in a green label holder. (#8882)
- 4592 1926 MS64+ PCGS. CAC.** Satiny with elegant color that is predominantly yellow but also has orange influences. Strong design definition with great quality for a near-Gem, though luster grazes and scrapes in the fields combine to preclude Gem status. (#8882)

Popular MS66 1926 Ten Dollar Conditionally Rare So Fine

- 4593 1926 MS66 PCGS.** The 1926 is one of the most familiar type coins in the Saint-Gaudens eagle series, a beneficiary of overseas repatriation. Yet the journey to Europe and back took a toll on most known survivors, and while Gems of the date are available for a price, this is one of just nine MS66 coins certified by PCGS with none finer (10/10). The present Premium Gem has vibrant yellow-orange luster with copper spots to the left of Liberty's chin and in the upper and left lettering on the reverse. In terms of marks, the well struck devices are effectively distraction-free. (#8882)

- 4594 1932 MS64 NGC.** An impressive 1930s gold piece with frosty yellow luster and considerable green patina. Hints of rose color and boldly defined design elements add to its considerable eye appeal. (#8884)
- 4595 1932 MS64 NGC.** Above-average definition on the hair over Liberty's ear, though the detail at the fronts of the wings is a trifle soft. Yellow-gold luster is a touch more dusky on the reverse. (#8884)
- 4596 1932 MS64+ NGC. CAC.** A yellow-gold representative that exhibits potent luster and a nice strike. Faint grazes on the cheek and fields fail to deny the eye appeal. The most collectible gold issue from the Great Depression. (#8884)
- 4597 1932 MS65 PCGS.** Fantastic luster and visual appeal. This Gem is immediately eye-catching, thanks to effusive canary-gold luster, and close inspection backs up the first impression. The well-defined portrait has just a few small marks. PCGS has certified 81 numerically finer pieces (10/10). (#8884)

Impressive 1932 Indian Ten, MS65+

- 4598 1932 MS65+ PCGS. CAC.** The combination of the PCGS Plus designation and the CAC approval indicates that this example is a top-notch 1932 Indian eagle for the type collector. Both sides have frosty yellow-gold surfaces with deeper orange-gold toning and few inconsequential marks. Population: 4 in 65+, 81 finer (10/10). No finer pieces have been awarded the Plus designation. (#8884)
- 4599 1932 MS65+ NGC. CAC.** A pleasing lime-green and sun-gold Gem. Luster dominates the well preserved and boldly struck surfaces. The 1932 will never be rare, but only a small percentage of the issue exceeds the quality of the present piece. (#8884)

LIBERTY DOUBLE EAGLES

- 4600 1850 Genuine PCGS.** The PCGS number ending in .98 suggests Surface Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been damaged and tooled. This olive-gold first year twenty has only a hint of friction on the devices, but both sides display wispy hairlines and the luster appears disturbed on the obverse field. (#8902)

Choice AU 1850 Double Eagle

- 4601 1850 AU55 NGC.** Semireflective fields offer yellow-gold radiance. The devices are strongly impressed, both in the centers and on the peripheries. Scattered light abrasions and a few digs on the cheek contribute to the grade. An attractive and important example of this first Philadelphia double eagle issue struck for circulation. (#8902)

- 4602 1853/2 XF40 NGC. FS-301.** This is a later die state of the rare 1853/2 double eagle. The primary diagnostic is the die lump on the coronet beneath the R in LIBERTY, as photographed in *Cherrypickers'*. Recutting is faint but nonetheless evident within the lower loop of the 3. Breen claims to have discovered this overdate in 1959, and it was publicized by Ted Clark. Lightly toned honey-gold with a few moderate field marks but no distracting abrasions. (#8909)

**Popular 1853/2 Overdate Twenty
FS-301, XF40**

- 4603 1853/2 XF40 NGC. CAC. FS-301.** Although light abrasions are evident on each side, none are inconsistent with the grade. The surfaces retain hints of luster and excellent eye appeal. A wonderful example, representing the popular 1853 overdate variety, listed in the *Cherrypickers' Guide* and other popular references. (#8909)

**1853/2 Liberty Head Twenty, XF45
In-Demand, Scarce Variety**

- 4604 1853/2 XF45 PCGS. CAC. FS-301.** The 1853/2 Liberty Head double eagle is a scarce variety that was discovered in the 1950s. The 1853/2 is most often seen in XF or AU grades, and high grade examples are rare. The present coin shows a little wear on the high points, but most design elements retain significant detail. The surfaces are lustrous, with vivid orange-gold color. Population: 24 in 45, 65 finer (10/10). (#8909)

XF Details 1853-O Double Eagle

- 4605 1853-O—Improperly Cleaned—NCS. XF Details.** The 1853-O twenty is a challenging issue with a relatively low mintage of 71,000 pieces. Most are seen in XF or low AU grades. Traces of luster reside in protected areas of this medium-yellow representative. Liberty's hair is softly defined, but the peripheral details are bold. Small abrasions pepper each side, but none are individually significant. A desirable example despite cleaning. (#8910)

**1854 Liberty Head Twenty, AU58
Elusive Large Date Variety**

- 4606 1854 Large Date AU58 NGC. CAC.** The mintage of the 1854 Large Date double eagle is unknown, but the issue is much rarer than its Small Date counterpart. While NGC does not keep track of this variety in its population report, PCGS has currently certified 10 coins in AU58, with a single specimen finer (10/10). The present coin is a well detailed example, showing only the slightest signs of circulation. The pleasing surfaces are light yellow-gold, with orange highlights, and bright mint luster. (#98911)

First-Year 1854-S Double Eagle, AU55

- 4607 1854-S AU55 NGC.** A Choice AU survivor from the first year of the official United States Mint at San Francisco. This is a scarcely worn yellow-gold example, well struck save on the left side, lightly abraded but attractive for what it is. A single cut on the lower hair curls warrants individual mention. Census: 22 in 55, 63 finer (10/10). (#8913)

- 4608 1855—Improperly Cleaned—NGC Details. AU.** Strongly struck with little actual wear. A past cleaning has given the yellow-gold surfaces numerous hairlines and an unnatural, satin-textured appearance. (#8914)

**1856-S Liberty Head Twenty, AU58
Strong Color and Detail**

- 4609 1856-S AU58 PCGS.** Once a great rarity in high grade, the supply of 1856-S double eagles was dramatically augmented by the salvage of the *S.S. Central America*. Despite the influx of new coins, the 1856-S is still a scarce date at the near-Mint level. The present coin is sharply detailed, with rich orange-gold surfaces, and bright mint luster. A scattering of minor abrasions is evident on both sides, the worst being a scratch from the tip of the tiara into the obverse field. Population: 32 in 58, 45 finer (10/10). (#8919)

Radiant 1856-S Double Eagle, MS62
Ex: S.S. Central America

- 4610 1856-S No Serif, Full A MS62 PCGS.** Ex: S.S. Central America. SCA 5905. Bright yellow-gold luster with richer butter-yellow elements at the margins. A boldly impressed piece, accurately graded due to light to moderate abrasions, yet strongly appealing and an important example of this less-represented Central America shipwreck issue. Comes in a faux-book case with certificate of authenticity and outer box. (#70022)

Gem S.S. Central America 1857-S Twenty

- 4611 1857-S Bold S MS65 PCGS. CAC.** Ex: S.S. Central America. Variety 20B. SCA 5065. A beautiful sun-gold Gem, precisely struck and radiant. Although the present piece spent approximately 130 years at the bottom of the Atlantic ocean, it instead appears as if it were freshly coined. The reverse is nearly immaculate, and the obverse has only infrequent faint grazes. A lustrous and outstanding representative of this historic shipwreck. The Bold S reverse, named for its deeply entered mintmark, was the second-most prevalent variety recovered from the S.S.C.A., trailing the well-known Spiked Shield. Housed in a gold label holder. (#70001)

Bright, Semireflective 1858 Twenty, Unc Details

- 4612 1858—Reverse Rim Filed—NGC Details. Unc.** The 1858 is a low-mintage Philadelphia issue and one that is all too often overlooked except by specialists. The fields on each side were striated and the result is a coin that displays bright, semiprooflikeness. The striking details are strong throughout and there are only a few small abrasions of any note. Close examination shows filing on the upper reverse rim. (#8923)
- 4613 1861—Harshly Cleaned—NGC Details. AU.** Well-defined with several abrasions on the portrait but only minor wear. Yellow-gold fields are extensively hairlined with disturbed luster from a past cleaning. (#8932)
- 4614 1861—Improperly Cleaned—NGC Details. Unc.** Cartwheel yellow-gold luster is subdued and slightly hairlined from a past cleaning. Save for a mark on the jawline, the surfaces show few abrasions. Well-defined with no trace of wear. (#8932)

1863-S Double Eagle, MS60
Rare Mint State Civil War Issue

- 4615 1863-S MS60 PCGS.** The 1863-S double eagle is a sought-after Civil War issue that is easy to locate in lower grades, but rare in Mint State condition. The present coin is a well struck example, with yellow-gold surfaces that are visited by rose and turquoise highlights. Much original mint luster is visible under the patina, and a scattering of minor abrasions on both sides is consistent with the grade. Population: 3 in 60, 43 finer (10/10). (#8940)

Near-Mint 1866 Double Eagle
Popular First-Year Type Coin

- 4616 1866 AU58 PCGS. CAC.** The 1866 Liberty Head double eagle is always in demand as the first year of the Type Two design, with the motto IN GOD WE TRUST on the reverse. The present coin is lightly circulated, with sharply detailed devices and bright mint luster. The pleasing orange-gold surfaces are lightly abraded for the grade. Population: 46 in 58, 23 finer (10/10). (#8949)

- 4617 1869—Harshly Cleaned—NGC Details. AU.** The 1869 Liberty Head double eagle is an elusive date in high grades, one of the few issues not represented in the National Numismatic Collection at the Smithsonian. The present coin is a lightly circulated piece, with much original detail remaining on the devices, and unnaturally bright greenish-gold surfaces. (#8955)

Surprising MS61 ★ 1871 Double Eagle

- 4618 1871 MS61 ★ NGC.** Garrett and Guth offer an excellent capsule summary of the 1871 twenty in their *Encyclopedia of U.S. Gold Coins*:

“This date has the lowest mintage of any Philadelphia Type 2 double eagle. It is scarce in all grades, with the average survivor rating Very Fine or Extremely Fine. Most are heavily abraded or harshly cleaned. ... Mint State specimens are very rare and seldom seen.”

While this coin has moderate to heavy abrasions across each side, it is also remarkably appealing, as suggested by the Star designation. Luster is the key, as both obverse and reverse fields offer pale yellow-gold reflectivity. The well struck obverse also shows a touch of frostiness. NGC has graded just four numerically finer examples (10/10). (#8960)

- 4619 1871-S AU55 PCGS.** A flashy canary-yellow example of this Type Two double eagle issue, softly struck with moderate abrasions but only a touch of wear. As is often the case, the reverse has a slightly better appearance. (#8962)
- 4620 1871-S AU55 NGC.** A briefly circulated Choice AU Type Two twenty that has a moderately abraded appearance. The reverse luster is close to complete, and luster also bathes the obverse stars and portrait. (#8962)

Desirable 1871-S Twenty, MS61

- 4621 1871-S MS61 NGC.** A bold example with full luster and mustard-gold color. A couple of moderate marks on the cheek, but otherwise less abraded than usual for the grade. The date shows evidence of repunching, with the dash from the base of a 1 present west of the 7 in the date. Scarce in Mint State despite a healthy mintage. Census: 57 in 61, 21 finer (10/10). (#8962)

1872-S Liberty Head Twenty, MS61 Challenging Date in Mint State

- 4622 1872-S MS61 PCGS. CAC.** The 1872-S double eagle is a condition rarity in high grade, and examples in MS61 condition are rare. The present coin is a brightly lustrous specimen, with rich orange-gold surfaces, accented by strong rose highlights. The strike is sharp in most areas, with a little softness on Liberty's hair. Population: 43 in 61, 4 finer (11/10). (#8965)

Lustrous MS62 1873 Open 3 Twenty

- 4623 1873 Open 3 MS62 NGC. CAC.** Well-defined for the issue with strong orange-influenced luster. While numerous wispy abrasions affect the fields and a few digs are noted on the portrait, the overall eye appeal is pleasing. A rim nick is noted at the bottom of the reverse, just under the letter N in TWENTY. (#8967)

Select 1873 Open 3 Double Eagle

- 4624 1873 Open 3 MS63 PCGS. CAC.** While the Open 3 subtype of the 1873 double eagle is available for a price in grades through MS62, it is scarce at the Select level and a full-on condition rarity any finer. This butter-yellow piece has soft but wonderful luster under a thick "skin" of original patina. Scattered grazes and marks influence the technical grade but have surprisingly little impact on the overall eye appeal. PCGS has certified just five coins finer (10/10). (#8967)

1873 Liberty Head Double Eagle, MS63 Scarce Variety in High Grade

- 4625 1873 Open 3 MS63 PCGS Secure.** The 1873 Liberty Head double eagle enjoyed a large mintage of over 1 million pieces, and two varieties are known for the date. The present coin represents the less available Open 3 variety, and examples in Select condition are definitely scarce. This specimen displays vivid orange-gold surfaces and vibrant mint luster. The strike is sharp in most areas, but a little softness shows on Liberty's hair. Only eight coins have been certified in higher numeric grades at NGC and PCGS combined (10/10). (#8967)

Noteworthy Near-Mint 1873-CC Twenty

- 4626 1873-CC AU58 NGC.** In the 2001 edition of his *Gold Coins of the Carson City Mint*, Doug Winter notes that while small hoards discovered in the 1990s made the 1873-CC double eagle more available than it had been, the date was still to be respected in upper circulated grades, writing: "This issue is still scarce in the lower to middle About Uncirculated grades and accurately graded About Uncirculated-58's are very scarce."

Mint State examples are rare and costly, creating incentive to resubmit the best pieces. This has distorted the numbers greatly; certainly, there are not 91 AU58 1873-CC twenties in NGC holders, no matter what the current (10/10) *Census Report* might say. This lemon-gold and butter-yellow example is gorgeous with soft, saturated luster and just a hint of wear across softly struck devices. (#8968)

Closed 3 1873-S Double Eagle, MS62

- 4627 1873-S Closed 3 MS62 NGC.** Diffuse but attractive apricot-gold luster dominates the eye appeal of this unworn Closed (or Close) 3 1873-S double eagle. Scattered small abrasions and wispy marks visit the surfaces, accounting for the grade, though the issue is still a condition rarity at the MS62 level. The hair below Liberty's coronet is softly defined, a typical striking characteristic. Census: 15 in 62, 1 finer (10/10). (#8969)

Lustrous 1873-S Open 3 Twenty, MS61

- 4628 1873-S Open 3 MS61 PCGS.** The Open 3 coins of the 1873-S double eagle issue are considerably rarer than the earlier Closed 3 coins, although there is no record of the exact mintage for each variety. We know that the San Francisco Mint coined 1,040,600 double eagles in 1873. If current total populations are any indication, an estimate of the mintages might be 687,000 Closed 3 coins and 353,000 Open 3 coins.

Regardless of the original mintage, the most important fact is that all Mint State representatives of this variety are rare. This impressive example is frosty and lustrous with bright yellow surfaces and wisps of pink and olive toning. Trivial marks on each side are consistent with the grade. Population: 28 in 61, 4 finer (11/10). (#8979)

-
- 4629 1874-S MS60 NGC.** While numerous fine abrasions appear on each side of this Type Two S-mint twenty, there is no trace of wear. Warm yellow-gold luster shows a patch of cloudiness above the E in UNITED on the reverse. (#8972)

Challenging Select 1875 Twenty Dollar

- 4630 1875 MS63 PCGS.** Most 1875 Philadelphia gold issues are low mintage rarities. The double eagle is an exception, as it is obtainable in grades through MS62. However, since most survivors were loosely stored, Select examples are rare, and the only PCGS MS64 that we have offered realized \$40,250 in an August 2007 auction. This lustrous lime-green and straw-gold representative exhibits potent luster and moderate field grazes. Population: 52 in 63, 3 finer (10/10). (#8973)

-
- 4631 1875-CC XF45 NGC.** Warm yellow-orange hues grace the faintly luminous fields of this Choice XF coin. Scattered light abrasions with a small copper spot between the ED of UNITED. A pleasing piece of Carson City gold. (#8974)

1876 Double Eagle, MS62 Last Year of Type Two Design

- 4632 1876 MS62 PCGS.** Light Motto. The vivid orange-gold surfaces of this coin display areas of prooflike reflectivity, as well as vibrant mint luster. The design elements are sharply defined in most areas, but a little softness is evident on Liberty's hair. The surfaces are lightly abraded for the grade, and the visual appeal is quite strong. The year 1876 saw the last use of the Type Two design, and MS62 examples are scarce. (#8976)

1876 Double Eagle, MS63, Heavy Motto Well-Balanced Overall

- 4633 1876 MS63 PCGS.** Heavy Motto. Three short rays at the far left characterize the Heavy Motto 1876 twenty. This would make a splendid type coin as it is well-balanced overall. The luster is softly frosted, the strike strong throughout, and there are no singularly objectionable marks on either side. Population: 38 in 63, 15 finer (11/10). (#8976)

**1876 Type Two Twenty, MS63, Light Motto Variant
Lustrous and Sharply Struck**

4634 1876 MS63 NGC. Light Motto. The Light Motto 1876s show two longer rays at the far left just above the eagle's left (facing) wing. The surfaces are bright and highly lustrous with a few grade-limiting abrasions on the obverse. The strike is uncommonly strong, the 1876 being one of the few Type Two Twenties that can be found with a strong or full strike. (#8976)

4635 1876-CC VF30 NGC. Surprisingly lustrous for a VF-range coin with low-level luminosity through the fields. The expected scattered marks appear on the yellow-orange surfaces, though these flaws are mostly minor. An accessible Carson City twenty. (#8977)

Popular 1876-CC Double Eagle, AU53

4636 1876-CC AU53 NGC. The 1876-CC double eagle enjoys wide popularity for its centennial-year and Old West connections, and collectors seeking a pleasing circulated example should consider this AU53 example. Honey-gold surfaces remain lustrous with considerable yellow-orange overtones. Modestly worn with light abrasions and luster scrapes, as well as a couple of small pin scratches. (#8977)

**1876-S Liberty Head Double Eagle, MS62
Attractive 19th Century Type Coin**

4637 1876-S MS62 PCGS. CAC. The popularity of Mint State Type Two double eagles has increased exponentially in the last few years, as type collectors and bullion investors have joined series specialists in the hunt for suitable examples. This attractive MS62 specimen is well struck, with just a little softness on Liberty's hair. The orange-gold surfaces display bright mint luster, with hints of green color in places. The surfaces are moderately abraded for the grade. (#8978)

**1876-S Twenty, MS62
Brightly Lustrous and Sharply Defined**

4638 1876-S MS62 PCGS. Bright orange-gold color and frosted mint luster provide excellent eye appeal on this first-year Type Three double eagle. The strike is sharp and the surfaces are minimally abraded for the grade. The 1876-S is available in circulated grades and lower Mint State grades for type collectors. (#8978)

**Select 1876-S Double Eagle
Condition Rarity in Higher Grades**

4639 1876-S MS63 PCGS. The 1876-S Liberty Head twenty is a popular choice among type collectors seeking a Type Two double eagle for their collections. The present coin displays vivid orange-gold surfaces, highlighted by vibrant mint luster, and complemented by well detailed devices. Only 11 coins have been certified in higher numeric grades at PCGS (11/10). (#8978)

4640 1877-S MS61 Prooflike NGC. Distinctly reflective with pale canary-gold color save for an area of milky patina to the right of Liberty's hair. Scattered light to moderate abrasions but considerable eye appeal. Census: 1 in 61 Prooflike, 1 finer (10/10). (#78984)

Attractive MS63 1878 Double Eagle

4641 1878 MS63 NGC. Like many Type Three issues, the 1878 double eagle and its half-million-plus mintage are readily accessible in most circulated grades and even the lower tiers of Mint State. The Select level is a completely different story; in MS63, the 1878 is scarce at a minimum, and if not rare there, then certainly any finer. This is a delightful example, bright yellow-gold with a subtly frosted "skin" that is most visible in the shallow marks and luster scrapes scattered on each side. The interior devices are better-defined than usual, and the coin has plenty of charm. (#8985)

Select 1878 Double Eagle
Vivid Color, Strong Eye Appeal

4642 1878 MS63 PCGS. Although the 1878 Liberty Head double eagle enjoyed a large mintage of 543,625 pieces, examples in Select Mint State condition are quite rare. The issue circulated heavily, and many coins were used in overseas trade, accounting for the small number of high grade pieces known today. The present coin possesses vivid orange-gold surfaces, with intense highlights of green color. The design elements are strongly impressed, and vibrant mint luster enhances the considerable eye appeal. The surfaces are minimally abraded for the grade. Population: 30 in 63, 8 finer (10/10). (#8985)

**1878 Twenty, MS64, One of the Finest Known
Exceptionally Clean and Highly Lustrous**

- 4643 1878 MS64 PCGS Secure.** The 1878 is generally considered a relatively available Type Three issue, until one looks for a near-Gem such as this piece. The reason is explained in the Fuljenz-Winter reference: "The surfaces often show numerous deep abrasions, particularly in the obverse fields. Examples which are relatively free of bagmarks are very hard to locate and they command strong premiums." This is an extraordinarily clean example and might even grade higher if it were not for a couple of tiny ticks on the back part of Liberty's cheek. The mint luster is simply outstanding, smooth and satiny, and the strike is uncommonly strong throughout. At this grade level, there are only a handful of examples known. PCGS has only certified seven others and NGC has graded four. None are finer at either service (10/10). (#8985)

Charming Choice VF 1879-CC Twenty

- 4644 1879-CC VF35 PCGS. CAC.** Though the wear on this 1879-CC twenty is clearly in the VF range, the surfaces are remarkably smooth, with just a couple of small digs noted on Liberty's portrait. Both sides are largely orange-gold, though the faintly luminous reverse has deeper reddish-magenta accents close to the margins. (#8989)

**1881-S Liberty Head Double Eagle, MS62
Sharply Struck Example, With Good Luster**

- 4645 1881-S MS62 NGC.** From a substantial mintage of 727,000 pieces, the 1881-S Liberty Head double eagle is easy to locate in circulated grades, but MS62 examples are scarce. The present coin features sharply defined devices and vibrant mint luster. The surfaces are a light greenish-gold color, with a moderate number of abrasions for the grade. Census: 65 in 62, 3 finer (10/10). (#8995)

Lustrous MS62 1883-S Double Eagle

- 4646 1883-S MS62 PCGS.** While this issue has a generous mintage approaching 1.2 million pieces, high demand has locked up many of the Mint State examples, particularly MS62 and better. This is one such coin, yellow-gold with strong cartwheel luster under moderate patina. The boldly impressed portrait has a copper spot in the lines of her pulled-back hair. (#9000)

**1884-CC Double Eagle, MS61
Nice Color, Popular Type Coin**

4647 1884-CC MS61 NGC. The 1884-CC Liberty Head double eagle is a popular Type Three, mintmarked type coin, from a mintage of 81,139 pieces. Doug Winter estimates a surviving population of 1250-1500 examples in all grades, with 100-150 pieces extant in Mint State. The coin offered here is an impressive MS61 specimen, with pleasing orange-gold fields, and bright mint luster. The sharply defined devices are tinted with hints of rose. (#9001)

4648 1884-S MS62 NGC. Well-defined with bold orange overtones and generous satiny luster. Eye-appealing for the grade with mostly small marks and wispy abrasions accounting for the grade. NGC has certified 93 finer pieces (10/10). (#9002)

4649 1884-S MS62 PCGS. CAC. The lime-green peripheries and pumpkin-gold centers are bathed with luster. This well struck double eagle is kept from a higher grade by the occasional abrasion, notably a horizontal mark on the jaw. (#9002)

4650 1885-S MS62+ PCGS. Extraordinary mint luster is the outstanding characteristic of this attractive Liberty Head double eagle. The strike is sharp and the pleasing greenish-gold surfaces are moderately abraded for the grade. (#9005)

4651 1885-S MS62 PCGS. Well-defined with warm yellow-gold luster. Though the obverse shows a few too many abrasions for a Select coin, the reverse is clean save for minor pinscratching near the eagle's head. (#9005)

4652 1885-S MS62+ PCGS. CAC. This orange-gold Liberty twenty has a lightly abraded obverse, which on its own would surely command a higher grade. The reverse exhibits the expected clusters of small abrasions. (#9005)

**Select 1885-S Liberty Head Double Eagle
Rich Color, Strong Eye Appeal**

4653 1885-S MS63 PCGS. CAC. The 1885-S Liberty Head double eagle is readily available in lower grades, but Mint State coins are elusive. The vivid orange-gold surfaces of this Select specimen are highlighted by soft hints of rose color. Vibrant mint luster and a sharp strike add to the compelling eye appeal. (#9005)

Flashy MS62 1887-S Twenty

4654 1887-S MS62 PCGS. Strongly struck with yellow-gold devices that show coppery elements on the high points. The surrounding fields are inherently flashy, especially on the reverse, though rings of patina are present around the margins. Great eye appeal for an issue that is a borderline condition rarity any finer. PCGS has graded just 65 such pieces (10/10). (#9007)

Doubled Die Reverse MS62 1888 Twenty

4655 1888 Doubled Die Reverse MS62 PCGS. CAC. FS-801. Die doubling toward the rim is obvious on UNITED STATES OF AMERICA and TWENTY DOLLARS. E PLURIBUS UNUM and the arrows are also noticeably die doubled. The lustrous olive-gold surfaces are well struck and display superior eye appeal for the grade, although faint grazes are prevalent throughout. Population: 6 in 62, 1 finer (11/10). (#145738)

4656 1889-S MS62 PCGS. CAC. Well-defined with strong yellow and wheat-gold luster that has a hint of frosty shimmer. Lightly abraded with several copper spots in the face area. (#9012)

4657 1890 MS62 PCGS. CAC. Saturated lemon-gold luster prevails at the margins, while the centers have more subdued color but surfaces that swirl just as strongly. Light to moderate abrasions on the well struck portrait account for the grade. PCGS has certified 34 numerically finer pieces (10/10). (#9013)

4658 1890-CC—Improperly Cleaned—NGC Details. AU. Faint hairlines emerge on both sides when the piece is carefully rotated beneath a light. This Carson City gold type coin is nicely struck, and the reverse in particular displays a generous amount of luster. (#9014)

**Choice AU 1890-CC Twenty
Vivid Color, Vibrant Luster**

- 4659 1890-CC AU55 PCGS.** Intense collector interest attends any offering of Carson City coinage, and the double eagle denomination is particularly popular. This eye catching example is lightly circulated, with sharp central details, but a little softness on the lower obverse stars. The surfaces are a light greenish-gold color, with especially vibrant mint luster. (#9014)

**1890-CC Double Eagle, AU58
Nice Color, Bright Mint Luster**

- 4660 1890-CC AU58 PCGS.** The 1890-CC double eagle enjoyed a substantial mintage of 91,209 pieces, and the issue is a favorite with mintmark type collectors. The present coin possesses vivid orange-gold surfaces, with abundant mint luster. The design elements are sharply detailed throughout, and only the slightest signs of circulation can be detected. The eye appeal is extraordinary for a near-Mint coin. (#9014)

Laudable MS61 1890-CC Double Eagle

- 4661 1890-CC MS61 PCGS.** While this date has a near-six-figure mintage, it is not especially available in Mint State grades and is conditionally scarce as early as MS61, the grade seen here. Orange-tinted yellow-gold luster is bright across each side and Liberty's portrait is sharply defined, though the surrounding stars are soft. (#9014)

**1892 Twenty Dollar, AU55
Popular, Low-Mintage Date**

- 4662 1892 AU55 PCGS.** The 1892 had an unusually low mintage of only 4,523 coins for circulation. That mintage makes it especially attractive to collectors, and as a consequence there is a significant premium placed on high-grade survivors. This is a bright orange-gold example that is sharply defined. It shows the usual small to medium-sized abrasions on each side and there is a significant presence of mint luster surrounding the devices. Population: 19 in 55, 44 finer (10/10). (#9019)

**1892-CC Liberty Head Twenty, AU53
Popular CC-Mint Type Issue**

- 4663 1892-CC AU53 PCGS. CAC.** The 1892-CC double eagle boasts a fairly low mintage of 27,265 pieces, but the survival rate is relatively high for this issue. The present coin is an attractive specimen, with sharply defined devices, and just the slightest wear evident on the high points. The pleasing surfaces are a rich orange-gold color, with rose highlights, and strong mint luster. (#9020)

Still-Lustrous 1892-CC Double Eagle, AU53

- 4664 1892-CC AU53 PCGS.** Excellent remaining detail and luster for the AU53 grade. Yellow-gold surfaces show a few copper spots close to the rims, but the color is even otherwise. A lightly worn representative that shows few significant marks aside from a cluster of abrasions to the left of the Carson City mintmark. (#9020)

1892-CC Twenty, AU58 Prooflike Very Rare in Prooflike Grade

- 4665 1892-CC AU58 Prooflike NGC. CAC.** A lightly circulated example from the always popular Carson City Mint. The present coin displays reflective prooflike surfaces and a razor-sharp strike, unusual on a CC-Mint twenty. Visual appeal is quite strong for a circulated coin. Census: 4 in 58 Prooflike, 6 finer (10/10). (#79020)

- 4666 1893 MS63 PCGS.** The honey-gold centers are encompassed by sea-green. This lustrous Select Liberty twenty has a good strike and no distracting abrasions. Although the 1893 is available in Uncirculated grades, PCGS has yet to certify any examples as Gem or finer. Housed in an old green label holder. (#9022)

- 4667 1893-CC—Improperly Cleaned—NGC Details. AU.** The 1893-CC is a better date even for the Carson City Mint, since only 18,402 pieces were issued. This is a lightly circulated example with unnaturally luminous fields due to a long-ago cleaning. No marks are of any interest save for a minor edge ding at 2 o'clock on the reverse. (#9023)

Lustrous Near-Mint 1893-CC Double Eagle

- 4668 1893-CC AU58 PCGS.** Though the recently re-opened Carson City Mint had produced more than 90,000 double eagles in 1890, production went on a downhill roller-coaster ride. By the time the Nevada facility was shut down for good a second time in 1893, it had struck just 18,402 of the twenty dollar gold coins. This is a lightly patinated yellow-gold example from that famous issue, impressively lustrous and well-defined with just a touch of wear across the highest parts. (#9023)

- 4669 1893-S MS62 PCGS.** Boldly detailed with either canary-yellow or orange-gold color depending on the angle. Great luster, though a number of small marks on the portrait combine to account for the grade. (#9024)

Difficult MS63+ 1893-S Twenty

- 4670 1893-S MS63+ PCGS.** Like many Type Three San Francisco issues, the 1893-S is available today in MS61 and MS62 due to foreign bank holdings. Non-numismatic storage limits high grade survivors, however, and only a single coin (a PCGS MS65) has been graded above MS64. The present Select piece has relatively few marks, most of which are on the obverse. The honey-gold and lime surfaces are lustrous and boldly struck. Population: 1 in 63+, 41 finer (11/10). (#9024)
-

Conditionally Rare 1894-S Twenty, MS65

- 4671 1894-S MS65 NGC.** The 1894-S Liberty twenty is one of those elusive issues that is rarely found in Gem grades, despite a seemingly large mintage of more than 1 million coins. Many of those coins were shipped overseas.

The past 612 auction appearances of 1894-S double eagles in our sales since 1993 include 47 examples certified as MS64, the finest we have offered. The present Gem is the first MS65 appearing in any of our sales. This Gem features a bold strike and an attractive blend of rose-gold and olive patina over its brilliant yellow surfaces. Census: 7 in 65, 0 finer (10/10). (#9026)

- 4672 1896-S MS63 NGC.** Vibrant yellow-orange luster with uncommon eye appeal for the Select designation. Excellent detail with more wispy marks than significant abrasions. (#9030)

Vibrant 1897-S Double Eagle, MS64

- 4673 1897-S MS64 NGC.** This green-gold Choice Type Three twenty provides dynamic cartwheel luster and a sharp strike. The obverse field is remarkably unabraded, as is the reverse. Noticeable contact is limited to Liberty's jaw and cheek, which displays a slender thin diagonal mark. NGC has certified just 19 pieces finer (11/10). (#9032)

Attractive Select 1898 Double Eagle

- 4674 1898 MS63 NGC.** This late 19th century double eagle issue is readily accessible through the MS62 level, though Select pieces are elusive and anything finer is a condition rarity. This MS63 example has characteristically solid design definition on Liberty's head, and the cartwheels of the yellow-orange luster are understated but undeniable. NGC has graded just 21 numerically finer pieces (10/10). (#9033)

- 4675 1898-S MS64+ NGC. CAC.** Dazzling cartwheel luster brightens this apple-green and canary-gold Choice double eagle. A sharply struck piece that is well preserved aside from a few small marks on the left obverse. (#9034)

Amazing MS65 1898-S Twenty

- 4676 1898-S MS65 NGC.** A gorgeous Gem example of this late 19th century issue, a date that is available for a price in lesser condition but genuinely scarce this fine. Pale yellow centers are as lustrous as the amber-gold outer zones, and the interior and margin devices have equally strong definition. NGC has certified just six numerically finer examples (10/10). (#9034)

- 4677 1900 MS64 NGC. CAC.** Boldly impressed through the centers with top-notch eye appeal for the near-Gem designation. A great double eagle from the turn of the century.(#9037)
- 4678 1900 MS64+ PCGS. CAC.** As the first double eagle of the century, the 1900 Liberty Head has great appeal for type collectors. This Choice Mint State example displays rich orange-gold surfaces, with lighter hints of yellow and rose. Blazing mint luster and a razor-sharp strike add to the outstanding eye appeal.(#9037)
- 4679 1900 MS65 PCGS. CAC.** A flashy-satiny coin that strikes a balance between brilliant cartwheels and an understated shimmer. Gold-orange outer color gives way to paler yellow in the centers. Population: 71 in 65, 2 finer (11/10).(#9037)
- 4680 1900-S MS63 NGC.** Bright luster with a reflective yellow-gold backdrop to the light patina over each side. Scattered light abrasions in the fields contribute to the grade.(#9038)

**1900-S Double Eagle, MS64+
Vivid Color, Extraordinary Eye Appeal**

- 4681 1900-S MS64+ PCGS.** The 1900-S double eagle was produced in large quantities, but most examples were circulated in foreign trade, and few specimens exist in high grades today. The present coin is a high-end Choice Mint State piece, with vivid orange-gold surfaces and extraordinary mint luster. The design elements are sharply defined throughout, and only a few minor abrasions are evident on the obverse. The eye appeal of this coin is incredible. Currently, only three coins have been certified in higher numeric grades at PCGS (10/10). (#9038)
- 4682 1901 MS64 PCGS. CAC.** Wheat-gold overall with elements of richer yellow at parts of the margins. A charming near-Gem from the turn of the century, housed in a green label holder.(#9039)
- 4683 1903 MS64+ PCGS.** The 1903 Liberty Head double eagle is a favorite date among type collectors, and this example is a particularly attractive Choice Mint State specimen. All design elements exhibit razor-sharp definition, and the orange-gold surfaces are awash with luminous mint luster. The high-end status of this piece is confirmed by the plus designation.(#9043)

- 4684 1903 MS64+ PCGS. CAC.** This sharply struck near-Gem double eagle would be a welcome addition to an advanced type set or a fine date collection. The light orange-gold surfaces radiate vibrant mint luster and the visual appeal is outstanding.(#9043)
- 4685 1903 MS64+ PCGS.** Great yellow-gold luster with hints of wheat and orange. Strongly struck on the central devices with a few small digs scattered in the fields, most visibly behind Liberty's hair bun.(#9043)
- 4686 1903-S MS63+ PCGS. CAC.** Both sides are strongly lustrous, and while the obverse has a satiny appearance, the reverse has full-blown cartwheels. Rich yellow-gold on most of each side, though the inner reverse has a paler canary-gold appearance.(#9044)
- 4687 1904 MS64 PCGS. CAC.** Satiny but effusive yellow-orange luster characterizes this well-defined near-Gem. A single abrasion to the left of Liberty's lips contributes to the grade. Housed in a first-generation holder.(#9045)
- 4688 1904 MS64 PCGS. CAC.** Bold yellow-orange luster with a measure of reflectivity on the obverse. This sharply struck near-Gem is ideal for the type collector. Housed in a green label holder.(#9045)
- 4689 1904 MS64 PCGS.** Well-defined with intense yellow-gold color. A small planchet flaw of ambiguous origin appears between stars 5 and 6, but otherwise the coin shows only small, scattered marks. Housed in a first-generation holder.(#9045)
- 4690 1904 MS64 NGC.** A boldly struck near-Gem with rich butter-yellow luster that cartwheels across each side. Slightly satiny and entirely appealing, a great type coin.(#9045)
- 4691 1904 MS64 ★ NGC.** Sharply struck with dynamic eye appeal for a near-Gem. Most of each side is orange-gold with minor copper spots, but the obverse interior has striking luster in pale yellow-gold.(#9045)
- 4692 1904 MS64+ NGC.** The 1904 is the most sought-after date in the series for type collectors seeking an example of the Type Three Liberty Head double eagle. The present coin is a high-end Choice example, with rich orange-gold surfaces, vibrant mint luster, and a needle-sharp strike.(#9045)
- 4693 1904 MS65 PCGS.** A magnificent Gem example of this popular 20th century type coin, the present specimen displays an extraordinary strike, with fine detail present on all design elements. The lustrous yellow and rose-gold surfaces show remarkably few abrasions and stunning eye appeal.(#9045)
- 4694 1904 MS65+ PCGS. CAC.** Uncommonly fine even by Gem standards, thanks to impressively preserved yellow-gold surfaces. Excellent detail on the portrait, though the eagle's neck is a trifle soft.(#9045)
- 4695 1904-S MS64 NGC. CAC.** Pleasingly detailed in the centers if a trifle soft on the stars. Great yellow-orange luster with generally smooth surfaces aside from a scrape to the right of the date.(#9046)

4696 1904-S MS64 PCGS. Crisply defined at the centers, if a trifle softly struck on the obverse stars. This yellow-gold near-Gem is pleasingly lustrous, though the portrait shows several grade-defining abrasions. (#9046)

4697 1905-S MS62 PCGS. CAC. This yellow-gold double eagle has vibrant luster and a precise strike. Small marks are present but are substantially fewer than is usual for the grade, especially on the well preserved reverse. (#9048)

Elusive 1906 Double Eagle, MS62

4698 1906 MS62 PCGS. Bright with coruscant luster that dominates the surfaces. A strong strike and variegated honey-gold and orange-gold color further enhance the look. The 1906 is a conditionally scarce issue from a low mintage of only 69,500 coins, one of the keys among 20th century Liberty double eagles. (#9049)

Low-Mintage 1906 Double Eagle, MS62

4699 1906 MS62 PCGS. After the massive millions of double eagles minted in 1904, Philadelphia's production of the denomination had a hangover the following two years, putting out pieces to the tune of five figures. This MS62 coin, a lustrous and moderately abraded yellow-orange example, comes from a mintage of just 69,500 business strikes. Well-defined for the date and housed in a green label holder. (#9049)

Select 1906 Double Eagle, Ex: Bass

4700 1906 MS63 NGC. CAC. A gorgeous, satiny example with generally yellow-gold surfaces that show honey overtones and minor copper spotting around the AT of STATES. A well-defined coin with a few small reed marks and other digs in the portrait area but solid overall eye appeal.
Ex: likely the Harry W. Bass, Jr. Collection - Part II (Bowers and Merena, 10/1999), part of lot 1930. (#9049)

**Select 1906-D Double Eagle
First D-Mint Twenty**

4701 1906-D MS63 PCGS. CAC. Always popular as the first double eagle from the Denver Mint, the 1906-D is scarce in higher Mint State grades. An attractive Select specimen, like the present coin, is a good combination of quality and value. This piece exhibits sharply detailed devices, with few abrasions for the grade. The pleasing rose-gold surfaces display bright mint luster and excellent eye appeal. (#9050)

Lovely Choice 1907-D Twenty Dollar

4702 1907-D MS64 PCGS. A highly lustrous pumpkin-gold near-Gem whose precise strike and nearly pristine reverse attest to its quality. We note only a few faint marks on the left obverse. The second and final Denver issue of the Liberty type, and a desirable addition to an advanced holding of the series. (#9053)

4703 1907-S MS63 PCGS. CAC. Well-defined with strong and satiny yellow-orange luster. A lovely Select coin from the end of the Liberty double eagle series, smooth aside from a small patch of digs to the left of Liberty's nose. (#9054)

4704 1907-S MS63 PCGS. The final S-mint Liberty twenty, offered here as a satiny sun-gold Select beauty. Well-defined with more wispy abrasions than significant marks, though an abrasion is noted to the right of Liberty's ear. (#9054)

4705 1907-S MS63+ PCGS. CAC. Dusky blended sea-green and apricot-gold toning graces this lustrous and well impressed final-year Liberty twenty. Careful inspection reveals undisturbed surfaces save for inconspicuous grazes near the hair bun. (#9054)

PROOF LIBERTY DOUBLE EAGLE

Impressive 1901 Double Eagle, PR66 Cameo

4706 1901 PR66 Cameo NGC. The 1901 double eagle is considered one of the relatively common proof issues of the Type Three design, despite a mintage of only 96 coins, and a survival in the range of 40 to 50 coins. Many of the survivors are impaired, with others just below the Gem grade level. This was the last issue where cameo coins are available, with the NGC Census Report showing 31 of the 42 certified coins have a Cameo or Ultra Cameo designation. From 1902 to the end of the series, only about half of all submissions have been called Cameo and just four coins are considered Ultra Cameo. This 1901 double eagle is highly important for type collectors.

Both sides have fully lustrous and satiny yellow-gold devices with deeply mirrored fields. A few faint hairlines are evident on each side of this highly desirable and attractive example. Faint bluish patina is evident in the protected areas that adds to the overall aesthetic presentation.

NGC has only certified four examples of this date in PR66 Cameo, with one each in PR66 Ultra Cameo and PR67 Ultra Cameo, the only two coins that are graded finer by the Florida firm (10/10). A single PR66 Cameo example is the finest that PCGS has certified. The total certified population is 6% of the original mintage, an unrealistically high percentage. There is no doubt that all of the NGC and PCGS population figures, including a total of 83 coins, includes numerous resubmissions. (#89117)

HIGH RELIEF DOUBLE EAGLES

MCMVII Wire Rim High Relief Double Eagle Uncirculated Details

- 4707 1907 High Relief, Wire Rim—Damaged—NGC Details. Unc.** A satiny yellow-gold representative of this famous, coveted, and scarce issue. The devices have full detail, with no evidence of wear seen on Liberty's raised knee or her chest. The crest of the eagle's front wing also lacks rub. The NGC assessment appears unduly strict, but we note a brief, bright mark between the RT in LIBERTY, a pinscratch on the obverse rim near 2 o'clock, minor edge crimping on the reverse at 3 and 9 o'clock, and some roughness on the reverse rim near 5 o'clock. (#9135)

High Relief, Wire Rim 1907 Twenty, MS62

- 4708 1907 High Relief, Wire Rim MS62 NGC. CAC.** The 1907 High Relief Saint-Gaudens double eagle has been called the most beautiful regular-issue U.S. coin. The High Relief was struck in two formats, the Flat Rim and Wire Rim styles, with the present coin representing the more available Wire Rim variety. The Wire Rim is a thin piece of metal that was extruded between the collar and the die when the coin was struck, forming a fin around the circumference of the coin. This feature was considered a flaw at the time of striking, but it has come to be prized by modern collectors, as an illuminating artifact of mint technology.
- The present coin is an impressive orange-gold specimen, with satiny mint luster, and few abrasions for the grade. Like most High Reliefs, the strike is razor-sharp on the central devices, but some softness shows on the peripheral devices. (#9135)

Flat Rim 1907 Saint-Gaudens Twenty, AU Details

- 4709 1907 High Relief, Flat Rim—Improperly Cleaned—NGC Details. AU.** The scarcer Flat Rim variety of this iconic double eagle issue, one of only 4,000 or so examples so made. This coin shows the expected sharp strike on the central design elements, with the often seen softness on the peripheral details. The surfaces are perhaps a little too bright to be completely natural. (#9136)

Superb Gem High Relief, Flat Rim 1907 Saint-Gaudens Twenty

4710 1907 High Relief, Flat Rim MS67 NGC. Numismatists are familiar with Augustus Saint-Gaudens' eagle and double eagle, but his *oeuvre* included statues, bas-reliefs, medallions, cameos, and works in other media. As a teenager he began his career with an apprenticeship to a cameo-cutter before he left for Paris in 1867. Although he was able to make some money selling cameos in New York City, by his own accounts they did not sell well in Paris, where other artists were more skillful. Saint-Gaudens would soon create works on a grander scale, but his experience with cameo-cutting would come in handy when he was commissioned to design medals and, later, coins.

It is impossible to say which of Saint-Gaudens' many works was the most important, but certainly his statue of General William Tecumseh Sherman is one of the most lauded, and the figure of Victory (Nike) in the monument would later be used as a model for the double eagle. This statue also brought Saint-Gaudens into contact with Roosevelt, who was vice president at the time, and their collaboration would later result in the beginning of the American coinage renaissance.

Saint-Gaudens wanted his statue of Sherman to be positioned near Grant's Tomb, which was completed in 1897, for artistic and historical reasons. Roger Burdette (2006) writes, "After a chance meeting on a train returning from the Buffalo Exhibition in May 1901, he sought the intervention of vice-president Theodore Roosevelt in an attempt to secure his preferred location of the statue."

Although Roosevelt was unsuccessful and the statue was placed at the southeastern corner of New York's Central Park, he did not forget his encounter with Saint-Gaudens. Less than four years later, Roosevelt would ask Saint-Gaudens to redesign some of the country's coins. The coins were Saint-Gaudens' final project, and the 1907 High Relief double eagle was the fitting capstone to the artist's distinguished career.

The physical perfection of this coin makes one realize why Theodore Roosevelt was so proud of these pieces and why he used them for presentation purposes. The surfaces are essentially perfect. We just do not see any flaws on either side—they may exist—we simply do not see them. The bright yellow-golden surfaces display radiant mint luster, and the striking details are complete throughout (note the separation of the letters at the top of the reverse from the rim). In sum, a simply incredible survivor. For the Flat Rim variety, Census: 15 in 67, 2 finer (10/10). (#9136)

PROOF HIGH RELIEF DOUBLE EAGLE

Magnificent PR62 1907 High Relief Twenty

4711 1907 High Relief PR62 NGC. In his 1913 *Reminiscences*, Homer Saint-Gaudens quoted his late father: "A sculptor's work endures so long it is next to a crime for him not to do everything in his power to produce a good result." This quote forms the basis for understanding the complete catalog of works by Saint-Gaudens from his days as a cameo cutter until his final days when he was working with Henry Hering on the designs for the ten and twenty dollar gold pieces. Saint-Gaudens produced several medals, but his most renowned works in small format are the ten and twenty dollar gold pieces. The artistic nature of these coins makes them his most affordable and accessible sculptural works.

The sculptural nature of Saint-Gaudens double eagle is best brought out by the pinpoint precision of the proof strikings. This piece has all the elements required of a proof. The design elements display extreme sharpness, both in the centers and at the peripheries; there is an absence of die erosion or distortion; numerous, raised die polishing lines are evident and are particularly bold on this piece as a proof rather than a business strike; no radial flow lines are evident giving the coin a uniformly satiny surface; and there is a slight build-up of extruded metal just inside the borders at some places which is a result of additional strikes from the hydraulic press. Close examination with a loupe reveals a few scattered contact marks, but the only one worthy of mention is in the reverse field between the upper and lower wings of the eagle. (#9132)

SAINT-GAUDENS DOUBLE EAGLES

- 4712 1907 Arabic Numerals MS64 NGC.** This well struck near-Gem exhibits strong design detail and pleasing luster. Yellow-gold surfaces reveal a few minor marks that preclude the attainment of a Gem classification. (#9141)
- 4713 1907 Arabic Numerals MS64 PCGS.** Bright yellow-gold color with occasional canary accents. A gorgeous example of this first-year Saint-Gaudens issue, struck in low relief but well-defined for the type. (#9141)
- 4714 1907 Arabic Numerals MS64+ PCGS. CAC.** A vibrantly lustrous wheat-gold example that is the next best thing to a Gem. Well struck for the type with scattered small marks in the rays below the eagle and in the field to the right of Liberty. (#9141)

Arabic Numerals 1907 Twenty, MS65

- 4715 1907 Arabic Numerals MS65 PCGS.** The third and final P-mint 1907 double eagle type released to circulation, of the type later shared by the more plentiful 1908 No Motto twenty. Well struck overall, if slightly soft at the margins, with light wheat-gold color and glimpses of orange in the luster. An attractive Gem. (#9141)
- 4716 1908 No Motto MS64 PCGS.** Yellow-gold elements lace through pale straw-gold surfaces. A lovely near-Mint representative of this popular No Motto type issue, housed in a green label holder. (#9142)
- 4717 1908 No Motto MS65 PCGS.** Short Rays obverse. A beautiful Gem gold type coin that boasts booming luster and a sharp strike. The straw-gold surfaces are pleasingly preserved. (#9142)
- 4718 1908 No Motto MS65 PCGS.** Long Rays Obverse. A green-gold Gem from the second and final year of the No Motto subtype. Both sides are smooth, and the satin luster is generous. (#9142)
- 4719 1908 No Motto MS66 PCGS. Wells Fargo Nevada Gold.** The rich reddish-gold surfaces are accented by lighter yellow-gold in the center of the obverse. The striking details are well defined and there are only minimal abrasions present (none apparent to the unaided eye). (#9142)
- 4720 1908 No Motto MS66 PCGS. Wells Fargo Nevada Gold.** Deep, even reddish-gold color is seen over both sides of this highly lustrous No Motto twenty. The striking details are not quite fully brought up, as often seen on Wells Fargo pieces. (#9142)
- 4721 1908 No Motto MS66 PCGS. Wells Fargo Nevada Gold.** Extraordinary mint luster and rich, original color characterize this high-grade prize. The No Motto type was only minted for two years and the Wells Fargo coins are of uniformly high quality. (#9142)

- 4722 1908-D No Motto MS64+ PCGS.** The 1908-D No Motto Saint-Gaudens double eagle represents the last year of the two-year design type. This specimen is a high-end near-Gem, with a sharp strike, strong mint luster, and medium greenish-gold surfaces, with hints of orange. (#9143)
- 4723 1908-D No Motto MS64+ PCGS. CAC.** Long Rays Obverse. The mintmark is lightly repunched. A well struck peach-tinged double eagle from the briefly coined No Motto subtype. Carefully preserved and lustrous with a limited number of minor marks. (#9143)

Gem 1908-D No Motto Double Eagle

- 4724 1908-D No Motto MS65 PCGS.** Long Rays obverse. An exquisite orange-gold Gem that boasts booming luster and clean surfaces. Nicely struck and clearly original. Much scarcer in high grade than the 1908 No Motto, which was saved in remarkable quantity and quality. PCGS has certified only nine pieces finer (10/10). (#9143)

MS65 1908-D Twenty Popular No Motto Type

- 4725 1908-D No Motto MS65 PCGS.** Popular with mintmark type collectors as the second year of a two-year design, the 1908 No Motto Saint-Gaudens double eagle is not too difficult to locate in grades up to the Gem level, but any higher grade is virtually unobtainable. The present coin is a delightful Gem, with sharply defined devices, vibrant mint luster, and attractive greenish-gold surfaces. Only nine coins have been certified in higher numeric grades at PCGS (10/10). (#9143)
- 4726 1908 Motto MS63 NGC.** A yellow-orange Select example of the later With Motto double eagle issue of 1908. Pleasingly lustrous but with a significant horizontal abrasion on Liberty near her waist. (#9147)
- 4727 1908 Motto MS63 NGC.** A lustrous yellow-orange example of the popular but often low-accessibility With Motto 1908 twenty. Slightly satiny with a prominent copper spot near Liberty's waist. (#9147)
- 4728 1908 Motto MS63+ PCGS. CAC.** This crisply struck green-gold double eagle lacks noticeable marks and provides pleasing eye appeal. The mintage of 156,258 pieces is only a fraction of its No Motto counterpart. (#9147)

**Choice 1908 Saint-Gaudens Twenty
With Motto, Outstanding Eye Appeal**

- 4729 1908 Motto MS64 PCGS. CAC.** The motto IN GOD WE TRUST was placed on the reverse of the Saint-Gaudens double eagle design in the later part of 1908, making this issue extremely popular as a first-year type coin. The present coin is a delightful Choice Mint State specimen, with a razor-sharp strike, vivid orange-gold surfaces, and bright mint luster. (#9147)

**1908 Saint-Gaudens Twenty, MS64
Less Available Motto Type**

- 4730 1908 Motto MS64 PCGS.** The 1908 Motto Saint-Gaudens double eagle is definitely more difficult to locate than its No Motto counterpart, but Choice examples can be acquired with a little patience. The present coin exhibits a razor-sharp strike, with vibrant mint luster and attractive greenish-gold surfaces. (#9147)

With Motto 1908 Twenty, MS64

- 4731 1908 Motto MS64 PCGS.** Rich orange-gold luster is the prime attribute of this With Motto 1908 double eagle. The strike is pleasing overall, if a trifle soft on the torch and the hand holding it, while the surfaces show scattered but never grade-threatening marks. This issue is available for a price in MS64, but PCGS has certified just 60 pieces finer (10/10). (#9147)

Impressive 1908 Motto Twenty, MS65

- 4732 1908 Motto MS65 PCGS.** Struck late in the year, the 1908 Motto double eagle issue had a mintage of 156,258 coins, and it is a condition rarity in Gem grades, although lower grade coins are rather common. It is believed that a large percentage of the mintage was either exported or melted. Those that were exported have slowly returned to the U.S. in recent decades, and are usually in lower Mint State grades. The few high grade coins were probably preserved in coin collections since the time of issue. This lovely Gem has dark patina on the high points and trivial surface marks that are mostly hidden in the design elements. It is a splendid example with frosty yellow luster. Population: 50 in 65, 10 finer (11/10). (#9147)

- 4733 1908-D Motto MS64+ PCGS. CAC.** The 1908-D Saint-Gaudens double eagle is quite popular with type collectors as one of the first issues to include the motto IN GOD WE TRUST in the design. The present coin is a high-end Choice example, with orange-gold surfaces, vibrant mint luster, and sharply detailed devices. (#9148)

**Choice AU 1908-S Double Eagle
Only 22,000 Pieces Minted**

- 4734 1908-S AU55 NGC.** The 1908-S Saint-Gaudens double eagle claims the second-lowest business-strike mintage of the series, behind the celebrated High Relief issue. This specimen shows only the slightest traces of circulation, with lightly abraded greenish-gold surfaces and slightly subdued mint luster. (#9149)

**1908-S Saint-Gaudens Double Eagle, MS61
Scarce, Low-Mintage Issue**

- 4735 1908-S MS61 NGC.** The 1908-S Saint-Gaudens double eagle boasts one of the lowest mintage figures of the series at 22,000 pieces. The issue was used extensively in commerce, and this date is one of the few cases where the surviving population includes more circulated examples than Mint State pieces. The 1908-S is scarce in all Mint State grades today.

The present coin features attractive orange-gold surfaces, with green highlights. This example is well struck, with just a touch of softness on the eagle's breast and the Capitol dome. Strong mint luster is evident on both sides. A scattering of minor abrasions on both sides explains the grade. Census: 43 in 61, 85 finer (10/10). (#9149)

- 4736 1909/8 MS61 NGC. FS-301.** The bold, familiar overdate from early in the Saint-Gaudens series. Rich yellow-orange luster with coppery elements on the high points and scattered in the fields. (#9151)

Lustrous 1909/8 Double Eagle, MS62

- 4737 1909/8 MS62 PCGS. FS-301.** An unusual 20th century overdate, possibly the most obvious in its century, and one of the few double eagle variants to appear in the *Guide Book*. This example is a lustrous yellow-orange coin with minor copper spotting at Liberty's knee and on the eagle's tail and the sun below. Well struck but with significant abrasions along the left obverse rim and above Liberty's outstretched arm. (#9151)

Popular 1909/8 Overdate Twenty, MS62

- 4738 1909/8 MS62 NGC.** The 1909 overdate twenty is a highly popular doubled die variety, the die first impressed from a 1908 hub, and rehubbbed with the 1909 date. This piece has satiny light yellow luster with dark high point patina. It is destined for an advanced cabinet of Mint State Saint-Gaudens double eagles. (#9151)

**1909/8 Saint-Gaudens Twenty, MS62
Guide Book Variety**

- 4739 1909/8 MS62 PCGS. FS-301.** Always popular as the only overdate in the 20th century U.S. gold series, the 1909/8 Saint-Gaudens double eagle is listed on page 273 of the 2011 *Guide Book*. The coin offered here displays attractive greenish-gold surfaces, with bright mint luster, and well struck design elements. (#9151)

Vibrant MS63 1909-D Double Eagle

- 4740 1909-D MS63 PCGS.** With its five-figure mintage, the 1909-D double eagle has attracted numerous collectors, though in grades below MS63 sufficient supply exists to meet the demand. The imbalance appears at the Select level and becomes acute any finer. This is a well struck yellow-gold example, lightly abraded with a luster graze under the olive branch but thoroughly pleasing. The luster is particularly vibrant. (#9152)

Select Mint State 1909-D Twenty

- 4741 1909-D MS63 PCGS.** The 1909-D is one of several Saint-Gaudens double eagles famous for a five-figure mintage, 52,500 pieces in this case. Offered here is a luminous Select example, yellow-gold with light patina overall and a decent strike that shows significant softness only at the top of the torch and Liberty's foot. Lightly abraded but a coin that offers considerable all-around eye appeal. (#9152)
- 4742 1910 MS64 PCGS.** A light orange-gold example of this popular Saint-Gaudens double eagle, in Choice Mint State condition. This coin exhibits razor-sharp details on all design elements, with vibrant, softly frosted mint luster. (#9154)
- 4743 1910 MS64 PCGS. CAC.** Pale yellow-gold in appearance when out of the light, though pink-orange overtones appear everywhere but the borders when the coin is tilted at the proper angle. Choice and well struck with a great appearance overall. (#9154)

- 4744 1910-D MS65 NGC.** Bright yellow-gold luster with prominent orange overtones. This is a gorgeous Gem, well struck overall with only minor softness at the top of the torch and a few other peripheral details. NGC has graded 44 numerically finer examples (10/10). (#9155)

- 4745 1910-D MS65 PCGS.** The 1910-D Saint-Gaudens double eagle is more difficult to locate than most of the mintmarked issues of the decade, and the date is quite scarce in any grade above the Gem level. The present coin is a lustrous, well struck Gem, with pleasing orange-gold surfaces.
Ex: Exclusively Internet Auction (Heritage, 11/2004), lot 14267, realized \$2,941.70. (#9155)

- 4746 1910-D MS65 PCGS.** Both sides of this attractive example show lemon-gold coloration with minimal surface abrasions and good eye appeal. An attractive example of this D-mint double eagle issue, one of the earliest branch mint Saint-Gaudens twenties to be accessible to a range of collectors. (#9155)

Premium Gem 1910-D Double Eagle Only Two Coins Certified Finer at PCGS

- 4747 1910-D MS66 PCGS.** From a mintage of 429,000 pieces, the 1910-D Saint-Gaudens double eagle is not rare in lower Mint State grades, but examples in Premium Gem condition are quite scarce, and only two coins have been certified in higher numeric grades at PCGS (10/10). The present coin features a razor-sharp strike, with excellent mint luster, and pleasing greenish-gold surfaces. (#9155)
- 4748 1910-S MS64 PCGS. CAC.** A bright and lightly frosted canary-gold example that has suggestions of sun-yellow at the centers. Well-defined with a single graze on the upper gown warranting individual mention. (#9156)

**Gem 1911 Double Eagle
Underrated Issue in High Grade**

4749 1911 MS65 NGC. From a smallish mintage of 197,250 pieces, the 1911 Saint-Gaudens double eagle is an underrated date, especially in high grades. Most examples seen are in the MS60-MS63 grade levels, with Choice specimens appearing only infrequently. Examples in Gem Mint State condition are rare.

The present coin is a spectacular Gem specimen, with attractive orange-gold surfaces. The mint luster is unusually vibrant for a 1911, which often displays somewhat subdued luster. The razor-sharp strike imparts bold detail to all design elements, and the visual appeal of this piece is extraordinary. Census: 39 in 65, 14 finer (10/10). (#9157)

4750 1911-D MS65 PCGS. CAC. Satiny yellow-gold with orange peripheral accents. A well-defined Gem with a generally smooth appearance save for a handful of small defects in the fields. (#9158)

4751 1911-D MS66 PCGS Secure. This magnificent Premium Gem is draped in rich apricot and olive-green shades. Full struck save for slight incompleteness on the raised knee. Marks are essentially absent aside from a trivial rim ding at 7 o'clock on the reverse. (#9158)

Lustrous Gem 1911-D/D Double Eagle

4752 1911-D/D MS65 PCGS. FS-501. A lovely Gem example of this clearly repunched mintmark. This well struck and highly lustrous canary-gold piece has a bold strike and only infrequent minor marks. FS-501 comprises close to a majority of high grade examples of the 1911-D, with many examples in undesignated older third party holders, but its long-term popularity is established. Ex: Dallas Signature (Heritage, 11/2006), lot 2802. (#145010)

Popular 1911-D/D Double Eagle, MS65

4753 1911-D/D MS65 NGC. FS-501. This repunched mintmark variety is prominent and increasingly popular, particularly in the better states of preservation. The present piece is a Gem, yellow-gold with an orange cast to the luster. Well-defined devices and faintly textured fields are equally smooth. A gorgeous coin with great all-around appeal. (#145010)

Dazzling Gem 1911-D/D Double Eagle

4754 1911-D/D MS65 PCGS. FS-501. Olive-gold toning fills the margins, while the fields and devices are apricot. This boldly struck Gem has booming luster and a minimum of inconsequential contact. One of two repunched mintmark varieties for the series currently listed in Cherrypickers', along with the less often encountered 1909-S/S. (#145010)

Gem 1911-D/D Saint-Gaudens Twenty

- 4755 1911-D/D MS65 NGC. FS-501.** An attractive and radiant canary-gold Gem of this interesting repunched mintmark variety. The curve of a secondary mintmark is unmistakable to the right of the primary D. The strike is essentially unimprovable, and luster dominates the carefully preserved surfaces. (#145010)

1911-D/D Twenty, MS65, FS-501

- 4756 1911-D/D MS65 PCGS. FS-501.** An interesting variety, with the undertype of a second D located just to the right of the primary mintmark. The present coin is a delightful Gem, with a sharp strike, vibrant mint luster, and pleasing orange gold surfaces, with hints of green. Population: 61 in 65, 17 finer (10/10). (#145010)
- 4757 1911-S MS64 PCGS. CAC.** A desirable example of this popular pre-war issue. The green-gold surfaces are lustrous and precisely struck. Uncommonly unabraded for the grade despite a few small marks on the sun. (#9159)
- 4758 1911-S MS64 PCGS. CAC.** Wheat-gold surfaces are lightly patinated with prominent orange overtones that show up in the light. Copper-spotting appears at the margins and on Liberty's knee, but the overall appearance is consistent with the near-Gem designation. (#9159)

**1911-S Twenty, MS65
Impressively Lustrous Surfaces**

- 4759 1911-S MS65 PCGS.** The 1911-S is one of the more available dates in the Saint-Gaudens double eagle series, right through the near-Gem level. MS65 pieces are obtainable with patient searching, but anything finer is much more challenging. The lustrous surfaces of this Gem display honey-gold patina and nicely defined devices. A few minor grade-consistent marks are seen over each side. (#9159)

**Gem 1911-S Saint-Gaudens Twenty
Vivid Color and Mint Luster**

- 4760 1911-S MS65 PCGS.** Light orange-gold surfaces, with hints of green and rose color, highlight this delightful Gem double eagle. The design elements are sharply delineated throughout, with fine detail evident on the Capitol building and the eagle's breast. Vibrant mint luster contributes to the outstanding eye appeal on both sides. (#9159)

**1911-S Twenty Dollar, MS65
A Clean, Sharply Impressed Example**

- 4761 1911-S MS65 PCGS.** A crisply impressed representative that provides vibrant cartwheel luster and a minimally abraded appearance. Close examination shows one small nick in the obverse field at 2:30. The 1911-S is readily available in MS62 through MS64, but is uncollectible above MS66. 1911 was the final year with 46 obverse stars, since New Mexico and Arizona joined the Union in 1912. (#9159)

**Gem 1911-S Double Eagle
Vivid Color, Sharp Strike**

- 4762 1911-S MS65 PCGS.** The 1911-S Saint-Gaudens double eagle is an available date in the series, and a favorite choice among mintmark type collectors. The present coin is a magnificent Gem specimen, with vivid orange-gold surfaces and bright mint luster. Hints of rose color highlight the surfaces in some areas, and the design elements are sharply defined throughout. (#9159)

**Premium Gem 1911-S Saint-Gaudens Twenty
Only One Coin Certified Finer**

4763 1911-S MS66 PCGS. The 1911-S Saint-Gaudens double eagle was well represented in a Central American hoard that surfaced in 1983, making the date easy to locate in grades up to MS65. However, the 1911-S is quite rare at the Premium Gem level, and only a single coin has been certified in higher numeric grade by either of the leading grading services (10/10).

The present coin is a magnificent Premium Gem, with sharp detail evident on all design elements. The pleasing surfaces display light orange-gold color, with green and rose highlights. Bright mint luster enhances the tremendous visual appeal. (#9159)

4764 1912 MS63 PCGS. Rich yellow-orange luster with elements of lighter straw at the centers. Areas of prominent copper alloy appear on Liberty's knee and the top of the eagle's close wing. (#9160)

Satiny 1912 Double Eagle, MS64

4765 1912 MS64 PCGS. Satiny yet intense luster is the hallmark of this 1912 double eagle, gold-orange and lightly patinated with a more prominent cartwheel effect on the reverse. Well struck devices show light, scattered marks which combine to account for the grade. PCGS has certified just 34 numerically finer pieces (10/10). (#9160)

**1913 Saint-Gaudens Twenty, MS64
Sharply Detailed, Vibrant Luster**

4766 1913 MS64 PCGS. The 1913 Saint-Gaudens double eagle boasts a low mintage of 168,780 pieces. The issue is scarce at the Choice level, and any finer grade is quite rare. The coin offered here is an attractive Choice specimen, with a sharp strike, ample mint luster, and inviting greenish-gold surfaces. Only 10 coins have been certified in higher numeric grades at PCGS (11/10). (#9161)

4767 1913-D MS64 PCGS. CAC. Great yellow-gold luster with distinct peach elements at parts of the margins. This well struck and shining near-Gem has excellent eye appeal for the grade. (#9162)

**1913-S Double Eagle, MS62
Vibrant Mint Luster**

4768 1913-S MS62 PCGS. CAC. The 1913-S Saint-Gaudens double eagle is always in demand because of its low mintage of 34,000 pieces. The present coin is a pleasing MS62 specimen, with sharply detailed design elements, vibrant mint luster, and pale yellow-gold surfaces, with hints of rose. (#9163)

**1913-S Saint-Gaudens Twenty, MS62
In-Demand, Low-Mintage Issue**

- 4769 1913-S MS62 PCGS.** The 1913-S Saint-Gaudens double eagle is a sought-after, low-mintage date in the early series. This attractive MS62 example is well struck, with bright mint luster, and appealing greenish-gold surfaces. A scattering of minor abrasions on both sides explains the grade. Housed in a green label holder. (#9163)

Scarce 1914 Twenty, MS63

- 4770 1914 MS63 NGC. CAC.** A scarce date in the Saint-Gaudens series, the 1914 had a low mintage of just 95,200 coins, and survivors are usually in low Mint State grades, when they are found at all. Traces of dark olive patina on the high points ensure the originality of this important double eagle. (#9164)
- 4771 1914-D MS64 NGC. CAC.** A flashy yellow-gold Denver double eagle, modestly abraded yet appealing. Areas such as Liberty's torch hand are better-defined than usually seen. (#9165)
- 4772 1914-D MS64+ PCGS. CAC.** A high-end, Choice Mint State example of this popular Saint-Gaudens double eagle, with sharply defined design elements, softly frosted mint luster, and pleasing orange-gold surfaces. (#9165)
- 4773 1914-D MS65 NGC.** Well-defined save for slight softness on the torch hand. This yellow-gold Gem has intense luster through the fields, especially close to the rims. NGC has graded 43 numerically finer examples (10/10). (#9165)
- 4774 1915-S MS64+ NGC. CAC.** Strong orange overtones appear at certain angles on this immensely lustrous yellow-gold example. Pleasingly detailed with excellent surface quality for the near-Gem designation. (#9168)
- 4775 1916-S MS64 PCGS. CAC.** A lustrous near-Gem example from the last double eagle issue struck before 1920. Yellow-orange outer zones give way to paler cores. Housed in a green label holder. (#9169)

**1916-S Saint-Gaudens Double Eagle, MS65
Strong Luster, Vivid Color**

- 4776 1916-S MS65 PCGS.** Although not as easy to locate in Gem condition as some numismatists believed in the past, the 1916-S Saint-Gaudens twenty is an available date in high grade and enjoys tremendous popularity with mintmark type collectors. The present coin is a spectacular Gem, with lovely greenish-gold surfaces, highlighted by hints of rose and orange. All devices are sharply rendered, and both sides display vibrant mint luster. (#9169)

-
- 4777 1920 MS63+ PCGS. CAC.** Booming luster and a good strike combine with clean surfaces and original olive-gold toning to confirm the quality of this scarcer date double eagle. Less than half the mintage of either the 1920-S or 1921, but both those issues are rarities due to eventual Treasury melting. (#9170)

- 4778 1922 MS64+ PCGS. CAC.** This stunning near-Gem 1922 Saint-Gaudens twenty is highly lustrous with frosty yellow-gold surfaces and incredible eye appeal. Both sides have sharp design features and minimal surface marks. (#9173)

- 4779 1922 MS64+ PCGS. CAC.** Rich yellow-orange luster with light patina. Well-defined with a charming and frosty appearance, as well as surface quality that comes captivatingly close to the Gem level. (#9173)

**Popular Gem 1922 Double Eagle
A Rarity Any Finer**

- 4780 1922 MS65 PCGS.** The 1922 double eagle is a relatively high-mintage issue graced with bountiful availability even to the Gem level. Yet after MS65, the population falls off a cliff; PCGS has graded just seven coins finer (10/10). While this example is soft at the top of the torch, the rest of the coin is well-defined, and the orange-kissed yellow-gold luster is effusive. (#9173)

4781 1923 MS64+ PCGS. The 1923 Saint-Gaudens double eagle claims a mintage of 566,000 pieces and is considered an available date, though more elusive than the 1924, 1925, 1926, 1927, and 1928. The present coin is a well struck piece, with just a touch of softness showing on the Capitol building. The surfaces are brightly lustrous, with light orange-gold color. (#9175)

4782 1923 MS64+ PCGS. CAC. Wheat-gold and yellow hues with considerable frostiness to the luster. This attractive near-Gem shows a single copper spot along the lower left obverse border. Boldly appealing. (#9175)

4783 1923 MS64+ PCGS. CAC. This honey-gold near-Gem has a full strike on the Capitol building, the eagle's breast, and the fingers of Liberty's torch hand. A few inconspicuous ticks on the waist are all that deny an even finer grade. (#9175)

Bright MS65 1923 Twenty

4784 1923 MS65 PCGS. A brightly lustrous Gem with understated elegance, pale yellow-gold with peripheral apricot overtones. Two prominent die cracks through the letters of LIBERTY add a visual twist, and aside from a touch of softness on Liberty's torch hand and flatness at her knee, the strike is pleasing. A great condition rarity any finer. (#9175)

1923 Saint-Gaudens Double Eagle, MS65 Excellent Visual Appeal

4785 1923 MS65 PCGS. At the Gem level, the 1923 Saint-Gaudens double eagle is much more difficult to locate than its mintage of 566,000 pieces would suggest, and only three coins have been certified in higher numeric grades by PCGS and NGC combined (10/10). The present coin displays lovely yellow and rose-gold surfaces, with an exemplary strike, and vibrant mint luster. (#9175)

Lustrous MS65 1923 Double Eagle

4786 1923 MS65 PCGS. The obverse has a distinctly satiny appearance, while the reverse sports bolder cartwheel luster. Yellow-orange surfaces take on distinct peach hues at the right angle. While a number of Gem 1923 double eagles appear in the combined certified population, PCGS has graded only three coins finer (10/10). (#9175)

4787 1923-D MS66 NGC. The 1923-D Saint-Gaudens double eagle enjoys great popularity with type collectors, because of its status as the most available mintmarked issue of the series in high grades. The present coin is a magnificent Premium Gem, with a razor-sharp strike, vibrant mint luster, and attractive orange-gold surfaces. Eye appeal is outstanding. (#9176)

4788 1923-D MS66 PCGS. Orange-tinged yellow-gold luster overall with a few elements of pale wheat. Scattered shallow luster grazes preclude an even finer designation. Housed in a first-generation holder. PCGS has certified just 59 numerically finer pieces (10/10). (#9176)

4789 1924 MS64 NGC. Well struck with deep butter-yellow luster under a light layer of patina. Scattered shallow marks and a few tiny digs combine to account for the grade. (#9177)

4790 1924 MS65 NGC. A shining yellow-gold Gem with considerable frostiness to the luster. A small scrape under Liberty's flowing hair precludes an even finer designation. Type collectors should take note. (#9177)

4791 1924 MS66 PCGS. CAC. A spectacular Premium Gem example of this popular Saint-Gaudens double eagle, the present coin displays virtually pristine orange-gold surfaces, with pinpoint definition on all design elements, and vibrant mint luster. (#9177)

4792 1924 MS66+ NGC. The 1924 Saint-Gaudens double eagle is an available date in high grades, and a favorite choice among type collectors. The present coin is a high-end Premium Gem, richly patinated in hues of orange, green, and rose-gold. The strike is sharp in most areas, with a little softness on the Capitol building, and the mint luster is rich and frosty. (#9177)

1924-D Saint-Gaudens Double Eagle, MS62

4793 1924-D MS62 PCGS. A well struck, MS62 example of the esteemed 1924-D Saint-Gaudens double eagle, this specimen displays greenish-gold surfaces, with bright mint luster, and orange highlights. The surfaces are lightly abraded for the grade. Formerly considered extremely rare, this date has become more available since some examples were recovered from European holdings in the 1950s. (#9178)

**1924-D Saint-Gaudens Twenty, MS62
Sharp Strike, Nice Color**

- 4794 1924-D MS62 PCGS.** The 1924-D Saint-Gaudens double eagle, once considered a great rarity, is still regarded as a scarce issue today. The present coin is a sharply detailed MS62 example of this popular date, with lustrous, orange-gold surfaces. Housed in a green label holder. (#9178)

**1924-S Double Eagle, MS62
Scarce Date in High Grade**

- 4795 1924-S MS62 PCGS.** Once considered the rarest date in the series, and still acknowledged as a scarce issue, the 1924-S Saint-Gaudens double eagle is seldom encountered in high Mint State grades. The coin offered here is a well struck MS62 example, with subtle, frosty mint luster, green and rose-gold surfaces, and few abrasions for the grade. Housed in a green label holder. (#9179)

**Choice AU 1925-S Saint-Gaudens Twenty
Condition Rarity**

- 4796 1925-S AU55 NGC** In addition to its status as a scarce date in all grades, the 1925-S Saint-Gaudens double eagle is a prime condition rarity. Given the difficulty and expense involved in acquiring a high grade example, many collectors opt for a nice AU coin to fill the position in their date set. The present coin is a well detailed specimen, with just a touch of high-point rub detected on Liberty's chest and the eagle's breast. The lustrous surfaces are an attractive orange-gold color. (#9182)
- 4797 1926 MS66 PCGS.** The 1926 Saint-Gaudens double eagle is an underrated date in the series, especially in higher grades. The present coin is a spectacular Premium Gem, with sharply defined design elements, vivid greenish-gold surfaces with orange highlights, and bright mint luster. PCGS has certified only four coins in higher numeric grades (10/10).(#9183)

- 4798 1926 MS66 PCGS.** Attractive frosty luster graces the greenish-gold surfaces of this Premium Gem. Sharply struck and free of individually mentionable marks. PCGS has certified just four finer representatives (10/10).(#9183)

**1926-S Double Eagle, MS62
Vivid Color**

- 4799 1926-S MS62 PCGS.** The 1926-S Saint-Gaudens double eagle was once believed to be the third-rarest issue of the series, but coins have become more available over the years, as the date was well represented in several European finds. This specimen is a delightful greenish-gold example, with vibrant mint luster, and a sharp strike. Housed in a green label holder. (#9185)

**1926-S Saint-Gaudens Twenty, MS64+
Extraordinary Visual Appeal**

- 4800 1926-S MS64+ PCGS. CAC.** The 1926-S Saint-Gaudens double eagle enjoyed a large mintage of more than 2 million pieces, but the survival rate is very low, due to the Gold Recall of 1933. The present coin is a high-end Choice Mint State specimen, with sharply defined devices, bright mint luster, and attractive orange and rose-gold surfaces. Eye appeal is outstanding. (#9185)
- 4801 1927 MS65 PCGS.** A magnificent Gem specimen of this sought-after 20th century type coin, this specimen is sharply detailed, with vibrant mint luster and stunning eye appeal. Housed in an old green label holder. (#9186)
- 4802 1927 MS66+ NGC.** A magnificent, high-end Premium Gem, with sharply detailed devices, bright frosty mint luster, and attractive greenish-gold surfaces, with orange highlights. The 1927 Saint-Gaudens double eagle is an available date and a popular type coin. (#9186)
- 4803 1927 MS66+ NGC.** A step above even the average Premium Gem and an ideal coin for the type collector. Bold yellow-gold luster takes on an orange cast through the reverse fields. NGC has graded just 48 numerically finer examples (10/10).(#9186)
- 4804 1927 MS66+ PCGS.** This orange-tinged wheat-gold stunner has a slightly satiny obverse and more intense cartwheel luster on the reverse. A solidly struck and fantastic Premium Gem with memorable visual appeal. Oh-so-close to the Superb Gem tier, where PCGS has graded just 12 coins (10/10).(#9186)

- 4805** 1928 MS65+ ★ NGC. Yellow-orange luster and sea-green peripheral accents lend this type coin memorable beauty. Practically an MS66, and if not for a mark below her outstretched arm, a more-than-viable candidate for the grade. (#9189)
- 4806** 1928 MS65+ ★ NGC. High-end for the grade and absolutely gorgeous. This yellow-gold Gem has considerable orange overtones and touches of frost on the well-sculpted central devices. (#9189)
- 4807** 1928 MS66+ ★ NGC. Practically a Superb Gem on a technical level and incredibly appealing, hence the Star designation. Wheat-gold and orange luster dances on each side, and the strike and preservation are equally impressive. (#9189)
- 4808** 1928 MS66+ PCGS. An immensely lustrous Premium Gem-plus with yellow-gold surfaces that show an orange cast at the right angle to the light. Satiny and smooth, a flat-out gorgeous survivor. (#9189)

TERRITORIAL GOLD

- 4809** (1842-52) A. Bechtler Dollar, 27G. 21C., Plain Edge XF40 NGC. K-24, R.3. Softly struck at right obverse and corresponding left reverse, though remnants of yellow-gold luster add eye appeal to the fields. Smooth and desirable. Listed on page 365 of the 2011 *Guide Book*. (#10040)

C. Bechtler Gold Dollar, 28 G. Centered
K-3, AU Details

- 4810** (1834-37) C. Bechtler Dollar, 28G. Centered—Damaged—NGC Details. AU. K-3, R.6. Perhaps not as popular as the N reversed variety, the Normal N is definitely the scarcer of the two Centered varieties. The damage mentioned on the insert is a small clip seen on the right edge. The surfaces show the often-seen waviness, from apparent die buckling. Each side is green-gold with reddish accents and faint traces of charcoal around the devices. A couple of shallow planchet flakes are seen on each side but do not detract from the overall visual appeal. Listed on page 363 of the 2011 *Guide Book*. (#10058)

(1834-37) Bechtler Five Dollar, AU50
Carolina Gold, K-17, Plain Edge

- 4811** (1834-37) C. Bechtler Five Dollar, 140G. 20C, RUTHERFORD. AU50 NGC. K-17, R.5. Plain Edge. For many years, the gold coinage of the United States did not circulate because the intrinsic value of the coins was greater than the face value. The weight of the federal gold coins was adjusted in 1834 to remedy this situation, and Christian Bechtler followed suit, placing the date of the federal authorization—AUGUST 1.1834.—on the obverse of his privately issued five dollar gold pieces. Bechtler minted nine different varieties of five dollar gold coins during this period. This coin represents the scarce K-17 variety of Carolina gold, with a period after RUTHERFORD and a period replacing the colon between C and BECHTLER.

The present coin is a lightly circulated example, with a few minor abrasions and rim bruises, but all original detail still legible. Census: 1 in 50, 13 finer (10/10). (#10112)

**Phenomenal C. Bechtler Five Dollar, K-17
140G. 20C, RUTHERFORD, MS61**

- 4812 1834 \$5 C. Bechtler Five Dollar, RUTHERFORD, Plain Edge MS61 NGC. K-17, R.5.** The 20 is close to CARATS, and the date of the enabling legislation, August 1, 1834, is imprinted on the obverse of this first-rate Territorial gold piece. Apparently, the Bechtlers wisely wished to avoid running afoul of the U.S. government; when the weight of federal gold coins was reduced, the Bechtlers began issuing coinage with the new, reduced standard gold content. (Of course, to do otherwise would have been to risk the inexorable consequences of Gresham's Law, that bad money drives out good. Any coins with an excess of gold would have been hoarded in preference to other coins with lower gold content.)

This piece is in phenomenal condition for a Territorial gold piece, as it shows almost none of the usual abrasions on both sides, and the surfaces are far finer than usually seen. Perhaps this piece was a specimen or presentation piece of some kind? Only the most trivial marks on the reverse preclude an even finer grade, but as it stands this canary-yellow piece is superlative in its appeal. Among the top specimens at either service, and well within the Condition Census. Listed on page 365 of the 2011 *Guide Book*. (#10112)

**Uncirculated 1853 Assay Office Twenty
900 Thous., K-18**

- 4813 1853 Assay Office Twenty Dollar, 900 Thous. MS60 NGC. K-18, R.2.** A yellow-gold Assay Office twenty that has surprisingly few marks for the grade, aside from an unobtrusive slender groove beneath the WE in TWENTY. Luster dominates the reverse, and fills the obverse legends and motif. Although numerous working die pairs were made from K-18 hubs, undescribed die distinctions exist, a possible project for the dedicated pioneer gold specialist. For example, the present piece lacks crossbars on the As in AMERICA, and the M in AMERICA lacks an upper right serif. Listed on page 371 of the 2011 *Guide Book*. (#10013)

- 4814 1850 Moffat & Co. Five Dollar Fine 12 NGC. "K-7c", R.4.** This Large Eagle variety is not photographed in the 1982 Kagin standard reference to the series, although photos of the variety are included in Breen's 1988 *Encyclopedia*. The present straw-gold example witnessed California Gold Rush circulation, but marks are limited to a trio of faded lines on the upper reverse field and a tiny dig near star 2. Listed on page 367 of the 2011 *Guide Book*. (#10243)

1849 Mormon Five Dollar, AU50
Scarce K-2 Variety

- 4815** 1849 Mormon Five Dollar AU50 NGC. K-2, R.5. The Mormon church authorized and minted gold coinage from the gold dust received as tithes from members of their church who visited California. The first issue consisted of ten dollar pieces, paid out on December 12, 1848, actually predating any coinage by California private mints. Five dollar pieces were minted later, with different emissions dated 1849, 1850, and 1860.

The present coin is a scarce 1849 five dollar piece, with few signs of circulation, and lustrous, greenish-gold surfaces. The K-2 variety is the only one for the date, and this piece shows the typical strike for the issue, with weakness on the clasped hands, and on the 8 in the date. Census: 3 in 50, 28 finer (10/10). (#10262)

K-5 1850 Mormon Five Dollar, AU50

- 4816** 1850 Mormon Five Dollar AU50 NGC. K-5, High R.5. While the mint in Great Salt Lake City struck four distinct denominations of private gold coinage in 1849, its 1850-dated coinage was limited to five dollar coins, which are rare today regardless of grade. This is a lightly circulated example, pale green-gold with considerable luster remaining in the broad fields. All important devices are as boldly outlined as they can be seen on the issue, and the overall eye appeal is solid. Scattered light abrasion and a dig above the left hand on the obverse contribute to the grade. Listed on page 380 of the 2011 *Guide Book*. (#10265)

CALIFORNIA FRACTIONAL GOLD

- 4817 1855/4 Liberty Octagonal 25 Cents, BG-106, R.3, MS65 NGC.** Prominently reflective with a touch of satin to the pale yellow-gold surfaces. A well struck example of this scarce overdated variant. Census: 3 in 65, 2 finer (10/10).(#10375)
- 4818 Undated Liberty Round 25 Cents, BG-204, R.5, MS63 PCGS.** A sharply struck, lustrous specimen of this Pioneer Gold variety, the BG-204 is very rare in Select Mint State condition. A specimen was found in the wreck of the S.S. *Winfield Scott*, which sank in December 1853, giving numismatists a terminal date for the production of this issue. Population: 8 in 63, 2 finer (10/10).(#10389)

1853 'Peacock' Reverse Half Dollar BG-302, MS63

Distinctive Design Type Among California Fractionals

- 4819 1853 Peacock Reverse 50 Cents, BG-302, Low R.4, MS63 PCGS.** The famous "Peacock" reverse was possibly made to mimic the federal coins that were struck with rays that year. A small blemish on the reverse minimally affects the appeal of this yellow-gold and lustrous representative. Numerous die rust spots indicate that this piece is Die State II. Encapsulated in a green label PCGS holder. Ex: *Harold Rothenberger Collection (Superior, 1/31-2/1/1994), lot 2803.* (#10422)
- 4820 1854 Liberty Octagonal 1 Dollar, BG-528, R.6, AU55 NGC.** A very rare example of this die pair, part of the popular Liberty one dollar octagonal series. Greenish-gold surfaces are lustrous through light wear and have a slightly scyphate or cup-shaped appearance. (#10505)
- 4821 1854 Liberty Octagonal 1 Dollar, BG-532, Low R.4, MS61 NGC.** This intricately struck Period One gold dollar has mildly reflective fields and delicate peach and straw-gold toning. Brief hair-thin lines on the reverse determine the grade. Census: 5 in 61, 8 finer (10/10).(#10509)
- 4822 1870 Liberty Octagonal 25 Cents, BG-757, R.6, MS64 Prooflike NGC.** This challenging Period Two variety is identified by a high 8 in the date and obvious repunching on the LA in DOLLAR. Apricot and straw-gold toning grace reflective and smooth fields. The strike is crisp at the borders but shows softness on CAL. (#710584)
- 4823 1872/1 Indian Octagonal 25 Cents, BG-790, R.3, MS65 PCGS.** The deeply mirrored fields are devoid of contact, although a brief lintmark is noted beneath the fraction denominator. Struck from clashed dies. Population: 29 in 65, 4 finer (10/10).(#10617)

- 4824 1872 Indian Octagonal 25 Cents, BG-791, R.3, MS65 NGC.** A flashy canary-gold Gem that has a hint of orange toning on the reverse field. The obverse appears fully struck, and only a few letters in the legend are incompletely brought up. (#10618)
- 4825 1873 Indian Octagonal 25 Cents, BG-793, R.5, MS65 NGC.** A lustrous Gem, mildly reflective on the reverse with yellow-gold color and greenish accents. An appealing example of this rare die pair. (#10620)
- 4826 1868 Liberty Round 25 Cents, BG-806, R.3, MS66 PCGS.** A lustrous honey-gold representative that boasts a consistent strike and exemplary eye appeal. The reverse appears concave while the obverse is somewhat convex, as coined. Population: 19 in 66, 1 finer (10/10).(#10667)
- 4827 1871 Liberty Round 25 Cents, BG-813, R.3, MS65 PCGS.** A high grade example of this available Liberty head variety. Gorgeous orange-gold and ice-blue toning illuminates immaculate surfaces. The centers show only slight incompleteness. Population: 12 in 65, 3 finer (10/10).(#10674)
- 4828 1872/1 Indian Round 25 Cents, BG-869, Low R.4, MS65 Prooflike NGC.** Watery, deeply mirrored fields combine with intensely frosted devices to provide exceptional eye appeal. Generally well struck except for some of the obverse stars. A prominent die crack vertically bisects the reverse. Census: 2 in 65 Prooflike, 1 finer (10/10).(#710730)

Finest Certified BG-883 1878/6 25 Cents MS66 Prooflike, Round, Indian Head

- 4829 1878/6 Indian Round 25 Cents, BG-883, High R.4, MS66 Prooflike NGC.** The single finest certified example of BG-883. PCGS has certified none in grades above MS65, and only the present lot is graded at the MS66 level by NGC, with none finer (11/10). This is a prominently mirrored Premium Gem with well struck devices and only infrequent minor incompleteness on the reverse legend. The butter-gold surfaces are essentially as made. (#710744)
- 4830 1881 Indian Round 25 Cents, BG-887, R.3, MS66 Prooflike NGC.** An essentially fully struck Premium Gem whose flashy honey-gold and apricot surfaces exude eye appeal. Among the finest survivors of this late Period Two variety. Struck from rotated dies. Census: 4 in 66 Prooflike, none finer (10/10).(#710748)
- 4831 1872 Indian Octagonal 50 Cents, BG-940, R.4, MS65 PCGS.** This high grade octagonal half dollar has exemplary field reflectivity and a splendidly mark-free appearance. The legends are evenly struck, although the wreath shows slight softness opposite the large stars. Population: 11 in 65, 0 finer (10/10).(#10798)
- 4832 1870 Liberty Round 50 Cents, BG-1010, R.3, MS66 NGC.** An impressively lustrous Premium Gem that has a touch of texture to satiny yellow-gold fields. This piece is a trifle soft on the right obverse but otherwise well struck. (#10839)

**Very Rare BG-1036 1875 Indian Round Half
MS63 Prooflike**

4833 1875 Indian Round 50 Cents, BG-1036, Low R.8, MS63 Prooflike NGC. An extremely rare die variety, similar to the relatively plentiful BG-1037 but the first star is distant from the bust tip, and the 8 in the date is small. This is a flashy canary-gold round half with glimpses of dusky gray toning on the upper reverse and a remnant of the striated planchet surface near star 6. One of only two examples of BG-1036 certified by NGC. PCGS has also certified two pieces, one as MS61 and the other as MS62 (11/10). (#710865)

4834 1868 Liberty Octagonal 1 Dollar, BG-1105, High R.4, MS63 PCGS. Bold yellow-gold color and intense mirrors characterize this Liberty one dollar octagonal. Lightly abraded but decidedly appealing. Population: 10 in 63, 8 finer (10/10).(#10916)

4835 1875 Indian Octagonal 1 Dollar, BG-1112, High R.5, MS62 NGC. Diffuse reflectivity influences the yellow-gold surfaces, which pockets of strong gleams most visible in the obverse fields. A well-defined and impressive example of this rare Indian one dollar octagonal issue.(#10923)

End of Session Three

SESSION FOUR

Heritage Live!™, Internet, Fax, and Mail Only Session
Sunday, December 5, 2010, 10:00 AM CT, Lots 7001 - 9499
Dallas, Texas

A 15% Buyer's Premium (\$14 minimum) Will Be Added To All Lots
To view full descriptions, enlargeable images and bid online, visit HA.com/1147

SPECIAL INTERNET BIDDING FEATURE

Online proxy bidding ends at HA.com two hours prior to the opening of the live auction. Check the Time Remaining on individual lots for details. After Internet proxy bidding closes, live bidding will take place through Heritage Live™, our bidding software that lets you bid live during the actual auction. Your secret maximum will compete against those bids, and win all ties. To maximize your chances of winning, enter realistic secret maximum bids before live bidding begins. (Important note: Due to software and Internet latency, bids placed through Live Internet Bidding may not register in time and those bidders could lose lots they would otherwise have won, so be sure to place your proxy bids in advance.)

- 7063 1787 Connecticut Copper, Draped Bust Left Good 4 ANACS.** W-4135, Miller 37.6-K.4, High R.5. NGC Census: (2/68). PCGS Population (6/533). (#370) *Purchased from Richard Picker (8/11/1960). From The W. Philip Keller Collection of U.S. Colonials.*
- 7064 1787 Connecticut Copper, Draped Bust Left—Cleaned, Corroded—ANACS. Good 4 Details.** W-4185, Miller 37.13-HH, R.5. NGC Census: (2/68). PCGS Population (6/533). (#370) *Purchased from E.G. Coins (4/20/1966). From The W. Philip Keller Collection of U.S. Colonials.*
- 7065 1787 Connecticut Copper, Draped Bust Left Good 6 ANACS.** W-4125, Miller 37.5-e, R.5. NGC Census: (4/64). PCGS Population (5/528). (#370) *Purchased from David Bullowa (11/8/1952). From The W. Philip Keller Collection of U.S. Colonials.*
- 7066 1787 Connecticut Copper, Draped Bust Left—Corroded, Damaged—ANACS. VG8 Details.** W-3240, Miller 32.4-F, R.6. NGC Census: (4/60). PCGS Population (20/508). (#370) *Purchased from Bowers and Ruddy (1/28/1972). From The W. Philip Keller Collection of U.S. Colonials.*
- 7067 1787 Connecticut Copper, Draped Bust Left VG8 ANACS.** W-3025, Miller 16.5-n, R.6. NGC Census: (4/60). PCGS Population (20/508). (#370) *Purchased from W.D. Rudisill (9/16/1961). From The W. Philip Keller Collection of U.S. Colonials.*
- 7068 1787 Connecticut Copper, Draped Bust Left VG8 ANACS.** W-3000, Miller 16.1-m, R.5. NGC Census: (4/60). PCGS Population (20/508). (#370) *Purchased from Stack's (10/9/1954). From The W. Philip Keller Collection of U.S. Colonials.*
- 7069 1787 Connecticut Copper, Draped Bust Left VG8 ANACS.** W-3105, M. 25-m, R.5. NGC Census: (4/60). PCGS Population (20/508). (#370) *Purchased from Steinmetz (4/20/1975). From The W. Philip Keller Collection of U.S. Colonials.*
- 7070 1787 Connecticut Copper, Draped Bust Left VG8 ANACS.** W-3225, Miller 32.2-X.2, R.5. NGC Census: (4/60). PCGS Population (20/508). (#370) *Purchased from Kenneth W. Rendell (3/6/1959). From The W. Philip Keller Collection of U.S. Colonials.*

- 7071 1787 Connecticut Copper, Draped Bust Left—Corroded—ANACS. VG8 Details.** W-3835, Miller 33.33-Z.3, R.5. NGC Census: (4/60). PCGS Population (20/508). (#370)
*Purchased from Foster (11/24/1953).
From The W. Philip Keller Collection of U.S. Colonials.*
- 7072 1787 Connecticut Copper, Draped Bust Left, INDE/INDN VG8 ANACS.** W-3925, Miller 33.38-Z.1, High R.6. NGC Census: (4/60). PCGS Population (20/508). (#370)
*Purchased from David Bullowa (11/8/1952). Earlier from an unidentified Henry Chapman sale, lot 1830.
From The W. Philip Keller Collection of U.S. Colonials.*
- 7073 1787 Connecticut Copper, Draped Bust Left VG8 ANACS.** W-3340, Miller 33.2-Z.5, R.1. NGC Census: (4/60). PCGS Population (20/508). (#370)
*Purchased from Vic Breneman (5/6/1961).
From The W. Philip Keller Collection of U.S. Colonials.*
- 7074 1787 Connecticut Copper, Draped Bust Left VG10 ANACS.** W-3040, Miller 17-g.3, Low R.4. NGC Census: (7/53). PCGS Population (42/466). (#370)
*Purchased from Alfred D. Hoch (11/30/1959).
From The W. Philip Keller Collection of U.S. Colonials.*
- 7075 1787 Connecticut Copper, Draped Bust Left VG10 ANACS.** W-3050, Miller 19-g.4, R.3. NGC Census: (7/53). PCGS Population (42/466). (#370)
*Purchased from F.P. Hinman (9/30/1958).
From The W. Philip Keller Collection of U.S. Colonials.*
- 7076 1787 Connecticut Copper, Draped Bust Left VG10 ANACS.** W-3040, Miller 17-g.3, Low R.4. NGC Census: (7/53). PCGS Population (42/466). (#370)
*Purchased from Ted L. Craige (8/17/1967).
From The W. Philip Keller Collection of U.S. Colonials.*
- 7077 1787 Connecticut Copper, Draped Bust Left VG10 ANACS.** W-3615, Miller 33.16-Z.15, R.3. NGC Census: (7/53). PCGS Population (42/466). (#370)
*Purchased from David Bullowa (11/8/1952).
From The W. Philip Keller Collection of U.S. Colonials.*
- 7078 1787 Connecticut Copper, Draped Bust Left VG10 ANACS.** W-4070, Miller 36-l.1, High R.5. NGC Census: (7/53). PCGS Population (42/466). (#370)
*Purchased from Hollinbeck Stamp & Coin Co. (1/28/1954).
From The W. Philip Keller Collection of U.S. Colonials.*
- 7079 1787 Connecticut Copper, Draped Bust Left—Corroded—ANACS. Fine 12 Details.** W-3125, Miller 27-a.1, R.5. NGC Census: (5/48). PCGS Population (30/436). (#370)
*Purchased from H.J. Rosen (Penn Coins, 5/22/1964).
From The W. Philip Keller Collection of U.S. Colonials.*
- 7080 1787 Connecticut Copper, Draped Bust Left—Cracked Planchet—Fine 12 ANACS.** W-3005, Miller 16.2-NN.1, R.5. NGC Census: (5/48). PCGS Population (30/436). (#370)
*Purchased from H.J. Rosen (Penn Coins, 5/22/1964).
From The W. Philip Keller Collection of U.S. Colonials.*
- 7081 1787 Connecticut Copper, Draped Bust Left Fine 12 ANACS.** W-3025, Miller 16.5-n, R.6. NGC Census: (5/48). PCGS Population (30/436). (#370)
*Purchased from Ted L. Craige (5/25/1966).
From The W. Philip Keller Collection of U.S. Colonials.*
- 7082 1787 Connecticut Copper, Draped Bust Left Fine 12 ANACS.** W-3220, Miller 32.2-X.1, R.3. NGC Census: (5/48). PCGS Population (30/436). (#370)
*Purchased from New Netherlands (10/23/1953).
From The W. Philip Keller Collection of U.S. Colonials.*
- 7083 1787 Connecticut Copper, Draped Bust Left—Corroded—ANACS. Fine 12 Details.** W-3830, Miller 33.32-Z.13, R.1. NGC Census: (5/48). PCGS Population (30/436). (#370)
*Purchased from G.R. Adams (3/4/1961).
From The W. Philip Keller Collection of U.S. Colonials.*
- 7084 1787 Connecticut Copper, Draped Bust Left—Corroded—ANACS. Fine 12 Details.** W-3860, Miller 33.34-Z.11, R.5. NGC Census: (5/48). PCGS Population (30/436). (#370)
*Purchased from Ted L. Craige (10/3/1963).
From The W. Philip Keller Collection of U.S. Colonials.*
- 7085 1787 Connecticut Copper, Draped Bust Left—Corroded, Damaged—ANACS. Fine 12 Details.** W-3200, Miller 31.1-r.4, R.2. NGC Census: (5/48). PCGS Population (30/436). (#370)
*Purchased from Stack's (10/9/1954).
From The W. Philip Keller Collection of U.S. Colonials.*
- 7086 1787 Connecticut Copper, Draped Bust Left—Corroded—ANACS. Fine 12 Details.** W-3425, Miller 33.6-KK, R.2. NGC Census: (5/48). PCGS Population (30/436). (#370)
*Purchased from Stack's (10/9/1954).
From The W. Philip Keller Collection of U.S. Colonials.*
- 7087 1787 Connecticut Copper, Draped Bust Left Fine 12 ANACS.** W-4155, Miller 37.8-k.2, R.5. NGC Census: (5/48). PCGS Population (30/436). (#370)
*Purchased from Robert A. Vlack (10/9/1962).
From The W. Philip Keller Collection of U.S. Colonials.*
- 7088 1787 Connecticut Copper, Draped Bust Left—Corroded—ANACS. Fine 12 Details.** W-3310, Miller 33.1-Z.13, R.5. NGC Census: (5/48). PCGS Population (30/436). (#370)
*Purchased from Stack's (10/9/1954).
From The W. Philip Keller Collection of U.S. Colonials.*
- 7089 1787 Connecticut Copper, Draped Bust Left—Corroded—ANACS. Fine 12 Details.** W-3940, Miller 33.38-Z.23, High R.5. NGC Census: (5/48). PCGS Population (30/436). (#370)
*Purchased from J. Stipp (3/2/1975).
From The W. Philip Keller Collection of U.S. Colonials.*
- 7090 1787 Connecticut Copper, Draped Bust Left Fine 15 ANACS.** W-3440, Miller 33.7-r.2, R.1. NGC Census: (4/44). PCGS Population (68/368). (#370)
*Purchased from David Bullowa (11/8/1952).
From The W. Philip Keller Collection of U.S. Colonials.*
- 7091 1787 Connecticut Copper, Draped Bust Left Fine 15 ANACS.** W-3900, Miller 33.36-T.2, R.2. NGC Census: (4/44). PCGS Population (68/368). (#370)
*Purchased from Hollinbeck Stamp & Coin Co. (1/28/1954).
From The W. Philip Keller Collection of U.S. Colonials.*
- 7092 1787 Connecticut Copper, Draped Bust Left Fine 15 ANACS.** W-4110, Miller 37.3-i, R.3. NGC Census: (4/44). PCGS Population (68/368). (#370)
*Purchased from Hollinbeck Stamp & Coin Co. (1/28/1954).
From The W. Philip Keller Collection of U.S. Colonials.*
- 7093 1787 Connecticut Copper, Draped Bust Left Fine 15 ANACS.** W-4260, Miller 44-W.4, R.4. NGC Census: (4/44). PCGS Population (68/368). (#370)
*Purchased from Kenneth W. Rendell (5/2/1959).
From The W. Philip Keller Collection of U.S. Colonials.*
- 7094 1787 Connecticut Copper, Draped Bust Left—Corroded—ANACS. VF20 Details.** W-3130, Miller 28-m, R.5. NGC Census: (5/39). PCGS Population (73/295). (#370)
*Purchased from Pukall (11/19/1958).
From The W. Philip Keller Collection of U.S. Colonials.*

- 7095 1787 Connecticut Copper, Draped Bust Left—Corroded—ANACS. VF20 Details.** W-3120, Miller 26-AA, R.5. NGC Census: (5/39). PCGS Population (73/295). (#370)
*Purchased from Pukall (11/19/1958).
From The W. Philip Keller Collection of U.S. Colonials.*
- 7096 1787 Connecticut Copper, Draped Bust Left—Scratched—ANACS. VF20 Details.** W-3045, Miller 18-g.1, R.6. NGC Census: (5/39). PCGS Population (73/295). (#370)
*Purchased from Alfred D. Hoch (5/6/1960).
From The W. Philip Keller Collection of U.S. Colonials.*
- 7097 1787 Connecticut Copper, Draped Bust Left—Corroded—ANACS. VF20 Details.** W-3210, Miller 31.2-r.3, R.1. NGC Census: (5/39). PCGS Population (73/295). (#370)
*Purchased from Pukall (12/6/1958).
From The W. Philip Keller Collection of U.S. Colonials.*
- 7098 1787 Connecticut Copper, Draped Bust Left—Corroded—ANACS. VF20 Details.** W-3605, Miller 33.15-r.1, R.2. NGC Census: (5/39). PCGS Population (73/295). (#370)
*Purchased from Kenneth W. Rendell (5/2/1959).
From The W. Philip Keller Collection of U.S. Colonials.*

- 7134 1788 Connecticut Copper, Draped Bust Left—Corroded—ANACS. VF30 Details.** W-4610, Miller 16.3-N, R.2. NGC Census: (0/7). PCGS Population (5/24). (#409)
Purchased from Kaplan (9/9/1952).
From The W. Philip Keller Collection of U.S. Colonials.
- 7135 1786 New Jersey Copper, Narrow Shield VG8 ANACS.** W-4870, Maris 17-b, R.2. NGC Census: (1/23). PCGS Population (4/173). (#496)
Purchased from Germantown Coins (10/6/1962).
From The W. Philip Keller Collection of U.S. Colonials.
- 7136 1786 New Jersey Copper, Narrow Shield VG8 ANACS.** W-4940, Maris 23-P, R.4. NGC Census: (1/23). PCGS Population (4/173). (#496)
Purchased from Cessna (9/6/1952).
From The W. Philip Keller Collection of U.S. Colonials.
- 7137 1786 New Jersey Copper, Narrow Shield—Laminations—Fine 12 ANACS.** W-4945, Maris 23-R, R.4. NGC Census: (1/21). PCGS Population (9/155). (#496)
Purchased from J.A. Walsh (5/19/1961).
From The W. Philip Keller Collection of U.S. Colonials.
- 7138 1786 New Jersey Copper, Narrow Shield—Reengraved, Smoothed—ANACS. Fine 12 Details.** W-4840, Maris 16-L, R.2. NGC Census: (1/21). PCGS Population (9/155). (#496)
Purchased from Douglas (9/29/1951).
From The W. Philip Keller Collection of U.S. Colonials.
- 7139 1786 New Jersey Copper, Wide Shield, Bridle—Corroded—ANACS. VF20 Details.** W-4890, Maris 18-M, R.1. NGC Census: (0/7). PCGS Population (3/18). (#501)
Purchased from Johnson (6/3/1959).
From The W. Philip Keller Collection of U.S. Colonials.
- 7140 1787 New Jersey Copper, Outlined Shield—Corroded—ANACS. VG8 Details.** W-5190, Maris 38-c, R.4. NGC Census: (2/27). PCGS Population (2/227). (#503)
Purchased from J.A. Walsh (5/19/1961).
From The W. Philip Keller Collection of U.S. Colonials.
- 7141 1787 New Jersey Copper, Outlined Shield—Corroded—ANACS. VG8 Details.** W-5050, Maris 6-D, R.2. NGC Census: (2/27). PCGS Population (2/227). (#503)
Purchased from Philip Greco (9/23/1960).
From The W. Philip Keller Collection of U.S. Colonials.
- 7142 1787 New Jersey Copper, Outlined Shield Fine 12 ANACS.** W-5305, Maris 55-m, High R.4. NGC Census: (0/26). PCGS Population (13/209). (#503)
Purchased from Schaefer (5/3/1952).
From The W. Philip Keller Collection of U.S. Colonials.
- 7143 1787 New Jersey Copper, Outlined Shield—Corroded, Scratched—ANACS. Fine 12 Details.** W-5350, Miller 62-q, R.3. NGC Census: (0/26). PCGS Population (13/209). (#503)
Purchased from French (10/10/1953).
From The W. Philip Keller Collection of U.S. Colonials.
- 7144 1787 New Jersey Copper, Outlined Shield—Corroded—ANACS. Fine 12 Details.** W-5400, Maris 68-w, R.4. NGC Census: (0/26). PCGS Population (13/209). (#503)
Purchased from E.D. Sherwood (10/23/1965).
From The W. Philip Keller Collection of U.S. Colonials.
- 7145 1787 New Jersey Copper, Outlined Shield—Damaged—ANACS. Fine 15 Details.** W-5195, Maris 39-a, R.2. NGC Census: (0/26). PCGS Population (20/189). (#503)
Purchased from Stack's (4/10/1954).
From The W. Philip Keller Collection of U.S. Colonials.

- 7146** 1787 New Jersey Copper, Outlined Shield—Damaged—ANACS. VF20 Details. W-5380, Maris 64-t, R.1. NGC Census: (1/25). PCGS Population (23/166). (#503)
Purchased from W.D. Rudisill (9/16/1961). From The W. Philip Keller Collection of U.S. Colonials.
- 7147** 1787 New Jersey Copper, Camel Head—Struck on a 1773 1/2 Pence—Fine 12 ANACS. W-5310, Maris 56-n, R.1. NGC Census: (0/6). PCGS Population (1/57). (#515)
Purchased from Ed Hipps (3/16/1963). From The W. Philip Keller Collection of U.S. Colonials.
- 7148** 1787 New Jersey Copper, Camel Head Fine 12 ANACS. W-5310, Miller 56-n, R.1. NGC Census: (0/6). PCGS Population (1/57). (#515)
Purchased from James Kelly (6/10/1952). From The W. Philip Keller Collection of U.S. Colonials.
- 7149** 1788 New Jersey Copper, Head Right—Corroded—ANACS. VF20 Details. W-5510, Maris 67-v, R.1. NGC Census: (0/6). PCGS Population (5/40). (#521)
Purchased from Somerset (8/3/1963). From The W. Philip Keller Collection of U.S. Colonials.
- 7150** 1788 New Jersey Copper, Running Fox—Fields Tooled—ANACS. VG8 Details. W-5535, Maris 77-dd, R.4. NGC Census: (1/3). PCGS Population (1/32). (#524)
Purchased from Cessna (9/6/1952). From The W. Philip Keller Collection of U.S. Colonials.
- 7151** 1788 New Jersey Copper, Running Fox, Late Die State, VG10 ANACS. W-5535, Maris 77-dd, R.4. NGC Census: (0/3). PCGS Population (3/29). (#524)
Purchased from Richard Picker (1/27/1964). From The W. Philip Keller Collection of U.S. Colonials.
- 7152** 1787 Vermont Copper, BRITANNIA—Environmental Damage—NGC Details. VF. W-2255, Ryder-13, R.1. NGC Census: (1/19). PCGS Population (16/54). (#554)
- 7153** 1788 Vermont Copper, Bust Right—Scratched—ANACS. Good 6 Details. W-2175, Ryder-23, R.4. NGC Census: (2/19). PCGS Population (9/174). (#563)
Purchased from Kenneth W. Rendell (11/22/1958). From The W. Philip Keller Collection of U.S. Colonials.
- 7154** 1788 Vermont Copper, Bust Right VG8 ANACS. W-2155, Ryder-21, R.5. NGC Census: (3/16). PCGS Population (12/162). (#563)
Purchased from Kenneth W. Rendell (2/28/1960). From The W. Philip Keller Collection of U.S. Colonials.
- 7155** 1788 Vermont Copper, Bust Right—Corroded, Scratched—ANACS. VF20 Details. W-2150, Ryder-20, R.4. NGC Census: (2/8). PCGS Population (30/70). (#563)
Purchased from French (10/10/1953). From The W. Philip Keller Collection of U.S. Colonials.
- 7156** 1783 Nova Constellatio Copper, Pointed Rays, Small US Brown—Improperly Cleaned—NGC Details. XF. Crosby 2-B, W-1865, R.2. NGC Census: (0/0). PCGS Population (0/0). (#801)
- 7157** 1785 Nova Constellatio Copper, Pointed Rays, Large Date Fine 15 ANACS. W-1910, Crosby 4-D, High R.4. NGC Census: (1/48). PCGS Population (13/229). (#813)
Purchased from Van Horn (3/17/1960). From The W. Philip Keller Collection of U.S. Colonials.
- 7158** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays—Bent, Corroded—ANACS. Fine 12 Details. N-16 N, W-6925, R.3. Census: (4/239). PCGS Population (23/925). (#883)
Ex: French's (6/1954). From The W. Philip Keller Collection of U.S. Colonials.
- 7159** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays Fine 12 ANACS. W-6810, N. 12-U, R.4. NGC Census: (4/239). PCGS Population (23/925). (#883)
Purchased from Empire Coin Co. (3/31/1959). From The W. Philip Keller Collection of U.S. Colonials.
- 7160** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays XF45 ANACS. N. 13-X, W-6855, R.2. NGC Census: (13/162). PCGS Population (71/512). (#883)
Ex: Kreisberg-Schulman (4/1959). From The W. Philip Keller Collection of U.S. Colonials.
- 7161** 1787 Fugio Cent, UNITED STATES, Cinquefoils AG3 ANACS. N. 16-H, W-6920, R.5. NGC Census: (0/40). PCGS Population (1/219). (#889)
Purchased from Milt Stern (9/16/1961). From The W. Philip Keller Collection of U.S. Colonials.
- 7162** 1787 Fugio Cent, UNITED STATES, 1/Horizontal 1 Good 4 ANACS. N-10G, W-6700, R.5. NGC Census: (0/0). PCGS Population (0/1). (#892)
Purchased from Kenneth W. Rendell (4/5/1960). From The W. Philip Keller Collection of U.S. Colonials.
- 7163** 1787 Fugio Cent, STATES UNITED, Newman-19SS—Corroded—ANACS. VG8 Details. W-6980, N. 19-SS, R.5. NGC Census: (0/3). PCGS Population (0/23). (#895)
Purchased from J. Walsh (11/16/1963). From The W. Philip Keller Collection of U.S. Colonials.
- 7164** 1787 Fugio Cent, STATES UNITED, Eight-Pointed Stars—Corrosion—NGC Details. Good. NGC Census: (1/13). PCGS Population (1/64). (#898)
- 7165** 1787 Fugio Cent, Club Rays, Rounded Ends—Corroded—ANACS. VF20 Details. N-3 D, W-6680, R.3. NGC Census: (1/37). PCGS Population (12/71). (#904)
Purchased from Norm Pullen (10/29/1960). From The W. Philip Keller Collection of U.S. Colonials.
- 7166** (1792-94) Kentucky Token, Plain Edge XF45 NGC. W-8800, R.1. NGC Census: (11/54). PCGS Population (43/229). (#614)
- 7167** 1794 Talbot, Allum & Lee Cent, NEW YORK VF35 ANACS. W-8570, Fuld-2, R.1. NGC Census: (0/22). PCGS Population (15/72). (#634)
Purchased from Schaefer (9/29/1951). From The W. Philip Keller Collection of U.S. Colonials.
- 7168** 1783 Georgivs Triumpho Token—Corroded, Scratched—ANACS. VG8 Details. W-10100, Baker-7, R.3. NGC Census: (1/21). PCGS Population (2/98). (#664)
Purchased from James Kelly (4/3/1952). From The W. Philip Keller Collection of U.S. Colonials.
- 7169** 1783 Washington & Independence Cent, Large Military Bust PCGS. The PCGS number ending in .97 suggests Environmental Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. (#667)
- 7170** 1783 Washington & Independence Cent, Large Military Bust—Cleaned—ANACS. Fine 12 Details. Baker-4, R.4. NGC Census: (0/47). PCGS Population (6/210). (#667)
Purchased from W.E. Johnson (7/3/1959). From The W. Philip Keller Collection of U.S. Colonials.
- 7171** 1783 Washington & Independence Cent, Large Military Bust—Reverse Digs—ANACS. Fine 15 Details. W-10240, Baker-3, R.4. . NGC Census: (1/46). PCGS Population (4/206). (#667)
From The W. Philip Keller Collection of U.S. Colonials.
- 7172** 1783 Washington & Independence Cent, Large Military Bust—Damaged—ANACS. VF20 Details. W-10200, Baker-4, R.4. NGC Census: (3/43). PCGS Population (4/202). (#667)
Purchased from W.E. Johnson (7/3/1959). From The W. Philip Keller Collection of U.S. Colonials.

7173 1783 Washington & Independence Cent, Large Military Bust—Corroded—ANACS. VF25 Details. W-10230, Baker-4, R.4. NGC Census: (0/43). PCGS Population (8/194). (#667)
Purchased from W.E. Johnson (7/3/1959). From The W. Philip Keller Collection of U.S. Colonials.

HALF CENTS

7174 1794—Corroded—NGC Details. Fine. NGC Census: (0/7). PCGS Population (22/258). Mintage: 81,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$1,200. (#1003)

7175 1794—Corroded—ANACS. Fine 12 Details. NGC Census: (1/9). PCGS Population (22/259). Mintage: 81,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$1,200. (#1003)

7176 1804 Plain 4, No Stems XF45 PCGS. PCGS Population (64/345). NGC Census: (0/28). Mintage: 1,055,312. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$378. (#1063)

7177 1804 Plain 4, No Stems—Improperly Cleaned—NGC Details. AU. NGC Census: (0/4). PCGS Population (75/269). Mintage: 1,055,312. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$475. (#1063)

7178 1806 Small 6, No Stems VF35 PCGS. CAC. PCGS Population (43/311). NGC Census: (8/207). Mintage: 356,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: \$259. (#1093)
From The Sandy Beach Collection.

7179 1807 XF45 ANACS. C-1. NGC Census: (12/82). PCGS Population (17/84). Mintage: 476,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$526. (#1104)

7180 1808 XF45 ANACS. C-3. NGC Census: (6/13). PCGS Population (4/40). Mintage: 400,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$618. (#1107)
From The Diotte Collection.

7181 1811 AG3 ANACS. C-2. NGC Census: (0/30). PCGS Population (2/132). Mintage: 63,140. Numismedia Wsl. Price for problem free NGC/PCGS coin in AG3: \$153. (#1135)

7182 1826 MS60 Brown NGC. NGC Census: (0/5). PCGS Population (0/70). Mintage: 234,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$350. (#1144)

7183 1826 MS62 Brown NGC. NGC Census: (0/2). PCGS Population (12/58). Mintage: 234,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$475. (#1144)

7184 1835 AU55 PCGS. PCGS Population (95/450). NGC Census: (1/294). Mintage: 398,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$155. (#1168)
From The Eagle Harbor Collection, Part Two.

7185 1835 MS63 Brown PCGS. PCGS Population (113/128). NGC Census: (101/52). Mintage: 398,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$350. (#1168)

7186 1853—Improperly Cleaned—NGC Details. Unc. C-1. NGC Census: (3/597). PCGS Population (7/370). Mintage: 129,694. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$195. (#1227)

7187 1855 AU55 PCGS. PCGS Population (33/401). NGC Census: (14/517). Mintage: 56,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$145. (#1233)
From The Eagle Harbor Collection, Part Two.

LARGE CENTS

7188 1795 Plain Edge VG8 PCGS. CAC. PCGS Population (16/276). NGC Census: (0/15). Mintage: 501,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$525. (#1380)
From The Sandy Beach Collection.

7189 1795 Plain Edge—Corroded—ANACS. VG10 Details. S-76B. NGC Census: (4/11). PCGS Population (26/250). Mintage: 501,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG10: \$578. (#1380)

7190 1796 Liberty Cap Good 4 ANACS. S-81. NGC Census: (0/20). PCGS Population (9/128). Mintage: 109,825. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4: \$340. (#1392)

7191 1796 Draped Bust, Reverse of 1794 Brown—Environmental Damage—NGC Details. Fine. S-110. NGC Census: (0/0). PCGS Population (0/0). (#1404)

7192 1798/7 VG8 PCGS. PCGS Population (2/21). NGC Census: (0/1). Mintage: 1,841,745. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$300. (#1440)

7193 1802 Fine 12 PCGS. PCGS Population (24/302). NGC Census: (1/4). Mintage: 3,435,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$200. (#1470)

7194 1802 1/000—Corroded—ICG. VF30 Details. NGC Census: (0/0). PCGS Population (3/10). Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: \$985. (#1473)

7195 1803 Small Date, Small Fraction Brown—Improperly Cleaned—NGC Details. VF. S-247. NGC Census: (0/0). PCGS Population (0/0). Mintage: 3,131,691. (#1482)

7196 1803 Small Date, Small Fraction Fine 12 NGC. NGC Census: (1/0). PCGS Population (15/309). Mintage: 3,131,691. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$225. (#1482)

7197 1803 Small Date, Large Fraction—Corroded—NCS. XF Details. S-261. NGC Census: (2/5). PCGS Population (10/35). Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$825. (#1485)

7198 1808 Fine 15 PCGS. PCGS Population (15/82). NGC Census: (0/3). Mintage: 1,007,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 15: \$373. (#1543)
From The Sandy Beach Collection.

7199 1813—Burnished—NGC Details. VF. NGC Census: (0/7). PCGS Population (16/120). Mintage: 418,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$625. (#1570)

7200 1818—Cleaned—ANACS. AU53 Details. NGC Census: (0/2). PCGS Population (21/386). Mintage: 3,167,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$215. (#1600)

7201 1820 Large Date MS63 Brown NGC. N-13. Ex: Sandy Beach Collection. NGC Census: (0/2). PCGS Population (80/298). Mintage: 4,407,550. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$500. (#1615)
From The Sandy Beach Collection.

7202 1834 Large 8, Small Stars, Medium Letters AU50 NGC. NGC Census: (0/20). PCGS Population (6/57). Mintage: 1,855,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$185. (#1699)

7203 1835 Head of 1836 AU50 ANACS. NGC Census: (0/3). PCGS Population (5/46). Mintage: 3,878,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$175. (#1714)

7204 1836 AU58 PCGS. PCGS Population (16/47). NGC Census: (0/2). Mintage: 2,111,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$220. (#1726)
From The Eagle Harbor Collection, Part Two.

7205 1838 MS63 Brown NGC. NGC Census: (3/2). PCGS Population (76/129). Mintage: 6,370,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$500. (#1741)

7206 1853 AU50 PCGS. PCGS Population (55/636). NGC Census: (1/6). Mintage: 6,641,131. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$93. (#1901)

7207 1856 Slanted 5 MS63 Red and Brown PCGS. PCGS Population (13/51). NGC Census: (0/0). (#1923)

7208 1856 Slanted 5 MS63 Red and Brown PCGS. PCGS Population (13/51). NGC Census: (0/0). (#1923)
From The Eagle Harbor Collection, Part Two.

FLYING EAGLE CENTS

7209 1857—Reverse Corroded—NCS. Unc Details. NGC Census: (0/10). PCGS Population (40/2243). Mintage: 17,450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$300. (#2016)

7210 1857 MS62 PCGS. PCGS Population (370/1819). NGC Census: (0/5). Mintage: 17,450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$460. (#2016)

7211 1857 MS62 NGC. NGC Census: (0/10). PCGS Population (370/1818). Mintage: 17,450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$460. (#2016)

7212 1857 MS63 PCGS. PCGS Population (723/1095). NGC Census: (7/3). Mintage: 17,450,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$640. (#2016)

INDIAN CENTS

7213 1859 MS63 PCGS. PCGS Population (479/692). NGC Census: (1/3). Mintage: 36,400,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$540. (#2052)
From The Eagle Harbor Collection, Part Two.

7214 1860 MS62 PCGS. PCGS Population (108/857). NGC Census: (10/71). Mintage: 20,566,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$200. (#2058)

7215 1861 AU55 PCGS. PCGS Population (44/969). NGC Census: (24/689). Mintage: 10,100,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$145. (#2061)

7216 1862 MS64 PCGS. PCGS Population (576/262). NGC Census: (473/198). Mintage: 28,075,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$330. (#2064)
From The Eagle Harbor Collection, Part Two.

7217 1862 MS65 NGC. NGC Census: (163/35). PCGS Population (193/69). Mintage: 28,075,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$740. (#2064)
From The F.L. Ivy Rainbow Copper Collection.

7218 1863 MS64 NGC. NGC Census: (558/201). PCGS Population (647/177). Mintage: 49,840,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$315. (#2067)

7219 1863 MS64 NGC. NGC Census: (558/201). PCGS Population (651/177). Mintage: 49,840,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$320. (#2067)

7220 1863 MS65 NGC. NGC Census: (183/18). PCGS Population (146/31). Mintage: 49,840,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$810. (#2067)

7221 1864 Copper-Nickel MS64 PCGS. PCGS Population (439/103). NGC Census: (0/0). Mintage: 13,740,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$435. (#2070)

7222 1864 Bronze No L MS64 Brown NGC. NGC Census: (0/0). PCGS Population (81/33). Mintage: 39,233,712. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$145. (#2076)

7223 1864 Bronze No L MS64 Red and Brown PCGS. PCGS Population (343/203). NGC Census: (150/300). Mintage: 39,233,712. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$250. (#2077)

7224 1864 Bronze No L MS64 Red and Brown ANACS. NGC Census: (150/300). PCGS Population (343/203). Mintage: 39,233,712. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$250. (#2077)

7225 1864 L On Ribbon Bronze MS64 Brown NGC. NGC Census: (0/0). PCGS Population (52/5). Mintage: 39,233,712. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$650. (#2079)
From The F.L. Ivy Rainbow Copper Collection.

7226 1865 Fancy 5 MS63 Red and Brown PCGS. PCGS Population (143/314). NGC Census: (0/1). Mintage: 35,429,288. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$145. (#2083)

7227 1866 MS63 Brown NGC. NGC Census: (58/34). PCGS Population (38/62). Mintage: 9,826,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$300. (#2085)
From The F.L. Ivy Rainbow Copper Collection.

7228 1867 MS63 Brown PCGS. CAC. PCGS Population (40/35). NGC Census: (1/6). Mintage: 9,821,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$280. (#2088)

7229 1867 MS64 Red and Brown PCGS. PCGS Population (234/49). NGC Census: (122/26). Mintage: 9,821,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$785. (#2089)
From The F.L. Ivy Rainbow Copper Collection.

7230 1868 MS64 Red and Brown PCGS. PCGS Population (197/95). NGC Census: (2/1). Mintage: 10,266,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$555. (#2092)

7231 1869 Good 6 NGC. NGC Census: (7/139). PCGS Population (36/583). Mintage: 6,420,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 6: \$75. (#2094)

7232 1873 Closed 3 MS64 Red and Brown NGC. NGC Census: (61/30). PCGS Population (81/28). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$775. (#2110)
From The F.L. Ivy Rainbow Copper Collection.

7233 1874 MS63 Brown PCGS. PCGS Population (32/34). NGC Census: (0/0). Mintage: 14,187,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$215. (#2118)

7234 1875 MS63 Red and Brown PCGS. PCGS Population (113/295). NGC Census: (40/284). Mintage: 13,528,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$250. (#2122)

7235 1875 MS63 Red and Brown PCGS. FS-801. PCGS Population (113/295). NGC Census: (40/284). Mintage: 13,528,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$250. (#2122)

7236 1875 MS64 Red and Brown PCGS. PCGS Population (217/78). NGC Census: (159/125). Mintage: 13,528,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$345. (#2122)

7237 1875 MS64 Red and Brown NGC. NGC Census: (159/125). PCGS Population (217/78). Mintage: 13,528,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$360. (#2122)

7238 1876 AU58 NGC. NGC Census: (21/149). PCGS Population (24/72). Mintage: 7,944,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$235. (#2124)

7239 1876 MS64 Red and Brown PCGS. PCGS Population (200/62). NGC Census: (121/106). Mintage: 7,944,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$575. (#2125)
From The F.L. Ivy Rainbow Copper Collection.

7240 1876 MS64 Red and Brown NGC. NGC Census: (121/106). PCGS Population (200/62). Mintage: 7,944,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$575. (#2125)
From The F.L. Ivy Rainbow Copper Collection.

7241 1877 AG3 NGC. NGC Census: (190/1383). PCGS Population (240/2696). Mintage: 852,500. (#2127)

7242 1877—Damaged—ANACS. AG3 Details. NGC Census: (190/1383). PCGS Population (240/2701). Mintage: 852,500. (#2127)

7243 1877 Good 4 NGC. NGC Census: (148/1235). PCGS Population (336/2360). Mintage: 852,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4: \$690. (#2127)

7244 1877 PCGS Genuine. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. Mintage: 852,500. (#2128)

7245 1878 VF20 PCGS. PCGS Population (4/215). NGC Census: (0/0). Mintage: 5,799,850. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$102. (#2130)

7246 1878 MS64 Red and Brown NGC. NGC Census: (1/88). PCGS Population (193/76). Mintage: 5,799,850. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$565. (#2131)
From The F.L. Ivy Rainbow Copper Collection.

7247 1878 MS65 Red and Brown NGC. NGC Census: (88/0). PCGS Population (73/3). Mintage: 5,799,850. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$850. (#2131)
From The F.L. Ivy Rainbow Copper Collection.

7248 1879 MS64 Brown PCGS. PCGS Population (52/4). NGC Census: (68/55). Mintage: 16,231,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$180. (#2133)

7249 1879 MS65 Red and Brown NGC. NGC Census: (101/21). PCGS Population (64/9). Mintage: 16,231,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$340. (#2134)
From The F.L. Ivy Rainbow Copper Collection.

7250 1881 MS64 Red and Brown PCGS. PCGS Population (260/66). NGC Census: (0/0). Mintage: 39,211,576. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$180. (#2140)
From The F.L. Ivy Rainbow Copper Collection.

7251 1882 MS64 Red and Brown PCGS. PCGS Population (199/65). NGC Census: (143/115). Mintage: 38,581,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$200. (#2143)
From The F.L. Ivy Rainbow Copper Collection.

7252 1883 MS64 Red and Brown NGC. NGC Census: (140/119). PCGS Population (226/51). Mintage: 45,598,108. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$190. (#2146)

7253 1883 MS64 Red and Brown PCGS. PCGS Population (227/51). NGC Census: (140/119). Mintage: 45,598,108. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$195. (#2146)
From The F.L. Ivy Rainbow Copper Collection.

7254 1884 MS64 Brown NGC. NGC Census: (99/54). PCGS Population (67/18). Mintage: 23,261,742. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$135. (#2148)

7255 1884 MS65 Brown NGC. NGC Census: (42/12). PCGS Population (18/0). Mintage: 23,261,742. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$240. (#2148)
From The F.L. Ivy Rainbow Copper Collection.

7256 1886 Type One MS63 Brown NGC. NGC Census: (17/49). PCGS Population (28/49). Mintage: 17,654,290. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$210. (#2154)

7257 1886 Type One MS64 Red and Brown PCGS. PCGS Population (126/37). NGC Census: (40/36). Mintage: 17,654,290. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$480. (#2155)
From The F.L. Ivy Rainbow Copper Collection.

7258 1886 Type One MS64 Red and Brown NGC. NGC Census: (40/36). PCGS Population (126/37). Mintage: 17,654,290. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$480. (#2155)
From The F.L. Ivy Rainbow Copper Collection.

7259 1887 MS65 Red NGC. NGC Census: (21/2). PCGS Population (57/14). Mintage: 45,226,484. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$1,500. (#2159)
From The F.L. Ivy Rainbow Copper Collection.

WASHINGTONIA

- 9386** (Circa 1859) Sansom Medal AU55 NGC. Baker-72. Silver, 41mm.
- 9387** (Circa 1876) Washington-Grant Medal PR65 NGC. Baker-252.
- 9388** (1840s) Washington Temperance Society, House of Temperance MS63 Brown NGC. Baker-329. Bronze.
- 9389** (1830s) Tyrant Alcohol Token MS62 NGC. Baker-332. Silver.
- 9390** (1830s) Tyrant Alcohol Medal XF45 NGC. Baker-332A. Copper.
- 9391** 1876 Centennial Exposition, Danish Medal MS66 Brown NGC. Baker-426A. Bronze.

- 9392** 1876 Centennial Exposition, Danish Medal MS63 NGC. Baker-426B. White metal.
- 9393** 1881 Surrender At Yorktown Medal MS62 Prooflike NGC. Baker-452C. White metal.
- 9394** 1939 New York World's Fair, Washington Inauguration MS65 NGC. Baker-3002. Gilt. New York, NY.

U.S. MINT MEDALS

- 9395** (1862) George Washington Medal—Artificial Toning—NGC Details. Proof. Julian-PR-26. Silver.
- 9396** (1861-) Washington and Jackson—Environmental Damage—NGC Details. AU. Julian-PR-28.

SO-CALLED DOLLARS

- 9397** 1893 World's Columbian Exposition, Official Medal, Large Letters MS65 NGC. HK-154. Chicago, IL.
- 9398** 1893 Columbian Exposition, World Globe MS62 NGC. HK-174. Chicago, Illinois.
- 9399** 1901 Pan-American Exposition, Official Medal MS66 NGC. HK-289. Buffalo, NY.
- 9400** 1901 Pan-American Exposition Official Medal MS66 NGC. HK-289. Buffalo, NY.

- 9401** 1901 Pan-American Exposition, Official Medal MS67 NGC. HK-289. Buffalo, NY.
- 9402** 1904 Louisiana Purchase Exposition Official Souvenir—Improperly Cleaned—NCS. Unc Details. HK-301. St. Louis, MO.

- 9403** 1909 Alaska-Yukon-Pacific Exposition, 1 DWT Alaska Gold, MS64 NGC. HK-360. Hart's Coins of The West. Seattle, WA.
- 9404** 1915 Panama-Pacific Exposition, Official Medal MS62 NGC. HK-399. San Francisco, CA.
- 9405** 1915 Panama Pacific Exposition, Official Medal AU58 NGC. HK-400. San Francisco, CA.
- 9406** 1915 Pan Pacific Exposition Medal MS63 NGC. HK-401. San Francisco, CA.
- 9407** (1939-40) New York World's Fair, North Carolina Dollar MS64 NGC. HK-494. New York, NY.
- 9408** 1896 Bryan Dollar, Gorham Mfg. Company MS61 NGC. S-6, HK-780.
- 9409** 1896 Bryan Dollar, Gorham, Uniface MS63 NGC. S-7, HK-781.
- 9410** 1933 Montana Dollar AU58 NGC. HK-820.
- 9411** 1933 Pedley-Ryan Dollar MS61 NGC. HK-825. Denver, CO.
- 9412** (1961) Bowers Restrike Continental Dollar MS64 Prooflike NGC. HK-854. White metal.
- 9413** (1962) Restrike Continental Dollar MS64 NGC. HK-854A. White metal.
- 9414** (1962) Bowers Restrike Continental Dollar MS65 Prooflike NGC. HK-854A. White metal.
- 9415** (1961) Restrike Continental Dollar MS63 NGC. HK-856A. Goldline.
- 9416** Undated Confederation Reverse Continental Dollar MS61 NGC. HK-860.
- 9417** 1933 Century of Progress, Colorado MS63 NGC. HK-870.
- 9418** (circa 1940s) Brass Slug, The Days of '49, Blunt 4 MS63 NGC. J-640.

EXPOSITIONS AND FAIRS

- 9419** 1893 World's Columbian Expo Medal, Columbus Lead By Light MS62 NGC. Eglit-37. White metal, 65mm.
- 9420** 1904 Louisiana Purchase Exposition Exhibit Award Medal MS63 NGC. Hendershott-30-50. Bronze.
- 9421** 1904 Louisiana Purchase Exposition, 1/4 Louisiana Gold MS66 NGC. Hendershott-61-320. St. Louis, MO.
- 9422** 1904 Louisiana Purchase Exposition, 1/2 Louisiana Gold MS62 NGC. Hendershott-61-330. St. Louis, MO.

- 9423** 1904 Louisiana Purchase Exposition 1/2 Louisiana Gold MS64 NGC. Hendershott-61-330.
- 9424** 1909 Alaska-Yukon-Pacific Exposition 1/2 DWT Alaska Gold MS65 NGC. Hart's Coins of The West. Seattle, Washington.
- 9425** 1909 Alaska-Yukon-Pacific Exposition, 1/4 DWT Alaska Gold MS66 NGC. Hart's Coins of the West.
- 9426** 1909 Alaska-Yukon-Pacific Exposition, 1/4 DWT Alaska Gold, MS66 NGC. Hart's Coins of The West. Seattle, WA.
- 9427** 1915 Panama-Pacific Exposition Award Medal MS65 NGC. Bronze. San Francisco, CA.

HARD TIMES TOKEN

- 9428** 1837 Feuchtwanger Cent AU53 NGC. CAC. Low-120, HT-268, Breen 6-G. New York, NY.
From The Sandy Beach Collection.

U.S. MERCHANT TOKENS (1845-1860)

- 9429** 1846 W.W. Wilbur, Charleston SC—Improperly Cleaned—NGC Details. XF. Miller-SC-5.
- 9430** 1846 W.W. Wilbur, Charleston—Corrosion—NGC Details. VF. Miller-SC-7A.
- 9431** 1846 W.W. Wilbur, Charleston, SC—Spot Removals—NGC Details. VF. Miller-SC-9.
- 9432** 1846 W.W. Wilbur, Charleston, SC—Environmental Damage—NGC Details. XF. Miller-SC-9.

CIVIL WAR PATRIOTIC

- 9433** 1863 First In War, First In Peace Civil War Token MS64 Brown NGC. Fuld-174/272a.

CIVIL WAR TOKENS

- 9434** (1961) Bashlow Restrike Confederate Cent, Goldine MS68 NGC. Defaced Dies.
- 9435** (1961) Bashlow Restrike Confederate Cent, Copper MS69 Red NGC. Defaced Dies.

GOLD CHARMS

- 9436** 1914 Montana Gold, Oro Y Plata MS66 NGC. 0.34gm. Hart's Coins of the West.
- 9437** 1914 Montana Gold, Oro Y Plata MS66 NGC. 0.34gm. Hart's Coins of the West.
- 9438** 1914 Montana Gold, Oro Y Plata MS67 NGC. 0.34gm. Hart's Coins of the West.
- 9439** 1914 Montana Gold, Oro Y Plata MS67 NGC. 0.33gm. Hart's Coins of the West.
- 9440** 1914 Montana Gold, Oro Y Plata MS66 NGC. 0.79gm. Hart's Coins of the West.

CALIFORNIA GOLD CHARM

- 9441** 1915 1/4 California Gold, Round, Minerva, Wreath, MS62 NGC. 0.31gm. Hart's Coins of the West.

WORLD TOKENS

- 9442** (1790's) Am I Not A Man And A Brother Halfpenny—Improperly Cleaned—NGC Details. AU. Dalton & Hamer-1037. Middlesex, Great Britain. Edge: Payable in Dublin.
- 9443** (1790's) Am I Not A Man And A Brother Halfpenny—Environmental Damage—NGC Details. XF. Dalton & Hamer-1039A. Middlesex, Great Britain. Edge: Payable in Dublin Cork.

MISCELLANEOUS MEDALS AND TOKENS

- 9444** "1803" Kettle "Quarter Eagle" Brass Token—Improperly Cleaned—NGC Details. XF. 20mm.
- 9445** 1921 Cleveland, Ohio 125th Anniversary Medal MS64 NGC. Bronze, 51mm.
- 9446** 1924 Albany, New York Tercentenary Medal MS66 NGC. White metal, 51mm.
- 9447** (1947) Robert E. Lee Confederate Half Dollar Medal MS65 NGC. South Carolina.

ERRORS

- 9448** Undated Lincoln Cent—Late Stage Brockage—MS62 Brown ANACS.
- 9449** 1978 Washington Quarter—Struck on 5C Planchet—AU58 PCGS. Alfred V. Melson Collection.
- 9450** 1974-D Kennedy Half Dollar—30% Clipped Planchet—MS64 PCGS.

- 9451** 2001-P Sacagawea—US Mint Experimental Rinse Anti-Tarnishing Agent—MS67 PCGS.
